The most privileged class in America today is the banker because he can manufacture money—nobody else can—except the Government is supposed to—but we delegated that. So should we be surprised that we should say what is the ceiling if the prime interest rate reached 22 percent, not too long ago. What is to keep it from coming back and going up to 30 or 40 or 50? What is the limit? What is going to be declared the limit? What is going to be the goal of the Federal Reserve money managers?

They say, "Yes, it is a spendthriftness of the Government. It is the debt. It is the unbalanced budget." All of which is not true. It is just absolutely as false as any myth that has ever been set upon a people.

Nevertheless, they are getting away with it and you have an adminstration in power that is predicating its basic policies on those myths and misconceptions.

So I have asked these money managers, as I have asked Presidents since Kennedy, and particularly at the height of Vietnam, President Johnson: Who is making the decisions and how? What is the chain of events that lead to the judgmental decisions being made in those recondite rooms and boardrooms and decisions of the closed open-market committee?

Now, what, for example, protection do the people have if we in the Congress do not know. We are the people's agents. We cannot tell them.

I have been a member of this committee for 20 years and I cannot tell any of my constituents what it is the Federal Reserve has to protect the process for honest decisionmaking. Not at all. Because there is no accountability.

As a matter of fact, the Chairman has made it a point to come in and in one case blow smoke spirals out of a pipe, in the latter case smoke spirals out of a cigar, while they look at us dumb bumpkins in the Congress, dumb politicians, wastrels, the ones who are responsible for it.

You cut the Government and this will be solved because inflation, that demon inflation, will come under control. Well, they have been in control. Who else has been? It has not been the likes of HENRY GONZALEZ that has been chairman of the Appropriations Committee say in the House or be on the board. It has been the conservatives. At least my impression has been that if anybody called the chairman of those bodies a liberal, they would get a sock in the nose.

They have been in control. The truth is that Congress has not. If anything, they have been conservative, in my opinion too much so, and therefore not responsive to the burgeoning crying needs emanating from the midst of our society to give a fair shake and to maintain the American dream alive.

We cannot have it both ways. We cannot ask the people to accept the chains of slavery and go fight a war for us freely and happily and contentedly and within the conviction that there is a cause worth fighting for.

How in the world, how in the world, I just cannot conceive, and when I see it rocking along and even today the Chairman of the Federal Reserve, insistent and adamant and dogmatic that this tough policy is going to continue, if anything even worse, tougher.

So that even if it is obvious that a policy has not worked, in the by and by it might work. But in the meanwhile it is death for thousands, if not by the end of this year a million busi-

nessmen and Americans as the speaker brought out eloquently this afternoon. We will have another million Americans relegated to the waste heap of unemployment. We have a million Americans more unemployed today than the day Ronald Reagan raised his hand to take the oath of office of the Presidency on January 20.

Is that a policy that has succeeded? Does that reflect that?

It is not sufficient now, because even those that have been the most, the most enthusiastic supporters of this administration and during the elections last year, even now realize that to say whether it was all Jimmy Carter's fault, this is what he left, is just worn out.

The statute of limitations has run against Jimmy Carter's blame. It is our baby now, I do not care who is in. I repeat, it is not a party matter. Economics, like diplomacy and international relations, we used to say when Franklin Roosevelt was President, he had even a Cabinet that was bipartisan. He worked bipartisanly with a great Senator, Senator Vandenberg, and he used to say this to the partisans, he would say, "Politics stops at the water's edge." Not today. Not today.

When we have our Secretary of State or Secretary of Treasury and even the President going to Europe earlier this year, and blaming high interest rates on Jimmy Carter, the Europeans, of course, being wiser because they can look at things a little more objectively as to our own internal situation, were beginning to say, "Look, it is OK if you guys want to punish yourselves, but you are bringing down the whole world. If the United States sneezes, we in Europe catch a cold."

This is true, but it also works vice versa. And meanwhile those same Europeans have emerged when they have seen the lack of leadership, either in ability or unwillingness to exert it, among our money managers and have therefore developed a counterforce. Do you hear it discussed on the floor of this House? I do not know of any except myself who has even mentioned it. EMS, European Monetary System, EMF, European Monetary Fund. What are these things?

It is like ancient history almost. Nobody seems to realize that it has the most intimate thing to do with what is happening to us now, unemployment, reduction in standards of living.

It is like the Vietnam war. As long as it was that other family's kid that was drafted and that happened to be the kid that was too poor to go to college or some other reason such as that.

I ought to know, because from my district has come the highest rate of volunteerism to serve in war or peace than any other.

I think I ought to know that when the questions began to come in and it was not until a few more looked at the possibility of being drafted that you began to have the real serious trouble.

But should Congress have waited? Should it not have known that there was a questionable constitutional aspect about a President impressing without a declaration of war or specific sanction from the Congress an unwilling conscript into a war undeclared overseas outside the continental United States?

This was contrary to the specific provisions of the original draft law of 1941, or rather the modification in 1941, which almost lost except by one vote and did not pass until a Member put in an amendment that said no person subject to the act shall be compelled to serve against his will outside of the continental United States. That was still part of the law after the so-called end of World War II.

But we did not realize or did not give a tinker's dam because as long as it was somebody else, it was all right.

The Irish have a saying, "It is easy to sleep on another man's wound." That is what is happening to us today in the case of finances; but remember, one follows the other. If you cannot win the war at the money tables, it does very little good to win the war in the field, even though common tradition or legend has it the other way.

You look at history and you will see the beginning of an emergence of what we have set up, so this is the intricate relationship.

The thing that frightens is that we have an administration that rattles the atomic bombs and is asking us, we heard the debate this afternoon, you are going to cut because you want to balance the budget, but you are going to increase—for what? For defense.

Well, I certainly would not quarrel with the need for adequate defense and I am the one who will vote for 10 percent, 12 percent, even 15 percent of our gross national product for defense, if necessary. My whole record will show that. Why? Because without that, there is no meaning to our freedom. We will not have it; but you are really contradicting yourself and this is what I have had from the presentation of the administration's program.

I asked that question, and I am of such a build that if a question is not answered, no man will compel me to go along. I have always been that way and will continue to be that way as long as God gives me breath, I hope, and when I could not get answers when I asked, I said, "Wait. You want to balance the budget because you want to control inflation? You are saying you want to cut the budget on this other side, nondefense side, by say $46 billion, but you want to increase defense by over $46 billion, so your budget is about the same or maybe a little deeper. You have not really cut overall."

But you say that that must be accompanied by, of all things, a tax cut. To this day I cannot imagine that. I said, look, this looks like the emperor is naked. How are you going to do it? I do not know of any time it has been done.

Oh, because that tax cut will go primarily to businesses who in turn will invest it in productive endeavors.

I said, oh, then we will wait and see how the tax bill is drafted. Then when the tax bill came, there was no connection between the two. There is nothing to influence that.

So the proponents said, oh, it is just like John Kennedy in 1962. Well, there they were talking about something I knew about. That was the first year I came and I remember the bitterness and I remember how John Kennedy was not supported. His action came purely at the executive level and what we had was the so-called deceleration and all that that was tied in. It was tied in. You tied it in with production, with inventory buildup and individual production and employment; but this one did not.

On top of that, it was the most regressive tax that Americans are going to suffer with for generations, because I do not see it being turned around at all.

On top of that, you have this system where you do not even have basic accountability. There is not an American that I know, and if he does know, he has not wanted to tell anybody, that can answer these questions of accountability from these money managers.

That is the reason for my bill. I know it is always easy to look for some angle in Congress. Today American cynicism is rampant. We always think a politician has to have some angle if he is going to be doing anything. There must be some angle. He is going to get some political profit or some publicity or something.

Well, I have learned through my experience. I am a very privileged man. The people in my area have given me the privilege of representing them in the highest legislative offices, locally, State, and nationally, and I have now a record of over 28½ years in public elective office, so that I know. I have seen these things before.

I know that on the national level it is even worse, because after all, you know, one man cannot help but sound very egotistic, very almost egomanical to say he is going, of all people, to put in a resolution; but I do not think that ought to influence any thinking American.

I would like for the record to show that the response I have had nationwide to the bills and the resolutions I have introduced has been simply amazing, and I do not mean just from

nonbusiness circles. I mean from some very, very big corporate heads, from the State of Washington to the State of Maine and to the State of Florida; so I know that these are the things that are necessary, that it is not any act of heroism. I can think of many other ways. I do not think I am such a dumb politician that I cannot think of many other ways I could do it easier and maybe even more effectively; but I would be, and I know I would be kidding myself, first of all, and therefore, the people, and therefore, not really redeeming the great trust and the privilege that has been given me.

There is no higher privilege in the world of any kind, wealth, power, or any other form than in a free democratic society electing an individual. I cannot think of a higher reward myself.

Now, maybe it is because my background gives me a great deal of appreciation more than say the average American. It has been back here six or seven generations, and being my family came, like my father, to save his life, he was going to be shot and found, as he said, tranquility and peace and the ability to earn a living and raise his family, and I have never forgot it.

We were told and can remember being told and having visited that father country, and I realize what a vast difference there is, even though the words used are the same; they say it is democratic, just like we call the Western European countries democratic or free countries; but, oh, my goodness, the average American should visit in order to fully appreciate the difference in words and their meaning and significance.

It is the same thing here in politics. We live in a day and time in which images are what make you and get you elected; but I think that whether it is here or anywhere else, images must give way to the real thing sooner or later.

□ 1820

You either have it or you do not, sooner or later, in or out of America. The big trouble with us in America is that our image, the world does not necessarily constrain itself to our orbit, and this is where the rub is. This is why we are confronted with a very ticklish situation in which great unity must come forth, must be summoned forth. We must have the best ability of the best people unified to even obtain a solution, so you can see how difficult a challenge it is, and how maybe perhaps it is impossible to achieve in time to avoid a catastrophe other than as we are doing now, coming in with—which I will announce—so-called measures of anticipation of what is certainly now, unavoidable. In other words, shoring up and reducing the impact, the detrimental impact as much as possible.

But, when we look at our history and we find, why was it necessary for the Congress to enact the 1913 Federal Reserve Act, why, there are reasons for it, and they in turn dovetail with what happened before with the First United States Bank, the Second United States Bank, and we have got to understand that, because if we do not understand that we will not know what it is has created the problem confronting us now.

This is the main burden I have against the so-called programs, such as they are, that have been given to us in Congress. I am not talking about the speeches made by the President to the public. The public does not distinguish between the speeches and what we have to pass on, which is the followup, the specific measures in bill form that we have got to look at. This is the thing that we have got to look at. This is the thing that we have to answer for.

But when you look at the history, you see, for example, that we do not know, does the Federal Reserve Board have an inspector general? Is it true that a couple of years ago we had a very serious leak, and on other occasions, from the supposedly secret proceedings of the Open Market Committee, which leaked prematurely can inure to the special interests, especially in the New York financial districts, of millions and millions and millions of dollars.

What happened last week, and in fact we had a full page ad in the New York paper making it look as if it was a victory—that was what was called a bank failure today is called a merger, but you had the FDIC, Federal Deposit Insurance Corporation, having to dish out half a billion dollars. Now, we know that there is a limit to how many of those things the FDIC can come and intervene with. We know that.

We also know, we were told, and I protested going into a secret meeting on that—I did not see why and I still do not—but we were told by these regulators that one-third of the institutions in the thrift industry are in that kind of trouble; not just bad, serious distress, and a goodly number in the commercial banks. Now, the Greenwich Bank aspect of a while ago, a half billion dollars from the FDIC, that was a savings bank. They are in serious trouble. They are going to pop like popcorn in a popper, and there is a limit to what is insurable and coverable.

Do we want to wait until that fate leaks out, wait until you have panic, or what are you going to do? We will have to go back and reread the history of 1929, 1930, 1931, and 1932, and see the parallel. On housing, for example, long-term fixed mortgages, we are doing now in the long-term fixed mortgage area the same thing and have the same practices that we had really before October 1929; that is, 95 balloon rollovers—the same thing.

Now, does it take a genius? No. If that were the case I would not even be able to discuss this because I certainly am no genius, and I certainly am not even an expert. I certainly do not even consider myself an expert, but I am charged with the responsibility of being one four hundred and thirty-fifth lawmaker, or policymaker in this House, and I have been assigned to a special area of activity, the Banking Committee, and therefore I have tried to discharge my ability in and to the extent of my limitations and knowledge. I raised the questions, and as I said, and repeat, if those questions are not answered I am not going to be bludgeoned into a goose-step obedience. No power on Earth will do that and I think the average Member is about the same way if given a chance to have to discharge a responsibility along these lines. I am, as I reported last week, I am doing everything I can to make sure that my measures are seriously considered by the proper committee of jurisdiction, and I have directed a letter to the chairman of the Judiciary Committee in the case of impeachment and in the case of the resolution structuring bills, one that would abolish the Open Market Committee. It is an anachronism. It has usurped to itself powers Congress never gave, and it ought to be, and then a restructuring of the Federal Reserve System if nothing else.

I am trying to get the full committee chairman to see if at least we can get hearings, and actually I am respectful of the judgment of my colleagues in those responsible positions.

THE ALASKA NATURAL GAS TRANSPORTATION SYSTEM PRIVATE FINANCING ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 10 minutes.

● Mr. CORCORAN. Mr. Speaker, I am pleased to be joined today by several colleagues in introducing the Alaska Natural Gas Transporation System Private Financing Act. Joining me in cosponsorship are: Mr. BROYHILL, Mr. BROWN of Ohio, and Mr. DANNEMEYER.

The ANGT's Private Financing Act represents what we believe to be an appropriate legislative approach to encouraging the production, transportation, and utilization of the vast reserves of natural gas at Prudhoe Bay. This five-section bill includes the following provisions. Section 1 states the bill's short title. Section 2 provides that the risk of building the pipeline rests upon the sponsors and that the

cost for the pipeline will only be paid by gas consumers in association with the delivery and purchase of gas. Section 3 decontrols the price of natural gas at the Prudhoe unit field of Alaska. Section 4 allows the oil companies to participate in the sponsorship of the project and also includes antitrust review provisions. Finally, section 5 is technical in nature and provides the import and export permits necessary to transport gas through Canada into the United States.

The cosponsors of this legislation and I believe that this bill represents a legislative approach far superior to the approach provided by the possible congressional approval of the pending waivers to the Alaska Natural Gas Transportation Act of 1976. These proposed waivers were submitted by the President to the Congress on October 15, and introduced on October 19, as House Joint Resolution 341 and Senate Joint Resolution 115.

In the House, House Joint Resolution 341 was jointly referred to the Committees on Interior and Insular Affairs and Energy and Commerce. Seven days of joint hearings, involving 63 witnesses, were held by the Interior Committee's Energy and Environment Subcommittee and the Commerce Committee's Fossil and Synthetic Fuels Subcommittee. These extensive hearings were concluded just last week on November 9.

The Alaska Natural Gas Transportation Act of 1976 provides for an expedited procedure for congressional consideration of waivers such as those submitted by the President last month. For the waivers to go into effect, both Houses must vote approval by mid-December. It is important to note that Presidential waiver proposals are not subject to amendment.

While I agree that we must pursue efforts to produce and transport Prudhoe Bay gas for the benefit of the lower 48 States, I strongly oppose the unusual financing method provided in the waiver package. I object to the prebilling waiver because it would allow gas ratepayers to be billed for pipeline construction costs before they receive Alaskan gas and even if it is delayed or, worse yet, if the pipeline is never completed. Second, even if the gas does manage to get produced and transported, I seriously question the marketability of $18 gas, a price which is four times the current average price for gas per thousand cubic feet (mcf). As I asked repeatedly during the hearings, "Who is going to buy $18 gas?" We must consider alternative approaches to gaining access to that gas. Such an alternative approach is embodied in the legislation we are introducing today.

The original cosponsors of this bill and I have agreed that we will oppose any attempt to use this legislation as a vehicle to promote the accelerated deregulation of natural gas. While we agree on pursuing the deregulation of Prudhoe Bay gas, as provided in this legislation, we will oppose any efforts to otherwise amend the Natural Gas Policy Act of 1978 in connection with congressional consideration of the ANGT's Private Financing Act.

Mr. Speaker, it is clear to the sponsors of this legislation that the proposed waivers represent an inappropriate approach to producing and transporting Prudhoe Bay gas, especially in view of the fact that prospective lenders stated during the hearings that the approval of the waiver package would not guarantee financing for the project. We urge our colleagues to oppose the pending waiver package, and we ask our colleagues to consider, and hopefully support, an alternative legislative approach, such as that taken by the Alaska Natural Gas Transportation System Private Financing Act.

Mr. Speaker, for the benefit of our colleagues, I insert in the RECORD at this point the text of the ANGT's Private Financing Act:

H.R. 4980

A bill to amend the Alaska Natural Gas Transportation Act of 1976 to waive certain provisions of law in order to promote the construction and initial operation of the Alaska Natural Gas Transportation System

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Alaska Natural Gas Transportation System Private Financing Act".

PRIVATE FINANCING OF SYSTEM

SEC. 2. Section 9 of the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719g) is amended by adding at the end thereof the following new subsection:

"(f) Each tariff, certificate, or other authorization issued by the Commission respecting the rates and charges of natural gas transported through the approved transportation system shall provided that—

"(1) the fixed costs of such transportation system to be taken into account under such authorization, and

"(2) the acquisition cost of natural gas and other variable costs of such system to be so taken into account,

shall be borne by the natural gas purchasers in proportion to the volumes of natural gas delivered to such purchasers.".

PRICE DECONTROL FOR FIRST SALES OF NATURAL GAS SHIPPED THROUGH SYSTEM

SEC. 3. Section 8(g) of the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719f(g)) is amended by adding at the end thereof the following new paragraph:

"(5) The first sale of any natural gas produced from the Prudhoe Bay Unit of Alaska and transported through the approved transportation system shall not be subject to the provisions of title I of the Natural Gas Policy Act of 1978 (15 U.S.C. 3311 through 3333), relating to maximum lawful prices for first sales of natural gas. The amount paid in any such first sale shall be deemed to be just and reasonable for purposes of sections 4 and 5 of the Natural Gas Act.".

PRODUCER PARTICIPATION; CURRENT SPONSORS COMPENSATION; ANTITRUST REVIEW

SEC. 4. Section 8(g) of the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719f(g)), as amended, is further amended by adding at the end thereof the following new paragraph:

"(6)(A) Subject to subparagraphs (B) and (C), the provisions of the third undesignated paragraph of section 1, and the provisions of the conditions IV-4 and V-1 of section 5, of the Decision and Report to Congress on the Alaska Natural Gas Transportation System (September 1977), as approved under Public Law 95-158, are hereby waived to the extent necessary to permit producers of Alsaka natural gas (including the State of Alaska) to participate in the ownership of the Alaska pipeline segment of the approved transportation system.

"(B) Any agreement on producer participation pursuant to subparagraph (A) shall provide that any person—

"(i) who, on the date of the enactment of this paragraph, holds an interest in the approved transportation system, and

"(ii) who, within a reasonable period of time following such agreement, notifies the other interest holders of such person's intent to withdraw from participation in the system,

shall be entitled to have such person's interest in the system acquired by one or more of such producers at a price which fully compensates that person.

"(C)(i) Any agreement on producer participation pursuant to subparagraph (A) may be approved by the Commission only after consideration of advice from the Attorney General and upon a finding by the Federal Energy Regulatory Commission that the agreement will not (I) violate the antitrust laws, or (II) restrict access to the Alaska segment of the approved transportation system, or restrict capacity expansion, in any manner which discriminates against persons who are not parties to the agreement.

"(ii) The Attorney General and the Federal Trade Commission shall, from time to time, review the operation of the approved transportation system approved under this Act to determine whether agreements described in clause (i) comply with the provisions of subclauses (I) and (II) of clause (i).".

EXPORTATION AND IMPORTATION OF ALASKA NATURAL GAS

SEC. 5. Section 8(g) of the Alaska Natural Gas Transportation Act of 1976 (15 U.S.C. 719f(g)), as amended, is further amended by adding at the end thereof the following new paragraph:

"(7) The provisions of section 3 of the Natural Gas Act, and the provisions of section 103 of the Energy Policy and Conservation Act, are hereby waived as such provisions would apply to Alaska natural gas transported through the Alaska pipeline segment of the approved transportation system to the extent that any authorization would otherwise be required for—

"(A) the exportation of Alaska natural gas from Alaska into Canada (to the extent that such natural gas is replaced by Canada downstream from the export);

"(B) the importation of natural gas from Canada into any of the contiguous States of the United States (to the extent that such natural gas replace Alaska natural gas exported to Canada); and

"(C) the exportation of Alaska natural gas from Alaska into Canada and the importa-

tion of Alaska natural gas from Canada into any of the contiguous States of the United States.".●

THE FEDERAL GOVERNMENT SHOULD NOT HELP CLEAN UP THREE MILE ISLAND

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. FISH) is recognized for 10 minutes.

● Mr. FISH. Mr. Speaker, as many of my colleagues are aware, the Secretary of Engery recently announced that the Federal Government would help support part of the cleanup activities at the Three Mile Island nuclear powerplant. In his announcement, the Secretary indicated that the administration would request a total of $123 million over the next 3 to 4 years to fund various research and development activities at the damaged generating station. This funding would be used to provide technical assistance in the cleanup of the water in the building basement; remove and dispose of abnormal wastes not disposable at commercial sites; remove and evaluate the damaged reactor core; and develop special tooling needed for early access. For several reasons, I believe it would be unwise and inappropriate to support this program at this time.

Along with my fellow members of the Committee on Science and Technology, I have always strongly supported our Nation's efforts to become energy independent. Our inability and unwillingness to face our energy problems in the last 7 years has had many serious repercussions. The energy crisis has drained the financial strength of our country and seriously threatens our national security.

Events make it imperative that we press forward with the development of our domestic energy resources. We must now take advantage of the potential billions of barrels of oil shale, tar sands, and heavy oil deposits, and the vast abundance of coal reserves which lie in our country. The Science Committee has heard a great deal of encouraging testimony of the unlimited potential of these and other inexhaustible energy resources, such as solar and fusion energy.

It is certainly in our Nation's best interests to continue to pursue the development of these various energy resources. However, regardless of what role nuclear fission should play in our future energy mix, there are several compelling reasons why the Federal Government should not support the cleanup of the damaged Three Mile Island (TMI) reactor unit.

First and foremost, funding a TMI research and development program would be incompatible with the administration's energy philosophy. This philosophy rests on the basic premise that the Federal Government should only support long-range, high-risk research and development activities. The administration believes that the Federal Government should not compete with industry in the development and commercialization of energy technologies which have already proven to be viable and are either in the marketplace or near commercialization.

This cleanup program would particularly be at odds with this philosophy. It seems clear that the 70 or more nuclear plants in commercial operation today make nuclear power a commercial technology. The record of commercial nuclear power is well known.

Given the specific circumstances surrounding the TMI accident, it is even more clear that the financial responsibility for this mishap must rest with those who produced and used the electric power. This has been the case in other circumstances such as the Nuclear Regulatory Commission levying a fine on a nuclear utility for an infraction of its regulations. According to the report of the President's Commission on the accident at Three Mile Island (the Kemeny Report)—

The GPU Service Corporation (GPUSC) has final responsibility for the design of the plant. However, by its own account, it lacked the staff or expertise in certain areas to discharge that responsibility. Once construction was complete GPUSC turned the plant over to Met Ed (Metropolitan Edison Company, the operator and part owner of the Three Mile Island nuclear powerplant) to run, but Met Ed did not have sufficient knowledge, expertise, and personnel to operate the plant or maintain it adequately.

The Kemeny Report goes on further to find that—

In conclusion, while the major factor that turned this incident into a serious accident was inappropriate operator action, many factors contributed to the action of the operators, such as deficiencies in their training, lack of clarity in their operating procedures, failure of organizations to learn the proper lessons from previous incidents, and deficiencies in the design of the control room. These shortcomings are attributable to the utility, to suppliers of equipment, and to the Federal commission that regulates nuclear power. Therefore—given all the above deficiencies, we are convinced that an accident like Three Mile Island was eventually inevitable.

Based upon this report, the utility certainly had responsibility for this most unfortunate accident, and I believe they should be held strictly accountable.

My second concern with this research and development program is with the funding implications that would result. Budgetary pressures have presented the Congress this fiscal year with many hard choices, especially in the energy area. The recent increases in inflation and our overall economic situation have made it painfully clear to us that our Nation is in the midst of severe and deep economic troubles. While recognizing that an effective energy research and development program is in our best national interests, I believe that it is obvious that drastic action is necessary to get the economy back under control. This action must include reductions in Federal spending, and every agency and every program will have to take its fair share of cuts no matter how attractive the individual activities sound on their own merits.

In light of these concerns, I have supported the energy program approved by the Science Committee that calls for an aggressive effort in all of our Nation's energy research and development programs. Overall, the committee authorized over $1.56 billion for nuclear energy R. & D. compared to $1.02 billion for fossil, solar, geothermal, low-head hydropower and conservation research and development programs. We also authorized funding for many other important energy programs, including $376 million for the State and local conservation grant programs and other conservation activities. Our energy programs will certainly face close scrutiny in the years ahead, and many more tough funding decisions will have to be made. It would be a mistake to tip this balance toward one energy form or another. Taking into account our severe budget constraints, I do not believe that we can afford to commit ourselves to this new nuclear program and still be able to maintain a well-balanced energy program that will allow us to fully take advantage of all of our domestic energy resources.

While it is apparent that the Federal Government cannot and should not directly support the cleanup of this tragic accident, all would agree that there is still an urgent need to proceed with the cleanup of this accident in the most expeditious manner possible. Public health and safety are in jeopardy as long as this plant remains contaminated.

In this regard, I believe that there are several other viable options available to help us proceed with this task. One possible option that has been suggested would be the establishment of a national insurance program for nuclear powerplant property. This option would help us avoid any Government bailout for the cleanup of nuclear accidents and apportion the costs of any such accident on an equitable basis to those who really benefit from this activity. I would encourage my colleagues to consider this possibility, as well as other alternative solutions, as we face this important nuclear issue in the months ahead. Our budget can ill afford any more subsidies for nuclear energy.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from New York (Mr. GILMAN) is recognized for 5 minutes.

● Mr. GILMAN. Mr. Speaker, on Thursday, October 29, 1981, I was in attendance at the United Nations General Assembly in New York as part of my duties as a member of the U.S. delegation to the United Nations. Consequently, I was unable to be present for a number of House votes on that day.

On rollcall No. 286, the question of agreeing to the Chair's approval of the Journal of the previous day's proceedings, I would have voted "yea." That motion passed by a vote of 346 to 12.

On rollcall No. 287, the motion to table the pending motion to instruct the House conferees to accept a provision of the Senate version of the Defense Department authorization bill for fiscal 1982, I would have voted "nay." The motion failed, 171 to 224, and the motion to instruct was approved by a voice vote.

On rollcall No. 288, a motion offered by Mr. DERWINSKI to recommit the State Department authorization bill for fiscal years 1982 and 1983 to the Committee on Foreign Affairs with instructions to report the bill back with instructions forthwith, I would have voted "yea." That motion failed by a vote of 63 to 318.

I would have voted "aye" on rollcall No. 289, the final passage of the State Department authorization, which passed by a vote of 317 to 58.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. NELSON) is recognized for 5 minutes.

● Mr. NELSON. Mr. Speaker, due to official business, I was not present for the vote at noon today on approval of the Journal for Friday, November 13, 1981. Had I been present I would have voted "yes" on rollcall 298.●

BANKING COMMITTEE SUSPENSIONS ON TUESDAY, NOVEMBER 17

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Rhode Island (Mr. ST GERMAIN) is recognized for 5 minutes.

● Mr. ST GERMAIN. Mr. Speaker, the Banking Committee has two bills listed on tomorrow's Suspension Calendar. H.R. 4879 would make deposits at international banking facilities exempt from Federal Deposit Insurance Corporation assessments. H.R. 4879 also would extend FDIC deposit insurance coverage to the Trust Territory of the Pacific Islands. The second bill, H.R. 4515, would lift the 20 percent ceiling on purchases of mortgages older than 1 year by the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association, and would permit FHLMC and FNMA to purchase mortgages from FDIC and from the National Credit Union Administration.

Both bills were the subject of hearings by the Subcommittee on Financial Institutions Supervision, Regulation, and Insurance. In addition, the Housing and Community Development Subcommittee heard testimony on the amendments made by H.R. 4515. In both cases, the necessity of taking prompt action led to full committee markup sessions. This step was taken with the agreement of the minority and the committee and was not done to rush anything to judgment by bypassing subcommittee markup.

To expedit consideration on the floor tomorrow, I intend to move to suspend the rules and pass H.R. 4879 with a committee amendment thereto. The committee amendment will contain two titles, title I being the text of H.R. 4879, as ordered reported by the committee, and title II the text of H.R. 4515. To provide Members with a copy of the committee amendment to be considered by the House, the text will be printed in the amendments section of today's CONGRESSIONAL RECORD.●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mrs. CHISHOLM (at the request of Mr. ADDABBO), for the week of November 16, on account of illness.

Mr. RICHMOND (at the request of Mr. WRIGHT), for November 16 and 17, on account of personal reasons.

Mr. LEE (at the request of Mr. MICHEL), for today, on account of illness.

Mr. FORSYTHE (at the request of Mr. MICHEL), for November 16 through November 18, on account of official business as a member of the Committee on Merchant Marine and Fisheries.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. GONZALEZ, special order for 60 minutes each on today, Wednesday, and Friday.

(The following Members (at the request of Mr. GUNDERSON) to revise and extend their remarks and include extraneous material:)

Mr. DOUGHERTY, for 45 minutes, November 19, 1981.

Mr. CORCORAN, for 10 minutes, today.

Mr. FISH, for 10 minutes, today.

Mr. GILMAN, for 5 minutes, today.

(The following Members (at the request of Mr. KOGOVSEK) to revise and extend their remarks and include extraneous material:)

Mr. NELSON, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. ST GERMAIN, for 5 minutes, today.

Mr. GLICKMAN, for 5 minutes, today.

Mr. BONKER, for 60 minutes, December 10, 1981.

At the request of Mr. GONZALEZ, Mr. MAVROULES, for 60 minutes, on November 18.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. ALEXANDER, and to include extraneous matter on the budget resolution.

(The following Members (at the request of Mr. GUNDERSON) and to include extraneous matter:)

Mr. LEBOUTILLIER in two instances.
Mr. DERWINSKI in two instances.
Mr. HILLIS.
Mr. BROOMFIELD.
Mr. FINDLEY.
Mr. WOLF in two instances.
Mr. MCEWEN in two instances.
Mr. MADIGAN.
Mr. KEMP.
Mr. VANDER JAGT in two instances.
Mr. FRENZEL.
Mr. DORNAN of California.
Mrs. ASHBROOK in two instances.
Mr. GILMAN.

(The following Members (at the request of Mr. KOGOVSEK) and to include extraneous matter:)

Mr. DINGELL in two instances.
Mr. VENTO.
Mr. FLORIO.
Mr. STARK in three instances.
Mr. SOLARZ in two instances.
Mr. SWIFT.
Mr. STOKES in two instances.
Mr. MCDONALD.
Mr. SCHUMER.
Mr. LUNDINE in two instances.
Mr. OBERSTAR.
Mr. GARCIA.
Mr. IRELAND in two instances.
Mr. ST GERMAIN.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 1672. An act to expand the membership of the U.S. Holocaust Memorial Council from 60 to 65 and for other purposes.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 28 minutes p.m.) the House adjourned until tomorrow, Tuesday, November 17, 1981, at 12 o'clock noon.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Reports of various House committees concerning the foreign currencies and U.S. dollars utilized by them during the third quarter of calendar year 1981 in connection with foreign travel pursuant to Public Law 95-384 are as follows:

By Mr. BIAGGI:

H.R. 4978. A bill to amend title 18 of the United States Code—Crimes and Criminal Procedure; to the Committee on the Judiciary.

By Mr. CONABLE:

H.R. 4979. A bill to amend the Internal Revenue Code of 1954 to provide that a dividend paid by a corporation directly to certain charitable organizations at the direction of a shareholder shall be treated as a charitable contribution of the corporation, and to exclude such dividend from the income of such shareholder; to the Committee on Ways and Means.

By Mr. CORCORAN (for himself, Mr. BROYHILL, Mr. BROWN of Ohio, and Mr. DANNEMEYER):

H.R. 4980. A bill to amend the Alaska Natural Gas Transportation Act of 1976 to waive certain provisions of law in order to promote the construction and initial operation of the Alaska Natural Gas Transportation System; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

By Mr. DONNELLY:

H.R. 4981. A bill to provide for the issuance of a postage stamp to commemorate the thirtieth anniversary of the date on which Rocky Marciano won the heavyweight championship of the world; to the Committee on Post Office and Civil Service.

By Mr. EDGAR:

H.R. 4982. A bill to extend eligibility for membership in the AMVETS to persons serving in the Armed Forces of the United States, and to citizens of the United States serving in the armed forces of allied nations, after May 8, 1975; to the Committee on the Judiciary.

By Mr. LOWERY of California:

H.R. 4983. A bill to amend the Fishermen's Protective Act; to the Committee on Merchant Marine and Fisheries.

By Mr. QUILLEN:

H.R. 4984. A bill to amend title 17 of the United States Code to exempt nonprofit veterans' organizations and nonprofit fraternal organizations from the requirement that certain performance royalties be paid to copyright holders; to the Committee on the Judiciary.

By Mr. SILJANDER:

H.R. 4985. A bill to amend title IV of the Social Security Act to make necessary modifications in selected provisions relating to eligibility and payments of aid under the AFDC program, in order to make such program more realistic and to assure that the assistance provided thereunder more effectively serves its intended purposes; to the Committee on Ways and Means.

H.R. 4986. A bill to amend title IV of the Social Security Act to make additional modifications in selected provisions relating to eligibility and payments of aid under the AFDC program, in order to make such program more realistic and to assure that the assistance provided thereunder more effectively serves its intended purposes; to the Committee on Ways and Means.

By Mr. SKELTON:

H.R. 4987. A bill to amend title 10, United States Code, to increase the number of Assistant Secretaries in the Department of Defense, and for other purposes; to the Committee on Armed Services.

By Mr. SOLARZ:

H.R. 4988. A bill to amend title XII of the National Housing Act to establish national standards in order to reduce incendiarism and maintain community vitality, and to encourage States to adopt minimum standards for arson investigation and insurance underwriting; to the Committee on Banking, Finance and Urban Affairs.

H.R. 4989. A bill to establish an Interagency Committee on Arson Control to coordinate Federal antiarson programs, to amend certain provisions of the law relating to programs for arson investigation, prevention, and detection, and for other purposes; jointly to the Committees on Banking, Finance and Urban Affairs, the Judiciary, and Science and Technology.

By Mr. VANDER JAGT (for himself and Mr. GUARINI):

H.R. 4990. A bill to amend the Internal Revenue Code of 1954 to clarify the status of certain amateur athletic organizations; to the Committee on Ways and Means.

By Mr. ADDABBO:

H.R. 4995. A bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes.

By Mr. DERWINSKI:

H.J. Res. 362. Joint resolution to clarify and reaffirm that it is the basic policy of the Government of the United States to rely on the competitive private enterprise system to provide needed goods and services; to the Committee on Government Operations.

By Mr. WRIGHT (for himself, Mr. YATES, and Mr. PEPPER):

H. Con. Res. 220. Concurrent resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt; to the Committee on Rules.

By Mr. SILJANDER:

H. Res. 274. Resolution expressing the sense of the House of Representatives with respect to high interest rates, economic recovery, and the gold standard; to the Committee on Banking, Finance and Urban Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. BARNARD:

274. Also, petition of Ho Ngan, Aachen, West Germany, relative to redress of grievances; to the Committee on Public Works and Transportation.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2559

By Mr. SNYDER:

—On page 2, line 5, strike "$1,450,000,000" and insert in lieu thereof "$1,402,898,000".

On page 2, line 9, strike "$425,000,000" and insert in lieu thereof "$375,000,000".

On page 2, line 14, strike "$33,000,000" and insert in lieu thereof "$29,730,000".

H.R. 4879

By Mr. ST GERMAIN:

Amendment in the nature of a substitute.

—Strike out all after the enacting clause and insert in lieu thereof the following:

TITLE I—INTERNATIONAL BANKING FACILITY DEPOSIT INSURANCE ACT

SHORT TITLE

SEC. 101. This title may be cited as the "International Banking Facility Deposit Insurance Act".

INTERNATIONAL BANKING FACILITY DEPOSITS

SEC. 102. Section 3(1)(5) of the Federal Deposit Insurance Act (12 U.S.C. 1813(1)(5)) is amended to read as follows:

"(5) such other obligations of a bank as the Board of Directors, after consultation with the Comptroller of the Currency and the Board of Governors of the Federal Reserve System, shall find and prescribe by regulation to be deposit liabilities by general usage, except that the following shall not be a deposit for any of the purposes of this Act or be included as part of the total deposits or of an insured deposit:

"(A) any obligation of a bank which is payable only at an office of such bank located outside of the States of the United States, the District of Columbia, Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands; and

"(B) any international banking facility deposit, including an international banking facility time deposit, as such term is from time to time defined by the Board of Governors of the Federal Reserve System in regulation D or any successor regulation issued by the Board of Governors of the Federal Reserve System.".

BRANCHES OF INSURED BANKS IN THE TRUST TERRITORY OF THE PACIFIC ISLANDS

SEC. 103. (a) Section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813) is amended—

(1) in subsection (a), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa," each place it appears therein;

(2) in subsection (m)(1), by inserting "of the Trust Territory of the Pacific Islands," after "American Samoa,"; and

(3) in subsection (o), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa," each place it appears therein.

(b) Section 7 of such Act (12 U.S.C. 1817) is amended—

(1) in subsection (a)(4), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,"; and

(2) in subsection (b)(5)(B), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,".

(c) Section 11 (a)(2)(A)(iv) of such Act (12 U.S.C. 1821(a)(2)(A)(iv)) is amended—

(1) by inserting "of the Trust Territory of the Pacific Islands," after "of American Samoa,"; and

(2) by inserting "the Trust Territory of the Pacific Islands," after "Virgin Islands, American Samoa,".

TITLE II—MORTGAGE PURCHASE AMENDMENTS OF 1981

SHORT TITLE

SEC. 201. This title may be cited as the "Mortgage Purchase Amendments of 1981.".

PURCHASES OF MORTGAGES MORE THAN ONE YEAR OLD

SEC. 202. (a) The third sentence of section 305(a)(2) of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454(a)(2)) is amended to read as follows: "The Corporation may purchase a conventional mortgage which was originated more than one year prior to the purchase date only if the seller is the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the National Credit Union Administration, or any other seller currently engaged in mortgage lending or investing activities.".

(b) The fourth sentence of section 302(b)(2) of the Federal National Mortgage Association Charter Act (12 U.S.C. 1717(b)(2)) is amended to read as follows: "The corporation may purchase a conventional mortgage which was originated more than one year prior to the purchase date only if the seller is the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the National Credit Union Administration, or any other seller currently engaged in mortgage lending or investing activities.".

MORTGAGE LOAN PURCHASES FROM THE FEDERAL DEPOSIT INSURANCE CORPORATION AND THE NATIONAL CREDIT UNION ADMINISTRATION

SEC. 203. Subsections (a)(1) and (b) of section 305 of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454) are amended by inserting "the Federal Deposit Insurance Corporation, the National Credit Union Administration," after "Federal Savings and Loan Insurance Corporation," each place it appears.

EXTENSION OF REMARKS

PROMINENT NATIONAL MEDICAL LEADER IN VIRGINIA'S 10TH DISTRICT

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. WOLF. Mr. Speaker, William D. Dolan, M.D., director of pathology at Arlington Hospital, serves as president of the American Blood Commission, a private sector umbrella group of 40 of the Nation's leading medical, business, and consumer agencies. Through this constituency, the commission represents the interests of millions of Americans and their families for a safe, efficient national blood supply system. I ask that Dr. Dolan's remarks to the 1981 annual meeting of the American Blood Commission be printed at this point in the RECORD.

REMARKS BY WILLIAM D. DOLAN, M.D., PRESIDENT, TO THE AMERICAN BLOOD COMMISSION'S SIXTH ANNUAL MEETING

The essential aim of the National Blood Policy is to improve the "quality and supply of blood and blood products." It seems that implementing a national resource sharing plan now being developed by the major blood service agencies would go a long way toward meeting this goal. Indeed, the National Blood Policy states that one of its key policy goals is "to enhance resource sharing and areawide cooperation in the collection, processing, distribution and utilization of blood in order to make the most effective use of the national blood supply."

The National Blood Policy indicates that the problem of often inadequate blood supplies is clearly a managment problem. The problems identified by the National Blood Policy pertaining to the supply and quality of blood resources, and the efficiency and accessibility of blood services "cannot be solved without coordination of the now fragmented elements which comprise the present system." The National Blood Policy further holds that achieving the necessary coordination involves building "a comprehensive framework for improving the blood service system by taking advantage of existing strengths in the present system in an orderly and constructive way."

Thus, the National Blood Policy calls for "a pluralistic and evolutionary approach to the solution of blood collection and distribution problems." The private sector was charged with the responsibility to improve the "organization of the blood service complex and the operational aspects of blood collection, processing and utilization to implement the National policy."

The National Blood Policy implementation strategy thus is based on the good faith of private sector agencies to work with each other for the common goal of positive change. It indicates that while acting pluralistically, the agencies involved should be prepared to adapt to new ways for the common good. "Although the implementation of the National Blood Policy should build on existing strengths in the present system to assure continuity of essential services, this intent is not to be interpreted as a mandate to maintain the status quo. It is to allow gradual evolution to the most effective organization and operation of the blood service complex." The National Blood Policy goes on to say in the very next paragraph that "if the private sector is unable to provide satisfactory progress, a legislative or regulatory approach would have to be considered."

That is exactly what Senator Hatch and his predecessor, Senator Schweiker, have said about resource sharing. From the Congressional Record of January 15, 1981, Senator Hatch's remarks pertaining to the Blood Assurance Act of 1981 were these: "It is clearly preferable that the existing blood organizations meet the goal" of a blood resource sharing agreement "without federal legislation." He continued, "The proposal incorporated in the Blood Assurance Act of 1981 is more a prod than an intervention. On that basis I am prepared to have this bill and other proposals considered by the Committee on Labor and Human Resources if current private initiatives fail."

Of course, the National Blood Policy's call for private sector implementation, building on the strengths of the existing pluralistic system but not maintaining the unacceptable status quo, called for a change-agent. That is why we, the original incorporators, established the American Blood Commission. You will recall that we carefully selected words in our Articles if Incorporation and ByLaws such as "monitor," "promote," and "coordinate" to describe the Commission's method of carrying out this mandate. The atmosphere was charged and no one wanted to alienate or be alienated. At the same time we had a public trust. We went on record as saying the American Blood Commission was organized in order "to implement the National Blood Policy" and that "it will operate to promote the public welfare" to "develop an adequate voluntary supply of blood to meet the health needs of the Nation."

That is a broad responsibility, and its broadness may have served to shield those whose commitment wavered. I am concerned that this Commission should, as the National Blood Policy stated, work to evolve a well-managed blood supply system and that the Commission not devolve into simply a debating society incapable of taking sustained and effective action to accomplish its mission.

Now is the time to stand up and be counted. Those who support this organization must demonstrate their commitment through leadership and action. It is time to reassert our mission and to add to the headway we already have made. I would like to see thoroughly explored, both on a regional and national basis, the matter of merging a resource sharing plan and the current regionalization effort. The key to success lies within resource sharing. Other initiatives and programs are important, as seen by the Commission's contribution in the area of uniform labeling, public information and communication and the National Blood Data Center. Where these programs continue to serve a useful purpose they should be continued and strengthened. We should also carefully monitor them to see if they need to be modified, phased into others, or closed when they complete their objectives. And we should identify other initiatives that are appropriate to coordinate the development of a comprehensive framework that will support improvement of the management of blood services and resources. Time is running out for the private sector, as represented by the American Blood Commission. During this coming year we can accomplish much, but how?

First, by the members of this Commission truthfully saying what they think and not just paying lip service to this effort. Second, if you don't like an idea, I have to ask you to come up with a better one. Third, while representing your organization and its programs don't blindly protect your turf, thus overlooking the common good. To quote one famous American: "A rising tide lifts all the boats."

This concept is vital to the well-being of the entire system we are attempting to improve for the benefit of all Americans. The strong, active support of the members of this organization will set the Commission on the right track and reinvigorate its efforts to demonstrate the private sector's capability in bringing the promise of the National Blood Policy to life.

CLEAN AIR ACT

HON. JOHN D. DINGELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. DINGELL. Mr. Speaker, as House hearings continue on the Clean Air Act in connection with our urgent need to reauthorize the law, a Detroit News editorial, dated October 16, 1981, discusses the need for changes in the law to reflect air quality gains achieved.

We are working toward prompt consideration of the law by the Energy and Commerce Committee yet this year. Legislative action on this important law should not become lost in the morass of next year's budget process. That process was tedious and time consuming earlier this year, and there is no reason to believe that next year will be different.

I am hopeful we can process this law as expeditiously as possible.

The Detroit News article follows:

FIXING THE CLEAN AIR ACT

People often ignore past accomplishments when they debate the Clean Air Act regulations that govern automobiles. Progress has been remarkable in the past 10 years, and government data suggest that air quality has improved faster than expected.

Cars produce three major pollutants: carbon monoxide, hydrocarbons, and oxides of nitrogen. Since 1970, the law has forced reduction of these pollutants from cars in six stages, each of which mandated new equipment at considerable cost to the car buyer.

By the 1981 model year, the standards reduced hydrocarbons and carbon monoxide by 96 percent, nitrogen oxides by 76 percent.

Congress is now debating whether to tighten the regulations further, to clean up the last fraction of auto pollution.

The cost of the clean-air devices has spiralled through the six stages, and it is clear that the tighter the standards become, the greater the cost.

The Bureau of Labor Statistics says the consumer paid $16 per car for 1968 equipment, which reduced pollutants by 50 to 62 percent from precontrol levels. The 1981 equipment cost $400 a car. The law of diminishing returns is obviously at work.

The industry wants to step back a notch, from 1981 to 1980 standards, for carbon monoxide and nitrogen oxides, without changing the hydrocarbon standard. This would drop the emissions level for carbon monoxide from 96 percent to 92 percent, and for nitrogen from 76 percent to 52 percent.

The auto makers argue with good reason that the higher 1981 standards are too costly for the small gain in benefits. If the industry is permitted to go back to 1980 standards, GM's customers alone would save as much as $300 on some smaller models.

The reduction of auto pollution will continue even if the government does nothing more. Only new cars meet the stricter standards, and it takes about 10 years to replace the entire fleet. As old cars are removed from the road, pollution declines.

The most efficient way to improve air quality is to sell more new cars. And the best way to perk up sales is to reduce prices. Washington could do its part by approving a modest relaxation of the clean air standards.●

AVERELL HARRIMAN

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. UDALL. Mr. Speaker, the life of Averell Harriman is an almost unbelievable story. Born to wealth, he was a champion of the working families of America. The good he has done has been lasting and important. He was a towering figure in the foreign policy of several decades. He was for peace and restraint in foreign affairs, but he was tough and realistic about the Soviet Union and other adversaries. He could have been President, but never found just the right time to run.

I admire and respect this man. He has been a model for me and others of my generation. I hope he is with us another 90 years.●

FACTSHEET ON MOBILE SOURCE EMISSIONS

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. HILLIS. Mr. Speaker, on November 13 Congressman TRAXLER placed in the CONGRESSIONAL RECORD (pages 27474-27475 the first part of a factsheet on H.R. 4400, the Mobile Source Clean Air Act Amendments of 1981. The factsheet was prepared by the Motor Vehicle Manufacturers Association.

Due to the complexity of the Clean Air Act there is a great deal of misunderstanding and misinformation on what changes are needed. H.R. 4400 is an attempt to improve the act by reducing Government regulations and recognizing that we have perhaps reached a point of diminishing returns in reducing the emissions of vehicles.

Due to the lack of information surrounding the provisions of H.R. 4400, several false assertions have been circulated about the bill. The factsheet prepared by MVMA address those assertions. Therefore, I am inserting the second part of the factsheet in the RECORD at this point. I hope that Members will have an opportunity to review this material and join with me and Congressman TRAXLER in building support for a more reasonable Clean Air Act when it comes before us for reauthorization:

FACT SHEET ON MOBILE SOURCE EMISSIONS

ASSERTION

Standards for gasoline and diesel trucks and buses, already long delayed, will start to take effect between 1984 and 1986, depending on the pollutant. These reasonable standards will protect public health at a modest cost.

COMMENT

Heavy-duty vehicles and engines have been federally regulated since 1970. Under the 1970 Clean Air Act Amendments, general regulatory authority was extended to EPA and heavy-duty standards were tightened in 1974 and again in 1979. The 1977 Clean Air Act Amendments added a requirement that "final" standards must reflect a 90 percent reduction for HC and CO and a 75 percent reduction for NO_x (the same percentage specified for autos).

Motor vehicle manufacturers support the deletion of specific percentage reduction requirements from the Act. Heavy-duty standards should be set administratively under rule making procedures based on the need to meet National Ambient Air Quality Standards and on cost effectiveness.

Heavy-duty vehicles account for 3.5 percent of the HC, 11 percent of the CO, 10.7 percent of the NO_x, 3.6 percent of the particulates and 0.9 percent of the sulfur dioxide emitted from man-made sources nationwide in 1979, according to EPA.

Ninety percent reduction standards for HC and CO would require costly (about $900 per truck) catalyst technology for gasoline powered trucks. Such standards would, according to EPA, result in an improvement in air quality of only 2 percent for ozone and 7 percent for CO. Marginally less stringent standards would avoid this cost at no discernible loss in air quality. It would also avoid substantial added costs for maintenance and fuel over the life of the vehicle.

Seventy-five percent reduction standard for NO_x has been found by EPA to be unfeasible for diesel trucks.

Standards should be based on demonstrated air quality need and not on arbitrary percentage reduction pre-determinations.

ASSERTION

Setting the automobile NO_x standard at 2.0 g/m will require greater control from powerplants and other stationary sources.

COMMENT

Passenger cars accounted for about 15 percent of all man-made NO_x emissions nationwide in 1979.[1]

To date, states have relied almost exclusively on motor vehicle standards to reduce man-made NO_x emissions.

A standard of 2.0 g/m will provide for continued air quality improvement. According to latest EPA estimates,[2] total passenger car NO_x emissions have decreased 13 percent since 1973 (the year that standards began). The largest annual reduction occurred in 1979 as new cars meeting the 2.0 g/m standard (which started in 1977) bean to significantly impact the total on-the-road fleet.

According to recent EPA testimony "In NO_x, we have a non-problem. We have hundreds of monitors out there recording attainment . . . Over the next 10 years, we don't see the NO_2 problem getting worse. What happens after the next 10 years is hard for us all to forecast, but it seems to me as we look at it, what we see when we make these projections is some decline, and then the possibility of some increase in the post-1990 timeframe . . .

"The growth takes place in major power plants and fueling places. It takes place out in the country. The growth in NO_x emissions which may have been called to our attention tends to have to do with major stationary sources which are not in the same place [as mobile source NO_x emissions]. These are two different problems."[3]

ASSERTION

The state of the art in control technology dictates that Congress should write into law future diesel particulate standards.

COMMENT

The Clean Air Act authorizes the EPA Administrator to set standards for particulate emissions based on technology, but does not specify those standards. EPA has subsequently set light-duty vehicle standards of 0.6 g/m beginning in 1982, and 0.2 g/m for cars and 0.26 g/m for light trucks in 1985, despite industry data which demonstrated that technology would not be available to achieve those latter standards.

EPA is presently reviewing the 1985 standards.

Durable control technology to meet the 1985 standards has not yet been demonstrated.

[1] National Air Pollutant Emission Estimates, op. cit., p. 10.
[2] Ibid.
[3] Hearing transcript., op. cit., p. 99-101.

For most applications, the use of a particulate trap would be required. Assuming a passenger car standard of up to 2.0 g/m NO_x, the smallest vehicles would possibly be expected to comply with the 0.2 g/m particulate standard without the use of a particulate trap. These very small vehicles carry an uncertainty with respect to compliance with the standard for 5 years and 50,000 miles, even though they may be successful in achieving a 0.2 g/m particulate standard at low mileage.

The only potentially promising trap technology carries with it serious concerns with regard to required base engine redesign and its ability to regenerate (clean) itself during periods of low speed operation.

Establishment of statutory standards at the level proposed will discourage investment in and further development of diesel engines, because investment decisions will have to be made before any new review of the Clean Air Act would be likely to occur.

ASSERTION

The requirement that all cars beginning in model year 1984 meet standards regardless of altitude is needed for air quality and health protection.

COMMENT

Motor vehicle manufacturers support retention of the concept of "proportional" high altitude standards implemented by EPA under the Act for 1982-83 model years. Proportional standards provide for the same percentage reduction in emissions at high altitude that is required at low altitude, although the high altitude numerical standards would be somewhat higher.

At high altitudes, vehicles tend to emit more HC and CO and less NO_x emissions. Since ozone and NO_2 attainment is not considered a special problem at high altitudes, HC and NO_x standards more stringent than those at low altitude are not needed.

Of the 192 counties designated as high altitude, only 19 are presently classified by EPA as non-attainment for CO.

An 11.0 standard for CO at high altitude would provide the same proportional reduction as a 7.0 standard at sea level—the level presently permitted under waiver by EPA in model year 1982. It can be demonstrated that a high altitude CO standard of 11.0 would provide for attainment of the national health standard.

Nonproportional high altitude standards could once again raise the prospect of fewer model offerings being available in high altitude areas which account for only 3 percent of the vehicle population.

Permitting vehicles to be designed to meet standards at sea level or high altitude depending on their area of use is essential, to avoid the unnecessary cost, performance, and fuel economy penalties the present law would impose on the 97 percent of the fleet not sold at high altitude.

ASSERTION

Emissions averaging would lead to an increase in automobile pollution by allowing some vehicles to exceed emissions limits as long as the average emissions for the fleet met the standards.

COMMENT

An emissions averaging approach would not change the total amount of vehicle emissions entering the atmosphere. It is the total amount of pollutants emitted that affects air quality, not the contribution of any particular vehicle. In any case, current emission regulations—both Federal and in California—to a large extent are based on the averaging approach.

Motor vehicle manufacturers support a proposal that would authorize EPA to study alternative compliance procedures for motor vehicles, but that does not specify any single approach.

ASSERTION

Cars already meet the standards that would be relaxed.

COMMENT

A substantial part of today's fleet is meeting alternative NO_x and CO emissions standards under EPA waiver authority:

According to EPA, more than two/thirds of the 1982 gasoline powered new car fleet will be certified to meet a CO standard of 7.0 g/m instead of 3.4 g/m under waiver provisions of the Act. Under present law, beginning with model year 1983 all cars will have to meet 3.4 g/m.

Waivers of the 1.0 NO_x standard have been granted for virtually all of the existing diesel models through 1984. Small manufacturers (American Motors) are permitted to meet 2.0 g/m in model years 1981-82. Under present law, beginning with model year 1985 all diesel-powered cars will have to meet 1.0 g/m.

ASSERTION

The cost savings that would result from these proposals are inconsequential and would be offset by diminished fuel economy performance.

COMMENT

The cost impact of emission requirements is not uniform among motor vehicle manufacturers, or even among particular engine families of the same manufacture. For example, since these are "performance" rather than "design" standards manufacturers may select different systems to meet the requirements according to the needs of their respective products and engineering decisions.

In recent public statements, individual manufacturers have estimated that the average added cost of meeting 1981 auto standards compared to 1980 standards was as high as $480 per car. While retention of the 1980 standards would not permit all emission-related costs added in 1981 to be recouped, manufacturers have estimated, however, potential consumer cost savings in a range of $80 to $360 per car, depending upon the type of control technology used. In a 10-million-car sales year, this translates to a potential savings impact on the economy that could range between $800 million and $3.6 billion.

Individual auto manufacturers have publicly estimated that the retention of 1980 standards would allow them to improve fuel efficiency in a range of from 2 to 5 percent. Again, as in the case of cost estimates, the situation is different for each manufacturer according to the type of emissions control system used and other engineering considerations. Nevertheless, the proposed emission changes would lead to increases, not decreases, in fuel economy.●

PRESIDENT'S ECONOMIC RECOVERY PROGRAM

HON. BRUCE F. VENTO

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. VENTO. Mr. Speaker, the New York Times published an editorial taking to task the President's economic recovery program for its inconsistencies and faulty logic. The administration was given its 3-year, 25-percent cut in Federal personal income taxes to enable citizens to save and invest—a key to its supply side prescription for economic recovery. Now we find that the tax cut is also being used as an excuse for Federal budget cutting in social welfare programs. The administration would have us believe the State and local governments will increase their taxes to pay for the needs which the Federal Government has abandoned. This of course, reduces what Americans can save. As the Times puts it, "* * * the administration cannot have it both ways."

I insert the Times editorial in full in the RECORD:

[From the New York Times, Oct. 31, 1981]

THE EMPEROR'S NEW TAX CUT

Though the occasion attracted little attention, the Reagan Administration last week unveiled the final, and most miraculous, phase of its economic plan for the country.

Phase One, it will be recalled, followed the supply-side prescription for economic recovery: tax less so people save and invest more, thus stimulating growth. Phase Two was get the Federal Government off people's backs and let states and local governments look after domestic needs. The next step was to answer the question, where would they get the money? What revenue stream would Washington relinquish for them to tap instead?

Now Norman Ture, a Treasury Under Secretary, has revealed the answer. The cut in Federal income taxes, he noted, makes new billions available to state and local taxation—available, that is, if governors and mayors have the nerve to try to tap it.

That is a puzzle and a contradiction, but not an answer. Either the tax cut is intended to leave more money in private pockets, and thus stimulate the economy; or it means there is more money for state and local governments to take out of private pockets, to pay for public services. Unless it wishes to be regarded as cynical and insincere, the Administration cannot have it both ways.

Last spring President Reagan told some county officials that, like Martin Luther King, he had a dream. To compensate them for assuming prime responsibility for welfare and other programs, he contemplated turning back tax sources that Washington had preempted. Now, Mr. Ture says, the mission is substantially accomplished. the three-year, 25 per cent cut in Federal personal income taxes will by 1984 provide states with an average of $2.24 billion in new taxing room.

Does the President really want states to pursue this source? Obviously not, if that would torpedo his recovery plan. No matter what one thinks of other aspects of the Reagan programs, his brand of federalism looks suspiciously like a shell game, whose only sure losers are the poor.

The Administration's concept of federalism turns on Mr. Reagan's conviction that the units of government that spend taxpayers' money should answer directly to those who pay taxes. He also says he knows that states cannot cope with added social welfare responsibilities unaided. But last summer's

cuts were deeper than expected, and they aren't the last. Instead of absorbing welfare, Medicaid and food stamps, White House planners talk of dumping more of the burden on state.

What chance, realistically, have states to finance mounting social welfare obligations with higher taxes? A beleaguered state like Michigan, its automotive industry in trouble, finds ever more people dependent on unemployment, welfare and other social programs; just at the time it needs more help it is getting less.

What should a resident of Detroit, say, do as a result? For Mr. Ture, that's easy: move. "You decide where you want to live," he says. That means Americans who don't have much choice about where to live are left stranded. Washington, able to help, has become unwilling. The states, willing for the most part, are not able. Mr. Reagan may consider his vision of federalism a dream; to America's needy people and communities, it's a hoax.●

NEW HYDE PARK'S GREAT ACHIEVER: MARIO NUZZI

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, in communities throughout this great Nation, there are individuals who have dedicated their life's energies to the betterment of others and their communities.

Within the Sixth Congressional District, which I so proudly represent, there is such a person who fills that role in the community of New Hyde Park, Long Island, N.Y.

On November 14, 1981, New Hyde Park, Nassau County, New York State, and the U.S. Congress, saw fit to participate in a special tribute to Mr. Mario Nuzzi as the people of New Hyde Park designated Mario Nuzzi to receive their "Man of the Year Award."

Leaders from all walks of life gathered to pay fitting recognition to a man who has done so much for his family, community, and country. What follows is a short biography of Mr. Nuzzi and a description of the ceremonies at which he was honored.

This material appeared in the Nassau Illustrated News and was written by Mr. James DeGraff Carr. I am proud to share the story of Mr. Mario Nuzzi—it is truly the story of a great achiever and a great American.

[The material follows:]

MARIO NUZZI IS NEW HYDE PARK'S MAN OF THE YEAR

(By James DeGraff Carr)

Nassau County Executive Francis T. Purcell, two United States Congressmen, two New York State Supreme Court Judges, both a State Senator and Assemblyman, a County Court Judge and Nassau County Republican Committee Chairman Joseph M. Margiotta are expected to be among the glittering galaxy of luminaries who will honor Greater New Hyde Park Chamber of Commerce's 1981 Man of the Year Mario J. Nuzzi, this coming Saturday evening, November 14, at his gala testimonial dinner dance in the New Hyde Park Inn Grand Ballroom.

Both Congressmen John LeBoutillier and Raymond J. McGrath are expected to grace the gala with their presence as well as Supreme Court, Appellate Division, Judges Thomas Gulotta and Sal Wachtler, County, Court Judge, Paul Lawrence, State Senator Ralph Marino, Oyster Bay Town Republican Committee Chairman: Assemblyman Dean G. Skelos and Nassau County Republican Committee Chairman and Mrs. Joseph M. Bargiotta with his law partner Michael and Mrs. Ricigiano.

TOWN OFFICIALS TO ATTEND

Prominent town officials who will be among the over 250 distinguished guests expected to attend the event will be Hempstead Town Presiding Supervisor and Mrs. Thomas S. Gulotta, and Councilman Joseph N. Mondello, North Hempstead Town Clerk and Mrs. John S. DaVanzo and Councilman and Mrs. Charles J. Fuschillo.

MAYOR GILL TO BE PRESENT

New Hyde Park Village's top public official, Mayor William T. and Mrs. Gill will also attend the Chamber Man of the Year gala, traditionally considered Greater New Hyde Park's most significant social event of the year.

PROFILE OF A WINNER

Mario J. Nuzzi was born October, 1923 in Jamaica, Long Island. He came to New Hyde Park at the age of five, where he has been residing for the last 53 years.

WORLD WAR II HERO

During the depression, Mario helped his father. Nuzzi clan partiarch John J. Nuzzi, support the family of 12 children. At the age of 18, he was drafted into the United States Army and spent 44 months overseas. He served in the Battle of Normandy, Battle of Cherbrough, Battle of the Rhine, Battle of Antwerp and the Battle of the Bulge. He was decorated with nine citations, one of which was the French Croix De Garre and also the Belgium Forge De Garre.

NUZZI BROS. ENTERPRISES FOUNDER

Upon his return from the service, Mario helped set up a successful fuel business (Nuzzi Fuel Oil) with his brothers, Joe, Mike and Angelo, three years later he went on his own to become even more successful when he and his partner, Anthony Ferrante established Nuzzi Bros. Enterprise, which consists of Nuzzi Bros. Auto Collision, Nuzzi Bros. Auto Salvage, Denton Ave, Auto Salvage, Nuzzi Reality, Tomar Realty and West Hampton Adult Home.

Mario is a member of the New Hyde Park Fire Department, New Hyde Park Lions Club, G & E Lider post (V.F.W.), New Hyde Park Elks, Lodge 2107, Past Vice President of Greater New Hyde Park Chamber of Commerce, second Vice President of American of Italian Defamation League. He was also knighted in 1973 by a representative from the Vatican for his outstanding workmanship for humanity.

The American Heart Association recently honored him with the Man of the Year Award for Nassau County, 1980. He personally raised $40,000 for this worthy cause. Mario has always been very generous to all fraternal and charitable organizations, and the Greater New Hyde Park Chamber of Commerce feels at this time, that he is most deserving of the Man of the Year Award.●

CLEAN AIR ACT REAUTHORIZATION

HON. EDWARD R. MADIGAN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. MADIGAN. Mr. Speaker, Mr. Jerry J. Jasinowski, a senior vice president and economist for the National Association of Manufacturers, recently was a guest contributor to the editorial page of the New York Times. I hope Mr. Jasinowski's efforts to reconcile competing arguments in the Clean Air Act debate will make a positive contribution to the reauthorization of this law. I am inserting Mr. Jasinowski's comments with this purpose in mind.

The article follows:

WASHINGTON.—The Clean Air Act has become a double-edged sword. One edge is the act's laudable objective of protecting public health from the effects of excessive air pollution. Unhappily, the other is the use, at times, of the incredible complexity of the 185-page law to impose Federal controls that retard economic development, industrial productivity, and the achievement of clean air.

Our best bet to improve air quality further is to encourage the expansion and modernization of our industrial plant and equipment. This process would phase out older manufacturing plants equipped with less-efficient air-pollution controls and replace them with plants with modern pollution controls and processes designed right into them.

The Clean Air Act is written in such a way as to make it exceedingly difficult to build new plants or modernize existing ones. This puts a premium on maintaining existing economically inefficient and polluting plants.

As a result of two requirements—"prevention of significant deterioration" and "nonattainment"—the act creates a Catch-22 situation in which a manufacturer cannot build his new plant is one location because the air is too clean cannot build it in another because the air is too dirty. As a result, the manufacturer may abandon his plans for a new plant, may decide to situate it in another country, or may decide to buy an existing plant and try to keep it running as long as possible.

If a manufacturer persists in pursuing his idea for a new plant or for improving existing facilities, he runs into a maze of bewildering regulations that complicate and delay matters. To comply with the "prevention of significant deterioration" program, which limits or prohibits the situating of factories where air quality does not meet national standards, he may have to estimate the impact of his proposed plant changes on tiny increments of pollution—an inexact, usually inconclusive exercise. Frequently, after spending a lot of time and money on these studies, he winds up installing the "best available control technology," which he could have done anyway without going through expensive, time-consuming guesswork.

To comply with the "nonattainment" rules, which govern emission sources—factory smokestacks, for example—in geographical areas that do not meet national air-cleanliness standards, the manufacturer

must, be upgrading or closing existing facilities, establish an "offset" to any emissions that will be produced by the new construction. In some industrialized regions, offsets—for example, buying small polluting companies and shutting them down—are difficult or impossible. In far too many cases, this provision prevents the construction of plants that could be more productive, less energy-intensive, and less polluting.

These provisions of the Clean Air Act delay or prevent the installation of modern and clean plants, equipment, and processes, and this pushes up costs. The experience of the Hampton Roads Energy Company, in Virginia, is a case in point. The company was formed in 1973 to construct a much-needed oil refinery at a projected cost of $300 million. The facility was expected to begin operations by 1979. Today, largely as a result of permit delays, the refinery still has not been built; because of inflation and the increased cost of capital, the latest cost estimate for the facility is $1 billion.

These and other provisions of the act have made this regulatory mechanism unnecessarily burdensome and expensive. The total cost imposed by the law for the last decade have been $118 billion, or $2,100 for every four-person household. By 1987, industry will have spent at least $300 billion trying to comply with the act. With costs at this level, in addition to other adverse effects, we cannot afford to extend the act without major changes.

Those changes should modify the provisions of the act that impede the modernization of industry. The debate over the law is often described—wrongly, I believe—as a choice between clean air and economic development. In fact, the law works against both, impairing the achievement of clean air as much as it saps our economic vitality. By modifying the act to encourage industrial modernization, we can have both clean air and economic growth.

In seeking amendments to the act, manufacturers are not arguing for the right to build plants without air-pollution controls. We are arguing for the right to build them with better controls. We are totally committed to continued progress toward cleaner air.

The House Subcommittee on Health and the Environment is continuing hearings on the act, and the Senate Environment Committee is debating possible amendments as well. If the Congress would soon enact legislation eliminating the counterproductive features of the law, the nation could enter 1982 with a modern Clean Air Act that would raise industrial productivity, provide more jobs, and achieve better air quality for all.●

A REFUSENIK'S PLIGHT

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. MARKEY. Mr. Speaker, I rise to bring to the attention of my colleagues in the House the plight of Efim Krupnik, a Soviet Jew who, for 2 years, has been separated from his wife and son because of the Soviet Union's refusal to approve his applications for an exit visa.

In June 1977, Efim, his wife Rozalia, and his son Rostislav applied to emigrate together to Israel. At that time, Soviet officials recommended that Efim and Rozalia get a divorce, so that Rosalia and Rostislav could apply separately. Efim was told to postpone applying for an exit visa until 3 years after his 1976 retirement from the Klimov mechanical plant where he was a mechanical engineer.

The Krupniks complied with this advice, and Rosalia and Rostislav left the Soviet Union in October 1979. However, all of Efim's recent applications to emigrate have been refused. The Soviet Union still claims that Efim cannot leave for security reasons, even though 5 years have now passed since Efim's retirement.

Efim is 66 years old. He has already suffered a heart attack and recently became diabetic. He is only asking to be permitted to rejoin his family.

I am asking my colleagues to join with me in urging the Soviet Union to reaffirm its commitment to the principle of reunification outlined in the Helsinki accord by permitting Efim Krupnik to rejoin his family.●

LET'S LISTEN TO THE SAUDIS

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. FINDLEY. Mr. Speaker, Philip M. Klutznik, a former Cabinet Secretary in the Carter administration and a former president of the World Jewish Congress, this weekend wrote in the Washington Post that the Saudi peace proposals "are not incompatible with the [Camp David] peace process" and that "if the autonomy talks fail to deal adequately with the Palestinian issue, there is no dishonor in supplementing them with the suggestions of others."

Following a visit to the Middle East in August, Mr. Klutznik likened the Palestinians to "modern-day Jews of the Arab world" and concluded that the PLO is "the only party qualifed to speak for the Palestinians."

For such a prominent American spokesman for the Jewish community to speak out so candidly and forthrightly is yet another sign of moderation on the basic issues that have for so long blocked peace in the Middle East. Mr. Klutznik is a man with exceptional credentials and his statement may prove to be a crucial development in Middle East policy by giving President Reagan the political running room he needs to move toward a more realistic policy that can lead to a lasting peace.

The article follows:

LET'S LISTEN TO THE SAUDIS

Not since Israel's creation in 1948, in my judgment, has there been a greater possibility of achieving peace between Israel, the Palestinians and its Arab neighbors.

Looking back, anyone who expected the Camp David accords to be accepted by all the states in the Middle East was unaware of the sensitivities that were either ignored or purposely shelved for later consideration. Likewise, anyone who now expects the Saudis' eight points to be universally applauded is remiss in not appreciating the real facts of life in the region—both in Israel and among parties less thoughtful than the Saudis.

However, the acceptance by Jordon, the PLO and others of the overall approach embodied in the Saudi eight-point "peace plan" may be a crucial turning point. For the first time, even if indirectly, important Arab parties have turned away from "outlawing" Israel as an illegitimate entity and have looked to negotiations with recognition and "coexistence" as the eventual goal.

Many have forgotten the extreme difference between the speeches Anwar Sadat and Menachem Begin made to the Knesset—differences that thoughtful negotiations helped resolve.

I feel somewhat the same about the current situation. The Saudis have taken a significant lead and will be attempting at the Arab summit in Fez later this month to achieve an Arab consensus. The importance of these developments must not be missed.

My visit in August to a number of Arab countries, including Saudi Arabia, convinced me that with very few exceptions there was a general feeling at the highest levels that Israel was here to stay, that it had developed into a military superpower, that Jewish nationalism was accepted as fact if not understood, and that the time had finally come to find an answer to the basic problem that stood in the way of a comprehensive peace.

Over and over, the Palestinian issue dominated conversation and viewpoints. The Palestinians have become a special people in the Arab world, in some ways like the Jews were in the West following World War II.

The next most significant conclusion was that the PLO was the only party qualified to speak for the Palestinians. There will be those who will say that such a conclusion is naive or ill-founded. Perhaps so; but it remains a fact that the PLO has sufficient strength in an increasing number of capitals to either accelerate or abort the peace process that was begun four years ago with Sadat's Jerusalem visit.

The PLO members are trying to create, and with some success, an organization that handles many social and economic problems, even as they continue to build a more sophisticated military potential. They are spoken of as "the modern-day Jews of the Arab world."

I found that the Camp David accords were rejected not so much because of unwillingness to contemplate peace with Israel as because they failed to link properly the Egyptian-Israeli treaty with resolution of the Palestinian issue. Many condemn Camp David for this, forgetting that without this beginning there probably would not be today's Saudi initiative. Others feel that Camp David has served its function and should now be supplemented or transcended.

It would be tragic and unthinkable to lose the momentum begun at Camp David. The autonomy discussions should now be accelerated in an attempt to draw Palestinian representation into the negotiations. But if the autonomy talks fail to deal adequately

with the Palestinian issue, there is no dishonor in supplementing them with the suggestions of others.

Here the Saudi approach may prove useful. As President Hosni Mubarak in Egypt has suggested, and as the Reagan administration has implied, the Saudi ideas are not incompatible with the peace process. Enlarging participation in the process was, in fact, envisioned at Camp David.

I knew the representatives of Saudi Arabia in the United Nations in the mid-1950s and 1960s. They were in the main mercenaries who were not always native Saudis or polished diplomats. Energy economics and 20 years have transformed the Saudi situation. Yet the ruling family, it appears to me, senses that many more changes need to be made. In my contacts outside the kingdom with representatives of the Saudi monarchy and with Saudi private businessmen, I have not found the alleged arrogance of which some others complain. There actually seems to be a kind of modesty accompanied by serious anxiety about the unknown future. Comparing Saudi Arabia with Iran under the shah is unrealistic. In fact, there is little comparison to Saudi Arabia today or probably in history—the country is sui generis.

I conclude that no genuine peace will be achieved anytime soon without some real measure of Saudi participation. If this conclusion is correct, or even if the conjecture has possibilities, then it should be explored by both the United States and Israel. We need to build on the progress Camp David made possible. We may be mid-stream between the beginning of a limited peace and the achievement of a comprehensive peace.●

DAY OF SORROW—64 YEARS OF TRAGEDY

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, November 7, 64 years ago, marks the birth of the "Great October Socialist Revolution." Thus began a metamorphosis so complete and so sinister as to enslave an entire people. With 60 million innocent victims in its wake, this revolution swiftly emerged as the most morally abhorrent and repressive system ever to darken and stain the pages of human history.

Today, the Soviet Union is not simply a state. It is a "Prison of Peoples," dedicated to the final eradication of the Judeo-Christian way of life and the sacred values on which it rests. It is the enemy of all people and the captor of each who would be so unfortunate as to come under its sway. It is, in short, the enemy of the eternal basis of the spirit—freedom.

In view of 64 years of continuous tragedy, the Congress of Russian Americans have issued a proclamation declaring November 7 to be a "Day of Sorrow." It is hoped that this proclamation will encourage all Americans to become more fully aware of the dangers inherent in a Communist form of government.

I commend this proclamation, and an accompanying news release, to my colleagues as follows:

CONGRESS OF RUSSIAN-AMERICANS, INC., NEWS RELEASE

On November 7th the rulers of the Soviet Union will celebrate the 64th anniversary of the "Great October Socialist Revolution". On this tragic anniversary of the Bolshevik takeover in Russia, the Congress of Russian Americans reiterates its continued concern for the condition and destiny of all people living under Communist rule. Sixty four years ago a tragedy occurred which scarred not only the Russian nation but also the entire free world: Lenin and his minority party overthrew the democratic Provisional Government of Russia. Two months later the Bolsheviks dissolved the freely elected Constituent Assembly, in which they had polled only 25 percent of the vote and renamed the nation the Union of Soviet Socialist Republics.

Despite the bitter struggle waged in the ensuing Civil War, which lasted more than three years and was followed by numerous peasant and worker uprisings against Communist domination, Lenin and his successors were able to consolidate their iron hold over the people that make up the USSR. Moreover, since World War II, Communist leaders have added to their empire most of Eastern Europe. This tyranny has caused millions of deaths and untold suffering in the prisons and concentration camps of the Gulag Archipelago, and has kept life at a subsistence level for most of the population.

The Soviet build-up of armaments in conjunction with foreign policy aimed at spreading the Communist system wherever possible has caused the threat of world war to hang over the United States and the free world for several decades. Furthermore, unsolicited Soviet meddling in the affairs of the developing nations continues to cause serious foreign policy problems faced by the United States and its allies.

For sixty four years Russian immigrants have repeatedly warned the world of the dangers of Communism. Too often they have been not only misunderstood, but even mistaken for Communists. As a result, the word "Russian" has ironically become synonymous with the words "Soviet" and "Communist". Moreover, despite being the first and foremost victim of Communism, the Russian nation is not even included on the list of captive nations.

Thus, in light of the ever-increasing threat of Communist domination we appeal to all people of good will to join us in condemning the inhuman and evil nature of Communism, reminding ourselves of all the people deprived of their basic human rights, defending those persecuted for their religious beliefs and praying for the souls of the millions of victims of Communist terror in all captive nations.

PROCLAMATION

Whereas November 7th, 1981 will be commemorated by the rulers of the Soviet Union as the 64th anniversary of the Bolshevik revolution; and

Whereas due to the Bolshevik overthrow of the democratic Provisional Government of Russia there appeared the first Communist state in the world, a state ruled by a totalitarian regime and characterized by the complete denial of economic, political, and spiritual human rights; and

Whereas the Communist rule of terror, based on the ruthless suppression of any internal opposition and on the total exploitation of all human and economic resources, has cost the people of the Soviet Union millions of lives; and

Whereas while the Soviet constitution purports to guarantee basic human rights and freedoms; it nonetheless qualifies these rights in such a manner that their intended purposes are perverted and made meaningless; and

Whereas the Soviet constitution is so worded that Soviet citizens are deprived of the right to appeal to it for the protection of their constitutional rights; and

Whereas the specter of Communism, regardless of where it has set root, has similarly resulted in the loss of millions of human lives as is this day clearly evident in the case of Afghanistan; and

Whereas the number of victims of Communist aggression continues to rise and there are many residing among us who are living reminders of the ruthless nature of the Communist system;

Therefore, I (name), do hereby proclaim November the 7th, 1981, the 64th anniversary of the Bolshevik revolution, a "Day of Sorrow" urging our citizens to become fully aware of the dangers inherent in a Communist form of government.●

FORGOTTEN TRABAJADORES

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. McDONALD. Mr. Speaker, it is fascinating to watch the press today and how little attention it is paying to Nicaragua as the last lights of freedom go out there. It is amazing how little outcry there is when a business leader is assassinated or the only opposition newspaper is closed, even temporarily. Washington and New York City cocktail circuits are too busy talking about the horrible "right" in El Salvador and how peace must be negotiated at the point of a gun. Therefore, it was refreshing to read the editorial "Forgotten Trabajadores" in the Wall Street Journal of October 19, 1981, which recognized the situation in Nicaragua for what it is. The first three paragraphs of that editorial follow as a reminder to my colleagues who made so many eloquent but wrong statements during the debate on aid to Nicaragua after the Sandanistas took over.

FORGOTTEN TRABAJADORES

Thanks to a disturbingly effective left-wing propaganda campaign, the Reagan administration has been largely stalled in its efforts to gather public support for a U.S. counterattack against the Soviet-Cuban conquest of Central America. But it is far too early to give up the fight. The propaganda lies are by now so transparent that even the most liberal Congressmen, newspaper editors and churchmen surely cannot avoid recognizing them.

For example, can anyone still doubt that Nicaragua has been a victim of a Commu-

nist takeover? The Cuban-style "neighborhood committees" are in place, the secret police are being trained, La Prensa has been told it will be closed if it continues to speak up, Archbishop Obando y Bravo is being suppressed and a spectacular military buildup is under way. The Sandinistas are creating an army and militia of over 250,000, equivalent to a full one-tenth of the population, even though the country can't feed itself or pay its debts. Heavy equipment, including 30 T-55 tanks, has been pouring in from the Soviet bloc. The combined forces of Nicaragua and Cuba soon will dwarf any army south of the Rio Grande and drive a Soviet strategic wedge between North and South America.

Little Costa Rica, once a model democracy, has been destabilized and intimidated by the Nicaraguan buildup and internal subversion. The territory of Honduras is being used with impunity to funnel arms from Nicaragua to the Communist guerrilla army in El Salvador. An active terrorism campaign is under way in Guatemala, drawing the usual counter-terror from the right with its predictable additional contributions to destabilization.●

WHEN WILL THE PLO RECOGNIZE ISRAEL

HON. WM. S. BROOMFIELD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. BROOMFIELD. Mr. Speaker, amid all the hoopla surrounding the Saudi eight-point Middle East peace plan, the supporters of the Saudi initiative have failed to mention that the beneficiaries of the plan, the PLO, have refused to endorse it. Daily we hear that if the United States, Israel, and Egypt would renounce Camp David and support the Saudi plan, that peace would be at hand. Although I find it commendable that the Saudis have proposed a solution that they believe will eventually lead to a comprehensive peace settlement in the Middle East, I disagree that their plan should take precedence over Camp David. The important question is, are all the parties in the Arab camp unified in their support of the Saudi solution? The answer is no.

Not only is Egypt still willing to pursue the Camp David accords, but the PLO, as reported in the Washington Post on November 14, 1981, page A18, has failed to support the Saudi plan. I found it strange that such an important item as the PLO rejection of the Saudi plan did not receive front page coverage. But the article, at least, revealed the true desires of key actions within the PLO. Let me quote one part of the article:

> PLO Chairman Yasser Arafat has praised some aspects of the plan, but radical Palestinian groups have denounced it because it appears to suggest giving up the struggle to recover the entire area that was formerly Palestine.

In other words, powerful segments of the PLO still envisage driving Israel into the sea. As long as this attitude continues to exist, how can any reasonable person ask Israel to make concessions on the West Bank that will threaten their own existence? I believe that the burden is on the Palestinian people to reject these extreme positions and for the PLO to bring these extreme factions into line. It is time for all serious observers of the Middle East to again acknowledge that it is not Israeli intransigence that is blocking a full peace settlement, but PLO refusal to give up a basic element in their charter, namely the destruction of Israel.

The complete Washington Post story of November 14 follows:

[From the Washington Post, Nov. 14, 1981]

PLO LEADERS FAIL TO REACH ACCORD ON SAUDI PLAN FOR MIDEAST PEACE

(Reuter)

BEIRUT.—The Palestine Liberation Organization leadership held a lengthy meeting today but apparently failed to agree on a stand on Saudi Arabia's Middle East peace plan.

The Saudi plan, which some observers say implies recognition of Israel within its pre-1967 frontiers in return for creation of a Palestinian state, has divided the Palestinians.

PLO Chairman Yasser Arafat has praised some aspects of the plan, but radical Palestinian groups have denounced it because it appears to suggest giving up the struggle to recover the entire area that was formerly Palestine.

A vaguely worded statement after a meeting of the PLO's executive committee did not directly mention the Saudi proposals but said the session discussed "political initiatives and moves in the region."

"It was agreed to follow up contacts in this connection with the aim of achieving a unified Arab stand serving the Palestinian struggle and the just cause of our people," said the statement, according to a report by the Palestinian news agency WAFA.●

FAIRFAX COUNTY EXECUTIVE J. HAMILTON LAMBERT ASSESSES STATE OF METROPOLITAN WASHINGTON REGION

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. WOLF. Mr. Speaker, J. Hamilton Lambert is a lifelong resident of the Washington area and a member of the Fairfax County government staff for the past 20 years. For the past 2 years, he has been county executive, the top administrative position in the county government. He has won wide acclaim not only for his performance in that position but as leader in promoting cooperation among the region's local governments. He is chairman of council of governments' committee of the area's chief administrative officers.

I ask that an interview which appeared in the fall 1981 edition of "The Region" be printed at this point in the RECORD. The state of the Metropolitan Washington region concerns us all.

Q. & A.: FAIRFAX COUNTY EXECUTIVE J. HAMILTON LAMBERT ON THE STATE OF THE REGION

Q. As one of the most prominent administrators in the local governments of the Washington area, how do you assess the state of the region? Are we in good shape?

A. Overall, compared to most other metropolitan regions in the United States, the Washington Metropolitan Area is in outstanding shape. Obviously, we have problems. Some of them—the high cost of housing, for example—may be related to our affluence. Others, such as our serious regional transportation problems, can be related to the fact that historically the region's largest employer was concentrated in a small central area, and regional approaches to solving the problem were begun rather late. But on balance, this is a healthy, fortunate region. We have an economy that is relatively insulated from cyclical fluctuations. We have one of the lowest unemployment rates in the nation, and a growing sense of regionalism is making it possible to approach our problems in a spirit of cooperation that has not always characterized this area's jurisdictions. I think we have every right to view the region's future with optimism.

Q. What trends or changes do you see for our cities and counties?

A. I expect that there will be some leveling off of population growth, due both to demographics and to a slowing of the growth of the Federal Government and its budget. I expect also that there will be more growth of employment centers in the suburbs and more concern on the part of the individual for shortening work trips. As our demographics change, I think we can look for some changes in the patterns of local government spending—perhaps relatively more emphasis on social programs for adults and the aged, less on schools, for example.

Q. Have some changes already taken place?

A. Yes. We already have seen changes in building patterns—more townhouses and apartments, fewer large-lot single-family homes—and this pattern probably will continue.

I hope we will see a continuing and strengthening of the gains in regional cooperation that have occurred in recent years. Many of our most urgent problems—water supply, sewage conveyance and treatment, sludge and other solid waste disposal, Metro and other transportation problems—can be solved only through regional approaches.

Q. What significance will the policies of the Reagan Administration hold for Metropolitan Washington as a region and for our local governments individually?

A. When the Federal Government cuts back on programs in which Federal funds pass through to the state and local governments, there has got to be a profound effect on those local governments. People have become accustomed to these programs and are reluctant to see them cut or dropped. At the same time, people support the concept of cutting both Federal programs and Federal taxes.

Now, the benefits of lower Federal income taxes can be pretty illusory if local governments pick up all the lost Federal program funding and fund these programs out of the property tax, sales tax and other local reve-

nues. Local governments are going to have to pick up some of these programs, but they are going to have to do so selectively. Otherwise, the taxpayer is going to be no better off. Local administrators, and particularly local governing bodies, are going to face some very difficult choices.

Q. Figures from last year's census show that jobs and households in the area are growing much faster than the population. What does this tell us about our present and future?

A. The fact that job opportunities are growing faster than the population is a good sign, except that we run a serious danger of imbalance if the kinds of jobs offered don't match the kinds of skills our population possesses. We really don't need to attract more skilled workers to this area as much as we need to improve the job skills of our own unemployed and underemployed, and to provide a transportation network that will connect the potential worker to the job location.

The growth of households suggests that household sizes are continuing to shrink, which is not a new trend. It may presage more construction of relatively small, multiunit housing as opposed to the traditional, suburban house on a half-acre lot.

Q. Paying for the completion of Metro comes in for a lot of discussion in Fairfax. Is this a serious problem throughout the region or is it worse in your County than elsewhere?

A. Metro funding will be a problem for the entire region. It is a greater problem in Virginia than in Maryland because the State of Maryland is picking up capital costs which in Virginia must be paid for locally. The growth of Metrorail into Virginia should help our citizens to recognize the value of the system to themselves as well as to the region.

Q. Aside from the loss of Federal revenue, do you see any long-term financial problems for local governments?

A. If interest rates remain high over a long period of time, they could make it difficult for local governments to continue orderly capital improvement programs. This has not become a serious problem yet and many economists see it as temporary situation.

Q. How about the positive side? What's the good news?

A. I think there is a lot of good news for people in this region. The best probably is that the economy not only is based on a very stable foundation but also is diversifying. And the next best news most likely is that—in spite of news stories to the contrary—the major jurisdictions in the Washington area really are working together to find regional solutions to regional problems. This is true both on the part of elected officials and at staff levels. As a county executive, I have been deeply impressed with how well the chief administrative officers of our region have worked across city, county and even state lines to cope with questions like the future of Metro, cleaning up the Potomac and guiding the economy and development of our region. That's good news—and it's kind of cooperation and coordination you don't find in many places.●

MX MISSILE PLAN

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. SCHUMER. Mr. Speaker, when President Reagan announced his decision regarding the MX missile system, Caspar Weinberger proudly stood at his side and entertained the technical questions concerning the new design. Three days later, the Secretary of Defense appeared before the Senate Armed Services Committee in staunch support of the President's plan to build 100 MX missiles, placing 36 in existing Titan silos which have been hardened to withstand pressure up to 5,000 p.s.i., and deferring the deployment of the others until further basing research can be completed. The administrations embrace of this proposal is disturbing, not to mention inconsistent.

Back in February, just 7 months ago, at his confirmation hearings, Mr. Weinberger stated:

Simply putting it (the MX) into existing silos will not answer the two or three concerns I have; namely, that these (silos) are well known and not harded sufficiently, nor could they be, to be of sufficient strategic value to count as a strategic improvement to our forces.

The confusion is highlighted even more by examining the contrasting opinions of high level advisers to the President. While Secretary of Defense Weinberger supported the plan, at the same Armed Services Committee hearing, Gen. David Jones, Chairman of the Joint Chiefs of Staff, registered a different view.

I remain to be convinced that hardened silos will give survivability. I reserve judgment as to whether it would be wise to go ahead with hardening.

How then, if even the President's top advisers on the subject are in conflict, can this MX proposal be deemed anything short of highly questionable?

This conflict between experts is not even the primary reason I consider this plan to be highly questionable. Its technical deficiencies speak well enough for themselves. My primary objection is that the entire concept of spending vast amounts of the taxpayer's money to "superharden" our fixed silos in order to gain survivability until 1984, when a new plan for a permanent solution will be put into effect, is utterly ridiculous. As Mr. Weinberger said, "It is not a final solution, only a system to be used until further research can provide a permanent solution." Recent estimates have placed the cost of this "temporary" program at $7 billion. I cannot support such spending when our present strategic forces are quite competent until research can be completed. Simultaneous destruction of all three elements of the strategic triad is virtually impossible. Further, the United States has many thousands of independently targeted strategic nuclear weapons, about 50 percent more than the U.S.S.R., by far enough to target any forseeable increase in the number of strategic targets in the Soviet Union.

Additionally, the superhardened silos will be as vulnerable to Soviet attack as our present Minuteman and Titan silos. According to the Department of Defense brief, "Soviet Military Power." "The SS-18 is capable of destroying any known fixed-target with high probability." Senator John Tower elaborated on this fact: "Intelligence officials tell us that improved Soviet missile accuracies will enable Moscow to destroy even the 'hardened' silos. Pouring in more concrete and steel will not reduce danger for any appreciable length of time. It could be measured in terms of months rather than years. Beyond that, Pentagon officials have no idea how they will actually harden these Titan silos. There is no plan, no design. They don't even know if it's possible."

Hence, it seems unwarranted for the Congress to appropriate at least $7 billion for such a stop-gap effort, especially in light of current budget constraints.

The Reagan plan was best summed up by former Secretary of Defense, Harold Brown, when he said, "Hardening the silos doesn't get you anything if they are left standing there in the middle of a crater."

The MX is inherently flawed. Congress should scrap it.●

GUARDIAN OF LIBERTY

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. STARK. Mr. Speaker, this year has seen a resurgence of the drive by the CIA and other "intelligence-gathering" forces to undo the reforms and lessons of the Watergate era by giving new and enormous powers to the CIA. It is incredible that so many can have forgotten the painful lessons of the past so quickly.

Fortunately, a number of leaders in the Congress have been resisting these efforts to turn the CIA into a domestic spying agency and to give it new and unlicensed powers against Americans and foreigners abroad. Senator BARRY GOLDWATER has spoken out on these ominous developments. I am also pleased to note, Mr. Speaker, the very active role played by Representative DON EDWARDS, chairman of the Subcommittee on Civil and Constitutional Rights of the House Judiciary Committee.

Chairman EDWARDS, whose district adjoins mine, was recently eloquently commended in an editorial in the November 5, 1981, San Jose Mercury. The editorial describes the terrible dangers inherent in the new Executive order proposal. As Chairman EDWARDS states:

If a free society is sacrificed for a better intelligence system, we have compromised our very goal.

Clearly, it is time for all citizens, conservative and liberal, who believe in a government of laws and of checks and balances to make their concerns known about a pending assault on our constitutional liberties.

Mr. Speaker, I would like to include in the RECORD at this point the editorial from the San Jose Mercury entitled, "Freedom's Just Another Word Under Reagan Order on CIA."

[From the San Jose Mercury, Nov. 5, 1981]

FREEDOM'S JUST ANOTHER WORD UNDER REAGAN ORDER ON CIA

When Sen. Barry Goldwater and Representative Don Edwards agree on anything, it's significant. When they agree that a proposed new executive order governing CIA activities is a frightening threat to civil liberties, it's time to head for the tornado shelter and batten down the doors.

The conservative Republican from Arizona is chairman of the Senate Select Committee on Intelligence, the liberal Democrat from San Jose is chairman of the Subcommittee on Civil and Constitutional Rights of the House Judiciary Committee. Both are alarmed by the Reagan administration's proposed revision of Executive Order 12036, the document that defines the functions of the Central Intelligence Agency, the FBI and other components of the American intelligence machine. Goldwater and Edwards—and the rest of us—have a lot to be alarmed about.

The scariest part of the new order, and the one that has created the most controversy, is Section 2, Paragraph 9, which states: "No one acting on behalf of agencies within the Intelligence Community may join or otherwise participate in any organization in the United States on behalf of any agency within the Intelligence Community without disclosing their intelligence affiliation . . . except in accordance with procedures established by the head of the agency concerned and approved by the Attorney General."

Like a multiple warhead atop an ICBM, that paragraph, with its deceptively turbid wording and curiously inverted structure, contains a number of civil liberties bombshells.

In the first place, it would allow the CIA for the first time to infiltrate and engage in spying against organizations within the country. As a later passage makes clear, the CIA's sleuths would even be allowed to act as agents provocateurs. Under the existing executive order, signed by President Carter in January 1978, only the FBI can engage in such machinations.

Reagan's order also would give the CIA a much longer and looser leash. Under the present rules, acts of domestic counterintelligence must be approved in advance by the attorney general. The Reagan rules would require only that such activities conform to some general, as yet unspecified and inevitably secret "procedures" to be agreed upon by the CIA and FBI czars, and the attorney general.

Invidious as it is, Section 2, Paragraph 9 is by no means the only frightening element of Reagan's proposal. The new order also would:

Remove the provision that Americans abroad can be subjected to continuing physical surveillance only it there is a reasonable belief that they are agents of a foreign power;

Make it possible for intelligence agencies to disseminate information they have collected about American citizens even if they are not the subjects of an investigation—"creating," as Edwards says, "serious privacy questions for Americans who are totally innocent of any wrongdoing";

Authorize the CIA to cooperate with state and local law enforcement agencies, a function presently limited to the FBI; and

Remove the requirement that the president receive a recommendation from the National Security Council before authorizing any covert actions overseas.

In drafting the National Security Act of 1947, the law that created the CIA, Congress took pains to bar the agency from any domestic spying role: "The agency shall have no police, subpoena (or) law enforcement powers or internal security functions." The consequences of ignoring that bit of legislative wisdom became chillingly clear a few years ago with the revelation that the CIA had spied on hundreds of thousands of Americans as part of "Operation Chaos," an elaborate—and unsuccessful—effort to prove that domestic dissenters were the puppets of sinister foreign powers.

Now the White House is about to give the CIA not merely a license but an official mandate to engage in precisely the same sort of police-state tactics again, with only the flimsiest procedural restraints. It's ironic that this administration, in the name of defending America and its institutions, is willing to endanger the very freedoms that distinguish this nation from its totalitarian enemies.

Congressman Edwards expressed the idea well in a different, but related, context. "If a free society is sacrified for a better intelligence system, we have compromised our very goal."●

ELMER B. STAATS, FORMER COMPTROLLER GENERAL, SUPPORTS ACTION TO PROVIDE FOR MORE ADEQUATE PAY LEVELS FOR TOP-LEVEL SENIOR EXECUTIVES

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. WOLF. Mr. Speaker, Elmer B. Staats, former Comptroller General of the United States, has written to me to express the hope that Congress will take some action this year to provide for more adequate pay levels for top-level senior executives. Mr. Staats' letter arrived coincidentally the same day I received the most recent report of the General Accounting Office which indicates once again that it would be cost effective to raise the pay cap. I value Mr. Staats' judgment and counsel, and I ask that the text of his letter of November 9 be included at this point in the RECORD.

WASHINGTON, D.C., *November 9, 1981.*

Hon. FRANK R. WOLF,
House of Representatives.

DEAR CONGRESSMAN WOLF: I am writing to express the hope that Congress will take some action this year to provide for more adequate pay levels for top-level officials. As you know, this was a matter of great concern to me while I served as Comptroller General. I issued several reports to the Congress on the subject and testified a number of times. It is my understanding that it is possible that some action will be taken on this matter with respect to the continuing resolution which expires, I believe, on November 20.

The facts in the case have been well publicized:

1. We now have seven levels of responsibility earning the same pay and, with the increases being permitted for the lower ranks, this will now be increased to eight levels. This adds up to more than 46,000 Federal executives and senior managers.

2. Federal executives were due a 9.1 percent pay increase in October 1980, but appropriation act language prohibited payment of this increase. A similar 7.02 percent raise due in October 1979 was denied similarly.

3. The Commission on Executive, Legislative, and Judicial Salaries recommended substantial increases in their report to the President and the Congress last year. In January 1981, the President recommended an immediate increase of 16.8 percent in executive salaries. This proposal was also rejected by the Congress.

4. And now the House Appropriations Committee and the Senate Appropriations Committee have voted to continue the pay restriction for 1982.

As you know, the Government is the loser because of the high turnover which this pay cap has brought about. The rate of retirement of executives at the pay ceiling increased from 17.6 percent in March 1978 to 67 percent for the 12 months ending August 31, 1980. The Federal Government is thus losing many of its most highly trained professional, scientific and executive managers just at the peak of their careers. Most are talking the position that they can get other employment and collect cost-of-living adjustments on their retirement. They can hardly be criticized for this.

My great hope is that the Congress will see fit to raise its own pay, along with that of members of the executive and judicial branches. The Commission on Executive, Legislative, and Judicial Salaries recommended increases for this group of about 40 percent. While I do not necessarily endorse a percentage figure this high, the case for substantial adjustment upward is a very strong one indeed. If the Congress is unwilling to provide for a pay increase for itself, I suggest that increases be provided at least for executive and judicial branches and for non-elective positions in the legislative branch. In doing so, the Congress would be taking action similar to that which was recenty taken in Great Britain and Canada where the linkage between legislative salaries and others had been broken. In fact, the linkage within the United States has been in effect only since 1965.

As Comptroller General, I was responsible for recommending actions which I believed would improve the operations of the Feder-

al Government and for making studies of the cost and benefits of government actions. Doing something here would certainly be cost effective and I hope that you will use the letter for whatever value it may have as the present continuing resolution expires.

Sincerely,

ELMER B. STAATS.●

SMOKING AND PREGNANT WOMEN

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. STOKES. Mr. Speaker, the first advertisement showing a woman smoking appeared in 1919. Then in 1926 a beautiful young model in the advertisement of a leading brand did not smoke, but pleaded "blow some my way." But in 1928 a famous ad urged women to "reach for a Lucky instead of a sweet."

By 1934, according to a survey by the Milwaukee Journal, 16.7 percent of adult women smoked cigarettes. Moreover, it estimated that women consumed 135 packs per year compared to 244 for men.

After 1940, women's smoking rates rose rapidly. According to the "Health Consequences of Smoking for Women—A Report of the Surgeon General" and by 1965, 33.3 percent of American women were smoking versus 51.1 percent of men. Although smoking among all adult males had declined continuously since 1965 to 28.2 percent for women versus 36.9 percent for men in 1979, "the first signs of an epidemic of smoking-related disease among women are now appearing." The gloomy part of the picture, however, is that cigarette smoking among teenage girls has increased, although smoking among teenage boys has remained virtually constant.

Besides the harmful effects of smoking generally, for those entering the marital age and mothers-to-be there are serious implications to be considered. Thus a pregnant woman who smokes risks not only her health but also changes the conditions under which her baby develops.

Some of the factors involved in maternal smoking include spontaneous abortions, the deaths of unborn and newborn infants, pregnancy complications, and the long-term effect on those children who survive.

Women who smoke during pregnancy have more babies born dead, and more of their babies die during the first month of infancy, than those of nonsmoking mothers. The more a woman smokes during pregnancy, the greater the reduction in her infant's birthweight.

Mr. Speaker, these and other serious health consequences of smoking on women and those that affect men also have not deterred them from smoking. Although many agree that it is harmful and is a health hazard, the lifestyle persists. But there are hopeful signs that something can be done to help people take better care of themselves and their children by learning the health consequences of tobacco use.

We have already reported that smoking has declined among adult men and women, increased among teenage girls, and remained constant among teenage boys. Many antismoking programs exist for both young people and adults. But it is still not known what forms of education are most effective in keeping young people from moving from experimentation with cigarettes to becoming habitual smokers. Nor is it known how best to help adults give up the smoking habit.

There is a program, however, that can start people out on the right track. That is the Great American Smokeout sponsored by the American Cancer Society on November 19.

This can be a great day for smokers, particularly girls and pregnant women, for it is a day on which they can show themselves that quitting the habit may not be as difficult as they may have thought. It is done by giving up cigarettes for a day, 24 hours.

Last year a Gallup poll reported that nearly 16.5 million Americans tried to give up smoking during the Smokeout. Almost 5 million made it through the 24 hours, and 1 to 10 days later 2.2 million were still not smoking.

This is an effort to be commended. I hope that many more will join the Smokeout this year and that those who kick the habit for good will increase in number, especially for girls and pregnant women.●

ELMIRA IS FAR FROM DYING

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. LUNDINE. Mr. Speaker, the plight of America's major industrial cities attracts so much attention that we sometimes forget that dozens of smaller urban areas face the same problems—often with as much civic resolve and ingenuity. Recently, this neglect was partly redressed by a front-page story in the Wall Street Journal on Elmira, N.Y. With a population of more than 35,000 people, Elmira is nearly the largest city in the 39th District of New York. It is a city with a distinctive history: for many years the home of Mark Twain, and for many decades a significant manufacturing center. In recent years, however, Elmira has shared the fate of the rest of America's urban, industrial heartland in the Northeast and Midwest. Business failures have yielded persistent unemployment and an eroding tax base. And, in 1972, meteorological insult was added to economic injury when hurricane Agnes flooded much of the city.

Nevertheless, as the Wall Street Journal justly points out, Elmira is far from dying, and, indeed, thanks to the perseverence of some of its civic leaders, there are fresh signs of an improved future. I would add that, in my judgment, the Federal Government should be an active partner rather than a neutral bystander in this process of revitalization. Elmira is a textbook example of why the revitalization tools which the Reagan administration is trying to destroy—such as the Appalachian Regional Commission, the Economic Development Administration, and the urban development action grants—are especially needed today.

One other Federal assistance program which the President seeks to eliminate deserves special notice. This is the new labor-management cooperation program which recently provided another encouraging boost to Elmira's future which the Journal fails to mention. Last month, the Chemung County Labor-Management Committee, which is based in Elmira, was one of only nine such community groups in the country to successfully compete for the first round of grants under this Federal program. The grant will support the Chemung committee's work in promoting cooperation between local unions and businesses. This cooperation, in turn, will yield improved productivity in individual workplaces and an enhanced economic climate for the entire city. I am very encouraged by this development.

Overall, I believe my colleagues will find the Wall Street Journal's visit to Elmira instructive, and I commend this article to their attention:

ELMIRA WILL NEVER BE WHAT IT USED TO BE, BUT IS FAR FROM DYING

TOWN IN UPSTATE NEW YORK LOSES PLANTS AND PEOPLE; OPPORTUNITIES STILL EXIST

(By James M. Perry)

ELMIRA, N.Y.—Between 1880 and 1890, this city on the Chemung River in upstate New York grew by 50.4 percent. There were 48 hotels downtown, some of them respectable, and 67 passenger trains stopped at the three railroad stations every day.

There was history to the place, too. Regiments from George Washington's army destroyed the Iroquois Indian Confederation in a battle here. Mark Twain, summering at Quarry Farm, wrote some of his masterpieces here. At one time, this was the fire-engine capital of the world; later it was the typewriter capital. And because gliders are made here, it still thinks of itself as the soaring capital of the world.

But things just aren't the same these days.

The population, as measured by the 1980 census, is 35,327, down 4,618 from 1970, and even down 345 from Elmira's turn-of-the-

century salad days. Now there isn't a single hotel downtown, and the last passenger train went through here in 1970. The typewriter business—it once employed 6,600 people—is gone, and the fire-engine company is owned by an Ohio-based conglomerate. The glider company almost went out of business two years ago.

Elmira, the Cassandras will tell you, is dying.

SOMETHING SPECIAL

If so, this reporter would regret it. I was born here, and my forebears settled here long ago. The family business, an insurance agency in which my brother is a partner, was founded in 1860.

Elmira is special to me, but it isn't so different from dozens of other small cities that stretch across the old industrial heartland from Massachusetts to Wisconsin. In all the land-wringing about the problems of big cities in this belt—Buffalo, for example, or Cleveland—the fate of these smaller cities generally has been neglected.

So I came here to see if there is any life in the old home town—and, by extrapolation, in the rest of these towns.

There is first of all, conventional wisdom to consider. Conventional wisdom says that industry has left these small cities, with their strong unions, for the Sun Belt. Conventional wisdom, especially regarding Elmira, also says that people are "down" on their future. "Elmira seems to think it's always going to lose," says Democrat Stanley Lundine, the district's Congressman.

But, after spending a week here, talking to people and touring the plants and businesses, I think there is good news: Elmira isn't dying; it is changing. It just wore out, and the recovery is slow and painful—and a little depressing, for Elmira will never be the town it used to be.

SIGN OF CHANGE

Some changes are obvious. The day I arrived, workmen were removing the signs from Sears, Roebuck's downtown store. Sears is abandoning downtown for its new store in the Arnot Mall in Big Flats, halfway to Corning. One of my relatives is so angry about it that she cut up her Sears credit card.

And many of the old factories aren't exactly humming. The one we called "The Eclipse"—it was the Eclipse division of Bendix Corp.—employed almost 9,000 people during World War II, making cannons and artillery fuzes. The plant is half empty now, a part of Facet Enterprises, and fewer than 700 people work in it, making auto parts.

Despite the conventional wisdom, though, the Sun Belt was never a factor. Typical of Elmira's trouble is what happened to Remington Rand. In 1937 it was offered—and accepted, for nothing—the old Willys-Morrow plant, which had employed 6,000 workers in the 1920s, making transmissions, universal joints and gears for Overland and Willy-Knight automobiles. My grandfather was a manager at the plant, and I still have a pistol he carried—carried unhappily, for he was a gentle man—during periods of labor unrest. Elmira was a tough labor town.

The Remington Rand plant became the biggest office-machine factory in the world, or at least Remington boasted that it was. But in the mid-1950s the company began switching production abroad. In 1972, it closed the plant entirely, moving its last operation north to Canada, not south to the Sun Belt.

CONGLOMERATE UNITS

Other plants remain in operation here, but many of them are owned now by conglomerates, with headquarters far away. Kennedy Valve, for example, has been a local institution since 1907; it is now a subsidiary of ITT Grinnell Corp. of Providence, R.I. LRC Electronics Inc. is a division of Augat Inc. of Mansfield, Mass. American Bridge is part of U.S. Steel Corp.

And what is perhaps the city's best-known company, American LaFrance, the maker of those handsome custom-made fire engines, is a subsidiary of Figgie International, Harry Figgie's personal conglomerate (it also makes baseball bats) based in Willoughby, Ohio.

The president of the American LaFrance Division is Gerald Peters, who comes from Kentucky and displays in his office an autographed picture of former Alabama Gov. George Wallace. He isn't a typical Elmira businessman.

But he knows something about trucks, and maybe he is a lesson for Elmira. He came here, people say, to close down this plant. It was old and shabby and the work force wasn't very efficient.

"You wouldn't believe it," he says, "but they were making fire trucks in stalls. People brought the parts to the stalls and they put the trucks together. You couldn't tell which truck would be finished first. It depended on the foreman. If he was tough, he'd cannibalize parts from the next stall. We've got conveyor lines now, and it's a lot more efficient."

They also have a new plant, thanks to hard work over 10 years by the city, the county and the state, and here the story comes full circle. LaFrance is moving production into the old Remington Rand plant, where the Willys-Morrow plant used to be. It had been completely renovated, and Mr. Peters says the fire-engine business is here to stay.

Not just fire trucks, either. Mr. Peters reasons that there is more garbage to be collected than there are fires to put out. So he has taken his plant into the production of what he calls "refuse chassis" and what the rest of us call garbage trucks. When he heard that the Egyptian army wanted 200 trailers to carry tanks, he picked up that contract, too. "We opened the old Lehigh Valley Railroad repair shop in Sayre (Pa.), went out on the street to sign up 40 welders and turned those trailers out in nine months," Mr. Peters says. "You can't sit back these days and just wait for new business."

Others here understand that. Richard Evans is one of the city's movers and shakers and the owner of a roofing business. When business dried up here, he bought a plane and flew off and found business elsewhere. A local construction company, facing the same kind of problem, went off in the Chesapeake Bay area to build a bridge.

What Mr. Peters has done for American LaFrance is greatly admired by local business people, but there is a down side to it.

"When these companies were locally owned they did their business here," says Boyd McDowell II, president of Chemung Canal Trust Co., Elmira's only locally owned bank. "They banked locally, but now American LaFrance banks in Ohio; Kennedy Valve does its business in Rhode Island. And they all "ride the float, because the farther away the bank is, the longer they can hang on to their money. More and more, we are learning we have to depend on our local people and our local companies. That's our future."

THE GLIDER COMPANY

One of the local companies everyone roots for is Schweizer Aircraft Corp. Anyone flying into the Elmira airport (on the few flights that remain) knows about its gliders. Other aircraft seem to weave through the gracefully swooping sailplanes to reach the runway.

Schweizer was founded by three brothers who began building sailplanes when they were in high school. One of them, William, remains at the helm. Gliders don't sell very briskly these days, though, priced as they are from a knocked-down $18,000 model to a competition special at $40,000. "It's a luxury item," says William Schweizer, who, at 63, still soars in them regularly.

The craze now, he says a little sadly, is for hang gliders. But Schweizer doesn't build them and doesn't want to. The suspicion arises that maybe if American LaFrance's Gerry Peters were running Schweizer, he would be making hang gliders.

Schweizer survives on a more mundane product—a crop-dusting, bi-wing aircraft called the Ag-Cat. For 20 years, Schweizer made the plane for Grumman Corp., until Grumman cut Schweizer adrift two years ago. "We lost 80 percent of our business and had to lay off more than half of our 550 employes," says Paul Hardy Schweizer, Bill's son and a company vice president. "A big company, one of those conglomerates, would have closed the plant. We decided to tough it out. That's what it means to be involved in a community.

Now, Schweizer has bought out the Ag-Cat business and is back in production under its own name, turning out one plane a week. At the same time, the company hustled new contracts—making wing tips for Boeing's new 757 airplane, cargo doors for Beech's Super King Air 200s, even—in a one-shot deal—the tail assembly for something called the Cyclo-Crane, a cross between a blimp and a dirigible that is designed to lift and transport heavy objects.

"We feel we've made this a solid company that no longer will be subject to economic vicissitude," says, young Mr. Schweizer, who came home to his family's business after working eight years in Seattle for Boeing.

A CONTINUING FANTASY

Some of Elmira's business leaders continue to fantasize about some great national company's coming here to open a huge new plant and put Elmira back together the way it used to be. Last year, the entire Elmira establishment joined forces to bid for a 1.1 million-square-foot engine plant that was to be constructed jointly by J. I. Case Co. and Cummins Engine Co. The total investment was to be $356 million, and the local community, with the cooperation of local and state government, came up with $150 million in incentives. Elmira's industrial-development agency put in thousands of hours pulling the deal together.

"We understand they looked at 196 sites in North America, and we were one of the three finalists," says Andrew Pazahanick, the development agency's executive director. But as things turned out, space opened up on one of Cummins's own plants in North Carolina, and a new plant was not needed. A postscript: Elmira wouldn't have won anyway. Says Cummins executive James Shipp: "It was in the final five, but we had concluded it was too far out of the transportation area for our customers and suppliers."

The fact is that Elmira isn't likely to see another new plant that employs thousands

of workers. Unemployment here stands at 8.4 percent, compared with 7.5 percent nationally. But significant industrial opportunities still exists.

Not long ago, General Electric Co. left town, closing its foundry that had been a fixture here for decades. But a funny thing happened. Representatives of Trinity Valley Iron & Steel Co. of Ft. Worth, Texas, deep in the heart of the Sun Belt, came to Elmira to look at the equipment, with the idea of buying some and taking it home. Instead, they bought the foundry and put it back into production. Employment, at 300 people, is back to where it used to be, and orders totaling $20 million are already backed up.

"We're delighted with our work force here," says Thomas Kowalik, a foundry official. "They speak English."

CONFIDENCE AND PASSION

There are successful smaller companies here, and surely they represent the future. The Hilliard Co. employs 175 workers and makes industrial clutches and oil-filtering equipment. It plans to expand. "We're going to make it here," vows Vinton Stevens, the president. Hardinge Brothers employs almost 1,000 workers and makes high-precision lathes and related equipment. "We're happy here," says its president, Robert Bauman. "We aren't moving."

Every city needs people with passion. One such person here is George Zurenda, president of Elmira Stamping Co. It was Mr. Zurenda's idea to convert the old-Keeney Theater into what is now the Samuel Clemens Performing Arts Center, with attractions such as the New York Philharmonic Orchestra. The center has given Elmira a much-needed boost.

Any every city needs an eccentic genius. Elmira has one in Whitney Powers who started his company, Powers Manufacturing, in a chicken coop in 1959. He had worked for a glass bottle maker here for years and saw the need for a new product—an electronic machine to test and inspect glass bottles. He invented one and how he produces it. "It's the American way," he says. I saw a need and I filled it."

When Mr. Powers found that he couldn't get electronic circuit boards fast enough for his machines, he opened a separate business to manufacture them himself. Now, he says, small-time electronic geniuses from all over upstate New York are coming to purchase circuit boards for their own experiments. "These little guys are out there," Mr. Powers said: "Most of them come out of Cornell. Mind you, one day here, we're going to be the new Silicon Valley."

Now that's the old home-town spirit.●

BULLETPROOF VESTS FOR CRIMINALS—BIAGGI BILL SAYS NO

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. BIAGGI. Mr. Speaker, today I am introducing legislation which is aimed at keeping bulletproof vests off of criminals in the United States. Under my bill, a bulletproof vest would be redefined as a firearm. This would mean that those who sell bulletproof vests must obtain proper licenses.

Current Federal law now restricts importing, manufacturing, interstate commerce, or dealing in firearms or ammunition by other than those who have properly obtained licenses. By redefining bulletproof vests as a firearm brings them under these same provisions.

Further, my bill would make unlawful the sale of bulletproof vests to or their purchase by a person under indictment or a fugitive from justice.

As a police officer for 23 years in the city of New York I feel very strongly about the need for passage of this legislation. I find it appalling that hardened criminals have routinely been provided with the additional protection of a bulletproof vest—protection which allowed them to commit more crimes.

I have introduced a bill identical to one sponsored by my colleague, Mr. MOYNIHAN. Both of our bills were developed after close consultation with Mr. Phillip Caruso—president of the New York City Patrolmen's Benevolent Association. This problem has a long history but one recent case illustrated the need for this legislation. On October 20, one armored car guard and two police officers were killed in what has been called the Brink's robbery. It was disclosed that one of the holdup gang was wearing a bulletproof vest which allowed the assailant additional time to inflict a fatal wound on one of the officers and later he was found to have a spent bullet from the dead policeman's gun in his pocket.

I emphasize that it is not my intent to deny honest law-abiding citizens the right to wear and own a bulletproof vest. Its sole intent is to keep the criminal element from benefiting from the protection of a bulletproof vest. I urge all of my colleagues who are concerned about law and order to join me in support of this vital legislation.●

U.S. CONSULATE IN GOTEBORG, SWEDEN

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. OBERSTAR. Mr. Speaker, the State Department long has been a convenient target for budget cutting, under both Democratic and Republican administrations. It is a department without a constituency of ready defenders.

Unfortunately, the cost savings through budget reductions at the State Department are often exceeded by the detrimental effects of those reductions on American interests worldwide. In 1980, President Carter closed seven consulates and achieved an annual cost savings of under $2 million. I believe then, as I do now, that these cost reductions were shortsighted and pennywise and pound foolish. One of the consulates closed was located at Goteborg, Sweden, a port city in west Sweden, an area of critical importance to Swedish naval operations. As the United States was closing its consulate in Goteborg, the Soviet Union was constructing and opening its new consulate building in Goteborg. The incident involving the Soviet submarine in Swedish waters underscores the importance of maintaining an American presence in Goteborg to respond to Soviet adventurism in Scandinavia.

The United States should reopen the consulate at Goteborg. Earlier this week, I wrote to Secretary of State Alexander Haig to urge that the State Department take this action. I ask that a copy of my letter to Secretary Haig be included in the RECORD. I urge my colleagues in the Congress to join me in this appeal to Secretary Haig that the American consulate at Goteborg, Sweden, be reopened immediately.

HOUSE OF REPRESENTATIVES,
Washington, D.C.

Hon. ALEXANDER M. HAIG, Jr.,
Secretary of State,
Washington, D.C.

DEAR MR. SECRETARY: In 1980, the Carter Administration closed the U.S. Consulate at Goteborg, Sweden, as part of a worldwide effort to reduce consular expenditures. I opposed that decision because I believed it was a blatant example of shortsighted cost savings achieved with enormous long-term detriment to American interests overseas.

I have written Under Secretary of State Walter Stoessel to express the importance of reopening the Consulate at Goteborg, which was the only American Consulate in Sweden outside of the Embassy in Stockholm. The deplorable incident involving the Soviet submarine in Swedish waters underscores the importance of maintaining an active American presence to respond to Soviet adventurism in the area of Scandinavia. Unfortunately, while the United States was closing its Consulate in Goteborg, the Soviet Union constructed its new consulate building at Goteborg.

The United States should now act decisively to strengthen United States-Swedish relations. I urge you to reopen our Consulate at Goteborg as soon as possible. The annual budget for the Consulate totaled approximately $225,000. The value to American interests, both strategic and commercial, far outweighs the Consulate operating budget.

A decision to reopen the Consulate would provide a tremendous boost to pro-American feeling, which runs strong in west Sweden.

With best wishes.

Sincerely,

JAMES L. OBERSTAR,
Member of Congress.●

TECHNICAL CLARIFICATION REQUIRED TO HELP U.S. OLYMPIC TEAM

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. VANDER JAGT. Mr. Speaker, together with my colleague from New Jersey (Mr. GUARINI), I am introducing a bill to amend the Internal Revenue Code in order to clarify the tax-exempt status of certain amateur sports organizations. This legislation is intended to be a technical clarification of language which became law by section 1313 of the Tax Reform Act of 1976, by which Congress intended to make it easier for amateur sports organizations to obtain tax-exempt status. In so amending section 501(c)(3) of the Internal Revenue Code in 1976, language was also added which excluded from tax-exempt status those organizations which provided facilities or equipment. This was done to prevent social clubs and groups of casual recreational athletes from receiving tax-deductible donations. The legislative history of the amendment makes it clear that it was not intended to apply to bona fide amateur sports organizations.

However, because of the Treasury Department's strictly literal interpretation of the language of the amendment, many national governing bodies for sports on our Olympic program have lost their tax-exempt status and many others are in imminent danger of losing theirs simply because they provide modest training facilities and equipment. Among these organizations are the national governing bodies for the sports of gymnastics, track and field, diving, and volleyball. Many other bona fide amateur sports organizations are experiencing similar problems. In fact, I am advised that there are currently pending at the Internal Revenue Service approximately 150 applications for tax-exempt status by various bona fide sports organizations which requests the IRS will probably be required to deny unless corrective legislation is enacted.

Without tax-exempt status, many of these organizations are unable to raise the funds necessary for their existence. This will affect severely our ability to field a strong Olympic team in 1984. It is vital that Congress enact this corrective legislation this year.

This amendment simply clarifies the intent of Congress as it was expressed in 1976 and will have a negligible revenue impact.

I strongly urge all my colleagues on both sides of the aisle to support this measure.●

TORTURE REPORTED OF ETHIOPIAN JEWS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. SOLARZ. Mr. Speaker, I would like to call to the attention of my colleagues a most compelling article that appeared in the New York Times on Sunday, November 15, concerning the disturbing situation that faces the Jews of Ethiopia.

The suffering of this small and ancient community has not until recently been well known, except to a handful of concerned Americans, many of them members of the American Association for Ethiopian Jews.

Mr. Speaker, I include this article in today's RECORD:

[Special to the New York Times]

MASS ARRESTS AND THE DENIAL OF EDUCATION IN NORTHERN AREA CITED BY VISITING GROUP

(By David K. Shipler)

JERUSALEM, NOVEMBER 14.—Jews in a northern province of Ethiopia are being arrested and tortured and their villages deprived of educational and other Government services, according to a group of 13 Americans and Canadians who recently visited the country.

"In the last six to eight months, a dozen groups of 50 to 100 individuals have been arrested, kept in prison for a few months, some of them tortured," said Steven Bauman, executive director of the Canadian Association for Ethiopian Jews, which is based in Toronto.

He and the other travelers said they had interviewed Falashas, as the black Jews of Ethiopia are called, in Addis Ababa, the capital, in Gondar, capital of Gondar Province, and in a mountain village that they reached on horseback. They spent 10 days in Ethiopia, entering on tourist visas, then stopped in Israel before returning home.

Most of the group, hoping some day to return to Ethiopia for further investigations, asked not to be identified. Mr. Bauman served as their spokesman.

WITHOUT EXPLICIT APPROVAL

He said that the most acute suffering appeared to be occurring in Gondar Province, where the governor, whom he identified as Major Melaku, "has taken it upon himself to go after the Falashas." The governor seemed to be conducting his campaign without any explicit authorization from the central Government, Mr. Bauman explained.

Hebrew teachers and religious leaders are being rounded up, he said, and the Government's development program has been closed down in villages occupied by the Ethiopian Jews. Twenty of their schools have been shut and 190 teachers and administrators dismissed, Mr. Bauman reported. The Jewish Children are not accepted into Government-run schools.

As Mr. Bauman and the others interpreted Major Melaku's motives, they center on a blend of ancient anti-Jewish sentiments and contemporary anti-Zionism, historical contempt for the Jews and current apprehension about links they are said to have to Israel. Major Melaku is said to derive his authority from his loyalty to Ethiopia's Marxist ruler, Lieut. Col. Mengistu Haile Mariam, whom he helped during the coup against Emperor Haile Selassie in 1974.

The Ethiopian Jews are believed to number about 28,000, according to estimates made five years ago; about 85 percent live in Gondar Province. The term Falasha is not their own but is the Amharic word for exiles. The Ethiopian Jews call themselves the House of Israel and believe they are descended from nobles close to Menelik, son of King Solomon and the Queen of Sheba.

DEAL BY BEGIN CONFIRMED

Although for years Israel showed no interest in helping Ethiopian Jews to immigrate here, members of the American-Canadian group said they could confirm a recent assertion in Toronto by Simcha Jacobovici, an Israeli who worked on the problem, that Prime Minister Menachem Begin and Colonel Mengistu made secret arrangements in 1977 to exchange Israeli arms for Ethiopian Jews. Only 121 Ethiopian Jews were allowed to leave before Ethiopia's expanding ties with the Soviet Union made Soviet weapons plentiful and Israeli arms superfluous. Mr. Begin's office has denied the accounts.

Since then, Ethiopian Jews have arrived in Israel only indirectly, by circuitous routes. The total number is about 1,400.

Their situation in Ethiopia has worsened in recent months, the visitors found, partly because old superstitions have been revived that blame them for crop failures and hunger in the region. Mr. Bauman said that the villages of the Ethiopian Jews were in obviously more desperate condition than those of non-Jews. "The Ethiopians would have cattle, albeit diseased cattle," he said, "but the Falasha villages would have nothing, not even diseased cattle."

He said this was partly because Christian landowners had blocked the carrying out of the Government's land redistribution law as it pertains to Ethiopian Jews, leaving them as tenant farmers who are charged up to half their crop for rent.

ARRESTED MAN'S ACCOUNT

While the land problem is universal among Ethiopian Jews, the group found that their arrest and torture seemed to be limited to Gondar Province. Several former prisoners were interviewed, Mr. Bauman reported, including one of the leaders who was accused of being a pro-Zionist ringleader.

He told them he had been tied by his hands and feet to a long stick, suspended by the stick and beaten with clubs. He said that he received no medical attention, and that he had been gagged and told to raise a finger when he was ready to confess. Between the beatings, which continued for about two weeks, Mr. Bauman quoted him as saying, he was thrown into a large room containing about 400 other prisoners who were being tortured, Jews and non-Jews. Many had large open wounds that had become worm-infested, Mr. Bauman was told.

The man suffered from broken bones that were never set, Mr. Bauman was told. He was released after a year and a half and walks with a limp.

Another man, currently in prison, is a religious leader, Mr. Bauman said, whose family can visit him only on Sundays, between torture sessions. "He is carried out on a stretcher," Mr. Bauman reported, "and has several bones broken. He can't move from the stretcher."

Mr. Bauman said that an international conference on Ethiopian Jews was being planned for next May in Jerusalem to focus attention on their plight.●

THE STATE OF OUR TAX COLLECTION SYSTEM

HON. AL SWIFT

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. SWIFT. Mr. Speaker, we have been so concerned lately about tax policies—as to how much or how little can be cut from the budget—that I fear we are overlooking a very important aspect of our tax system which is, quite simply, the collection of the taxes themselves.

The methods in which taxes are collected by the Internal Revenue Service were very clearly depicted on CBS television's Sunday evening program—"60 Minutes." The fact that it was investigated by CBS was not the first notice of this issue. I first became aware of it in meetings with my constituents.

That CBS would report it only leads more credence to something which has become a growing concern to most Americans. What I am talking about are the arbitrary and often autocratic methods used by the IRS in carrying out its duties.

Our Federal tax system has always worked quite well because Americans are willing to pay their share of taxes. We are practically unique in regard to freely paying our taxes. However, continued policies of harassment by the IRS will change that very quickly.

The Ways and Means Committee must recognize the possible consequences of leaving unanswered, questions that are being asked by more and more Americans concerning the hostile methods employed by the IRS. It is amazing what Americans will do if you say "please" and what they will not do if you dictate or intimidate them.

While the Ways and Means Committee has been unusually busy this year, I feel it must find time in the near future to conduct a vigorous oversight investigation of the IRS's tax collection methods.

We need to assure the American taxpayer that the tax structure is fair and that the administration of collecting taxes gives proper regard to the dignity and basic rights of citizens. If we do not pay heed to what our constituents and the media have discovered, then the basic viability of our tax collection system will likely come apart.

If the IRS behaves like the Sheriff of Nottingham, Americans will surely think of Robin Hood. Let us head that off by taking action to assure that fairness and reason prevail in the IRS.●

THE GREAT AMERICAN SMOKEOUT

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. STOKES. Mr. Speaker, I wish to bring to the attention of my colleagues and annual event that has had great impact on the lifestyles and health of millions of Americans. It is the Great American Smokeout, sponsored by the American Cancer Society, and scheduled this year for November 19.

It is a special day for cigarette smokers, a day on which they prove to themselves that quitting the habit is possible, and not as difficult as many might fear. The Great American Smokeout is a lively and fun event. It emphasizes the benefits and techniques of quitting rather than the hazards of smoking. It is an upbeat and good-natured effort to encourage smokers to quit for just a day—24 hours—to prove to themselves that they can. Lots of them have ended up quitting for good.

Mr. Speaker, the first mass movement of smokers was led by Lynn R. Smith, editor of the Monticello (Minn.) Times, in his hometown in 1974. His idea of "D-Day" quickly spread throughout Minnesota under the sponsorship of the American Cancer Society. In 1976, it skipped west to California where it became known as the Great American Smokeout and enlisted more than 1 million smokers who signed pledges vowing that they would go 1 day without smoking.

In 1980, according to a poll conducted by the Gallup organization, nearly 16.6 million American smokers attempted to give up cigarettes on Smokeout day. Just under 5 million succeeded for a full 24 hours. One to ten days later 2.2 million were still not smoking.

The Smokeout has included rallies with gigantic ashtrays in public squares where people pitch in their cigarette packages, telephone pledgeins, parades, radio and television promotions, and assorted sight gags. Great American Smokeout personalities have included actors Ed Asner and Sammy Davis, Jr., singer Natalie Cole, who was last year's national chairman of the event, and this year Larry Hagman, "J. R." of the world-famous television series "Dallas," is leading the event.

On the more serious side, Mr. Speaker, most smokers concede that cigarettes are dangerous. According to the American Cancer Society's "Cancer Facts and Figures for 1981," smoking is responsible for about 83 percent of lung cancer cases among men and about 43 percent among women—more than 75 percent overall.

In recent years, however, the proportion of adult smokers in the U.S. population has been declining. From 1970 to 1978 adult male smokers declined from 43.5 percent of the population to 36.9, while women smokers decreased from 31.1 percent to 28.2 after a meteoric increase during the last decade. Teenage smoking increased significantly in the late 1960's and early 1970's, and still concerns medical authorities, although smoking among this group has also shown a slight decline.

There are now over 30 million ex-smokers in the United States, but 54 million others collectively smoke more than 620 billion cigarettes a year.

I believe this has grave potentialities for the health of the American people. The Great American Smokeout, however, provides smokers with a challenge that, if met, will mean great benefits for better health and less risks of lung cancer and other diseases.●

U.S. VISA POLICY—ONLY SOME IRISH NEED APPLY

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. BIAGGI. Mr. Speaker, over my 13 years in this House and especially during the more than 4 years I have served as chairman of the ad hoc congressional Committee for Irish Affairs, I have been opposed to our State Department's visa policies as they apply to citizens of Northern Ireland.

It has been my firm contention that the Department of State conducts a most discriminatory policy in the granting of visas—and as a result, imposes a form of censorship against many thousands of Irish-Americans. The Department has also been shown to indulge in selective morality in their visa issuances.

The most recent example in the long history of this problem is the visa case of Mr. Owen Carron—an elected Member of the British Parliament. Mr. Carron was scheduled to visit the United States to speak to a number of Irish-American organizations, as well as to meet with various Members of Congress, including myself. The State Department denied Mr. Carron's visa for a variety of reasons which I consider to be specious and unconvincing. Since when do we deny visas because of statements made by the applicant? Since when does the "belief" of a consular officer carry the weight which could lead to a visa denial?

It is especially interesting to note that when the State Department initially advised my office as to the reasons why Mr. Carron's visa was

denied—they stated that his close relationship with the Sinn Fein political party was a factor. My office advised State that Sinn Fein is a legally sanctioned political party in Northern Ireland, as well as the Republic of Ireland. This reason was dropped in the official letter which I received last week from State—further weakening the argument for their decision.

The Department of State in this same letter said that they have in fact granted a multiple entry visa good for 3 years to the Reverend Ian Paisley. Mr. Paisley has gained international attention through his public statements of bigotry and hatred against Catholics in Northern Ireland and has openly advocated the use of violence. Yet according to State, "after careful consideration of his application it was determined there were no grounds of ineligibility which would prevent the issuance of a visa and accordingly, a visa was issued." Yet on the other hand, a duly elected Member of the British Parliament is denied because he was "seeking to enter the United States to engage in activities prejudicial to the American public interest" by "conducting a publicity tour on the political situation in Ireland."

I intend to seek a reversal of State's ruling in this matter and hope those of my colleagues who feel as I do will join me in this effort. The State Department professes a policy of neutrality on the Irish issue yet their visa policies are as much an example of political meddling as one could imagine. The method by which we issue visas to citizens of Northern Ireland should not smack of the kind of selective morality that we have seen in the Carron case.

I wish to share with my colleagues, the letter I recently sent to State seeking an explanation of their actions in denying Mr. Carron's visa and the Department's response.

OCTOBER 22, 1981.

Mr. RICHARD FAIRBANKS,
Assistant Secretary for Congressional Affairs, Department of State, Washington, D.C.

DEAR MR. FAIRBANKS: I am writing to inquire about the State Department's denial of Owen Carron's application for a visitor visa. Mr. Carron, who is a member of the British Parliament, was recently denied a visa for visiting the United States.

I am interested in knowing the State Department's reasons for denying Mr. Carron's application. He is not a member of a proscribed organization and he was scheduled to address several well-respected Irish-American groups as well as to meet with local Massachusetts public officials and Members of the U.S. Congress. Who makes the final decision to award to deny an application for a visitor visa to the United States? Who made the final decision in Mr. Carron's case? Is a special consideration usually given to elected public officials of foreign countries when they apply for permission to enter the United States?

As I was to meet with Mr. Carron during his visit to the U.S., I am very much interested in the reasons for which he was denied a visa. Please respond to me at my Washington, D.C. office.

With kindest regards, I am

Sincerely,

MARIO BIAGGI,
Member of Congress.

DEPARTMENT OF STATE,
Washington, D.C., November 9, 1981.

Hon. MARIO BIAGGI,
House of Representatives,
Washington, D.C.

DEAR MR. BIAGGI: I am replying to your letters of October 22 concerning the visa denial to Mr. Owen Carron and the issuance of a visa to Mr. Ian Paisley.

Mr. Carron, an elected member of the British Parliament, had stated his intent to visit the United States to "conduct a publicity tour on the political situation in Ireland." On October 16, Mr. Carron's visa was refused under section 212(a) (27) of the Immigration and Nationality Act. This section of the law, in part, prohibits the issuance of a visa to any foreign national who seeks to enter the United States to engage in activities prejudicial to the American public interest.

Among the factors that led to Mr. Carron's refusal were Mr. Carron's public statements in support of the legitimacy of violence and para-military efforts in Northern Ireland and the strong likelihood that he would be engaged in fund-raising activities on behalf of the Provisional Irish Republican Army. It was the Department's opinion that Mr. Carron's entry would have had serious and adverse effects on American foreign policy interests vis-a-vis both the United Kindgom and Ireland, in addition to running counter to the worldwide U.S. policy of opposition to terrorism. For these reasons the issuance of a visa to Mr. Carron would therefore have been prejudicial to the public interest. The Department's determination was made despite Mr. Carron's position as an elected Member of Parliament.

Mr. Ian Paisley applied for a visa in late 1980. After careful consideration of his application, it was determined there were no grounds of ineligibility which would prevent the issuance of visa and accordingly a visa was issued.

I wish to emphasize, however, that the visa applications of Mr. Carron and Mr. Paisley are individual and separate cases. Both decisions represent application of U.S. immigration law in specific cases. All visa applications are adjudicated on an individual basis at our overseas missions and referred, as appropriate, to the Department for supplementary information and opinion. Although the decisions on the applications of Mr. Carron and Mr. Paisley were made at our Consulate General in Belfast, both decisions were made on the bases of advisory opinions from the Department which were provided to the Consulate General after careful consideration by the Department.

You should be aware that visas are being issued in significant numbers to residents in Northern Ireland. For example, in fiscal year 1979, 17,522 nonimmigrant visas were issued by the Consulate General in Belfast. In fiscal 1980, 24,847 nonimmigrant visas were issued—an increase of approximately 40 percent over fiscal year 1979. The political beliefs of applicants are not criteria for issuance or refusal. The key issue is whether there are grounds of ineligibility—such as advocacy of violence or terrorism—as prescribed under U.S. law. It was under such grounds, for example, that Andy Tyrie, head of the Ulster Defense Association, was refused a U.S. visa the last time he applied in July 1980. In other instances, we found no grounds of ineligibility preventing visa issuance to the family members of the deceased hunger strikers including the brother of Bobby Sands.

I hope this information has been helpful in explaining the decisions made on the visa applications of Mr. Carron and Mr. Paisley.

Yours sincerely,

RICHARD FAIRBANKS,
Assistant Secretary for Congressional Relations.●

CALL TO CONSCIENCE 1981: NAUM TSELESCIN

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. FRENZEL. Mr. Speaker, again this year the congressional vigil for Soviet Jewry will try to focus world attention on the plight of all Soviet refuseniks. We are interested in every one of them, but the one I shall discuss today is Naum Tselescin.

Mr. Tselescin and his parents, both of whom are elderly and in poor health, wish to go to Israel to be reunited with Naum Tselescin's mother's sister. They have repeatedly requested permission to emigrate.

Over the past several years I have attempted unsuccessfully to help Mr. Tselescin in his efforts to obtain permission to emigrate from the Soviet Union. I was again saddened to learn that he was recently denied this permission for the fifth time since 1977.

Mr. Naum Tselescin holds a doctorate in powder metallurgy. Until he applied for an exit permit in 1977, he had been the Chief of the Department of New Materials in Leningrad. He now has been transferred to a menial factory job.

I am told that the reason given for refusing permission for emigration is that Mr. Tselescin has knowledge of military secrets. However, Mr. Tselescin completed a 2-year military obligation over 9 years ago, was not an officer, and would probably not have been privy to any classified information.

Once more, I request that Soviet authorities allow Mr. Tselescin, his parents, and all other Soviet refuseniks like them, to exercise their right to free emigration as agreed to under the Helsinki accords.●

ANOTHER TROJAN HORSE?

HON. ROBERT GARCIA

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. GARCIA. Mr. Speaker, last Tuesday the Subcommittee on Census

and Population, which I chair, held a hearing on the proposed changes in the Government's statistical indicators for inflation and unemployment. I am concerned that this aspect of the administration's prescription for economic recovery may have a detrimental effect on wage earners, social security recipients, and Federal retirees whose pay and benefits are linked to the Consumer Price Index (CPI). I am concerned that proposed revision will create the statistical illusion that inflation is declining while the administration neglects to treat the underlying economic problems that face our country. And I am sure that it has not failed to cross many minds that this proposal may be another "Trojan Horse" the administration is rolling out to perpetuate the illusion so necessary to sustain public belief in its plan for economic reform.

Dr. Sar Levitan, of the Center for Social Policy Studies at George Washington University, gave significant testimony before the subcommittee pointing out the need to improve the Government's data-gathering system to accurately reflect the real economic conditions that affect the population. To insure maximum exposure to Dr. Levitan's testimony, I include the text of his testimony in the RECORD.

TESTIMONY BY SAR A. LEVITAN, CENTER FOR SOCIAL POLICY STUDIES, GEORGE WASHINGTON UNIVERSITY

The disturbing sharp rise in unemployment rates during recent months has moved labor force statistics once again to center stage, vying with inflation for the attention of the public and Congress. It is important that the public regard for—and trust in—our labor force data system remains high. However, there are signs that a growing number of policymakers and citizens have serious doubts about the concepts and definitions and operation of the data system.

It has taken many years of hard work and nonpartisan dedication to build up the public goodwill which is required for the data system to work. The entire system operates on a voluntary basis. If this trust is lost—by either the general public or policymakers—it will not be easily regained.

WHAT HAS BEEN DONE?

Five years ago Congress mandated the establishment of a commission charged with the responsibility of reviewing the federal employment and unemployment statistics and making recommendations for strengthening and updating the nation's labor force counts. It took Presidents Ford and Carter and the U.S. Senate nearly two years to nominate and approve the membership of the commission. The nine citizens appointed reported their recommendations on Labor Day 1979. The law that established the commission also required the Secretary of Labor to comment on the disposition of the commission's recommendations within two years after its report was filed. By the end of October, again a little belatedly, Secretary of Labor Raymond Donovan announced his views on the report of the National Commission on Employment and Unemployment Statistics and his intentions for implementing its recommendations.

Having been associated with that commission, I was delighted to find that the Secretary thought well of our labors. Unfortunately, though, he didn't think that he could carry out a great many of our recommendations. The controlling factor, as one might have guessed, was that it costs money to collect, analyze, and report solid statistics. The Secretary reiterated about a dozen times in his comments that he couldn't in good conscience implement recommendations that would involve additional outlays.

A check of the commission operations, however, would have indicated to the Secretary that the commission was indeed very frugal not only in its recommendations for added expenditures (which total under $40 million per year), but in the management of its own operations. It practiced what it preached. The commission actually completed its work in 14 instead of the 18 months allotted to it by law, and it returned to the Treasury one-third (i.e., about $1 million) of the funds allocated by Congress.

The fact is that the commission members were not only most careful about spending public funds, but also downright stingy in their recommendations. They recognized, however, that there is no free lunch. If public policy is to be exercised intelligently and based on data rather than on gut reactions and ideologies, we should recognize that running a $3 trillion economy cannot be done without appropriate data. And labor force data are a cornerstone of economic intelligence.

There are several ways in which trust in our labor force data system could be lost. The system was designed in the Great Depression and little has been done to adapt the concepts and definitions to evolving labor force structure and our ever-changing economy. The data system is being called on to do tasks that it was not constructed to perform, and federal, state and local policymakers are recognizing that the numbers in their current form often cannot help them in some of their most important decisions. For example, we have been told to expect more decisions to be made on the state and local level, but the information to make these decisions often does not exist. There is ample justification for concern that our labor force data system may become a victim of penny wise but pound foolish decisions.

CHANGES FOR THE 1980'S

When the commission conducted its research and deliberations, there were many advocates who urged the panel to make value judgments about the data system. For example, some asked us to come up with one official standard of full employment. While each commission member had his or her own opinion of what is full employment, we confined our mission to help establish a data system that could be used by various groups—who have different sets of values and objectives—in their formulation of what they considered full employment. The goal is to have a labor force system which can respond to the different needs and concerns of various policymakers and administrations. The concept of full employment is just as much a political and moral question as it is an economic and statistical issue. Our goal was to provide accurate and relevant numbers that would serve any administration, whatever its politicai coloration, and the public at large. Given the new administration's outlook and policy goals, it is rather surprising to me that Secretary Donovan rejected so many of the commission recommendations. I will single out only seven items:

1. State and local data must be improved. A major tenet of the Reagan administration is the desirability of generally reducing the powers of government and assigning tasks to the lowest possible levels of government where government intervention is deemed necessary. Realizing, however, that the federal government cannot give up all its responsibility of aid to states and localities, the Reagan administration has favored the disbursement of federal funds to states through block grants.

It is, however, utterly irresponsible for the federal government to leave the money in state capitols without giving them some guidance and a helping hand in its disbursement. Accordingly, if the federal funds are to be distributed on the basis of helping the truly needy or the dependent population, then it will be necessary for states to possess the necessary statistics on which to base allocation decisions. Cognizant of the costs, the commission recommended that the present sample of 60,000 households of the Current Population Survey (CPS) be doubled. The current CPS can't even come close to accomplishing the job that it is intended to do. Both efficiency and equity considerations led the majority of the commission to make this recommendation.

According to Secretary Donovan, to double the sample of the CPS would cost some $20 million. This is still, even in these inflationary days, a considerable chunk of money. Since Secretary Donovan agrees that it is a good idea to increase the CPS sample, I had hoped that he would at least suggest that when the budget is balanced and inflation is reduced to tolerable levels, he would favor the government investing in an enlarged CPS sample. There is no such promise in the Secretary's report. It is, then, quite clear that anything that would cost money is out, which means not only that there will be no improvement in the quality of labor force statistics; indeed some erosion is inevitable. There will also be no improvement in data on minorities if the CPS is not expanded.

2. Establishment data must be improved since productivity information is derived from these numbers. A second tenet of the Reagan administration is that budget cuts and tax reductions are needed as new incentives to increase the American propensity to save and invest. It is hoped that these efforts will bolster our country's sagging productivity.

Given the administration's rightful concern about slower growth rates and even declines in our output per work hour, Secretary Donovan might have been expected to be more flexible in approving the commission's recommendations to improve the establishment data which serve as the basis for measuring the nation's productivity. But in this case, as in others, he feels that budget constraints will preclude taking any real steps to improve the estimates. It is particularly ironic that the Secretary expects the Employment and Training Administration to upgrade these data after notifying the employees of the agency that they are all subject to a reduction in force.

The statistical base for these productivity numbers is deteriorating sharply because the establishment sample is becoming increasingly eroded. For example, in the growing service industry sectors, the commission found the sample is very poorly represented.

3. Changing technology calls for improvements in occupational data. If the administration's tax cuts are going to generate

major investments in new technology, then we will have vast occupational changes. Some skills that are now being practiced by many people will become obsolescent, and these individuals will have to change their occupations. Also, we could face production bottlenecks due to shortages in other skills. The commission report contained changes in the occupational data system which should be made in an effort to avoid these inflationary wage pressures and to help people find jobs in new and needed occupations.

4. Unemployment insurance data can be put to better use. Administration representatives have indicated interest in allowing states to use UI for providing occupational training to laid off workers. The current condition of the UI system must be factored into the equation when any proposals are made. But if we are going to have rapid changes in the labor force and skill composition of this nation, then we will require effective training systems.

A number of years ago the Labor Department funded the continuous wage and benefit history sample which studies the characteristics of UI beneficiaries in about 15 states. As we are moving in the direction of block grants, should we leave the sample at only 15 states? This would provide a flimsy and inadequate basis for making decisions that might involve the spending of billions for training. The Secretary, of course, would not expand this survey to all states.

5. The data system cannot ignore economic hardship. Our numbers focus on counting the number of employed and unemployed persons, but virtually ignoring the linking of these numbers with facts about household income. Some employed people are still subject to economic hardship while some unemployed individuals are in families with incomes well above the national median.

Another important tenet of the administration is that the generation of jobs through supply side economics would create many new employment slots for the needy and help them on the road to economic independence and prosperity. It might be expected, therefore, that the Secretary would be willing to encourage the analysis of the March CPS data which make it possible to link employment with earnings and income. This would require negligible costs involving only a part-time programmer, an analyst and some computer time. The data are already collected as part of the CPS. Instead of enthusiastically embracing the commission's recommendation of linking employment with earnings, however, the Secretary acts in the best fashion of the Delphic Oracle. He leaves in great doubt whether his department will ever work on hardship measures that would show the progress that Reaganomics brings to the lowest quintile of the population. Indeed, the Secretary objects outright to the commission's recommendations to collect data on income by source, thereby leaving out the basic piece of intelligence needed for evaluating the Reagan welfare program.

6. Voluntarism must be included in the data system. The Secretary's recommendation to scuttle the commission's recommendation of collecting triennial data on volunteers is even more puzzling. The cost, again, would be minimal because it could be added as a supplement to the CPS. The commission found that there is a great deal of interchange between volunteer work and work performed by persons counted in the labor force. Moreover, volunteers contribute to the GNP just as paid workers do. In line with the administration's faith in the growing role of volunteers and their potential for carrying out responsibilities now undertaken by government, I fully expected the Secretary of Labor to have supported this recommendation. Surprisingly, he rejects it without any explanation.

7. Decisions must be made on mid-decennial report. The law now mandates a mid-decennial census in 1985. There is a long leadtime to conduct a census, and the administration has not asked for any funds to carry it out. I am sympathetic that a mid-decennial census would cost a lot of money and some bother to the citizenry. But because of the lack of funds, a great many of the detailed 1980 census statistics will not be published until 1984 or 1985. This means we will have to run the economy with 1969 data. It is ironic that this administration wants to run this economy with Great Society statistics.

TOUGH TIMES

Secretary Donovan's endorsement of the commission's confidence in the professional excellence, objectivity, and integrity of the Bureau of Labor Statistics and Census personnel is welcome. He has also pledged that the administration will do all that it can to ensure that the "Bureau's work will continue to be conducted in a thoroughly nonpartisan environment." But the challenge remains to obtain rsources to maintain the "professionalism with which the Bureau of Labor Statistics operates." Dedicated as these professionals are to their mission, we can't rely upon them to work as volunteers.

It was another Republican President who believed that one could not fool the public forever. By refusing to implement the commission recommendations, which he considers meritorious, Secretary Donovan places public trust in labor force statistics in jeopardy and denies policymakers basic tools to help them formulate these decisions.

Our labor force data system appears to be in for some tough times. There is a major difference between rational budget constraints and the starvation diet offered by Secretary Donovan. The taxpayer may be appreciative today of the Secretary's "savings," but the results may be costly because needed data will not be available for decisionmaking either by government officials or private employers.●

LET US REVISE THE MORTGAGE SUBSIDY BOND TAX ACT TO HELP HOUSING INDUSTRY

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. VANDER JAGT. Mr. Speaker, there is little question that the current economic conditions have fallen heavily on the Nation's housing industry. With interest rates at continued high levels, few home buyers can afford the tremendous burden of a new home mortgage. And, as disappointing as it is for millions of young Americans who cannot afford to buy a home, it is devastating to the hundreds of thousands of Americans in the Nation's housing industry. I am hearing from business after business, builders, subcontractors, and suppliers, telling me that business activity has never been worse. Experienced builders and their construction crews have been completely idled, and I fear that in many cases they will never be able to completely recover.

In light of this very severe crisis in the Nation's housing industry, caused not by lack of demand but by the scarcity of affordable mortgage credit, I have been literally bombarded with questions on why the mortgage subsidy bond program has been unable to operate at all to provide at least some lower cost mortgages to targeted home buyers. The mortgage subsidy bond program will provide only limited help to the overall homebuilding industry, of course, but in such a depressed period any help at all is sorely needed.

The ability of State and local housing authorities to issue tax-exempt bonds to finance residential mortgages was limited by the passage last year of the Mortgage Subsidy Bond Tax of 1980 as part of the Omnibus Reconciliation Act we passed last session. The act was generally to direct the subsidy to those individuals with the greatest need and to limit the overall revenue loss from this type of tax-exempt bond.

But, while the congressional intent of the 1980 act was to target and restrict the use of mortgage subsidy bonds, the actual result has been to bring to a halt any activity whatsoever under the program. Part of the problem appears to be in the nature of the restrictions originally included in the 1980 act, which were considered somewhat frantically during the closing days of the 96th Congress along with a multitude of other major issues in the budget reconciliation bill.

The regulations issued by the Department of the Treasury did not clarify all issues and may have even further clouded certain technical areas. The final result is that no housing authority has been able to put together an issue that bond counsel will approve as definitely meeting all the restrictions in statute and regulation. So, no homes are being financed through the program despite the abundance of willing sellers and willing and qualified buyers.

As amazed as I am by the problems with the 1980 act bringing the program to a halt, I am even more disturbed that the issue has not been examined by the Ways and Means Committee, which has jurisdiction. When members of the committee did attempt to discuss the problems with the Mortgage Subsidy Bond Tax Act, during consideration of the tax bills this past summer, they were persuaded that the situation would be reviewed in the Oversight Subcommittee and withdrew their amendments on that basis. Unfortunately, no action has been taken in the committee to re-

solve problems created by the restrictions in the 1980 act. Nevertheless, I have urged both the chairmen of the full committee and the Oversight Subcommittee to schedule consideration of the matter, and I retain some hope that we might be able to at least examine the situation before the end of the year.

Two legislative proposals to amend the 1980 act have been introduced in the House and should be examined by the committee. H.R. 3614 has been introduced by Mr. DUNCAN and has attracted over 100 cosponsors. H.R. 4843 was more recently introduced by Mr. FRENZEL and makes somewhat more limited changes in the most troublesome provisions. I have joined as a cosponsor of both bills with the hope that greater support will help win an examination of the issues in the Ways and Means Committee. I should add that the Senate Finance Committee reviewed these bills in its Subcommittee on Taxation in a hearing last month.

Mr. Chairman, while this matter of tax-exempt mortgage bonds may seem a complex and technical issue to many of us, it is very important to millions of individuals struggling in the home industry, as well as those thousands of families who will otherwise have their dream of home ownership denied. I fail to understand why we cannot at least examine why the mortgage subsidy bond program has been crippled and consider what action should be taken.●

STATESMANSHIP OF SADAT

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. DORNAN of California. Mr. Speaker, numerous eloquent statements have been made in tribute to Anwar Sadat by Members of this House. I add to these statements, a most thoughtful and moving editorial by KNX Radio, Los Angeles:

Where have all the statesmen gone? KNX mourns this generation's answer: to a bloody grave.

Not so many years ago, political observers looked at world leadership and shrugged. They bemoaned the passing of the mid-century giants: Churchill, Roosevelt, de Gaulle. And they predicted that the new generation's leaders would achieve far less stature by comparison. But they failed to reckon with a strange new kind of statesmanship-by-martyrdom practiced by giants like Anwar Sadat.

The Churchills, de Gaulles and Roosevelts distinguished themselves by mobilizing great forces to war. But the giants who succeeded them have been dedicated to the prevention of conflict in an era of potential global suicide. The irony is that by working to prevent mass destruction, men like John Kennedy, Martin Luther King, Jr., and Anwar Sadat suffered the ultimate violence themselves.

Anwar Sadat must have prepared himself for the possibility of personal destruction when he renounced traditional hatreds and sought peace with Israel. His assassination must not stamp out the spirit of his acts. What's needed now is more leaders prepared, like Sadat, to defy the forces of violence.

The price they may have to pay makes their emergence almost too much to hope for. But KNX calls on all the world's citizens to support that kind of courage by rejecting calls for vengeance, no matter how stirring. No other tribute to Anwar Sadat would mean more.●

CUTBACKS IN SCHOOL LUNCH?

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. ASHBROOK. Mr. Speaker, when my good friend and respected colleague, Congressman BILL GOODLING, speaks out on the complex issues involving the child nutrition and national school lunch programs, he has done his homework and provides us with thoughtful insights and solid, commonsense recommendations.

I wish to commend the gentleman from Pennsylvania for this leadership in the area of child nutrition. Let me take this opportunity to share with my colleagues an interview with Congressman GOODLING entitled "Cut Back in School Lunches? Yes—Looser Rules Would Make Meals More Attractive, Reduce Waste, and Cut Costs" which appeared in the October 19, 1981, issue of U.S. News & World Report:

[Interview with Representative William F. Goodling, Republican, of Pennsylvania]

CUT BACK ON SCHOOL LUNCHES?

Yes—Looser rules would "make meals more attractive, reduce waste and cut costs."

Question. Representative Goodling, why do you favor easing the present federal nutrition guidelines for school lunches, as the Department of Agriculture is preparing to do?

Answer. First, the present guidelines, through their rigidity, encourage waste of food.

Second, given the current cut in the federal school-lunch subsidy, easing the guidelines is the only way to save the whole program.

Question. How is waste of food being encouraged?

Answer. The present guidelines require the school, in order to get federal reimbursement, to offer certain quantities of food from all the major food groups—milk, meat, bread and two kinds of vegetable or fruit—with limited substitutions, such as cheese for meat and rice for bread, allowed in all but the milk group.

The children must pick items from at least three of these four groups. Until recently, elementary-school children had to pick from all four.

So there is some choice, but it is quite limited. As a result, the children—especially the smaller ones—dump their spinach, pour out part of their milk and discard part of their meat.

When I was a school administrator before coming to Congress, I ate in school cafeterias for 23 years. I sat next to first graders who hated cooked spinach as much as I do but were trying to force it down because otherwise the teacher would go after them. Some of these kids tried to get me to eat their spinach for them, and I responded with the same silly statement people made to me when I was a kid: "Eat it. It's good for you."

I have watched youngsters get sick because teachers felt they had to force them to clean their plate and drink all their milk.

You're now required to serve little children 8 ounces of milk with the lunch. Some teachers who are also pig farmers love that requirement because half of that milk is dumped by the children and fed to the local pigs. But I deplore such waste.

Question. What remedy do you propose?

Answer. First, I favor a reduction by about one fourth in the minimum size of meals required. But remember: We are talking about minimum, not maximum, guidelines. In other words, nothing would prevent a school from serving more-copious meals than spelled out in the guidelines if it had the desire and the means to do so.

Second, food-service people have testified before Congress that they need greater flexibility to offer substitutions. That would make meals more varied and attractive and reduce waste, while, cutting down on costs at the same time.

For instance, one nutritionist testified that youngsters would be much better off with a good protein substitute, such as peanuts, for that piece of meat on their plate. Under present rules, we ship schools a lot of peanuts, but they cannot be counted as a protein substitute or in any other way unless you turn them into peanut butter. That makes no sense. It's certainly more nutritious to go with roasted peanuts as a meat substitute—if that is what the youngsters want—than to add sugar and other ingredients to the peanuts to make peanut butter.

Question. Would you allow ketchup to be counted as a vegetable, as the Agriculture Department's draft regulation would have?

Answer. No. Now, I'm not advocating silly substitutions like that or the substitution of cakes for bread. That proposal was seized upon and ridiculed by the media before it was withdrawn, but the whole fuss was needless: What school can afford to serve half a cup of ketchup or pickle relish instead of vegetables for lunch, or to substitute expensive cupcakes for cheap bread?

Question. Why do you say that an easing of the guidelines is the only way to save the school-lunch program?

Answer. Congress has reduced the school-lunch subsidy by nearly a billion dollars in the new fiscal year. If the school districts are not given the option of serving smaller portions and making sensible substitutes, the cost of a school lunch will go up by so much that the paying customers—the children required to pay the full cost of a lunch—will simply stay out of the school cafeteria. This will kill the school-lunch program altogether, and the big losers will be the needy children who now get a free or reduced-price lunch. Remember: There is no law in most states mandating a free or reduced-price lunch for needy youngsters unless you have a school-lunch program in the first place.

Question. If reduced portions and substitutes are permitted, by how much do you think school districts can raise the price of a lunch and still keep the program going?

Answer. I would estimate by a maximum of 15 cents.

Question. Aren't you concerned that eased guidelines might lead to children getting less nutritious meals?

Answer. No. You've got to remember that the guidelines would be minimum—not maximum—requirements and that we have people in the schools who have dedicated their lives to trying to serve nutritious meals. These people will continue to give seconds to youngsters who are hungry and ask for them and heap more food on the plate of those who they know need extra nurishment. All they ask is not to have their hands tied by rigid federal regulations.

Question. Wouldn't easing the guidelines be hardest on kids who are needy, since the school lunch is often their only substantial meal of the day?

Answer. On the contrary. As I pointed out, easing the guidelines is the only way to save the lunch program altogether—with needy children as the chief beneficiaries. We only cut the "free" lunch reimbursement by 3-plus cents.●

SOVIET AGGRESSION NEEDS TO BE ADDRESSED IN SALT

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. BIAGGI. Mr. Speaker, the Soviet submarine that was recently caught in Swedish waters, armed with nuclear capabilities, is but another compelling reason for us to get on with the business of renegotiating a verifiable strategic arms limitations agreement.

We have regularly witnessed Soviet "diplomatic doublespeak" which, on one hand, seeks to maintain Baltic Sea neutrality and, on the other hand, seeks to aggressively promote Soviet interests in that area as well as other areas of the world. Events in Cambodia, Czechoslovakia, Angola, and most recently, Poland, should send a clear signal to the world about Soviet intentions. This is not a paper tiger threat. More importantly, we should not allow the European pacifists demonstrating against our defense posture with NATO to dilute our efforts to deter Soviet aggression abroad.

The willingness of the Soviets to employ nuclear weapons in the Baltic Sea merits a hard-line response in our next round of SALT talks. We need a verifiable treaty which will allow us to operate from a position of strength—both here and abroad. To do anything less would be to promote a false sense of security within our own Nation as well as in those European nations which rely on our defense capabilities and NATO for their survival.

When Secretary of State Haig and the Soviet Ambassador sit down on November 30 to recommence SALT negotiations, our message to all should be clear: America will not stand by and pretend that the Soviet nuclear threat in Europe is a passive one. Concurrently, we should send a similarly strong message to those in Europe who have been protesting the American nuclear presence there.

As the following editorial from the New York Daily News indicates, the American nuclear weapons are not the ones they should fear. I commend this article to my colleagues.

SOBERING LESSON FROM THE U.S.S.R.

The Russian submarine that came to grief snooping around a Swedish naval base should awaken West Europe's antinuclear protesters to the facts of life about atomic weaponry.

Pacifists and leftists demonstrating against stationing nuclear arms in Europe have singled out the United States and NATO as targets of their wrath. The Soviet Union showed them that it not only has nuclear weapons of its own, but is willing to deploy them in an almost reckless manner.

Sending a submarine armed with nuclear-tipped torpedoes on a spying mission into the territorial waters of a neutral country was arrogant, ruthless and—above all—extremely dangerous. What would have happened if the sub, instead of running aground, had been detected and cornered by the Swedes? Would a desperate captain have incinerated part of Sweden to escape?

The willingness of the Russians to risk such a calamity simply to satisfy their curiosity about Swedish defenses is shocking. Certainly it ought to drive home to dubious Europeans the message that American warnings about the Soviet menace are not idle talk.

The episode also exposed the emptiness and cynicism of Soviet propaganda. For years, Moscow talked up its idea of making Scandinavia a nuclear-free area. The Kremlin has pulled the wool over a lot of European eyes with its slogan that the Baltic is a "sea of peace."

At least the Swedes no longer are taken in by that bunk. They have seen firsthand what a "sea of peace" means to the Soviet Union, and they are furious.

We only hope their indignation will rub off on the Germans, Belgians, Dutch, British and others who have been denouncing American nuclear arms as though they were the only weapons Europe had to fear.

TAKING THE PLEDGE

Only one thing is certain about the New Jersey gubernatorial contest: There's going to be a recount. And that's perfectly reasonable. Any time there's a fractional difference between candidates in an election in which nearly 2.3 million ballots were cast, a scrupulous double-check is absolutley essential.

What bothers us, however, are the hints from Republican Tom Kean and Democrat Jim Florio that whoever comes out on the losing end of the recount automatically will drag the entire mess into the courts. If that happens, with all the ensuing legal maneuvers, challenges and endless appeals, New Jersey might not know the name of its next governor until sometime near the end of the decade—maybe longer.

We think it would be a damned good thing, therefore, if Kean and Florio would both pledge that, win or lose, they intend to abide by the results of the recount, period. That's what the public interest demands. And public interest is what elections are all about, isn't it?

GOING THE CANADIAN WAY

Prime Minister Pierre Elliott Trudeau demonstrated considerable political skill, as well as tenacity, in coaxing nine of Canada's 10 provincial leaders into supporting his plan for "repatriation" of the nation's constitution.

Trudeau made concessions on the method for amending the constitution. But he won acceptance of a bill of rights to be incorporated in the document before it comes home, so to speak, from Britain. Considering that the prime minister had only two provincial chiefs behind him when negotiations began, it was an impressive job of persuasion.

The only dissatisfied province is Quebec. But it is to be hoped that the differences with the French-speaking province will be resolved as time goes on, and Canada will emerge not only with its own constitution at last, but as one nation, indivisible.

THE TATTOED SOCIETY

One of the toughest jobs for the modern journalist is spotting new fads. They come and go so fast that news hounds have to be darned quick on their feet to keep track. So congrats to Daily News reporter Daniel O'Grady for being the first to identify what appears to be the latest hot item—the temporary (about one week) tattoo.

So far, temp-tat artists are still sticking to the traditional patterns—pierced hearts, screaming eagles, mom's name in a scroll, etc. But it shouldn't be too long before a new art form emerges: The tattoo with a message. By next summer, we predict, the beaches will be covered with bodies that read, "Ban the bomb" or "Nuke the whales."●

OIL TAKEOVER THRUST

HON. MICHAEL G. OXLEY

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. OXLEY. Mr. Speaker, I would like to share with my colleagues three short editorials from leading Ohio newspapers which convey the strong pride held in the Marathon Oil Co. for almost a century. While both Houses examine the Mobil Corp.'s attempted takeover of Marathon with increasing scrutiny, these three editorials reinforce the need to keep Marathon an independent, community-minded domestic oil company.

[From the Findlay, Ohio, Courier, Nov. 4, 1981]

MARATHON

It takes big business to make an endangered species out of strength and success.

That's what is happening to Findlay's Marathon Oil Co., under financial attack by Mobil Corp. and perhaps others which want to absorb it because it is doing so well. Under management that has shown diligence and foresight Marathon built up a gas-oil reserve base that is the envy of competitors who would make it their prey.

It is much too early to determine how this Wall Street and court tug-of-war will go. The Findlay community can at this point find reasons of both hope and despair in

news reports, and those inclined either way will do just that. But exagerated hopes and fears breed rumors. Rumors breed more rumors. Then rumors most often fall apart. Let's don't decide what will happen before it happens.

It cannot be denied, however, that there is a great deal of concern in town about what will happen to Findlay if Marathon is gobbled up by a giant. Yet this concern, in turn, makes us realize how important Marathon is to the community and to Ohio.

At its roots Marathon is a northwest Ohio institution. Marathon is a legacy of success out of the oil and gas boom days of the 1880s when the fledgling Ohio Oil Co., Marathon's early name, turned a profit on 15-cent-a-barrel oil.

Marathon's contributions of leadership, resources and prestige to the community cannot be measured in stark, financial terms. But its support of the economy with a $58 million payroll is clearly recognized. We sense that these realizations and more are being slowly appreciated as Marathon fights for its survival as an independent corporation.

There isn't any thing we can say that will change events on Wall Street. But we do lend what used to be called moral support for an institution that is part of the life and blood of our community.

[From the Toledo, Ohio, Blade, Nov. 7, 1981]

OIL TAKEOVER THRUST . . .

Despite the shock waves generated in Findlay and other areas of northwest Ohio over Mobil Oil's attempt to grab control of Marathon Oil Co., the move should not have come as a surprise. Marathon, the 17th largest oil company in the country, is a prize that almost any conglomerate would reach for.

In the ambivalent atmosphere of anti-trust enforcement in Washington these days, Mobil no doubt has every reason to think it can do it; it could get the money. But it would be wrong. Neither Mobil nor Marathon is currently having trouble competing in the market, and the merger—by making the new company one of the larger ones in the industry—would lessen competition rather than strengthen it. This is just the opposite of the case with the Heileman-Schlitz brewery merger (discussed below), which has been opposed by the Justice Department.

Acquisition of Marathon for its large domestic and North Sea oil reserves admittedly would make corporate sense for Mobil, which is now the No. 2 retailer but has a weakness in domestic reserves. But, as a Marathon spokesman said, it would significantly lessen competition in such states as Florida, Wisconsin, Illinois, and to a lesser extent Ohio where Marathon's market position is much stronger than Mobil's. In general, Marathon sells gasoline at a lower wholesale price than Mobil in many areas where both companies are in competition.

The proposed merger, moreover, would lessen the need for Mobil to explore for new oil fields. A favorite theme of the oil companies is that they need higher gasoline prices to aid in their search for new sources of crude—a far more elusive task than it used to be. To explore for new petroleum sources requires corporate boldness and foresight, qualities that Marathon has demonstrated but which Mobil so far has reserved mostly for its corporate take-over bids and its ceaseless public-relations campaign to show that oil companies are not as bad as frequently pictured.

Marathon is resisting fiercely the Mobil take-over attempt, aided by a federal court restraining order temporarily halting Mobil's efforts and a decision by the Federal Trade Commission to scrutinize the proposal. In the long run, though, the Findlay-based firm probably will have to find a way to grow substantially itself or face take-over bids by other companies, perhaps by conglomerates with no huge stake in the energy field. Marathon is a healthy company, in no real need of whatever it is—which is far from clear—that Mobil can bring to it.

Unlike the beer merger, this one makes no sense from either the standpoint of improving competition in the industry or making life easier for consumers or the companies in question. Accordingly, the Reagan administration has more reason to oppose this bid for control of Marathon than it has worrying about the Wisconsin beer barons.

[From the Cleveland Plain Dealer, Nov. 14, 1981]

HOLD ON, MARATHON

Our support is with the people of Findlay, Ohio, who are expressing their disapproval of an effort by Mobil Oil Corp., America's second largest oil company, to acquire the locally headquartered Marathon Oil Co.

Seldom has there been so much unity of purpose in Findlay—which is about 50 miles south of Toledo. Their unity is tied to bread and butter. They fear Mobil's acquisition of Marathon, the 17th largest oil concern in the nation, will hurt them economically. At their rally this week it was clear that Findlay residents perceive this merger attempt as an intrusion by a carpetbagger.

Statistically Marathon Oil is a valuable community asset. Marathon employs 2,500 people, who pay $1.8 million a year in state income taxes and $1.2 million in income taxes to Findlay and other nearby communities. The company pays $9 million yearly in corporate taxes to the state and $3.2 million in other taxes for support of local government and schools. The company provides $760,000 in income taxes to Findlay. There is no denying its value to the community.

So the concerns of the people of Findlay are valid. There have been no guarantees that Mobil Oil, based in New York, would keep intact the circumstances keeping Marathon a local, independent oil concern. Other mergers, elsewhere, suggest otherwise.

Marathon Oil has gone into U.S. District Court to fight Mobil's unsolicited tender offer of $5.1 billion. The company's suit raises significant anti-trust issues and poses a major policy question for the Reagan administration.

All the legal arguments have not been made. The state attorney general has gone to court in an effort to use Ohio's anti-trust law on behalf of Marathon. Other facts: It is healthy for Mobil and Marathon to be competitors in shipping crude oil. It is in the best interests of consumers to have Marathon and Mobil sell gasoline in Ohio. It is in the interests of independent wholesalers and distributors of petroleum products to be able to buy supplies from Marathon.

Corporate bigness is not necessarily evil, particularly if the big firm is in your home town. Harold D. Hoopman, president and chief executive officer of Marathon, says, "We plan to do everything we possibly can to defeat this offer. We are determined to stay independent."

The effort by Marathon to stay independent is important to the people of Findlay and to the people of Ohio.●

THE STATE AND LOCAL GOVERNMENT CASH MANAGEMENT ACT OF 1981

HON. STAN LUNDINE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. LUNDINE. Mr. Speaker, I am pleased to introduce H.R. 4947, The State and Local Government Cash Management Act of 1981. The legislation will assist State and local governments raise additional revenues by easing restrictions on the management of their cash assets. It permits States and localities to deposit surplus funds in depository institutions at higher rates of interest and makes these governments eligible to establish interest-bearing checking accounts.

The efficient management of cash resources is particularly important to State and local governments during this time of economic stress. Local jurisdictions have suffered a series of economic setbacks caused not only by substantial reductions in Federal assistance, but by rising voter resistance to tax increases and record-high municipal borrowing costs.

State and local governments have already had to accept a substantial $13 billion reduction in Federal assistance, together with $2.3 billion in revenue losses as a result of the passage of the new tax legislation. Assistance programs to States and localities, which account for only 14 percent of total Federal spending, have been required to absorb nearly 66 percent of the cuts in new budget authority for the coming year.

State and local officials have been willing to accept this substantial share of the budget reductions enacted by Congress. But the cumulative effect of reduced Federal assistance, rising borrowing costs, and restricted tax revenues is beginning to play havoc with local budgets. A recent study by the National Governors Association found that at least 30 States expect to operate at a deficit this year, with almost all States lacking the capacity to raise funds from existing revenue sources to offset Federal cuts and rising interest costs. Most cities and towns found themselves in similar circumstances years ago and are now having to reduce basic services to limit further deterioration in their operating budgets.

Given such conditions among the Nation's State and local jurisdictions, it seems appropriate that Congress seeks ways to assist local officials in raising additional revenue and realizing additional savings in their day-to-

day operations. Earlier this year I introduced H.R. 2828, which seeks to lower the long-term financial costs to States and localities of issuing revenue bonds to finance major public works and infrastructure improvements. The proposal would reduce revenue bond underwriting costs by eliminating an outdated barrier to increased competition in the sale of these important financing instruments. It would permit sizable cost savings without additional cost to the Federal Government.

The legislation I am now introducing is similar in purpose to the revenue bond proposal. It provides the potential of additional revenue and increased fiscal control for local officials by eliminating unnecessary restrictions on public financing activities. It seeks to promote improved cash management opportunities for States and localities without additional cost to the Federal budget.

H.R. 4947 is a companion measure to S. 1686, introduced recently in the Senate by Senator RICHARD LUGAR (R-Ind.). The two proposals included in the legislation were developed by Senator LUGAR's staff on the Housing and Urban Affairs Subcommittee of the Senate Banking Committee.

The first proposal authorizes State and local governments to deposit idle or surplus funds in financial institutions at interest rates slightly below the average Federal funds rate. This would permit local funds to earn a much higher rate of interest and place local government deposits on an equal footing with surplus Federal funds.

Enabling legislation passed by the 95th Congress extended to the Federal Government the ability to deposit Treasury tax and loan account funds in depository institutions at interest rates approximately 1 percent below the average Federal funds rate. The legislation did not extend the same privilege to States and localities. Some State and local governments currently invest surplus funds in repurchase agreements and short-term Treasury bills. However, these options are not always available, particularly to smaller jurisdictions which lack both the skilled staff and the required minimum balances to enter these markets. As a result, these jurisdictions maintain their idle funds in accounts earning the minimum passbook interest rate.

A recent survey compiled by the Municipal Finance Officers Association reported that in early 1981, $46.7 billion in State and local government funds was held in time deposits. The average interest rate earned on this investment was 11.72 percent. The Federal funds rate at this time was 15.72 percent. Had States and localities been permitted to deposit these funds at an interest rate 1 percent below the Federal funds rate (14.47 percent), the increase in interest income could have exceeded $1.3 billion. While this example may be oversimplistic, it does serve to demonstrate the level of increased earnings possible under this proposal.

The second proposal consists of two provisions designed to clarify existing law to permit all general-purpose units of State and local government to establish and maintain interest-bearing Negotiable Order of Withdrawal (NOW) accounts. The Depository Institutions Deregulation and Monetary Control Act of 1980 extends eligibility for NOW accounts to nonprofit organizations "operated primarily for religious, philanthropic, charitable, educational, or other similar purposes." While the meaning of this provision is subject to dispute, it has generally been interpreted to exclude general-purpose governmental units. Currently, only special-purpose units of government can maintain NOW accounts, and only if the funds are used for schools, colleges, libraries, or health care facilities.

The confusion over eligibility for NOW accounts became a more sensitive policy issue last August when the Federal Home Loan Bank Board proposed regulations permitting savings and loan institutions to offer NOW accounts to general-purpose governmental units. At the same time, the Federal Reserve Board specifically prohibited commercial banks from offering such accounts. Further progress on the issue was halted by a permanent injunction against State and local participation in NOW accounts, resulting from the clear competitive advantage offered to thrift institutions by the conflicting regulations.

H.R. 4947 would resolve this issue by permitting both special-purpose and general-purpose units of State and local government to maintain NOW accounts at either commercial banks or thrift institutions. It would make NOW accounts available as a financial tool for local officials who seek to make better use of public funds. Had the $11.3 billion in State and local funds that were deposited in demand accounts at the end of 1980 been placed in interest-bearing NOW accounts, a minimum of $593 million in interest revenue could have been earned by States and localities.

By offering this provision, I am not implying that all State and local government funds will or should be deposited in NOW accounts. However, these accounts should be made available as a management option for financial managers seeking short-term return on valuable cash assets. I believe that permitting State and local funds to be deposited in NOW accounts is not only sound financial policy, it is well within the intent of the 1980 banking deregulation legislation.

State and local governments should be able to take advantage of new opportunities to earn the greatest possible return on public funds, particularly in light of increasing costs and declining Federal support. H.R. 4947 provides two additional cash management options that can be used not only to protect funds from inflation, but to provide additional sources of needed revenue. Had the legislation been in effect last year, over $1.9 billion in additional revenue would have been available to our States and localities.

While these measures would be beneficial to all local governments, they would be particularly advantageous to small cities and towns. As a former mayor of a small city in western New York, I am well aware of the limited cash management options available to most local officials. Most small cities do not have the staff to engage in any kind of sophisticated cash management programs. They also lack sufficient funds to make the high-interest investments routinely made by larger governmental units. The two measures in this legislation are easily used and provide small communities with tools to assure that temporarily idle funds are invested at the maximum possible return.

H.R. 4947 has already received strong endorsement from the National Association of Counties, the National League of Cities, the Municipal Finance Officers Associations, and from other organizations representing State and local governments. I have also discussed the legislation with the Independent Bankers Association, which has taken a neutral stand on the proposals, but encourages further study and consideration. While bankers are understandably concerned with the additional interest costs the proposals entail, they are also concerned with the serious fiscal problems confronting governmental units. The willingness of the IBA to take a neutral position on the legislation is not only meritorious, but exemplary of the kind of partnership between public bodies and financial institutions that this legislation, and H.R. 2828, seek to promote.

The proposals contained in H.R. 4947 are needed to help alleviate the fiscal pressures on State and local budgets. They are practical, commonsense initiatives that will help State and local officials achieve the kind of fiscal responsibility the public is now demanding of all levels of government. I think these are worthwhile proposals and urge Congress to adopt them.●

STOCKMAN CONFESSIONS POINT TO NEED FOR CLOSE SCRUTINY OF ADMINISTRATION POLICY

HON. FERNAND J. ST GERMAIN
OF RHODE ISLAND
IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. ST GERMAIN. Mr. Speaker, the need for the Congress to carefully scrutinize the details of the administration's economic game plan is dramatically demonstrated by the Dave Stockman interviews in the December edition of Atlantic Monthly.

What this Congress accepted as economic gospel, as a thoroughly worked out, soundly based plan is now revealed as so much puffery by the architect of the plan. A cynical bit of economic hocus pocus which unfortunately the Congress swallowed and helped sell to the American people.

Concerned that the administration's proposals had not given consideration to the needs of housing and the cities, I urged the House on February 17 to stop, look, and listen before buying the Stockman rhetoric.

I was sincerely concerned that OMB and the White House had simply pulled numbers from the air to justify the dismantling of programs I felt were essential to the future of the Nation. In hopes of pushing the administration to come up with specific data to justify the budget cuts, I charged last February:

> Numbers have filled the Washington air like so much confetti. A billion here, a billion there . . . every edition of the newspapers brings news of bigger and better cuts. At times, we had to question whether we were running a giant butcher shop or a government . . .
>
> The numbers—and the competition for bigger and bigger headlines—have submerged the programs themselves. My suspicion is that we are at the mercy of some giant computer in the basement at the Office of Management and Budget, pouring forth endless printouts designed to reach some preconceived notion of what looks good as a multi-billion dollar prime cut.
>
> Budget and Economic reports have been great public relations and political tools of Presidents—Democrats and Republicans alike. President Reagan and his Administration certainly have the right to play the same game. The Congress, the public, and the press, however, have the distinct responsibility to question the quality and rationality of the cuts, the glories of IBM wizardry notwithstanding.

Now the Atlantic Monthly tells us that, indeed, the OMB wizards were simply playing with numbers with little or no concept of where all of this led.

Atlantic Monthly quotes Stockman directly:

> None of us really understands what's going on with all these numbers . . . People are getting from A to B and it's not clear how they are getting there . . . We didn't make all the thorough, comprehensive calculations about where we really needed to come out and how much to put on the plate the first time, and so forth.

Elsewhere the article tells us:

> He (Stockman) cheerfully conceded that the Adminstration's own budget numbers were constructed on similar shaky premises, mixing cuts from the original 1981 budget left by Jimmy Carter with new baseline projections from the Congressional Budget Office in a way that, fundamnetally, did not add up. The budget politics of 1981, which produced such clear and dramatic rhetoric on both sides was, in fact, based upon a bewildering set of numbers that confused even those, like Stockman, who produced them.

All the while, Mr. Speaker, Dave Stockman was telling the world, with the assistance of an essentially unquestioning Washington press corps, that he had arrived at the calculations in the new game plan with great precision. That certainly was the impression of his testimony before the Banking, Finance and Urban Affairs Committee last spring as he defended efforts to cut the heart out of housing and community development programs.

Nothing in that testimony suggested that Mr. Stockman didn't understand the numbers or that, as Atlantic Monthly tells us, the calculations were knowingly concocted on "shaky premises."

It was just the opposite. Continually, we ran into the claims that the "administration knows best," that OMB had the data to back up its most complex numbers. Those claims, in the face of the Stockman assurances, were difficult—and ultimately impossible—to overcome for those of us who questioned the rationale for dismantling essential areas of the economy.

Mr. Speaker, it is true that OMB directors are political appointees and we expect any OMB chief to defend his administration's proposals.

However, OMB is an extremely vital part of the Federal Government, the repository of basic data, the keeper of many of the projections on which many in this economy calculate their actions. The public and the Congress should be able to depend on the material flowing from that office, the political affiliation of the director notwithstanding. OMB is not, after all, a subsidiary of the Republican National Committee and its obligations must go beyond simply running up numbers and "shaky premises" to support preconceived political decisions.

Unfortunately, Mr. Speaker, much of the press corps has presented the Stockman episode in terms so familiar to Washington political parlor games, in terms of who wins and who loses influence, not unlike a rundown of the college football ratings.

Mr. Speaker, the decisions of the administration and the Congress last spring and summer affect the lives of millions and millions of Americans. To them it is not a Saturday afternoon political football game. It is real life, jobs, housing, education, health.

Regardless of the final outcome of these issues, it is clear that we owe the American people decisions based on hard facts and real numbers and not on cynical statements by officials who never understood the numbers and who really didn't believe in the game plan.

Last February, Mr. Speaker, I said that the President and his administration will find many of us willing to cooperate if we can be assured that there are indeed "scalpels," and not meat axes, in the medicine closet. And most importantly, if we can be assured that there are qualified surgeons on the job that truly want the patient to live.

Mr. Speaker, after reading the Atlantic Monthly article I am not convinced that we have "qualified economic surgeons" on the job or that the wielders of the budget knives have any desire to keep the patient alive.

For those who demanded last spring that the Congress accept in toto, without question, the administration's economic program, I hope the December edition of Atlantic Monthly becomes required reading.●

BEWARE THE "FAHD PLAN"

HON. JACK F. KEMP
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, November 16, 1981

● Mr. KEMP. Mr. Speaker, many of us who opposed the sale of AWACS aircraft to Saudi Arabia have not been surprised by the events that have followed. We were not surprised to hear that, the day after the sale, the Saudi Arabians decided to raise the price of oil $2 per barrel. Nor were we surprised that they decided to curtail their production from 9.5 to 8.5 million barrels per day, a reduction as helpful to Libya as it is harmful to the United States. For that matter, we weren't surprised that the Saudi Foreign Minister Prince Saud recently chastised Oman for—Heaven forbid!—participating in American military exercises. These events have merely further substantiated our already well-buttressed view that Saudi Arabia does little to support the interests of the United States.

Considering their track record, then, we ought to be especially wary of the Saudis latest undertaking, the Fahd plan. This "peace plan," which is really a "peace offensive," makes a sham of the Camp David process. Its eight points which, among other things, require Israel to return to pre-1967 borders and provide for the establishment of a Palestinian state with East Jerusalem as its capital, pose a direct and grave threat to Israel's se-

curity and violate the terms of the Camp David accords to which the United States is committed.

Our State Department officials are making a mistake if they think they can advance Camp David while at the same time expressing approval of certain aspects of the Fahd plan. The Saudis, after all, have never concealed their opposition to Camp David; why should other Arab nations even consider joining the Camp David process when we are sending out signals that the Saudi approach is not entirely unacceptable?

Those who are so pleased by the Saudis' seeming willingness to accept Israel's right to exist should examine the Saudi's statements a little more closely. Clarifying point 6 of his plan, Prince Fahd has declared, "There is no Palestinian state without the PLO." The PLO has not renounced its commitment to liquidate Israel and, in fact, has been actively violating the terms of the cease-fire in Lebanon. The establishment of a state run by this terrorist group, which rejoiced at the death of Anwar Sadat, would clearly be a setback to peace in the Middle East. It indicates that while the Saudi Arabians may be deferring their immediate goal of the destruction of Israel, they are still angling, as Menachem Begin has said, "to liquidate Israel in stages."

Americans have as much to fear from the Fahd plan as Israel does. Our goal of a "strategic consensus" against Soviet adventurism in the Middle East is hardly well-served by establishing a militant Soviet client-state on Israel's borders. Nor is there any evidence that the Saudis share our desire to form such a consensus. They have been flirting with the Soviet Union and have continued to work with Soviet clients such as Libya and the PLO. How much longer will the Saudis continue to oppose our interests and consort with our enemies before we all recognize this?

American support for the Fahd plan, however qualified, is a dangerous indulgence in escapism and wishful thinking. I recommend the following Wall Street Journal editorial, "Eight-Pointed Confusion," to my colleagues to dispel the false hopes and misconceptions that are being entertained in this country and abroad.

The article follows:

EIGHT-POINTED CONFUSION

President Reagan has lately tried to reassure Israel and the world that the Camp David process lives, but we suspect U.S. credibility has suffered some permanent damage from the State Department's muddled handling of Saudi Arabia's eight-point peace plan. It seems to be another one of those increasingly troublesome cases of people in this administration sounding off about policy before there is a policy.

In this case, the initial sounding off at State gave importance to a Saudi plan that in fact contained nothing new, and certainly very little that the U.S. would be wise to support. It called, in essence, for a PLO state with its capital in East Jerusalem. And as usual, it was ambiguous on whether there would be any Arab recognition of Israel's right to exist.

But what with the Awacs deal cooking, and a big push to make the Saudis look like great statesmen, State exhibited the plan as some new Magna Carta. Before you could say Yasser Arafat, every Arabist in Europe had responded to what they saw as a new U.S. tack. Britain's Lord Carrington grabbed a plane for Riyadh and soon Secretary Haig found himself having to chastise the foreign secretary for saying the same things some of Mr. Haig's underlings had just said.

Over this last weekend, the PLO and the Saudis turned up the heat. A report from Beirut said that Mr. Arafat, on his own recent visit to Riyadh, had carried a message from Moscow promising Soviet support for the peace plan in return for Saudi recognition of the Soviet Union. The Saudis had already said that the Soviets had an "important role" to play in the Saudi peace plan.

If the Israelis are exasperated by the U.S. performance, they have every right to be. This on top of the Awacs deal is a bit much, particularly coming as it does when the Israelis are complying with the Camp David deal and pulling out of the Sinai. It also comes when the PLO, with Soviet encouragement no doubt, is brazenly violating the ceasefire the U.S. arranged in Lebanon, funneling more heavy weapons to South Lebanon to use in threatening Israel.

There is simply nothing to indicate that the PLO is ready to live at peace with Israel, and until there is, it would be highly irresponsible for the U.S. to entertain even a whisper of a PLO state. The Israelis have good cause to fear that such a state would be a grave threat.

In May 1980, for example, a resolution before Mr. Arafat's Fatah group, often referred to as the "moderate" wing of the PLO ("Fatah" is Arabic for "conquest"), called for "the liequidation of the Zionist entity—politically, economically, militarily, culturally and ideologically." Mr. Arafat claims he opposed this resolution, but he has consistently declared that aspirations for a Palestinian state wouldn't stop with the West Bank and the Gaza Strip. Last Dec. 7, he told an open meeting in Beirut, or so PLO radio reported, that "the victorious march will continue until the flag of Palestine is raised above Jerusalem and above the whole area of Palestine from the river to the sea, and from the Ras al-Nazzura to Eilat." That is, from the Jordan to the Mediterranean and from the Lebanese border to Israel's southermost city.

Such rhetoric is hard to dismiss, given that the PLO seems to have wiped out or intimidated almost every Palestinian Arab leader who has urged peace or cooperation with the Israelis. In February 1978, a prominent West Bank businessman who supported Sadat's peace initiative was shot dead. In June 1979, Sheikh Hashem Khuzendar, the religious leader of Gaza and a Sadat supporter, was assassinated; three weeks later, PLO spokesman Farouk Kaddoumi said "Our people . . . are capable of taking the necessary disciplinary measures against those who try to leave the right path."

Similarly, the PLO leaders openly rejoiced over the assassination of Anwar Sadat. They have been involved in bloody wars in Jordan and Lebanon. Even if Mr. Arafat should himself turn peacemaker—not likely given his heavy dependence on the Soviet Union—he may not have adequate control of other Palestinian terrorist groups. A PLO state would be a danger not only to Israel but perhaps even more so to its Arab neighbors. The Saudi plan, with its guaranteed place for the PLO, is not likely to entice the leaders of Jordan, the key to any lasting West Bank settlement.

By attaching new importance to the Saudi peace plan, the State Department simply reawakened pressures on the U.S. and Israel that Camp David had for a time laid to rest. It is likely to prove a mistake hard to repair.●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, November 17, 1981, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

NOVEMBER 18

9:00 a.m.

*Select on Indian Affairs

To hold hearings on S. 1613, requiring the U.S. Court of Claims to consider the merits of certain claims filed by the Navaho Indian Tribe, alleging U.S. breach of legal and treaty obligations and S. 1468, designating a portion of land in Harney County, Oreg., to be held in trust for the Burns Paiute Indian Tribe.

1318 Dirksen Building

9:30 a.m.

Governmental Affairs

Permanent Subcommittee on Investigations

To continue hearings on international narcotics trafficking.

3302 Dirksen Building

*Veterans' Affairs

To hold oversight hearings on the effects of the use of agent orange.

1224 Dirksen Building

10:00 a.m.

Armed Services

To hold hearings on the nominations of Robert N. Smith, of Ohio, to be Assistant Secretary of Defense for Health Affairs, and Melvyn R. Paisley, of

Washington, to be Assistant Secretary of the Navy for Research, Engineering, and Systems, and routine military nominations; and, in closed session, to receive a report of the Manpower and Personnel Subcommittee on flag and general officer strengths.
212 Russell Building

Energy and Natural Resources
Business meeting to resume markup of S. 1484, promoting the development of oil shale resources by revising the authority to lease lands containing oil shale deposits, and other pending calendar business.
3110 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
Business meeting, to resume markup of S. 1692, providing for the operation, maintenance, and construction of deep-draft channels and national harbors.
4200 Dirksen Building

Judiciary
Business meeting, to mark up S. 1630, reforming the Federal criminal laws and streamlining the administration of criminal justice.
2228 Dirksen Building

Joint Economic
Monetary and Fiscal Policy Subcommittee
To hold hearings on Government policy as it relates to the defense industrial base.
6226 Dirksen Building

2:00 p.m.
*Environment and Public Works
Business meeting to consider pending calendar business.
4200 Dirksen Building

Finance
Estate and Gift Taxation Subcommittee
To hold hearings on S. 1430, providing that the election to use the alternate valuation date for the estate tax may be made on a return that is filed late, and S. 1487, allowing independent local newspapers to contribute corporate earnings into a trust to provide for prepayment of estate taxes.
2221 Dirksen Building

NOVEMBER 19

9:30 a.m.
Banking, Housing, and Urban Affairs
Housing and Urban Affairs Subcommittee
To hold hearings on S. 1702, broadening FHA authority to provide additional mortgage and loan insurance programs and policies.
5302 Dirksen Building

*Commerce, Science, and Transportation
To hold hearings on the nomination of James E. Burnett, Jr., of Arkansas, to be a member of the National Transportation Safety Board.
235 Russell Building

Finance
International Trade Subcommittee
To hold hearings on S. 958, requiring the administering authority to impose an additional duty upon imported articles which are products of a nonmarket economy country.
2221 Dirksen Building

Governmental Affairs
Permanent Subcommittee on Investigations
To continue hearings on international narcotics trafficking.
3302 Dirksen Building

*Labor and Human Resources
Business meeting, to consider the nomination of John R. Van de Water, of California, to be a member of the National Labor Relations Board.
4232 Dirksen Building

10:00 a.m.
Armed Services
Manpower and Personnel Subcommittee
To hold hearings on bonus and special pay provisions for members of the armed services.
212 Russell Building

Energy and Natural Resources
To hold hearings on the nominations of Pedro San Juan, of the District of Columbia, to be Assistant Secretary of the Interior for Territorial and International Affairs; Vernon R. Wiggins, of Alaska, to be Federal Cochairman of the Alaska Land Use Council; and Janet J. McCoy, of Oregon, to be High Commissioner of the Trust Territory of the Pacific Islands.
3110 Dirksen Building

Environment and Public Works
Water Resources Subcommittee
Business meeting, to continue markup of S. 1692, providing for the operation, maintenance, and construction of deep-draft channels and national harbors.
4200 Dirksen Building

Governmental Affairs
Energy, Nuclear Proliferation, and Government Processes Subcommittee
To hold hearings on nuclear proliferation policy and the implication of new technology.
6226 Dirksen Building

Judiciary
Criminal Law Subcommittee
To resume hearings on S. 186, authorizing funds through fiscal year 1988 for the Department of Justice, to provide assistance to State and local governments for the improvement of the State criminal justice system.
2228 Dirksen Building

Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on S. 312, a private relief bill.
357 Russell Building

Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

10:15 a.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of F. Keith Adkinson, of West Virginia, to be a Federal Trade Commissioner.
235 Russell Building

1:30 p.m.
*Judiciary
To resume oversight hearings on government merger policies.
2228 Dirksen Building

3:30 p.m.
Foreign Relations
Closed briefing by officials of the Department of State on China-Taiwan policy.
S-116 Capitol

NOVEMBER 20

9:00 a.m.
Commerce, Science, and Transportation
To hold hearings on the nominations of Bobby Jack Thompson, of New York, to be Administrator of the U.S. Fire Administration, and Robert M. Garrick, of California, to be a member of the Board of Directors of the Communications Satellite Corporation (Comsat).
235 Russell Building

9:30 a.m.
Rules and Administration
To hold oversight hearings on the application and administration of the Federal Election Campaign Act (P.L. 96-187).
301 Russell Building

10:00 a.m.
Judiciary
**Juvenile Justice Subcommittee
To resume hearings on S. 1688, making it a Federal offense when a convicted criminal commits a series of crimes involving firearms, and S. 1689, providing that a convicted criminal sentenced to life imprisonment under State habitual criminal statutes be incarcerated in a Federal penitentiary.
2228 Dirksen Building

Conferees
Closed, on H.R. 3455, authorizing funds for fiscal year 1982 for military construction programs of the Department of Defense.
S-407, Capitol

2:00 p.m.
Judiciary
To hold hearings on pending nominations.
2228 Dirksen Building

NOVEMBER 23

9:30 a.m.
*Judiciary
*Immigration and Refugee Policy Subcommittee
To hold hearings on certain preference system provisions of the Immigration and Nationality Act (Public Law 94-571).
5110 Dirksen Building

Select on Indian Affairs
To hold hearings on S. 1370, authorizing the Secretary of the Army to acquire such oil, gas, coal, or other mineral interest owned by the Osage Tribe of Indians necessary for the construction of the Skiatook Lake, Osage County, Okla.
5302 Dirksen Building

10:00 a.m.
Judiciary
Security and Terrorism Subcommittee
To hold hearings to examine the presence of Cuban intelligence operations within the United States.
2228 Dirksen Building

NOVEMBER 24

9:00 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To hold hearings on S. 1660, to validate certain oil placer mining claims in Hot Springs County, Wyo.
3110 Dirksen Building

Governmental Affairs
Intergovernmental Relations Subcommittee
To hold hearings on State implementation of Federal regulations, focusing on standards of the Resource, Conservation and Recovery Act.
3302 Dirksen Building

9:30 a.m.
Finance
Taxation and Debt Management Subcommittee and International Trade Subcommittee
To hold joint hearings on S. 1824, increasing the limit on reforestation am-

ortization and changing the funding source for the reforestation tax incentives trust fund from certain forest products tariffs to cutting fees from Federal timber sales; and to review several trade and tax issues relating to the forest products industry.
2221 Dirksen Building

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on Federal regulatory enforcement policy.
6226 Dirksen Building

Rules and Administration
To resume hearings on the application and administration of the Federal Election Campaign Act of 1971, as amended.
301 Russell Building

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
1202 Dirksen Building

Governmental Affairs
To hold hearings on the nomination of Frederic V. Malek, of Virginia, to be a Governor of the U.S. Postal Service.
3302 Dirksen Building

Judiciary
Business meeting, to consider pending calendar business.
2228 Dirksen Building

Labor and Human Resources
Education Subcommittee and Employment and Productivity Subcommittee
To hold joint oversight hearings on the implementation of vocational education programs and the Comprehensive Employment and Training Act (CETA).
4232 Dirksen Building

2:00 p.m.
Judiciary
Security and Terrorism Subcommittee
To continue hearings to examine the presence of Cuban intelligence operations within the United States.
2228 Dirksen Building

NOVEMBER 25

9:30 a.m.
Veterans' Affairs
Business meeting, to mark up S. 349, providing for limited judicial review of the administrative action of the Veterans' Administration, and for reasonable fees to attorneys representing legal counsel for veterans.
412 Russell Building

10:00 a.m.
*Governmental Affairs
To hold hearings on proposed legislation requiring the Inspectors General of certain Federal agencies to periodically review their department's programs.
3302 Dirksen Building

Judiciary
Security and Terrorism Subcommittee
To continue hearings to examine the presence of Cuban intelligence operations within the United States.
2228 Dirksen Building

NOVEMBER 30

9:30 a.m.
Judiciary
Immigration and Refugee Policy Subcommittee
To hold hearings on certain provisions of the Immigration and Nationality Act (Public Law 94-571), relating to the H-2 temporary worker programs and nonimmigrant programs.
2228 Dirksen Building

DECEMBER 1

9:30 a.m.
Agriculture, Nutrition, and Forestry
To hold joint hearings with the Committee on Labor and Human Resources on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume oversight hearings on America's role in the world coal export market.
3110 Dirksen Building

Labor and Human Resources
To hold joint hearing with the Committee on Agriculture, Nutrition, and Forestry on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

Small Business
Productivity and Competition Subcommittee
To hold hearings on Federal antitrust policies, focusing on recent small business mergers.
424 Russell Building

DECEMBER 2

9:30 a.m.
Agriculture, Nutrition, and Forestry
To continue joint hearings with the Committee on Labor and Human Resources on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

Labor and Human Resources
To continue joint hearings with the Committee on Agriculture, Nutrition, and Foresty on S. 1442, revising and updating American food safety laws.
4232 Dirksen Building

10:00 a.m.
Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building

DECEMBER 3

9:30 a.m.
Energy and Natural Resources
Energy and Mineral Resources Subcommittee
To resume oversight hearings on America's role in the world coal export market, focusing on the domestic coal transportation network.
3110 Dirksen Building

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
1202 Dirksen Building

Governmental Affairs
Federal Expenditures, Research, and Rules Subcommittee
To hold hearings on proposed legislation providing for a uniform Federal procurement system.
3302 Dirksen Building

DECEMBER 4

9:30 a.m.
*Banking Housing, and Urban Affairs
To hold hearings on the use of Defense Production Act authorities to stimulate domestic production of titanium.
5302 Dirksen Building

DECEMBER 8

9:00 a.m.
Governmental Affairs
To hold hearings on debt collection procedures in the health professions student loan program, focusing on high delinquency rates.
5110 Dirksen Building

9:30 a.m.
Environment and Public Works
To hold oversight hearings on the Endangered Species Act (Public Law 96-159).
4200 Dirksen Building

Labor and Human Resources
To resume oversight hearings to examine affirmative action regulations of the Office of Federal Contract Compliance Programs, Department of Labor.
4232 Dirksen Building

DECEMBER 9

10:00 a.m.
Energy and Natural Resources
Business meeting on pending calendar business.
3110 Dirksen Building

DECEMBER 10

9:00 a.m.
Judiciary
*Criminal Law Subcommittee
To hold hearings on S. 613, amending the Federal Criminal Code to revise the scope of, and penalties under the Hobbs, Act, prohibiting interference with commerce by threat or violence.
2228 Dirksen Building

9:30 a.m.
Environment and Public Works
To resume oversight hearings on the Endangered Species Act (Public Law 96-159).
4200 Dirksen Building

Labor and Human Resources
To resume oversight hearings to examine affirmative action regulations of the Office of Federal Contract Compliance Programs, Department of Labor.
4232 Dirksen Building

10:00 a.m.
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold oversight hearings on activities of the Department of Energy.
3302 Dirksen Building

DECEMBER 11

10:00 a.m.
Environment and Public Works
Business meeting, to consider pending calendar business.
1202 Dirksen Building

JANUARY 13, 1982

CANCELLATIONS

NOVEMBER 18

10:00 a.m.
Judiciary
Security and Terrorism Subcommittee
To resume hearings to discuss the retention or destruction of certain Federal Government files.
2228 Dirksen Building

SENATE—*Tuesday, November 17, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

The PRESIDENT pro tempore. The presence of Reverend Sorrill to deliver the prayer was requested by Senator MATHIAS.

PRAYER

The Reverend Doctor Harold W. Sorrill, Jr., pastor, Clinton Baptist Church, Clinton, Md., offered the following prayer:

Almighty God and Father, we approach Thee with bowed heads and humble hearts. Thou art powerful and yet compassionate. Thou art all-wise and yet understanding of the limited knowledge of Thy creatures. Thou art cosmic in vision and yet able to see the needs of the most humble individual. Thou art sovereign over all of creation and yet willing to give humans a freedom of choice.

Unto Thy human creature hast Thou given the right to govern. Unto us hast Thou given a free nation in which to find fulfillment of our dreams and aspirations. Unto us hast Thou given elected officials to serve as ministers of God to us for good. Thus we heed the call of Paul not to fear such but to subject ourselves to their leadership.

Grant that these Senators who gather here on this Tuesday might be given clear minds and wise understanding. Let Thy wisdom be expressed through these Thy ministers of government, that we who follow their leadership might find good in life.

In the name above all names, we pray. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, according to my notes, after the recognition of the two leaders under the standing order, the Senator from Wisconsin (Mr. PROXMIRE) will be recognized on a special order, to be followed by a period for the transaction of routine morning business, not to extend more than 20 minutes, in which Senators may speak for not more than 3 minutes each.

At the close of morning business, as ordered, the Senate will resume the consideration of H.R. 4169, the State-Justice-Commerce appropriations bill.

I inquire whether the Chair's records coincide with the program I have just outlined.

The PRESIDING OFFICER (Mr. ARMSTRONG). The majority leader is correct.

Mr. BAKER. I thank the Chair.

LEGISLATIVE SCHEDULE

Mr. BAKER. Mr. President, in addition to the State-Justice-Commerce appropriations bill today, there is at least one other appropriations bill that I hope we might take up, and that is the Foreign Assistance appropriations bill. I believe it might not take a great deal of time to finish that measure. I hope the minority leader might consider the possibility of approving proceeding to that measure by temporarily laying aside the State-Justice-Commerce measure at some point in the day and taking up that appropriations bill.

It is also my understanding that Senators on both sides of the aisle may have caucuses around the noon hour today. If the schedule will permit—and I hope it will—it will be the intention of the leadership to have the Senate stand in recess during that time, since the caucuses by both parties are semiofficial in nature and often result in expediting the proceedings of the Senate, and I believe that is usually a good investment of the time of the Senate.

It is not expected that the Senate will be in very late today, although that will be determined in large part by how much progress we can make or how difficult it is to achieve progress.

Mr. President, the continuing resolution on appropriations was received in the Senate Chamber last evening and has been referred to the Committee on Appropriations. It is my understanding that the Appropriations Committee will begin considering that matter today and perhaps even report a resolution to the Senate tonight. If that is the case, I will once again approach the minority leader on the possibility of waiving the rule impediment that would prevent its earlier consideration and propose to take it up tomorrow, if it is available tomorrow.

There is another matter, the so-called waiver package, Joint Resolution 115, dealing with the Alaska Natural Gas Pipeline project. It had been my hope that it might be taken up either today or tomorrow. I urge Senators, however, to consider that we must take up that matter sometime this week. It is highly privileged, by the terms of the statute. Later today, I hope to have another announcement to make about when that matter will be scheduled. I remind Senators that there is a statutory time with respect to the consideration of that measure.

It is expected that on Friday we will continue with other legislative items, perhaps appropriation bills, perhaps even a conference report on the continuing resolution. The continuing resolution expires, by its terms, at midnight on November 20. It is imperative, of course, that we deal with that matter in advance of that time.

I must repeat the admonition I made on Friday and repeated yesterday—that there is a strong probability of a Saturday session, perhaps even a Sunday session.

Mr. President, the Senate will be in session Monday, Tuesday, and Wednesday of next week. I expect that we will have legislative business to perform during those days and that we will have votes. Senators are on notice, as they have been for some months, that only Thursday and Friday are set aside for the Thanksgiving recess. I think that is essential in view of the work that is yet to be done by the Senate.

I will try to arrange, with the cooperation of the distinguished minority leader, to abbreviate the business of the Senate on Wednesday, so that it will be possible for Members to catch airplanes, especially those who live some distance from the Federal city. I estimate that we will not have a very busy schedule on Wednesday afternoon, after about 3 o'clock.

Mr. President, I do not believe I have any other announcements I can make today that will be of particular interest to the Senate, until later in this day at least.

Therefore, I am prepared to yield to any Senator seeking recognition or, if there are none, to yield the control of my remaining time to the distinguished minority leader.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader for his outline of the program.

I have no need for my time at this point.

SENATOR NUNN ON NUCLEAR ARMS CONTROL

Mr. ROBERT C. BYRD. Mr. President, the control of nuclear weaponry has become a matter of increasing urgency and difficulty at several different levels. At the level of strategic intercontinental delivery systems, the administration has taken the position that the SALT II

agreement was "fatally flawed," and America must rebuild her strategic systems in order to negotiate a new treaty from a position of greater strength. The goal of the new negotiations is said to be arms "reduction," rather than "limitation."

There are serious problems with this approach. First, the strategic weapons recommendations made by the administration have been termed "interim" in nature. The decision to build a B–1 will cost so much over the next 5 years that the present Strategic Air Commander has stated the vital Stealth program will be stretched out. We simply cannot afford two new bombers at once. Furthermore, the decision to harden existing Titan and Minuteman silos, to place the MX missiles in them, does nothing to reduce the vulnerability of our ICBM force to Soviet attack.

Indeed, the administration's program calls for early retirement of portions of our B–52 and ICBM force, and may well make us more vulnerable in the mid-1980's than we would have been under the program of the previous administration. The net result of these decisions, decisions dictated by severe budget constraints rather than defense needs, is that the position of greater strength looks more and more illusory. Does this mean that we will delay the initiation of strategic arms talks with the Soviet Union indefinitely? Apparently not, since administration officials are saying that such talks will begin sometime next spring.

The second difficulty relates to the upcoming negotiations with the Soviets on the question of nuclear weapons in the European theater. It is essential that the American position in those negotiations appears serious and credible since the pressure is mounting on European governments to back off from their commitment to deploy such weapons in 1983. Our NATO partners expect us to negotiate the TNF question within the overall strategic arms framework. Indeed, Secretary Haig signed a communique with the other NATO defense ministers on May 5, 1981, which stated that the "* * * allies welcome the intention of the United States to begin negotiations with the Soviet Union on theater nuclear forces arms control within the SALT framework by the end of the year."

The problem here is that the administration, while rejecting SALT II, has not developed any of its own concrete arms reduction proposals around which the Alliance could rally. The danger exists, therefore, that the Soviets are being handed an opportunity to submit attractive proposals this year which could divide the Alliance and accelerate European tendencies to repudiate American leadership on the TNF deployment. The situation has been needlessly exacerbated by recent assertions that a nuclear conflict may be plausibly limited to European soil. Needless to say, such statements make implementation of the TNF deployment schedule more difficult. They put us in a more difficult position in the upcoming negotiations. They provide the Soviets with propaganda opportunities—opportunities which they skillfully exploit across Europe—to posture as genuine proponents of arm control. All that is occurring as they continue to deploy their SS–20 medium range ballistic missiles at the rate of one a week—making the imbalance of nuclear forces continually worse.

A third difficulty is that technological developments will make the successful conclusion of verifiable arms control agreements more difficult as time goes on. For example, U.S. cruise missile deployments introduce new elements of uncertainty into the equation, and the eventual production and deployment of similar Soviet weaponry will compound the uncertainties.

The distinguished Senator from Georgia, Senator NUNN, a highly respected Member of this body on defense issues, has made a valuable contribution to the discussion of these matters in a guest editorial published in the November 12, 1981, edition of the Washington Post. He suggests that institutional changes within the U.S. Government are needed in order to bring more coherence and consistency to American arms control efforts over time. He points out that more coordination is needed between Defense Department decisionmakers and administration arms controllers. Indeed, without more attention to this problem, our efforts to build a strong consensus within NATO on these matters may be doomed to failure.

In addition to these matters, however, Senator NUNN identifies with great clarity a problem now developing as a result of the proliferation of nuclear weapons technology: The possibility of nuclear weapons use by irresponsible parties to blackmail the West, to conduct nuclear terrorism, or even to precipitate a nuclear exchange between the superpowers. Senator NUNN surmises that the number of nuclear-armed nation states could grow from 6 to 20 by the end of this century. He speculates on a number of frightening, but certainly plausible, scenarios in which these weapons could plunge the world into a nuclear crisis, whether through detonations of unknown origin or through outright blackmail.

Thus, he points out that arms reduction or limitation principles must now be supplemented by a new concept—to control the potential use of such weapons in a crisis—so-called crisis-stability. Since there is no international mechanism to decisively contain these new possibilities of nuclear war, it seems clear that the United States and the Soviet Union bear a responsibility to work together on this crisis-management problem. Obviously, the problem is but a subset of the whole question of nuclear arms control arrangements which must be developed by the superpowers. It is one more important reason why the United States must make renewed efforts to develop, in detail, its arms control policies as soon as possible and to initiate serious negotiations with the Soviets.

I commend Senator NUNN for his continuing contributions to the debate on our Nation's defense posture and congratulate him for this thought-provoking article. I commend my colleagues' attention to it and ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD. as follows:

[From the Washington Post, Nov. 12, 1981]

ARMS CONTROL: WHAT WE SHOULD DO

(By SAM NUNN)

America's arms control goals have been vague and poorly understood by the public. Our tactics have been short-term, and our strategy ambiguous. Our patience at the negotiating table has been short-lived. Our timing has too often been driven by election considerations and our expectations have swung between euphoria and despair.

Three arms control treaties with the Soviet Union have been signed (by presidents Nixon, Ford and Carter) but have not been ratified by the Senate. This may demonstrate that our "separation of powers" is alive and well, but it also raises serious questions as to whether any American president can conclude an arms control treaty any more.

THE SETTING

The United States is now abiding (without formal agreement) by a SALT treaty that President Reagan himself declared "fatally flawed." While awaiting leverage from newly announced but as yet unapproved strategic programs, we are not renegotiating this unratified treaty. Testimony indicates it will be at least the late 1980s before any new strategic programs close the "window of vulnerability" and bring us back to "parity." Several key parts of the recently announced strategic program, which are not yet well-defined, will have major arms control implications.

We are about to begin negotiations with the Soviets on tactical nuclear weapons, an area in which the United States has little leverage and NATO is at a pronounced military disadvantage. These negotiations provide the Soviet Union a considerable opportunity to prevent the long overdue NATO tactical nucelar force modernization. They also create an increasingly unrealistic separation between strategic and theater nuclear weapons and allow the Soviets skillfully to manipulate growing European skepticism of American leadership.

Under these circumstances, should we be puzzled when we look over our shoulder and our allies aren't following our lead? They don't know where we're going. Do we? Whether we like it or not, our arms control efforts and NATO's future are now linked. A clear, consistent arms control approach that enjoys the support of Congress and the American people is a national security imperative.

CONTINUITY

If the American position on arms control is to have more credibility with our allies, our adversaries and the American people, we must bring some continuity to our process for formulating and executing arms control policy and integrating it with military policies. We must develop a clear set of long-term goals, objectives and priorities that can be understood by the public, our allies and, ideally, even our adversaries.

Procedures within our government must be developed to ensure that strategic weapons programs and arms control measures mesh

together better. We can no longer separate the two functions, giving civilians the job of controlling arms and the military the job of procuring weapons. U.S. military planners must have a greater input in shaping our arms control objectives so that arms control measures can also be treated as viable instruments for attaining required security objectives.

For more than a decade, the Soviets have had essentially the same people negotiating SALT. During that same period, the United States has had six chief negotiators and the major support staff has been changed many times. Why shouldn't the Soviets be confident they can wait out the Americans? Why shouldn't our allies and our adversaries believe that our patience and our horizons are limited in the arms control arena?

One way to improve arms control continuity would be to upgrade substantially the current General Advisory Committee on Arms Control. The present committee is colocated with the Arms Control and Disarmament Agency and, rightly or wrongly, is viewed as an adjunct of that agency. We should consider creating a bipartisan presidential commission to be the board of directors for our arms control efforts.

The commission would be appointed by the president and confirmed by the Senate for overlapping terms long enough to give it independence and continuity. It could not and should not supersede the constitutional prerogatives of the executive branch to negotiate, and the Senate to ratify, treaties. It could, however, be asked to bring some coherence to our arms control philosophy and implementation. Reporting directly to the president, the board should have a broad charter to consider arms control under the rubric of overall national security and foreign policy.

It could provide a publicly respected review board to:

Help formulate long- and short-term arms control objectives, goals and priorities consistent with our national security and our defense policies;

Monitor negotiations; and

Keep the American public informed of the goals, objectives and priorities of our arms control efforts in a way that can be separated from partisan political considerations.

STABILITY

The U.S. arms control process has had a narrow scope that undermines its potential positive impact in military terms and in international opinion. Over the last decade, most of our arms control effort has been directed at limiting the size of nuclear arsenals rather than avoiding or limiting the potential use of nuclear weapons in crises—so-called "crisis-stability." We hope to reduce the number of weapons in the long run, but reductions in numbers do not automatically or necessarily increase crisis stability. We hope to save money with a sound arms control agreement, but an even larger strategic budget would be well worth the money if the result were the reduced likelihood of nuclear war. With thousands of nuclear warheads available to each side, control of their use in crises is more important than reduction of numbers, cost or technological development.

We must begin to think about arms control initiatives that will address crisis stability.

How would the Russians react if a low-flying aircraft with U.S. markings delivered a nuclear device on one of their cities? Do they have the capability to determine the true origin of the aircraft? Would stunned and angry Russians react calmly and cautiously or would they draw immediate conclusions and launch a nuclear attack against America? How would we react if a nuclear device exploded in a ship of unknown origin in San Francisco harbor and obliterated the city? Will we sit idly by while the possibilities grow in the years ahead that a fanatical leader may attempt to rid the world of the superpowers by pulling a Third World trigger?

Are these unreal science fiction fantasies or is there a growing possibility of a third-party or terrorist use of nuclear weapons? At my request last spring, Gen. Richard Ellis, then commander of the Strategic Air Command, undertook the evaluation of the possibility of a third party triggering a superpower nuclear exchange under a variety of scenarios. Unfortunately, this evaluation showed that there are real and developing dangers in this area.

Do the U.S.S.R. and the United States have a mutual interest in preventing a Third World trigger or a terrorist use of nuclear weapons? Should both nations have a mutual interest in working together to be able immediately to identify the source of a nuclear strike from a third country or from a terrorist attack? Can arms control efforts be made relevant to the growing dangers of this type of nuclear catalyst?

The point is not to frighten, but to stimulate the best minds in both the United States and the Soviet Union to think soberly about the future potential for destruction facing the world. There are an increasing number of scenarios that could precipitate the outbreak of nuclear war that neither side anticipated or intended. By 1990, our government believes that more than 20 nations may have the industrial capability to build nuclear weapons. Terrorist possession of nuclear warheads in the future cannot be dismissed. Several nations are now also developing rockets for "commercial purposes." The simple fact is that we really don't have an international framework or mechanism for quickly and decisively controlling or containing these possibilities. In a world growing more dangerous with proliferation of nuclear weapons and delivery systems, the United States and the Soviet Union, as well as other nuclear powers, have growing reason to work together to prevent nuclear war.

U.S.-SOVIET COOPERATION

While there is still time, serious thought should be given by ourselves and the Russians to our possible mutual interest in establishing a military crisis control center for the monitoring and containment of nuclear weapons used by third parties or terrorist groups. This could take the form of joint U.S.-Soviet information-sharing combined with a multinational center for crisis management. A precedent for this type of effort can be found in the four-power Berlin center for movement of aircraft in the Berlin corridors.

The crisis management group could be a permanent standing team of highly qualified civilian and military personnel, in full operation 24 hours a day, 365 days a year, with access to the top political and military leadership. Its purpose would be to provide a mechanism that gives each side more confidence in the facts during a nuclear crisis. It would afford the leaders of both nations a better chance to determine, independently and jointly, the origin and parties responsible for any explosion of nuclear weapons. It has the potential for encouraging cooperation and building confidence between the superpowers, even when political relations are at a low ebb. These steps could contribute to crisis stability. They could also add a significant degree of deterrence to third-country or terrorist attempts to light the nuclear bonfire.

This will not be a simple task completed quickly, but the discussions and negotiations should begin. These negotiations could be broadened to address other mutual arms control steps, such as confidence-building measures to enhance verification, strengthening the U.S.-Soviet hot line, as well as reducing the vulnerabilities of command, control and communications of both nations. We could also begin discussions on a possible nuclear weapons deployment agreement that would lengthen the warning time both nations would have of a nuclear attack.

The nuclear powers must begin to improve our capacity to control a nuclear crisis—regardless of origin. Our nation must adopt clear goals that establish a foundation for arms control that has long-term continuity and less vulnerability to domestic partisan politics. We must find an arms control policy we can live with.

Mr. ROBERT C. BYRD. I yield to Mr. PROXMIRE any of my time he may wish to use.

Mr. PROXMIRE. I thank my good friend, the minority leader.

Mr. President, as I understand it, I have a special order.

The PRESIDING OFFICER. The Senator is correct.

Mr. PROXMIRE. Mr. President, I shall use part of the time of the distinguished minority leader and then I shall use my regular time. I do not think I will use more than 15 minutes.

Mr. BAKER. Mr. President, in view of this statement, I yield back my time remaining under the standing order.

LET US NOT GIVE UP ON BALANCING THE FEDERAL BUDGET

Mr. PROXMIRE. Mr. President, is inflation still the major economic problem in this country? The answer is of course, yes, indeed. We continue to suffer the most serious inflation we have ever endured. It has continued ever since 1939, 42 long years, by far the longest continuous inflation in American history.

Wholesale prices have risen by more than 600 percent, making this inflation by far the severest the Nation has ever suffered. It has continued right through three wars and the end of those wars.

This inflation has been so virulent that even the massive release of resources after World War II, the Korean war, and the Vietnam war did not reverse, as the end of wars always had in the past, the relentless rise of prices.

Indeed, it has continued right through recessions, including the 1974–75 economic downturn, the worst recession since the Great Depression, but prices continued to march right uphill, and the inflation continues now through another recession, with unemployment at 8 percent and rising, with bankruptcies nearing record levels, with an enormous surplus of unused capacity and idle resources. Prices continue their steady climb.

And thanks very largely to America's predominant leadership in the free world this inflation has become international. It plagues every free market economy in the world and has done so for decades. And this represents a serious and damaging spinoff threatening the military strength of the free world.

INFLATION NO. 1 PROBLEM

Yes, indeed, price rises have moderated some under the pressure of the current recession. But for anyone with any sense of perspective inflation, rampaging inflation, remains as our No. 1, our major economic problem. We cannot neglect inflation as the No. 1 priority of our economic policies.

Because inflation remains our predominant economic problem, we must not give up on the basic anti-inflation economic policies because we now find ourselves in a serious and growing recession. Let me be specific: that means we should not abandon our determination to cut spending and to balance the budget.

Mr. President, in the last few weeks the rate of interest has been falling. The prime rate has fallen from 21 percent to below 17 percent. Interest rates on Treasury bills have come down rapidly. The Federal Reserve Board has sharply reduced the rediscount rate and seems poised to cut it again. Mortgage interest rates remain stubbornly and painfully high but may start coming down soon. But again, Mr. President, for anyone with any sense of perspective, interest rates remain outrageously high by any historical standard. And what is worse, all of us know that as soon as the economy recovers those interest rates will resume their climb right back to the paralyzing levels that have knocked the housing industry flat on its back and driven the automobile industry into the worst economic times in many years.

Mr. President, let us recognize the nature of this recession. This is an inflation-induced recession. To recover from the recession we should not deepen the inflation. We should slow it down.

HIGH INTEREST RATES

So once again because high interest rates remain as the cruel cutting edge of inflation we must follow policies that will bring them down and keep them down to the historic levels that have throughout virtually all of our history enabled this country to grow and prosper unmatched by any other country in the world.

Again let me be specific: That means we should not abandon our determination to cut Federal spending and balance the budget. It means we should get the Federal Government out of the credit markets by stopping net off budget borrowing, and that brings me Mr. President, to my regular countdown. We now have 317 days before the expiration of the $1.79 trillion debt limit on September 30, 1982. We should not raise that debt limit again.

We should use the 10½ months that we have and the roughly $75 billion leeway we have remaining to assure the financial markets that we will not push the debt limit any higher. This is it. The Federal Government will not sink further into debt.

Is such a course practical with 8½ million Americans out of work? Absolutely, and here is why: Most of those Americans are out of work because enormous Government borrowing has driven interest rates so high that consumers and businesses simply cannot afford to borrow money.

We suffer a credit depression. Why do we have 2 million fewer jobs in homebuilding than demand for homes should support?

Because with mortgage rates about 15 percent, or more, we have priced more than 1 million families right out of the housing market. For a typical American family buying a new home, monthly payments would exceed an absolutely prohibitive $1,000, 80 percent of which is interest. With reasonable interest rates the typical monthly payments could fall to $600 from $1,000 and we would easily have another 1 million housing starts and 2 million additional jobs. Similarly in automobiles, farm equipment, in a vast variety of small business, high interest rates have stopped business cold.

CUT INTEREST RATES—FOR MORE JOBS

Reduce interest rates and we put America back to work. And how do we reduce interest rates? We reduce the mammoth rate of Federal Government borrowing. We cut the deficit and balance the budget. We yank the Federal Government out of net off-budget borrowing. And how do we accomplish that? We observe the debt limit and stop right where it is now.

Mr. President, hard as it may be to accept the argument, we will actually put more Americans to work if we reduce spending and balance the budget than if we follow any other economic policy.

ADMINISTRATION SURRENDERS

The Reagan administration has started out on both the right and the wrong path in putting this country back to work. For the first time in 50 years we have an administration that has, in fact, won congressional action to reduce Federal spending and yet the administration has now officially given up on any effort to balance the budget during the first term of President Reagan.

Unofficially they had given up months ago as two events make clear. The first is the revelation in the Stockman article. The second is clear fact and arithmetic.

When the Reagan administration came in they were faced with a $40 to $45 billion 1982 deficit. They knew this. It was public knowledge.

In the face of this they proposed a $38 billion cut in the budget, which left them with a small deficit for the year.

But they then added a $7 billion increase in the military budget and a tax cut of $40 billion during fiscal year 1982. That meant, by the clear arithmetic itself, a $49 to $54 billion deficit. They abandoned the balanced budget. The projections for fiscal years 1983 and 1984, based on the fiscal year 1982 numbers, make a balanced budget impossible using their numbers and their program.

Since then, the reaction of the financial markets to this news and the onset of the recession has pushed the budget out of shape even more.

SUPPLY SIDERS LIKE KEYNESIANS

But the point is that they have done this with their eyes open. The supply siders have always talked like Keynesian economists: "The deficit does not matter." "The deficit is now only a small part of the GNP." "It is manageable."

Therefore, what is needed is fundamental shift in policy to make a balanced budget a goal of administration economic policy. Short of that they will never achieve a balanced budget and the adverse effects on housing, autos, farmers, and high interest and inflation rates will continue.

The Reagan administration seems to have abandoned the old time religion. The party of William McKinley, Theodore Roosevelt, William Howard Taft, Calvin Coolidge, Herbert Hoover, Dwight Eisenhower, Robert A. Taft, BARRY GOLDWATER, and Gerald Ford has abandoned the balanced budget for the siren song of the supply siders which says deficits do not count and that by pushing on a spring we can guarantee progress and prosperity.

Because of the recession it will be impossible to provide a balanced budget in fiscal year 1982, this year. With unemployment anticipated at 9 percent or more and a falling off of production, investment and sales, Government expenditures will go up while tax receipts decline.

PREPARE NOW FOR BALANCED BUDGET

A deficit in a period of recession is justified. Our problem has been that we have had a series of deficits going back for more than 20 years, not only in periods of high unemployment and recession, but in periods of rapid growth, relatively full employment, and runaway inflation.

Where do we go from here? We should work now to provide a balanced budget in the periods of recovery and prosperity which follow the recession.

Unless we provide either for large cuts in future spending or increase in revenues, or a combination of both in fiscal years 1983 and 1984, both the inflation rate and interest rates will zoom to their recent levels and above in those years.

So the time to prepare for a balanced budget and a surplus in fiscal year 1983 and fiscal year 1984 is now. There are a variety of tools and policies by which such a program can be carried out. Here are some of them.

AGENDA FOR ACTION

Let me list a kind of agenda for action:

First, the President is now preparing the fiscal year 1983 budget. It will be proposed next January.

That budget could provide revenues and expenditures which would be in balance if the economy recovers and real economic growth in fiscal year 1983 is 3 percent or more—a balanced budget with growth of 3 percent or more.

Second, the President can propose a budget which limits Federal expenditures to a specific percent of GNP. I propose

that for fiscal year 1983 expenditures be limited to 19 percent or less of GNP. That would force additional discipline on spending and get us closer to a balanced budget.

Third, the President can use the debt ceiling as a tool to enforce fiscal discipline. As I said, he has 10 months and 15 days before the present debt ceiling is reached. He was given an additional $94 billion of spending since Congress authorized the increase in the temporary ceiling.

About $75 or $80 billion of that still remains. He should announce now that there will be no further increase in the debt ceiling and force his administration, the departmental budget officers, the Office of Management and Budget, and both Houses of Congress to find the cuts between now and then so we can live within the existing debt ceiling.

Fourth, he can apply stricter limits of off-budget lending, to the credit budget, and to loans and loan guarantees of the Federal Government which play such an important part in putting the Government into the money markets and competing with the private sector for funds for housing, autos, and consumer goods.

Fifth, he must make the most rigorous examination of the military budget in order to cut out the fat and waste, the frills and excess baggage, and to see to it that the military budget is spent for military purposes. In addition, he and his administration must concentrate on saving massive amounts of money in the area of military contracting by moving from a system which is primarily one of sole-source or negotiated bidding to a system of competitive bidding.

Furthermore, we need to put an end to gold plating and emphasize simpler, less complex and more efficient weapons.

BALANCE BUDGET IN 1983

These are just a few of the things the President can do to make certain that as the economy recovers, which both he and his chief economic advisers confidently predict for the middle of 1982, that we move strongly and purposefully toward a balanced budget in fiscal year 1983.

Mr. President, there is always debate as to whether we should balance the budget under certain economic conditions. The general consensus is we are going to have recovery beginning next summer when the 10-percent income tax reduction takes effect, that this will be an enormous boost to consumer spending and to the optimism of business, and that we will economically expand in advance.

That may well be right. I think the general feeling is we will have a growth of at least 3, 4, 5 percent or more. Under those circumstances we should balance the budget. That means we go into 1983—October 1, 1982, of course, the fiscal year begins—we go into that year with a rising economy, with an expanding economy, with circumstances in which we should, of course, balance the budget.

Instead of abandoning the balanced budget, the President should abandon the pessimism of the supply-side economists on the right who, like their opposite numbers on the left, tell us deficits do not matter and that we owe the debt to ourselves.

Through both tax and spending policies put in place in the 1983 fiscal year budget we must move massively toward a balanced budget and a surplus as the economy moves out of recession and into expansion at the end of the present period of decline.

The time to plan for that is now.

The place to carry it out is through the fiscal year 1983 budget document.

THE CONTINUING TRAGEDY IN UGANDA

Mr. PROXMIRE. Mr. President, an article in the November 13, 1981 Washington Post details the horrors of Ugandan refugees fleeing their country by the thousands and desperately seeking sanctuary in Zaire and Sudan.

This is the aftermath of Idi Amin's genocidal activities, a continuing tragedy and a nightmare from which the survivors are still seeking relief.

Thousands of soldiers from Amin's defeated Army, as well as defectors who fought as mercenaries with the Tanzanian invasion forces, now roam the dense forests where Uganda, Zaire, and Sudan converge.

Apparently still well-armed, the guerrillas ambush security forces and terrorize the local population as well as the hundreds of thousands of refugees who fled during and after Amin's reign of terror.

The guerrillas have virtually depopulated wide areas of the West Nile Province, home of the Kakwa ethnic group to which Amin belonged. Refugee officials say that Arua, just inside Uganda, has been completely destroyed.

Government officials in Sudan and Zaire are apprehensive about the effects of the refugee influx on their strained economies, and fear disruption of a precarious political and social stability.

An estimated 185,000 refugees have arrived in the region around the Zairian border town of Aru since April, 1979. Since June, 1981 45,000 have arrived in the aftermath of increased attacks in the northwest region of Uganda.

At least 250,000 refugees have fled to southern Sudan, a country already harboring an equal number of Eritrean refugees from Ethiopia. Refugee camps are overcrowded, diseases have broken out, and food and medical supplies are scarce.

Mr. President, the effects of Idi Amin's reign of terror did not end with his Army's defeat or with his escape from Uganda. The people of Uganda who survived his genocidal acts continue to suffer.

Mr. President, our ratification of the Genocide Convention will not restore Amin's victims to life or the survivors to health and freedom from want. But what of the next bloody dictator, Mr. President, and what of his victims? The United States, as a signatory to a Convention created to prevent genocide, might have brought the full weight of the international community to bear against Amin's atrocities.

If ratification of the Genocide Convention saves even one tribe from extinction, how will we answer our national conscience if we continue to delay? Mr. President, I urge immediate ratification of the Genocide Convention.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning busines for not to exceed 20 minutes with statements limited therein to 3 minutes each.

CORPORATE CHARITABLE CONTRIBUTIONS—S. 1834

Mr. DURENBERGER. Mr. President, during the past few months we have said a great deal about the Federal Government enabling local communities and voluntary organizations to play a greater role in solving our Nation's problems. We have introduced a bill (S. 1834) that will increase the capacity of the private sector to address the problems we face as a society.

The spending reductions approved by Congress, though necessary, will have a severe effect on charitable organizations. One study estimates that voluntary organizations will lose over $27 billion in the next 3 years from the cutbacks in traditional Federal support. Inevitably, charities will suffer further funding setbacks as State and local governments look for ways to trim overburdened budgets.

In addition to reductions in funding through Government programs, charities also face reduced incentives for giving created by this year's Economic Recovery Tax Act. It has been estimated that those changes in the tax law will reduce giving over the next 4 years by $18 billion in current dollars and $10 billion in constant dollars from what giving would have been if the tax law had not changed.

Yet this country has never needed the services of our voluntary organizations more. We cannot expect charities and voluntary organizations to take on a much greater role in solving the Nation's problems while, at the same time, we do nothing to help these groups compensate for the losses they have suffered. I do not intend to let this happen, which is why I join in support of this bill.

This bill is intended to enhance what has become one of the most important sources of charitable contributions and the source with the greatest growth potential: corporate giving. It does so by permitting shareholders a say in directing corporate giving through their stock dividends.

Specifically, our bill will permit shareholders each year to direct that one or more of their quarterly dividends be given to a charity designated by the shareholder. The shareholder then will

not have this dividend taxed to him or her as income—nor will the shareholder be entitled to receive a charitable deduction for the gift. The corporation, in turn, would give to the designated charity an amount that after taxes would leave the corporation in the same position as if it had paid the dividend to the shareholder.

To use a simplified example, let us assume the corporation's maximum tax rate is 40 percent. If a shareholder were to designate his $100 quarterly dividend to a favorite charity, the corporation would then give that charity $167, receiving a $167 charitable contribution deduction for an effective cost to the corporation of $100. That is the same cost to the corporation as making the $100 dividend to the shareholder, since dividends are not deductible by the corporation.

So, Mr. President, this simple modification of current law will result in increased giving to charities when shareholders realize that foregoing a dividend will result in a donation of substantially more than the amount of the dividend. Let me stress again the tremendous pressure we have put on voluntary organizations—the future success of our fight against social problems does not lie solely with the Federal Government.

The private sector must now play an increased role in the effort. As we turn more and more services and responsibility over to volunteers, the very least we can do is also give them the financial and moral support they deserve during this crucial period of transition. America's charities are willing to meet the new demands we have placed on them. Passage of this bill would help to give them the capability to succeed.

ORDER FOR 2-HOUR RECESS

Mr. BAKER. Mr. President, as I indicated earlier, there are caucuses that will occur between the hours of 12 and 2 p.m. today on both sides of the aisles. I ask unanimous consent that at 12 o'clock the Senate stand in recess until the hour of 2 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

Mr. BAKER. Mr. President, I inquire of the Chair if there is any further morning business to be transacted.

The PRESIDING OFFICER. Is there any further morning business?

If not, morning business is closed.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

The PRESIDING OFFICER. The Senate will now resume consideration of the pending business, H.R. 4169, which the clerk will state by title.

The legislative clerk read as follows:

A bill (H.R. 4169) making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The Senate resumed consideration of the bill.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordererd.

ARTHUR FLEMMING, PUBLIC SERVANT EXTRAORDINARY

Mr. WEICKER. Mr. President, it is my intention in just a few minutes to offer an amendment to the bill making appropriations for the Departments of Commerce, Justice, State, Judiciary, and related agencies for fiscal year 1982. Before doing that, I should like to comment on what has been reported in the press relative to Arthur Flemming.

Mr. President, Arthur Flemming became chairman of the U.S. Commission on Civil Rights in March of 1974. Born in Kingston, N.Y., on June 12, 1905, Mr. Flemming was graduated from Ohio Wesleyan University in 1927 and received his master's degree from American University in 1929. He received a juris doctor degree from George Washington University in 1933 and has been granted honorary degrees from a number of colleges and universities.

Mr. President, Arthur Flemming began his academic career as an instructor of government at American University in 1927 and became director of the School of Public Affairs at the university in 1934. He left American University in 1939 to become a member of the U.S. Civil Service Commission, where he served for 9 years. During this time, he also served as chairman of the Labor-Management Manpower Policy Committee of the War Manpower Commission for 3 years.

In 1948, Mr. Flemming was named president of Ohio Wesleyan University. He left this post in 1953 to serve as director of the Office of Defense Mobilization and, after 4 years, resumed the presidency of Ohio Wesleyan.

He was appointed Secretary of Health, Education, and Welfare in 1958 by Dwight D. Eisenhower. In 1961, he began a 7-year term as the president of the University of Oregon and then became president of Macalester College, where he remained for 3 years.

Mr. Flemming was nominated chairman of the White House Conference on Aging in 1971 and special presidential consultant on aging in 1972. He served as commissioner on aging of the Department of Health, Education, and Welfare from 1973 to 1978.

A member of the first and second Hoover Commissions on the organization of the executive branch, Mr. Flemming also served as a member of President Eisenhower's Advisory Committee on Government Organization, a member of the International Civil Service Advisory Board, and chairman of the National Advisory Committee of Upward Bound.

Mr. Flemming was appointed president of the Oregon Council of Churches in 1964, president of the National Council of Churches of Christ in America in 1966, and president of the National Council on Social Welfare in 1968. He also served as chairman of the American Council on Education in 1969.

Mr. President, I have known Arthur Flemming for the past 8 years, during the time that I have served on the subcommittee on appropriations dealing with the Departments of Commerce, Justice, State, and other related agencies. I think every American, I know every American can be proud of the stewardship that Arthur Flemming brought to the U.S. Commission on Civil Rights. He was a great credit to the Eisenhower administration in his capacity as Secretary of Health, Education, and Welfare. He has been a great credit to the academic community, and he has been a great credit to all Americans, especially to the cause of civil rights since his attaining the chairmanship of that Commission. I am deeply disappointed—deeply disappointed—in the news I heard today, which is that he has been asked to step aside.

Mr. President, if there was ever a gentle man and a perceptive man, it is Arthur Flemming. Nobody of any color or race brought more conviction to the job, to the mission, than Arthur Flemming.

I do not know what party he is registered in, Mr. President. I assume, since he was a member of the Eisenhower Cabinet, he is a Republican. Believe me, there are few Republicans that have distinguished themselves in the area of civil rights. Mr. Flemming is one of them. This country is better today for his efforts.

It escapes me as to how this administration, which is not exactly perceived as being activist in the area of civil rights, would want to let go one of the few Republicans in this country who is so perceived.

By means of these few words on the Senate floor, I just want to let Arthur Flemming know that I think he is one of the great Americans of these times, and he has never been needed more than he is needed today. Democrat and Republican, white and black, look upon civil rights as a matter of nostalgia in the past; and many of the gains that were achieved under the aegis of Arthur Flemming and others are being lost. So whatever else will now occupy his energies, I certainly wish him well.

I also wish the President would reconsider what he is doing here and take the advice of those who know about civil rights and have this fine Republican at his side during what I think are going

to be very difficult times ahead in this area.

Mr. President, I am ready to present an amendment. I do not have the amendment with me at this time.

I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 632

Mr. WEICKER. Mr. President, I have an amendment at the desk, and I ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Connecticut (Mr. WEICKER) proposes an unprinted amendment numbered 632:

On page 31, line 24, after the period, insert the following: "except that nothing in this act shall be interpreted as the establishment of religion, or prohibiting the free exercise thereof."

Mr. WEICKER. Mr. President, first of all, I commend the clerk for reading my handwriting.

Mr. President, what I have done here is to use the actual words of the Constitution of the United States rather than to use the all-encompassing word "constitutional." We now have an attempt to put into this bill the specific language of the first amendment of the Constitution of the United States.

Since many of my brethren are trying to amend the Constitution legislatively, I think I will try to protect the Constitution legislatively and let us see if we can go ahead and have my colleagues rise to their feet here and vote against the specific wording of the first amendment of the Constitution of the United States.

Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, the issue has not changed since debate on this floor yesterday. I think there are very few moments that I have been as disappointed in the action of the Senate as I was when in effect we went contrary to the Constitution and to the history of the interpretation of the Constitution.

The matter of religion is not something that belongs in the affairs of this Government. Religion is a personal, not an official thing in the United States of America.

It has de facto achieved official status, but that did not make it right.

I think it is safe to say for over 100 years Protestantism was de facto if not de jure the official religion of this country. Because it was, large numbers of persons were deeply wronged.

Those who come to mind most easily are Catholics, who until the election of John Kennedy were discriminated against in the American political system; Jews who were discriminated against in the American political system.

The fact is that we do not recognize any particular faith. It is not the job of any Senator to take up on the floor whether a rabbi leads off on Saturday or the priest leads off on Sunday.

And this word that is bandied about the floor that we are living under the Judeo-Christian ethic, I see no words in the Constitution about the Judeo-Christian ethic. The only thing that is in the Constitution of the United States is amendment one:

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof.

That is it. That is all that it says about religion. It is no more than that.

If an understanding of the Constitution of the United States is not clear on the floor of the Senate, where is it understood, where is it any more loved, where is it to be followed?

I want to make it clear to those who are engaged in this broad range of assaults that talk prolife, proprayer, who is against life, who is against prayer? No one that I know of.

In this instance the oath of office which I took to the Constitution of the United States makes it incumbent upon me to fight with every breath in my body to permit anyone to practice anything that he or she cares to in terms of his or her religion, anything; that he or she may practice in total freedom, not just freedom by law but freedom by virtue of fact.

And the minute religion intrudes upon the Government of this country in the sense of it becoming official we set person against person and community against community.

It is the law, it is the Constitution that has given to each one of us that freedom which I am committed to defend here on the floor with many of my other colleagues.

It just did not happen. This Nation was founded because of the violent acts of religion in another country thousands of miles away.

In the name of religion more mayhem and mischief has been committed in the history of this world than for any other cause.

My creed is the Constitution of the United States. It is not the creed of any other faith or any faith.

And so I hope in this very simple amendment that my colleagues will join with me in reaffirming their commitment to those magnificent words:

Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof.

Now, Mr. President, unless there is further to be said on the subject, I am quite prepared to move to the vote.

The PRESIDING OFFICER. Is there any further debate on the amendment?

If not, the question is on agreeing to the amendment of the Senator from Connecticut.

On the question the yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from New Mexico (Mr. DOMENICI) and the Senator from Arizona (Mr. GOLDWATER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Nevada (Mr. CANNON), the Senator from Arkansas (Mr. PRYOR), and the Senator from Tennessee (Mr. SASSER) are necessarily absent.

I further announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I also announce that the Senator from Alabama (Mr. HEFLIN) is absent because of death in the family.

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 93, nays 0, as follows:

[Rollcall Vote No. 380 Leg.]

YEAS—93

Abdnor	Garn	Moynihan
Andrews	Glenn	Murkowski
Armstrong	Gorton	Nickles
Baker	Grassley	Nunn
Baucus	Hart	Packwood
Bentsen	Hatch	Pell
Biden	Hatfield	Percy
Boren	Hawkins	Pressler
Boschwitz	Hayakawa	Proxmire
Bradley	Heinz	Quayle
Bumpers	Helms	Randolph
Burdick	Hollings	Riegle
Byrd, Harry F., Jr.	Huddleston	Roth
	Humphrey	Rudman
Byrd, Robert C.	Inouye	Sarbanes
Chafee	Jackson	Schmitt
Chiles	Jepsen	Simpson
Cochran	Johnston	Specter
Cohen	Kassebaum	Stafford
Cranston	Kasten	Stennis
D'Amato	Kennedy	Stevens

Eagleton	McClure	Williams
East	Melcher	Zorinsky
Exon	Metzenbaum	
Ford	Mitchell	

NOT VOTING—7

Cannon	Heflin	Sasser
Domenici	Leahy	
Goldwater	Pryor	

So Mr. WEICKER's amendment (UP No. 632) was agreed to.

Mr. WEICKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the time for debate on this measure be extended for not to exceed 5 minutes in order for me to make a statement and the distinguished Senator from North Carolina to offer an amendment in respect to this measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR WEDNESDAY

ORDER FOR RECESS UNTIL 10:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10:30 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order on tomorrow, the Senate resume consideration of the pending business, and that at that time the amendment of the distinguished Senator from North Carolina, which he is about to offer, will be the pending amendment; that at 11:30 a.m. tomorrow, the Senate temporarily lay aside this measure in order to accommodate the previous order for the vote on nine treaties, and that immediately following that vote, without further debate, intervening motion, or appeal, the Senate proceed to vote in relation to the Helms amendment.

Mr. HELMS. If the distinguished majority leader will yield, if the amendment is not accepted.

Mr. BAKER. Yes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATIONS, 1982

The Senate continued with the consideration of the bill.

Mr. BAKER. I yield to the distinguished Senator from North Carolina so that he may offer his amendment. I believe there will be approximately 4 minutes of debate left for that measure, at which time, under the order previously entered, the Chair will put the Senate into recess until 2 o'clock this afternoon.

I might say that this arrangement has been cleared with the minority leader, who has just left the floor to attend an official function.

Mr. President, at 2 o'clock this afternoon, I intend to ask the Senate to temporarily lay aside this measure in order to go to the foreign assistance appropriations bill.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. Mr. President, I commend the distinguished Senator from Connecticut for what I trust is a correct perception of the intent of the amendment just adopted, which I urged all Senators to support. There never has been a question that it would be the "establishment of a religion" to have children be permitted to engage in voluntary prayer. Certainly, there is no prohibition of the free exercise of religion involved in school prayer. The question has been contrived as a result of the Supreme Court's meddling in a matter that was none of the Court's business in the first place.

Mr. President, I have been presiding over a farm bill conference on the House side. I could not be here for the discussion of the amendment of the distinguished Senator from Connecticut. I would mention now that had I been able to be here, I would have suggested that instead of the word "except" at the beginning of Senator WEICKER's amendment the word "and" be used instead. Of course, being tied up elsewhere, I was not able to do that.

UP AMENDMENT NO. 633

(Subsequently numbered amendment No. 633.)

Mr. HELMS. So, Mr. President, simply to make clear that there is no intent to derogate the limitation on expenditures in the Senate's unanimous approval of the Weicker amendment, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 633:

On page 31, at the end of line 24, insert the following:

"*Provided further*, That nothing in this provision shall be interpreted in derogation of the limitation on expenditures stated herein".

Mr. HELMS. Mr. President, it may be that the distinguished Senator from Connecticut would be willing to accept this amendment and there would then be no need for any further discussion, now or later.

Mr. WEICKER. I say to my good friend from North Carolina, I have not had a chance to evaluate the language which he has presented to the Senate. I certainly will do that prior to our returning to this bill on tomorrow. I will be glad to give an answer at that time.

Mr. HELMS. I appreciate that.

Mr. President, inasmuch as I will be in the farm bill conference again tomorrow, I ask that it be in order that I ask for the yeas and nays on the amendment at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HELMS. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. HELMS. I will say that if the distinguished Senator from Connecticut decides to accept the amendment, I will of course ask that the yeas and nays be vitiated on tomorrow.

I yield back the remainder of my time.

Mr. WEICKER. I yield back the remainder of my time.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate will now stand in recess until the hour of 2 p.m.

Thereupon, at 12:21 p.m., the Senate recessed until 2 p.m., whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. LUGAR).

Mr. KASTEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1982

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate may temporarily lay aside the pending business and proceed now to the consideration of S. 1802.

The PRESIDING OFFICER. Without objection, the clerk will state the bill by title.

The assistant legislative clerk read as follows:

A bill (S. 1802) making appropriations for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes.

The Senate proceeded to consider the bill.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KASTEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Mr. President, it has now been more than 2 years since the Senate has considered a regular foreign assistance appropriations bill. It has been more than 3 years since such legislation has been signed into law. We are into the third year of continuing resolutions, and while the House Appropriations Committee has reported out foreign assistance legislation, it is nonetheless beginning to look like fiscal year 1982 will be the third full year of trying to manage and administer U.S. foreign assistance programs under a continuing resolution—a resolution, incidentally, which has as its base the unenacted conference report for fiscal year 1980.

Mr. President, it is against this background that the committee took the unusual step of reporting an original appropriation bill. We took this action for several reasons, but I believe we must emphasize that we did not take this action as a slap at the House.

On the contrary, the chairman and ranking Republican member of the House subcommittee have repeatedly indicated their own strong desires to get a foreign assistance appropriations bill enacted this year.

Hopefully our action here will help them in their efforts. I especially hope that our action will cause the administration to double its efforts, at the highest levels, and help those in the House who are working for enactment of the foreign assistance appropriations bill.

Mr. President, the bill as reported to the Senate provides for a total appropriation of $7,250,083,804 in new budget authority, $338,084,879 below the administration's September request, and $344,196,260 below the amount recommended in similar legislation reported in the House. The committee's recommendation is $1,505,981.028 below the President's March budget request. However, the committee's recommendation for the Export-Import Bank's program limitation is substantially above the administration's request.

The committee bill provides for a direct loan limitation of $4.7 billion, nearly $900 million more than was requested for the Eximbank in the President's September request. The budgetary effect of this recommendation means that the overall bill is over the President's September budget authority request.

However, I believe we are close enough to our goal, especially considering the give and take that will come in a conference with the House.

TITLE I—MULTILATERAL ECONOMIC ASSISTANCE

For multilateral economic assistance the committee is recommending the appropriation of $1,296,138,804, $322,318,875 below the administration's September request. Included under this heading are the multilateral development banks and voluntary contributions to United Nations and Organization of American States programs and agencies.

The committee is recommending small reductions, for budgetary reasons, to all of the multilateral development banks except for the soft loan window of the World Bank and for the Asian Development Bank. For the Asian Development Bank, the committee is recommending an appropriation slightly over the administration's September request.

The committee makes this recommendation in order to acknowledge that institution's superior management, which has consistently been more efficient and cost effective than all of the other multilateral banks.

For the International Development Association, the committee is recommending a reduction to the administration's request of $288 million. This recommendation follows the recommendation and justification originally made by the committee when it approved the first appropriation for IDA VI in the fiscal year 1981 supplemental. While this particular recommendation has created some controversy, it was held up by an overwhelming vote when an attempt was made in the full committee to increase it.

The committee's recommendation for voluntary contributions to U.N. and OAS voluntary programs is approximately $12.6 million below the administration's request. The committee is recommending $134.5 million for the United Nations development program and $38 million for UNICEF, the two most well known and well thought of U.N. programs in this account.

The request for the International Fund for Agricultural Development has been deferred for consideration until fiscal year 1983. The committee's justification for this action is presented in some detail in the committee report.

In recognition of our increased efforts in South America, the committee recommends $16.5 million for the OAS programs, the same as the President's March request.

TITLE II—BILATERAL ECONOMIC ASSISTANCE

For bilateral economic assistance, the committee is recommending an appropriation level which is $140,766,000 below the administration's September request. The primary accounts under this heading are the Agency for International Development's functional accounts, which make up $1.2 billion of the committee's recommendation, and the economic support fund, which makes up $2.549 billion of the committee's recommendation.

The latter account provides funding to those countries which have a special political and security relationship with the United States, the primary ones being Egypt and Israel.

Other accounts included under this heading are the State Department's migration and refugee assistance program and its international narcotics control program, the Peace Corps, and the Inter-American Foundation.

TITLE III—FOREIGN MILITARY ASSISTANCE

The committee is recommending the full budget request for title III, the foreign military assistance program. This program is made up of three programs.

First is the military assistance grant program, which provides grant military equipment and services to selected allies around the world. This program is phasing out, and unless something unforeseen develops, this is the last year for this particular program.

The second part of the foreign military assistance program is the international military education and training program. This program provides grant assistance for the training of military personnel from other countries. This training is done both in the United States and at institutions overseas, primarily the schools in the Panama Canal Zone.

The third military assistance program, and by far the largest one, is the foreign military credit sales program. Under this program the United States provides credits so that selected friends and allies may purchase military equipment.

In addition, there are direct credits in the form of grants to selected countries, primarily Israel. The committee is recommending a total appropriation of $1,096,376,000 for this title.

TITLE IV—EXPORT-IMPORT BANK

The committee's recommendation for the Export-Import Bank is substantially above the administration's request. For the direct loan program the committee is recommending a program limitation of $4.7 billion, compared to the administration's September request of $3,872,000,000. For the guarantee and insurance limitations, the committee is recommending $9,220,000,000, $1 billion more than the administration's request. This latter amount does not have any budgetary affect. The $1 billion add-on breaks down into $500 million for increased guarantee commitments and $500 million in FCIA insurance.

The committee strongly supports the Export-Import Bank, and, in fact, there was quite a bit of sentiment to go even higher than we did. However, the budgetary situation is such that the committee felt it could not add any more than it did.

Parenthetically, there is a great deal of concern in the committee with respect to the management of the Bank. The committee has learned only second hand of a number of new policy directions which have been done without consultation. In the future, the committee expects to be so consulted.

Mr. President, the thread which ties the rationale for the U.S. foreign assistance program together can be described in one word—that word is stability. Whether our foreign assistance program is in the form of military assistance to Israel, or whether it is in the form of rural health clinics in Upper Volta, in both cases the purpose is to promote a stable world.

It is perhaps easiest to see this in our foreign military assistance program, where our assistance is seen directly as providing for security and stability from outside interference.

However, there are other destabilizing factors, not military, which our foreign assistance program seeks to address. Surely the orderly economic development of any country in the world is to our advantage, and through the various types of foreign economic assistance, whether it be population control or agricultural related, the rationale is to promote stability.

It does not take the citation of too many examples to show where a world which is not in a stable condition works toward the disadvantage of the United States. The type of world we hope for will open more markets for U.S. goods, meaning more jobs for American workers. A peaceful continent of Africa and South America results in a steady supply of many of the most crucial raw materials the United States needs. A stable Middle East means secure energy supplies, and a safe Isreal.

Mr. President, I know it is difficult for many of my colleagues to support the foreign assistance program, and frankly I have been one who in the past has been very critical of foreign aid. There remains much in the program which deserves criticism, but I think overall we must recognize it as a selfish vehicle, one that is meant to serve U.S. interests, though surely it does not do as good a job as we would wish.

So, while I do not expect to make foreign aid supporters out of long-time foreign aid detractors, I do believe that a thoughtful consideration of some of the arguments I have just made would at least cause them to recognize the possibility of value in this program.

I ask unanimous consent to insert in the RECORD at the conclusion of my remarks a letter to me from David Stockman, in which he indicates that except for some problems with the Export-Import Bank, the administration views this bill as furthering "the President's goal of holding down the budget and reducing the deficit."

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. President, before I yield the floor to the ranking minority member, I would like to express my personal appreciation to Senator INOUYE, the ranking minority member of the subcommittee, who has been the leader and chairman of this subcommittee for many years.

Senator INOUYE has been tremendously helpful to me, always cooperative and understanding. It has been a great personal pleasure to work with him. I value his advice and I am enjoying his friendship, which I am confident will grow as years go by.

I would also like to thank the subcommittee staff who have done an outstanding job. I especially thank Jim Bond, his assistant, Ms. Jane McGhee, and also Richard Collins on the minority staff. They have worked hard and cooperatively in producing this bill which is before us today.

I urge my colleagues to support this legislation.

At this time, I yield the floor to Senator INOUYE for his opening statement.

The PRESIDING OFFICER. The Senator from Hawaii.

EXHIBIT 1

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., November 13, 1981.

Hon. ROBERT W. KASTEN, Jr.,
Chairman, Subcommittee on Foreign Operations, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: As the Senate prepares to take floor action on S. 1802, the Foreign Assistance and Related Programs Appropriations Bill, 1982, I wish to bring to your attention the Administration's views on the bill as reported by the Committee on Appropriations.

The Senate bill is generally in accord with the Administration request. While budget authority exceeds the September request by $338 million, or 3 percent, the resulting fiscal year 1982 outlay increase would be only $89 million. As reported by the Appropriations Committee, the Senate bill helps further the President's goal of holding down the budget and reducing the deficit.

The Administration has concerns, however, with the proposed treatment of the Export-Import Bank's credit limitations in this bill.

The $4.7 billion limitation on the Export-Import Bank's direct loan obligations and $9.22 billion limitation on loan guarantee commitments proposed in the bill substantially exceed the Administration's requests of $3.87 billion and $8.22 billion, respectively. They result in an increase of $828 million in budget authority, with resulting outlay increases of $83 million in 1982. Of even greater concern are outlay increases of $257 million in 1983, and $174 million in 1984.

There is also a special concern that S. 1802 proposes, for the first time, to set statutory m'nimums, or "floors" on new lending activities of the Bank. Such floors are highly undesirable, since they could force the Bank to seek additional business that may not be justifiable on economic or policy grounds.

I know that you share the Administration's continued commitment to reduce the growth of Federal spending. I hope that you will consider the Administration's concerns as you proceed with floor action on the bill.

Sincerely,

DAVID A. STOCKMAN,
Director.

Mr. INOUYE. Mr. President, I wish to thank my chairman for his kind words.

I join him in expressing gratitude to Mr. Bond, Ms. McGhee, and Richard Collins.

It has been my pleasure to work with the Senator from Wisconsin as he has learned his craft and developed the skills of a U.S. Senator. Senator KASTEN began the year as a freshman Senator. Before the day is out, I predict he will be a seasoned veteran. He has done a remarkable job, and I have, indeed, enjoyed working with him.

The chairman has enumerated the budgetary comparisons between this bill and the President's budget request, as well as the House-reported bill. I will not repeat those comparisons, but I do wish to echo Senator KASTEN's words and offer an explanation of why we are considering this bill—a Senate bill—today.

The foreign assistance programs of our country have been funded under continuing resolutions for the past 2 years. They continue to be funded in this manner at the present time, and there is a strong possibility that they will be funded under a continuing resolution for the remainder of fiscal year 1982.

Mr. President, when the administrators of Government agencies must operate their programs under the authority of a continuing resolution, they lose many of their management tools: necessary management decisions and personnel actions are delayed; planning and budgeting are tied to conditions which may no longer exist. Imagine trying to administer a program in 1982 under funding provisions and restrictions which were established in 1979. It is a difficult, if not impossible, task to do well. And yet, that is what we will require the administrators of these programs to do, if we do not enact a foreign assistance appropriations bill or—and here is the crux of the matter—make a fundamental adjustment in the terms of the continuing resolution. We can do that by making the Senate-reported bill, as amended, the base for calculating a rate of operations under a new continuing resolution.

It is as simple as that. We can force Government managers to make costly adjustments to outdated legislation or we can fulfill our responsibilities and legislate.

Mr. President, I strongly support the actions of the Appropriations Committee to bring this bill to the Senate floor. I do have some continuing concerns, and I shall address them when I offer amendments for consideration by the Senate.

There is one fundamental, overriding concern, however, which I wish to speak about now. I have said that I support the actions of the Appropriations Committee in bringing this bill before the Senate. I have said that, even though I am distressed by the lack of balance in this bill, because I believe it is our duty to draft legislation and to present it to the Senate for consideration and possible amendment.

Nonetheless, I would be remiss if I did not state, in unequivocal terms, my belief that an altogether disproportionate amount of the funding proposals in this bill are predicated on security assumptions primarily military in nature. This bill would provide appropriations to finance nearly $6 billion—$5,717,476,000—in security assistance and arms credits. The total of economic development assistance, excluding our refugee assistance programs, is only about one-half that amount, $3,118,207,804.

In this regard, let me note briefly what I regard as more than a curious anomaly. Global arms sales, according to the Department of Defense, increased by $1.3 billion in fiscal year 1971 to $15.2 billion in fiscal year 1980. The United States has surpassed the Soviet Union as the world's principal arms exporter. In the period 1977–80, the United States exported more than $24 billion in arms. This was 43 percent of the world total, as compared to 27 percent for the Soviet Union.

And yet, Mr. President, international stability has not increased. Listen to these comparisons:

In 1978, Nicaragua, having a per capita income of $840, spent $28 per capita on military expenditures but only $13 on health.

In the same year, Vietnam spent $18 per capita on military expenditures but only $4 on education and $1 on health.

In the Middle East, Egypt spent $91 per capita on the military but only $28 on education and $9 on health.

Apparently, arms sales do not contibute to stability. Rather than increasing stability and creating a favorable environment for U.S. economic goals, they have caused a fundamental shift in world opinion. Recent studies indicate that an increasing number of people in the non-Socialist world have come to regard the United States, not as the protector of the peace but as the proponent of arms sales.

Mr. President, our international security assistance programs are an important part of our overall foreign assistance programs. But when we allow them to dominate our relations with the developing world, we make the mistake of attempting to impose rather than create stability. The preponderant weight given to international security assistance and arms credits in this bill reveals, I believe, a fundamental misperception of the basic causes of instability in today's complex world.

In my view, the greatest threat to international stability is internal violence in the form of subversive or revolutionary movements bred by the conditions of crushing poverty and malnutrition in the developing world. It must be asked, if we make it easier for developing countries to opt for arms instead of bread for their people, do we improve their security? I think not. To the contrary, I believe that, if we base our foreign assistance policies on considerations which place too heavy an emphasis on military threats to security, our programs will fail to come to terms with the basic causes of instability and will deny the fundamental requirements of human existence to those in need. Military assistance, by any name, cannot serve to promote stability where it is threatened by economic discontent. If men are to work for peaceful social change, they must be encouraged to believe that their rightful demands will be met with enlightened humanitarian assistance and not repression by force of arms.

The funding level recommended by the committee would provide exactly what the President requested for mili-

tary assistance, for security assistance, for military training assistance, and for arms credits. Only the economic development assistance accounts were reduced.

Mr. President, at an appropriate time I will offer an amendment to provide full funding of the President's request for the International Development Association. I would hope that my colleagues will recognize the necessity of restoring at least a semblance of a balance to this bill.

Mr. KASTEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KASTEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. QUAYLE). Without objection, it is so ordered.

UP AMENDMENT NO. 634

(Purpose: Increase funding for the Sudan by $50 million, earmark funding for Egypt, Israel and Cyprus, and eliminate Committee language prohibiting assistance to Poland, Tunisia, and Costa Rica)

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes an unprinted amendment numbered 634.

Mr. KASTEN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On Page 8, Line 19, beginning with "$2,548,500,000" strike out all through "United States:" on Page 9, Line 2 and insert in lieu thereof the following: "$2,598,500,000: *Provided*, That of the funds appropriated under this paragraph not less than $806,000,000 shall be available for Israel, not less than $771,000,000 shall be available for Egypt, and not less than $100,000,000 shall be available for Sudan: *Provided further*, That, except as otherwise provided under this paragraph for Egypt, Israel, Sudan, Cyprus and scholarships for South African students, funds appropriated under this paragraph shall be made available only in accordance with the recommendations of the Committee on Appropriations of the Senate set forth in a table under the heading "Economic Support Fund" contained in Senate Report No. 97-266:"

Mr. KASTEN. Mr. President, this amendment serves two purposes. The first purpose is to eliminate the language in the committee bill which has caused some concern among our colleagues. That language prohibited funding for Poland, Tunisia, and Costa Rica, except that it provided that the President could have waived that limitation. The sole purpose for that committee language was technical in nature. The language was designed to effect the committee's decision to support the administration's budget request for the economic support fund, and was required in order to overcome earmarkings in the authorization legislation which would have had the effect of decreasing our recommendations by $25 million. Since the reporting of this legislation, however, a number of my colleagues have expressed the concern that the language might be misinterpreted. Therefore, this amendment would eliminate that language, but by using other language nonetheless effect the committee's recommendations. As for assistance to Poland, Tunisia, and Costa Rica, such assistance could be provided if the administration so desires.

Mr. President, the main purpose for the amendment now before us is to provide additional funding for the Sudan. This is on the basis of an urgent request by the administration, for which a budget amendment has been prepared and approved.

Mr. President, I have a letter from the President of the United States, dated November 16, 1981, to the Speaker of the House, and also a letter from OMB to the President, dated November 16, 1981, containing that request. I ask unanimous consent that both letters be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE WHITE HOUSE,
Washington, D.C., November 16, 1981.

THE SPEAKER OF THE HOUSE OF REPRESENTATIVES.

Sir: I ask the Congress to consider an amendment to the request for appropriations for fiscal year 1982 in the amount of $50,000,000 for foreign assistance.

The details of this proposal are set forth in the enclosed letter from the Director of the Office of Management and Budget. I concur with his comments and observations.

Respectfully,

RONALD REAGAN.

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., November 16, 1981.

THE PRESIDENT,
The White House.

SIR: I have the honor to submit for your consideration an amendment to the request for appropriations in fiscal year 1982 in the amount of $50,000,000 for foreign assistance. The details of this request are contained in the enclosure to this letter.

I have carefully reviewed the proposal contained in this document and am satisfied that this request is necessary at this time. I recommend, therefore, that this proposal be transmitted to the Congress.

Respectfully,

DAVID A. STOCKMAN,
Director.

FUNDS APPROPRIATED TO THE PRESIDENT

1982 budget appendix page	Heading	1982 budget request	1982 amendments pending	1982 proposed amendment	1982 revised request
I-D7	Economic support fund	$2,431,500,000	$117,000,000	$50,000,000	$2,598,500,000

This proposal provides for additional assistance for Sudan. It would increase 1982 outlays by $50 million.

Mr. KASTEN. Mr. President, Sudan's economic situation at this time is probably the gravest in Africa. Sudan's external debt has grown to $5 billion, and it is in arrears on $2 billion of that debt, its debt service ratio having risen to an alarming 60 to 70 percent of its foreign exchange earnings. Its principal export, cotton, has declined precipitously in the past 10 years due to overvalued exchange rates and movement of farmers into other crops and the shortage of labor. Soaring oil prices have also eaten into the balance of foreign exchange earnings.

Sudan has been one of the few countries in that part of the world to support the Camp David peace process. As a result, Libya, its neighbor to the west, has been actively working to overthrow the current government, trying to capitalize on the current economic situation. As a result, Sudan has appealed to friends such as the United States to provide additional assistance to that being provided by the International Monetary Fund so that it can weather these current difficulties, especially while taking on the hard reforms that are required by the IMF. Sudan has bitten the bullet, but it does need help outside of the IMF action. The IMF estimates that even with the reforms, and with projected debt rescheduling, and with the IMF drawing, Sudan will still be short between $250 and $300 million to meet its obligations in the coming months. Some of these obligations must be met in the next 30 days, thus the urgency of this request.

Mr. President, the Sudan is our friend, a close friend of Egypt's and most importantly, a good friend of the Camp David peace process. I believe it is crucial at this time for the United States to take this action, which will be extremely valuable, both in political and economic terms, to the current Sudanese Government. The timing of this is very important, as President Nimeiri is currently in the United States and it would obviously be helpful to him to take home news of additional U.S. support personally.

Mr. President, one last point: There has been criticism in the past that our military assistance to Sudan has not been responsive to its economic problems. Sudan does, of course, have a legitimate military need, but this funding is economic in nature, and desperately needed at this time.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Mr. President, I am pleased to concur with my chairman, Senator KASTEN. I think his arguments are worthy of our consideration. I wholeheartedly support him in this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 634) was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. INOUYE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 635

(Purpose: To increase fiscal year 1982 appropriations for the International Development Association to the amount requested by the President)

Mr. INOUYE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Hawaii (Mr. INOUYE) proposes an unprinted amendment numbered 635:

On page 3, line 23, strike $532,000,000 and insert in lieu thereof $820,000,000.

Mr. INOUYE. Mr. President, technically, the amendent I propose is quite simple. It provides the amount requested by President Reagan for a fiscal year 1982 contribution to the International Development Association. The amount is $820 million, or $288 million above the amount recommended by the committee.

Politically, and in relation to our fundamental interests, however, this amendment is not at all simple—it has a direct bearing on international cooperation and global stability and on the position of the United States as the leading economic and political power in the world.

The International Development Association is the so-called "soft-loan window, or concessional lending facility of the World Bank." It extends long-term, interest-free credits to the poorest countries in the world. These are soft loans, but they are not "soft-headed" loans;

Reflecting the importance of the agricultural sector, on which the majority of the world's poor depend, IDA has devoted nearly half of its lending to agricultural and rural development;

The development projects financed by IDA must meet the same economic and financial standards of the World Bank; and

As the ongoing Treasury Department study—which was initiated by the Reagan administration—has indicated, IDA projects have historically enjoyed rates of return equal to or better than U.S. private sector projects.

Mr. President, my amendment would provide $820 million as the fiscal year 1982 U.S. contribution to the sixth replenishment of IDA resources. As negotiated in international meetings, the U.S. share of IDA VI is $3.24 billion or 27 percent of total donor contributions. U.S. negotiators—in these international meetings—responded to congressional concerns by achieving a reduction in the U.S. share. In IDA V it was 31 percent; in IDA VI it will be 27 percent.

Of equal importance, our negotiators achieved an increase in the contributions made by others—Japan and Germany, as well as nine other countries have increased their shares. For each dollar the United States contributes, other countries will contribute $2.70. If the United States contributes $820 million this year, others will contribute $2,220 million. Conversely, if we reduce our contribution, others will reduce theirs. The $288 million difference between the amount I propose and the amount proposed by the committee will generate $815 million in contributions from other countries.

We often speak of burden-sharing among the developed countries. Here it is. We contribute $820 million, and they contribute $2,220,000,000. Does anyone in this Chamber believe that the United States does not benefit from this burden-sharing? Does anyone in this Chamber believe that the United States would provide $3,240,000,000 in fiscal year 1982 bilateral assistance for programs which demonstrably serve our national interests

That, I suggest, is what we would have to do were it not for the burden-sharing arrangements provided in the International Development Association. I would remind skeptics that 7 of the top 10 IDA recipients border on the Indian Ocean. All are of strategic interest to the United States, and all have been courted by the Soviet Union. Our interest in opposing the expansion of Soviet influence dictates our support of IDA.

Mr. President, IDA lending promotes economic development of the less developed countries (LDC's) and thus enhances U.S. exports; 25 percent of all U.S. manufactured exports go to non-oil-producing LDC's. Add the 13 members of the OPEC oil cartel, and the share rises to 38 percent. The developing countries are the largest potential market for U.S. finished products. I trust I need not remind anyone that we are in a recession and that export expansion is important to economic recovery.

Mr. President, there is another aspect of this interdependency which must be recognized. IDA lending promotes economic and political stability in the Third World. The United States has a vital interest in the stability of the Third World. Last year, the United States imported $49 billion of commodities from non-oil-producing developing countries.

We imported 100 percent of the columbium and strontium we need for steel and other metals and alloys used in our aerospace, machinery, and transportation industries; 93 percent of the bauxite used in the aluminum industry; 62 percent of the zinc used in the electrical, alloy, and construction industries; 90 percent of the cobalt used in industrial and aircraft engines and in the computer industry; 81 percent of the tin used for electrical construction and transport industries.

Mr. President, I hope that the brief arguments I have presented will encourage others to support my amendment. I hope I have demonstrated my belief that U.S. contributions to the International Development Association are, in fact, investments in international stability and that they promote the economic welfare of not only the developing countries but also the United States.

I know that some will remain unconvinced, but I hope they will give their full attention to what I have said. We can no longer indulge in the harsh, often irresponsible and critical rhetoric of the past. The position of the United States as a world leader is in question. To lead we must participate and to participate we must accept responsibility.

Before he left for the Cancun summit, President Reagan said:

Certainly the record of the international system is not perfect, but people flirt with fantasy when they suggest that it's a failure and unfair.

Let us not flirt with fantasy.

Let us provide full funding of the President's request for IDA.

Mr. President, I point out, as I have on many other occasions, that about 15 years ago, the United Nations conducted an important census which received very little coverage in the press, a census of the world to determine the extent of poverty. It was decided at that time that the dividing line between the rich and the poor should be $400 per annum—$400 per year. If your per capita income was $400 or more, you were considered wealthy in the eyes of the United Nations. If it were $400 or less, you were considered poor.

At the time the census was taken, the world was divided into 65 percent poor, 35 percent wealthy. Put another way, there were 65 percent have-nots and 35 percent haves. That was 15 years ago.

Today, it is estimated that that ratio has changed from 80 percent poor to 20 percent wealthy. It is also estimated, by projections, that by the year 2000, this world will be divided into two segments—5 percent wealthy and 95 percent poor.

Mr. President, I am a politician. I am not a social scientist or an an anthropologist. These numbers frighten me, because these numbers conjure up in my mind revolutions, rebellions, civil wars, civil disorders, civil disasters.

This democracy of ours can only survive in a stable world. The only way our economy can survive is to sell. If we cannot get things such as strontium, bauxite, zinc, cobalt, and tin, we cannot produce.

IDA is one way to help these countries to help themselves. This is one way to bring about stability. This amendment will bring about a proper balance to this bill.

At the present time, two-thirds of the funds appropriated here are for military assistance, one-third for economic and humanitarian assistance. This amendment will bring about a semblance of a balance, and I hope my colleagues will support it.

Mr. KASTEN. Mr. President, I reluctantly oppose the amendment of the Senator from Hawaii, because I agree with the sense of his eloquent statement, and I also agree completely with the needs we have for worldwide economic development.

This issue was raised for discussion purposes in the subcommittee. In full committee, we had a vote, and the Senator's amendment was overwhelmingly rejected. That vote was 15 to 5.

The committee's recommendation tracks with the position taken by the full Appropriations Committee. It also tracks with the position that was agreed with by the Senate several months ago, when

we approved the first payment for IDA VI in the fiscal year 1981 supplemental.

The Senate position is the following: We would provide no more over 3 years in the IDA VI appropriation than in the IDA V appropriation—that total was $2.4 billion—and we would provide the payments in this 3-year period on the same percentage basis as the administration is requesting.

Thus, in fiscal year 1981, it would be $408 million; in fiscal year 1982, it would be $624 million; in 1983, it would be $1,368 billion. However, because the conference agreement on the fiscal year 1981 supplemental provided $500 million rather than $408 million, only $532 million is necessary now to continue the policy adopted on this matter in our 1981 supplemental.

I point out, further, that this amendment represents the administration's request, which represents a 25-percent increase over 3 years of the dollars we provided fo the soft loan window of the World Bank under IDA V, the previous agreement. This is at a time when we are being asked to cut back on our other programs.

It makes sense to me that we continue to maintain this level at the previous year's level because it is such an important program, but it does not make sense to increase it by 25 percent at a time when all our domestic programs are under such tremendous pressure. Acceptance of this amendment will drive this bill over the President's budget in both budget authority and outlays.

I also point out to the Senator from Hawaii that with the number I am recommending and that the committee has approved, there is clearly room to maneuver in conference with the House of Representatives. Frankly, we need that maneuvering room in order to get our numbers for the President's budget highest priorities under some of the other categories.

It is my understanding that we will have to do some negotiating in this area. It is also my understanding that the position of many Senators is that we should do a little negotiating in this area and somehow put more of the economic assistance into the overall foreign operations bill and balance that off with some of the military.

I hope that at this time we can maintain the Senate's position, which is to maintain the level of appropriations at the level under item 5 and that we reject the idea of going on with the level that would represent a 25-percent increase in this program at a time when domestic priorities and domestic programs are being cut back.

In truth, Mr. President, I think that by maintaining the current level, we are expressing our support of the kind of economic assistance programs we need. We did not cut this program; it was maintained at the current level. I think it would be a mistake to go further and to increase it by 25 percent.

Mr. INOUYE. Mr. President, it grieves me to stand in opposition to my distinguished chairman. I found it a delight to be working with him during this year. But on this matter I find that I must uphold the request submitted by the President.

Several weeks ago when the fiscal year 1981 supplemental appropriations bill was taken up, I believe my chairman, the distinguished Senator from Wisconsin (Mr. KASTEN) said in response to the Senator from Missouri (Mr. DANFORTH):

> It is not our purpose or interest to force a renegotiation of the sixth replenishment of the International Development Association.

If my chairman will yield, is that the position that he is still maintaining?

Mr. KASTEN. The distinguished Senator from Hawaii is correct. It is not my position, and I do not believe it is the Senate's position to force a renegotiation of IDA, under the terms and arrangements under the IDA VI agreements. I think it is still an open question as to what the amount is going to be when it comes out of conference. I think it is also an open question as to what the amount might be in future years as we were to live up to or attempt to live up to some of the overall commitments we have made.

The Senator is aware there have been discussions about stretching out the payments for an additional year with a number of the contributors. But it is not in any way my intention or the intention of the committee to force a renegotiation of IDA VI.

Mr. INOUYE. I believe that the chairman intends to stretch this out for a 3-year period; is that correct?

Mr. KASTEN. Right now the provision is over 3 years. There has been discussion of stretching it out on to a fourth year, and that is the open question.

Mr. INOUYE. But the Senator does support the full funding of the amount negotiated by our representatives.

Mr. KASTEN. I do not want to force renegotiation of the agreement, but at this point I think it is unrealistic to support funding of the amount requested for this fiscal year in this particular bill.

Mr. INOUYE. My concern is that for fiscal year 1981 supplemental we appropriated $500 million and the committee chairman's recommendation is $532 million for fiscal year 1982. That would leave a balance of $2.028 billion that we agreed to in the negotiations for IDA IV. I do not see how we can appropriate $1.104 billion in each of the next 2 fiscal years with the cap in mind. I think it would be an impossible chore.

Mr. KASTEN. With the present budgetary constraints we are faced with I think it will be an exceedingly difficult chore and it is in looking at those numbers that a number of people have at least brought up the possibility of stretching the commitments over into a fourth year or into part of a fourth year. That is an open question right now, and it depends a great deal upon the final amount that we come out of conference in and also the attitude of the administration with these amounts. But I think to change the Senate position at this time as the Senator's amendment would do great harm to this bill. It would put it over the President's request and it would also back us away from the position that we have taken in the subcommittee, the full committee, and the Senate, that this program should not be cut back but it certainly should not be increased 25 percent at a time when domestic programs are under so much pressure.

Mr. INOUYE. Mr. President, I ask unanimous consent to have printed in the RECORD at this juncture two letters, one dated November 6, 1981, the other dated November 12, 1981, from the Secretary of the Treasury, the Honorable Donald T. Regan.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE SECRETARY OF THE TREASURY,
Washington, D.C., November 6, 1981.

Hon. DANIEL K. INOUYE,
U.S. Senate, Washington, D.C.

DEAR SENATOR INOUYE: I want you to know that your effort to restore the Administration's requested level of funding for the IDA VI replenishment during the Appropriations Committee mark-up of the foreign assistance appropriations bill is deeply appreciated.

We believe it is important to maintain our leadership in these international institutions, and thus have pledged to support previously negotiated agreements, albeit on an adjusted contribution schedule in recognition of domestic economic requirements.

While the Committee has provided a lower funding level for IDA than requested, I am hopeful that in conference with the House that level will be brought closer to the Administration's request. Again, your continuing support for this program and for the Administration's request is greatly appreciated.

With best wishes.

Sincerely,

DONALD T. REGAN.

THE SECRETARY OF THE TREASURY,
Washington, D.C., November 12, 1981.

Hon. DANIEL K. INOUYE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR INOUYE: I understand you will propose an amendment to the fiscal year 1982 foreign assistance appropriations bill to increase funding for the International Development Association (IDA) to the level requested by the President. I appreciate your support for the Administration's position in this matter and hope your colleagues will support your amendment.

IDA provides economic assistance to the world's poorest countries. Seven of the top ten borrowers are on the periphery of the Indian Ocean—Pakistan, Sri Lanka, Kenya, Egypt, Tanzania, Sudan, and India. All have been the targets of Soviet efforts to expand influence.

A major conclusion of the Administration's review of policies toward the multilateral development banks is that these institutions can be important instruments for promoting rational economic policies, which free the private sector to play a stronger role in developing countries. If we are to persuade other members to follow our leadership and to join us in supporting such policies, we will need clear signals of Congressional support for the Administration's position.

Due to budgetary constraints, the Administration's requests for IDA in 1981 and 1982 are sharp reductions compared to amounts provided in 1979 and 1980. Further reductions would have a minimal effect on outlays, since the full $820 million for IDA will result in outlays of about $25 million and $75 million in fiscal years 1982 and 1983, respectively.

IDA is a highly visible measure of the seriousness of U.S. intentions toward the banks. Congressional support for the IDA appropriations request is an important indi-

cator of U.S. willingness to assert a leadership role in the multilateral institutions.

With best wishes.

Sincerely,

DONALD T. REGAN.

Mr. INOUYE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MATHIAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATHIAS. Mr. President, I have the greatest respect for the judgment of the chairman of the subcommittee, the manager of the bill, and I appreciate the arguments that he has made here this afternoon in support of his position, arguments that I think reflect the austerity of the times and the difficult economic situation with which these United States find themselves.

But I feel that in the final analysis I have to come down on the side of the Senator from Hawaii, who has presented I think the stark reality of this situation.

We are not only in tough times in the United States, but we are in tough times in the world, and there has never been a time when it has been more important for us to be able to communicate in an effective and pragmatic way with the rest of the world, and that really is what is at issue here.

It is arming the President, arming the Government of the United States in order to be effective in the world.

What the Senator from Hawaii is doing is merely pressing the budget requests that have been made by the President. I do not think anyone who is familiar with the general policy and position of the Reagan administration would accuse this administration of being spendthrifts. I do not think that anyone would accuse this administration of wasting money deliberately.

And the amendment of the Senator from Hawaii really reflects the careful judgment of the President and Secretary of State and the other responsible officials of the administration.

I believe that this is a budget request that should be taken just as seriously as the request for any weapons system that we propose to add to our arsenal. We should take it just as seriously as any budget request for a defense item because the security of the United States depends upon a great number of things, and among those factors that affect our security and our vital interests are economic factors that can be heavily influenced by the kind of investment which is represented by the President's budget request.

I think we should keep firmly in mind that that is what we are talking about. We are not talking about some wild expenditure that is being proposed as an individual wish by a Member of the Senate. We are talking about the official request of the President as expressed in his budget.

That budget carefully considered, reduced to a bare minimum, reflects the judgment of the highest officials of Government as to what is necessary for our security and for the protection of our vital interests.

This is not an eleemosynary act. This is not some charity that we are proposing. This is an expenditure to promote the vital interests of this country and I think that is the way the Senator from Hawaii has expressed it.

Therefore, I think that it not only makes eminently good sense to support the amendment of the Senator from Hawaii, but that it also is a necessary thing to do, necessary in the judgment of the President, necessary in the judgment of the Secretary of State, and I think necessary in the judgment of any American who takes a realistic view of the world as it is today and as it is likely to be tomorrow.

So, Mr. President, I intend to vote in favor of the amendment of the Senator from Hawaii.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I want to commend my distinguished colleague from Hawaii who certainly, although he did not sit in on the months of deliberations and many, many sessions we had with David Stockman and others in the administration on IDA, has alertly gathered the spirit of the matter.

If we do not fulfill the President's request in this regard, we are going to unnecessarily bring up all kinds of questions as to what our intentions really are. After all, this agreement was worked out after many, many, many months of negotiating with 32 countries, and we have now taken a 3-year program and stretched it out to over 4, backloaded heavily in the final years.

I think the intention and good faith of the United States would be subject to considerable question around the world if the Senate now simply preempted the President on this and destroyed the careful continuity that has been worked out and the negotiating process that has brought us to the stage that we agreed to with the Senate authorizing committee and the President.

There are a number of reasons to support an amendment to bring our contribution to IDA up to the President's request level. These include the importance of IDA's role in furthering development, our strategic interest in many of the countries which receive loans from IDA, and maintenance of U.S. negotiating credibility with our allies.

IDA lends to the poorest countries on Earth. I am in complete accord with the President's view that developing countries must increasingly rely on investment and lending from the private sector. However, many of the countries which receive loans from IDA have not yet reached the stage where they are attractive risks for that sector. They need more educated labor forces, and a minimal infrastructure of basic roads, power, water, and food production before they will be able to attract much private capital. IDA loans help these countries meet some of these requirements.

I speak, having had some 25 years of experience in investing in countries abroad. I can assure those who are urging us to invest in those countries, I can say that until such time as there is that basic infrastructure, which no private sector can privately finance, they are not going to be prepared. So what we need to do is to put the seed money in that will attract that private capital, that will attract the technology and know-how that will flow once the basic needs have been met, and that is the whole purpose of IDA. That was the original concept from the beginning. It has worked wondrously well. It has taken certain economies that were at one time desperate up to the stage where they are now attractive for private loans, attractive for private investment, attracting not only capital but technology and know-how to their countries; and IDA can literally phase itself out of those countries and the private sector can take over. But we have a lot of countries today that are a long ways from that, and they need our help.

Many of the countries which receive assistance from IDA are of strategic importance to the United States, including Pakistan, Kenya, and the Sudan. We are increasing our bilateral assistance to some of these countries to help them defend themselves against external aggression and improve the lives of their citizens. It hardly makes sense to imperil a multilateral program which provides these same countries with financing from many countries.

Let us just take Pakistan alone. Both administrations, the Carter administration and the Reagan administration, both independently studying this situation of a nation that is strategic to us; a nation beset on one side with an invasion of Afghanistan; endangered because of the Iran-Iraq war, and put in a particularly strategic position because of total change in the evolutionary, revolutionary, process that is going on in Iran. We now are reaching out on a bilateral basis. Two U.S. administrations in a row, have believed it worthwhile to provide military and economic assistance to Pakistan, to bolster it up and give it a sense of security that it desperately needs right at this time.

How much better for us to be able to go to them and, with part of this loan and aid assistance that they need, do it through the World Bank? We know what happens when we bilaterally provide money to countries. Look at the billions of dollars that were forgiven in India alone.

There have not been defaults on the World Bank. There will not be defaults because they value highly the credit rating they have with an international organization of that stature. But many, many times there is resentment built up when we are doing these things and making loans that more properly could be done through the multilateral banks.

Further delay in meeting expected U.S. contributions to the IDA replenishment

will seriously call into question the good faith and dependability of the United States. The United States took an extra year to finally authorize our participation in the replenishment. During that time, in order to allow IDA to keep making commitments, other industrial countries advanced $1.5 billion in their own funds, even though they had the clear legal right to withhold their contributions until the United States was ready to meet its obligations. They have decided not to do this any longer. This means that every dollar we withhold from IDA results in an additional $2.7 billion being withheld by other countries. Thus, cutting the President's request by $300 million results in a total restriction on IDA lending of $1.1 billion.

This kind of disregard for our commitments to other industrial countries and to the financial impact on the poorest countries in the world will clearly have an impact on our credibility in other areas. We seek the cooperation of both industrial countries and developing countries in many areas which are important to us, ranging from defense relationships to international efforts to deal with communications and environment. If we seem to be capricious and undependable in one area, we are likely to undercut our negotiating ability in others.

I can simply say that if the Senate does this today, if we undercut the President's program, there was no use going to Cancun. All of the work that he did down there, a one-on-one basis with some 20 country leaders, would be for naught if we reverse it, if we show that he is so impotent that he cannot make a commitment of this kind, negotiated over many months by a previous administration and endorsed by this administration. We simply cannot undercut the President of the United States in this area.

And, as the arithmetic shows, it would really work adversely to the interest of the United States of America if we did so.

So I commend my distinguished colleague for his amendment. I urge that the amendment be accepted by the floor manager of the bill, Senator KASTEN, with whom we have all enjoyed working in these areas. We admire the tough-fisted and hardheaded approach in these areas. Someone has to be in that position. In this case, however, I do think when other hardheads, along with his—Secretary of Treasury Regan, Secretary Haig, Judge Clark, and David Stockman, himself—when they all have concurred that the basic program that they have laid out and that we have somewhat modified is the bottom line in this area, I think we ought to back them up and support them.

Mr. KASTEN addressed the Chair.

The PRESIDING OFFICER (Mr. COCHRAN). The Senator from Wisconsin.

Mr. KASTEN. Mr. President, I would like to thank the Senator from Illinois for his kind comments and to say that it has been my pleasure in working with him. I unfortunately find myself in opposition with him on this particular issue, although I do not disagree with anything the Senator has said in his strong statement on behalf of increased IDA funding.

The fact is, Mr. President, that we are in a difficult financial position. And I think that the proponents of IDA, frankly, should be satisfied that we are at the level that we have had last year, and that, of course, is the Senate position.

The fact of the matter is that we have found ourselves cutting all sorts of programs—domestic programs, programs which are hitting American citizens. And there is not support, at least not in this Senator's State—and I am not so sure there is much support at plant gates or among people anywhere in this country—to increase funds in this particular area at a time when we are cutting back spending in so many others.

I would also like to remind the various proponents that this is the Senate position; it is the Appropriations Committee position. But we are going to conference. And I think that with our position at this particular level, our position being that we ought not to increase the funding for the soft-loan window of the World Bank, but we should not decry it either. Their position has been for huge increases. And somewhere in between, I think, we might find a ground that would be a whole lot more acceptable to the distinguished chairman of the Foreign Relations Committee and also to the ranking minority member of this committee.

But I cannot, Mr. President, agree to this amendment and I must reluctantly, despite my strong respect for the leadership on both sides of the aisle of the Foreign Relations Committee, I must reluctantly oppose this amendment at this time.

● Mr. DANFORTH. Mr. President, I wish to express my support for the amendment offered by the Senator from Hawaii. The amendment would reinstate the full $820 million requested by the administration for the U.S. contribution to the International Development Agency (IDA VI) in fiscal year 1982. The amount of money appropriated by the Committee on Appropriations for this purpose, $828 million less than the previously reduced administration request, falls far short of American obligations and threatens once again to damage our credibility as a reliable participant in international development assistance efforts.

I oppose this reduction in our fiscal year 1982 contribution for the same reasons I opposed a similar reduction proposed by the Appropriations Committee in May during consideration of the Supplemental Appropriations and Rescission Act of 1981 (H.R. 3512). These reasons include:

First, the United States made a commitment in 1979 to contribute a specific amount to IDA. Our credibility is at stake. The administration has already made a major change in that commitment by stretching out our payments. Another reduction in this installment would once again bring into question our ability to live up to this international obligation.

Second, we must not lose sight of the facts and purpose behind the number being debated. We are talking about the U.S. contribution to an organization that we helped create over 20 years ago, an organization that loans money to the poorest of the world's poor so that they might develop, so that they might grow enough to feed themselves.

Finally, the amendment is fully supported by the administration. These are not numbers that someone pulled out of a hat. They are the product of much thought and extended consultation with our allies.

Take a closer look at IDA.

A multilateral development bank, IDA offers low-interest loans to the world's poorest countries. Almost 75 percent of the lending now goes to the countries with a per capita income of less than $360.

IDA loans are targeted to the lowest income groups within the recipient countries, aimed at increasing prospects for long-term self-sufficiency. The loans are repaid in full by borrowers and the money is recycled.

Almost one-half of the loans are used to advance agriculture and rural development, and to increase badly needed food production.

More than 30 percent of IDA lending goes to African nations, with such important countries as Egypt, Kenya, Pakistan, and the Sudan highly dependent on the program.

It is important to note that IDA VI, the sixth replenishment of the International Development Association, represents an international agreement, a commitment by our Government to 32 other donor countries. In December 1979, all of the donor countries agreed on a $12 billion replenishment for 3 years beginning July 1, 1980.

The U.S. share of the arrangement is $3.24 billion, or 27 percent of the total. This is a decline from our 42-percent share at the inception of IDA.

IDA VI lending was already delayed by 1 year pending approval of the U.S. commitment. By the time the United States got around to offering our first installment, other participant countries had already finalized their offers and had even advanced IDA $1.9 billion. But the IDA cannot continue lending under an annual threat of the United States reneging on its agreed share.

The U.S. contribution of $500 million for the first installment was already less than half the amount proposed by the last administration. Instead of paying off our share in three equal installments of $1.080 million as originally anticipated, we will now be stretching our payments to 4 years. This change has already led some to question our commitment. The further reduction proposed by the Appropriations Committee further jeopardizes our participation in the replenishment effort.

The United States has always prided itself for being a tried and true leader in the international economic scene. I simply cannot understand why the committee is willing to jeopardize that position once again.

The President reaffirmed the administration's support of multilateral institutions in Cancun last month. We should and must stand by these obligations.●

Mr. INOUYE addressed the Chair.

The PRESIDING OFFICER. The Senator from Hawaii.

Mr. INOUYE. Will the Chairman yield for a question?

Mr. KASTEN. I would be pleased to yield for a question from the Senator.

Mr. INOUYE. Am I correct to assume from the Senator's statement that he will lead the Senate delegation to conference with an open mind in this matter?

Mr. KASTEN. Mr. President, I want to assure the Senator from Hawaii, the Senator from Illinois, the Senator from Maryland and others that I understand the importance and the strong support in the Senate for the President's mark. There are a number of items that we are going to work with in conference that would deal with economic and security assistance. It is my intention, No. 1, not to force any kind of renegotiation in the IDA VI round and, No. 2, to try to work with and accommodate the House insofar as we are able to do so within the overall budget constraints and restraints we find ourselves in.

So I go to the conference supporting the Senate position, but knowledgeable that the Senate position is one in which a large number of us would feel that the higher level is more desirable. And I will take that into consideration in our conference deliberations.

Mr. INOUYE. Am I also to assume from the Senator's statement that he has no intention to open IDA VI to renegotiation; that he will do his best to stand by the judgment of the negotiators?

Mr. KASTEN. I, in no way, want to force our negotiators to renegotiate IDA VI. I am confident that if there is a stretchout or if there is some other funding level agreed to that any of this can be done working with and accommodating the other contributors to the World Bank. And I am hopeful that we will not have to have any kind of a renegotiation.

It is my very strong feeling that we do not force a renegotiation on IDA VI. But I have an equally strong feeling that we want to work within the overall budget restraints. I do not want to force renegotiation. I would hope a position that would come out of conference would not force a renegotiation.

Mr. INOUYE. Mr. President, with this assurance, and because of my desire to present a united front when we enter into conference with the House, I will withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

UP AMENDMENT NO. 636

(Purpose: To provide full funding of the President's fiscal year 1982 request for Population Planning Development Assistance)

Mr. INOUYE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The assistant legislative clerk read as follows:

The Senator from Hawaii (Mr. INOUYE) proposes an unprinted amendment numbered 636.

On page 6, line 3, strike $190,000,000 and insert in lieu thereof $211,306,000.

Mr. INOUYE. Mr. President, my amendment would provide full funding of the President's revised request for population planning development assistance—$211,306,000. This amount is $21,306,000 more than the committee's recommendation. However, it is still 17 percent below the President's March request of $253.4 million.

Mr. President, at present, the annual population growth rate in the more developed countries—that is, the United States and Europe—is six-tenths of 1 percent; in the less developed countries, it is 2.1 percent. At these rates, developed country populations will double in 113 years. A more disquieting projection is found in the estimate that the populations of the less developed countries will double in less than 35 years. In fact, United Nations projections indicate that the proportion of people living in developing countries will continue to rise in the remainder of this century—from 66 percent in 1960 to more than 78 percent in the year 2000. In other words, when this century becomes the next, three-fourths of the human population will be the "have-nots" of the world.

Population pressures have become critical and now threaten the future economic and political viability of a large number of developing countries vital to U.S. economic and security interests.

Allow me to give a specific example. The United States regards Egypt as vital to our interests. This is indicated, in part, by the fact that this bill contains funding proposals which would provide Egypt $1,671,000,000 in bilateral U.S. economic and security assistance in fiscal year 1982.

The present population of Egypt is 43.5 million people, and it is increasing at the rate of 3 percent each year. Forty-four percent of all Egyptians live in urban areas. It is estimated that urban populations in Egypt will double in 20 years. Cairo alone will grow from approximately 8 million people in 1980 to 16.4 million in the year 2000. The United Nations World Housing Survey reported that, in 1976, 60 percent of the people of Cairo lived in slums or squatter settlements. Imagine what it could be in the year 2000.

It does not greatly tax the imagination to think of what Egypt will be like in the year 2000—if population growth is not restrained. The number who live in slums and squatter settlements will increase. The number who have no jobs, no food, no hope will increase. The bitter fruit of despair will be ready for picking, and you may be certain that there will be extremists around to pick it.

We must ask ourselves whether we serve our Nation when we provide massive increases in arms—in the name of security and stability—and then seek to reduce budget expenditures by holding population assistance to 1979 levels. We ignore the true causes of instability and unrest at the peril of peace.

Mr. President, rapid population growth is outpacing the world's ability to provide the basic necessities of life. While we can take some comfort in the reduction in the annual rate of growth of the world's population—it has slowed to 1.7 percent from the 2 percent of the mid-1960's—we must also be aware that the annual increment to the world's population is increasing. The average annual population increment in the 1960's was 58 million; in the 1970's, at a reduced annual rate of growth, the annual increment was 66 million.

This is extremely significant, because of the inverse relationship between world population growth and world food production—per capita food production is declining. To be sure, we have been remarkably successful in our efforts to increase food production—but at great cost.

The doubling of world grain output since 1950 has entailed land abuse so severe that fully one-fifth and perhaps as much as one-third of the world's cropland is losing topsoil at a rate that is undermining its long-term productivity. The Department of Agriculture reports that the inherent productivity of 34 percent of U.S. cropland is now falling because of the excessive loss of topsoil.

Mr. President, I will not continue. Population problems are urgent, yet funds for population assistance have increased by less than 3 percent since 1979 and now represent in real purchasing power only 66 percent of the funds made available in 1972 when the Congress made population assistance a separate line item.

There are many here who know that I argued in committee for $240 million in funding. I was not successful, but I hope the full Senate will at least provide the President's revised budget request. I hope the Senate will support my amendment.

Mr. President, I have discussed this matter with the chairman of the subcommittee, and he has assured me that he is willing to accept this amendment.

Mr. KASTEN. Mr. President, the distinguished Senator from Hawaii is incorrect. Unfortunately, I am unable to accept this amendment. But he is correct in saying that we have discussed this amendment and that I agree with him that this account is one of great importance to our overall foreign assistance effort. It is an area in which I personally feel our support is deserved.

I would like to advise the distinguished Senator from Hawaii that the House amount of this account is approximately $50 million higher than our amount. Just to split, if we split the difference in conference, would put us over the President's budget.

I want to assure the Senator that I believe this is an important program. I believe this is a conferenceable item. I know I can assure the Senator that I will carry forward the desires that he has expressed so eloquently, as well as other Members of the Senate who I think are supportive of this program.

I further assure the Senator that the amount which comes out of conference will be a good bit closer, if not almost exactly, the amount which the President has requested and which the Senator from Hawaii is working toward.

Mr. INOUYE. Mr. President, with the assurance of the chairman that this is a conferenceable item, and that he would look with some favorable consideration

upon the President's request in conference, I withdraw my amendment.

The PRESIDING OFFICER. The amendment (UP No. 636) is withdrawn.

UP AMENDMENT NO. 637

Mrs. KASSEBAUM. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mrs. KASSEBAUM) proposes an unprinted amendment numbered 637.

On page 5, line 23, delete the number "$680,000,000" and insert in lieu thereof "$637,485,000."

On page 8, line 5, delete the number "$50,000,000" and insert in lieu thereof "$92,515,000."

Mrs. KASSEBAUM. Mr. President, this amendment reduces the appropriation for the Agriculture, Rural Development, and Nutrition account by $42,515,000 and increases the Sahel development program account by the same figure. This amendment reduces the Agriculture account to $637,485,000, the amount requested by the administration, and increases the Sahel development account to $92,515,000, an amount about $2 million less than the President requested.

The Sahel is a region of important humanitarian and political concern to the United States. The American people spoke from the heart in the early 1970's, when famine took the lives of thousands of Sahelians. They told the Congress that they could not accept that millions of their fellow human beings lived lives of hungry desperation and were condemned to periodic famine. The Sahel program was a mandate from the American people for a long-term commitment to enable these countries to halt the expansion of the Sahara desert and to achieve food self-sufficiency.

There have been problems with the Sahel program, of that there is no doubt. We must expect to encounter, and to overcome, problems when we made a long term commitment to the Sahel program.

The committee report indicates that there have been problems with the accounting of funds that were entrusted to the local governments. An Inspector General's report—and I would like to emphasize AID's Inspector General—discovered that some money was misused. In that there have been cases where the local governments have not used AID-furnished local currencies for agreed upon activities but for other public purposes. In these instances AID has been seeking and, so far, obtaining restitution. It is seeking to launch, with the funds we are discussing today, programs of technical assistance to train local government officials in better financial management.

In undertaking to assist the development of these countries, which are among the very poorest of nations, it was to be expected that there would be problems of this nature. What Congress has the right to expect as well is that AID will take effective action to solve these problems as they are discovered. I have received assurances from AID that improvements in the accounting procedures in the Sahelian states are among the highest priorities of the AID program in the region.

I would hope that my colleagues would join with me in this amendment. I have discussed it with the chairman and the ranking minority member of the subcommittee. I believe we can hopefully reach an agreement on this. I would appreciate their support.

Mr. KASTEN. Mr. President, I would like to say that we have been working with the Senator from Kansas on a number of different issues having to do with the African continent, knowing that she is the very capable subcommittee chairman of the African Affairs Subcommittee.

The Congress has long recognized the importance of providing assistance to the Sahel; and the Appropriations Committee believes that the Sahel development program is an international effort worthy of continued support. However, at a time when the economy of the United States is under considerable stress and major funding cuts have been made in a number of vital domestic programs, it is difficult to support the level of funding the Senator has proposed.

Mr. President, I congratulate the Senator for her work in finding ways to offset this particular account within the overall AID-Sahel development program so that we can increase these funds and put this back to the appropriate level, the appropriate level which the AID and the President have recommended, at the same time staying within the overall budget restraints which we have.

The Senator from Illinois may also want to address this issue.

It would be my intention at the appropriate moment to agree with the Senator from Kansas and to accept her very thoughtful amendment.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent to add as cosponsors Senator PELL and Senator CHAFEE.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mrs. KASSEBAUM. I appreciate the remarks of the chairman of the subcommittee. It is not easy, as we are trying to find priorities for our appropriations. I am pleased that we are working at it in such a way that we can shift some funding to secure other funds. I do believe that this region is of major concern.

Mr. PERCY. Will the Senator yield?

Mrs. KASSEBAUM. I yield.

Mr. PERCY. Mr. President, with regard to the Sahel program, let me simply quote from recent testimony by AID Administrator Peter McPherson before a House subcommittee. He stated:

Since the Senate Appropriations Committee has proposed reducing the Sahel Developmnet Program to only $50 million, I would like to take this opportunity to emphasize the importance I attach to this program. We are creating the human and institutional capacity, as well as the research base, that the Sahel needs for food self-sufficiency and self-sustaining development by the end of this century.

Moreover, State Department officials advise me that decreasing the Sahel program to $50 million would endanger U.S. security interests in West Africa. The Sahel Development Program is an important tool for helping the Sahel countries to resist the threat of Libyan takeover.

I am, of course, most concerned with the prudent management of U.S. resources. We are moving rapidly and systematically to deal with weaknesses in financial management systems that have been highlighted by recent audit reports. We have instituted a requirement that AID Mission Directors in the Sahel certify, as a condition for continuing local cost financing under our projects, that adequate host-country accounting systems are in place. We are also launching programs of technical assistance and training to insure that Sahelian management institutions are strengthened. In doing this, we have squarely faced up to a legitimate criticism of the Sahel Program and are dealing with it effectively.

I commend my distinguished colleague from Kansas for offering this amendment. The manager has done a very fine job in managing this bill, and the changes in these accounts would not erode the basic allocations made by his committee. I commend the manager for accepting the amendment.

Mr. INOUYE. Mr. President, I commend my colleague from Kansas for her leadership in this area. I ask that my name be added as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PELL. Mr. President, I also would like to say how happy I am that the managers of the bill have agreed to accept this amendment. We have many residents from the Sahel living in my State of Rhode Island. This matter is particularly interesting to those of us who represent Rhode Island.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Kansas.

The amendment (UP No. 637) was agreed to.

Mr. INOUYE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. Mr. President, I move to lay that motion on the table .

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 638

(Purpose: To establish a limitation of $5,065,000,000 on the fiscal year 1982 direct loan program of the Export-Import Bank of the United States)

Mr. INOUYE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Hawaii (Mr. INOUYE) proposes an unprinted amendment numbered 638.

Mr. INOUYE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 14, line 23, strike $4,695,000,000 through $4,700,000,000 on line 24, and insert in lieu thereof $5,060,000,000 or more than $5,065,000,000.

Mr. INOUYE. Mr. President, my amendment would raise the committee's

recommended ceiling on Export-Import Bank direct loans from $4.7 billion to $5.1 billion. The amendment would increase budget authority by $365 million and outlays by less than $20 million.

In truth, this is not an increase. In fiscal year 1981, Eximbank direct lending authority was $5,461,000,000. My amendment would reduce this amount by almost $400 million. I would also note that the ceiling proposed in my amendment is equal to the ceiling adopted by the Congress in the Omnibus Reconciliation Act of 1981.

Mr. President, Eximbank loan authorization levels have been projected at a fiscal year level of $6,710,000,000. Funding of Eximbank direct loans at the $4.7 billion level recommended by the committee would, therefore, leave a $2 billion credit gap. I would suggest that, when our country is in a recession, when our trade balance is in deficit, when we are trying to revitalize our Nation's economy, it is not a good time to have a credit gap in export financing.

Faced with rapidly rising imported energy bills, the major exporting countries have been competing more aggressively for export sales. The Congressional Research Service has found that the increasing similarities in price, quality, and availability of developed country goods means that Government financing arrangements have become a determining factor in export sales.

The United States is involved in a heated international trade competition. The governmental credit agencies of foreign nations have become key elements of foreign and economic policy. These agencies aggressively promote the exports of their countries by offering extremely favorable financing to prospective purchasers, particularly on large, high technology products. In 1980, the General Accounting Office produced a study which found that, during 1978, Japan and the United Kingdom supported 35 percent of their exports, France supported 20 percent of its exports, and Germany 12 percent. Only 6 percent of American exports were supported by Eximbank financing.

Mr. President, the proposed cut in direct lending authority reduces our ability to meet foreign credit competition. At the very least, it signals an American withdrawal from aggressive credit competition, and, as a result, weakens our bargaining leverage in future negotiations to eliminate foreign credit subsidies. The Reagan administration is unilaterally disarming the United States in a global credit war.

The Eximbank has been a critical factor in promoting foreign trade. In fiscal year 1980, Eximbank's loans, guarantees, and insurance supported exports of $18.1 billion, a 33-percent increase over fiscal year 1979. The Department of the Treasury found that at least 70 percent of the $18.1 billion in exports attributable to Eximbank would not have occurred without Eximbank support. Eximbank helps our international balance of trade.

Mr. President, in fiscal year 1981, Eximbank was funded at $5.5 billion. Eximbank has already made its budget sacrifice—the $5.065 billion provided in my amendment is $500 million less than the 1981 level. Nonetheless, I do not believe the Senate would support a higher level.

Consequently, I am proposing a somewhat smaller reduction than that proposed by the committee in the hope that the Senate will do its part to encourage expansion of U.S. exports.

Mr. President, I have been assured by the chairman of the subcommittee that every effort will be made to uphold the committee's recommended level in conference.

Am I correct?

Mr. KASTEN. Mr. President, as the Senator from Hawaii knows, this is the only title in which the subcommittee recommendation and the full committee recommendation is now substantially over the President's request. It is there because there is a strong feeling on the part of the Senate that we do need this kind of assistance as we increase an aggressive export policy.

It is my hope that we can stay as close to the Senate level as possible. I know there is support in this Chamber to go even further than we have now come out of committee. We are substantially over the House number. It will be my very strong intention to stay as close to the Senate number as we can. However, unfortunately, I have to resist the amendment to increase the Eximbank figure.

Mrs. KASSEBAUM. Mr. President, I am very appreciative of the efforts of the chairman of the subcommittee to bring this in with savings that are necessary, but I should like to speak for a moment to the Export-Import Bank and some of the misconceptions that surround that program.

In the best of worlds, we would not need an Export-Import Bank funding program, but in the reality of the world as it is, we need to give assistance to U.S. manufacturers when they have to compete against subsidized foreign programs. It is not that we are just cutting assistance to large corporate structures if we significantly cut back Ex-Im funding or take it away altogether. What we are talking about, if that should be the case, is a loss of a number of jobs in the United States.

The distinguished Senator from Hawaii gave figures in proportion to the percentages of other countries compared with our own. I should like to give figures that show how Eximbank assists businesses, both large and small.

For example, more than 5,700 firms in all 50 States have received direct Ex-Im assistance.

Boeing alone helped support 3,500 first-tier subcontractors in 44 States, plus another 50,000 scecond- and third-tier suppliers of materials and services.

Nearly 75 percent of a Westinghouse powerplant project was contributed by than 32,000 exporting jobs in 37 States.

The Bank's 1980 operations supported 720,000 American jobs, using the Government's estimates that for every $1 billion in exports, 40,000 jobs are supported.

Those are some figures that show the importance of this program, the importance of funding for this program, so that we can be competitive in the international market.

I am appreciative of the efforts of the chairman of the subcommittee to retain a strong level of funding, and I wish to lend support to his efforts to keep a sound program in place.

Mr. KASTEN. Mr. President, I commend the Senator from Kansas and the Senator from Hawaii for their ongoing strong support of this program—particularly the Senator from Kansas, who has been working not only on the floor and in the Foreign Relations Committee but also in the Budget Committee, in a strong effort to support the Exim program.

I am aware of the importance of this program to our exporters. I am aware of international competition. I am aware of the growing amount of predatory financing which is being brought forth by a number of countries, and I am aware of the importance of this particular program. So I assure my colleagues that I will do everything I can to maintain this level, the level we have brought from the full committee, and I will work for a strong Eximbank funding policy.

Mr. INOUYE. Mr. President, with the assurance of strong leadership in our conference with the House in maintaining the committee's position, I withdraw my amendment.

The PRESIDING OFFICER. The amendment (UP No. 638) is withdrawn.

UP AMENDMENT NO. 634 WITHDRAWN

Mr. KASTEN. Mr. President, I ask unanimous consent to reconsider the vote by which my unprinted amendment No. 634 was adopted.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KASTEN. Mr. President, I withdraw that amendment.

The PRESIDING OFFICER. The amendment (UP No. 634) is withdrawn.

UP AMENDMENT NO. 639

Mr. KASTEN. Instead, Mr. President, on behalf of Senator PERCY and myself, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN), for himself, Mr. PERCY, and Mr. KENNEDY proposes an unprinted amendment numbered 639.

Mr. KASTEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 8, line 19, beginning with $2,548,-500,000" strike out all through United States:" on page 9, line 2 and insert in lieu thereof the following: "$2,623,500,000: *Provided*, That of the funds appropriated under this paragraph not less than $806,-000,000 shall be available for Israel, not less than $771,000,000 shall be available for Egypt, not less than $100,000,000 shall be available for Sudan, not less than $5,000,-000 for Poland, not less than $5,000,000 for Tunisia, and not less than $15,000,000 for Costa Rica:

Mr. KASTEN. Mr. President, this amendment essentially takes care of a small misunderstanding that our Appropriations Subcommittee had with the Foreign Relations Committee. I feel very strongly that it is important that we

work in close concert with Chairman PERCY, with the minority and with the staff. We found that it was necessary to make a change in this amendment.

Mr. PERCY. Mr. President, during consideration of the International Security and Development Corporation Act of 1981, the Senate agreed to $5 million earmarkings each for Poland and Tunisia and a $15 million earmarking for Costa Rica. This amendment simply restores those levels already agreed to by the Senate.

The earmarking for Poland would allow U.S. private voluntary agencies to purchase, transport, and distribute food and medical supplies to Poland. These supplies will be badly needed by Poland this winter, and this small U.S. effort will be politically very significant.

The earmarking for Tunisia sustains a badly needed U.S. economic aid program for that country. AID has an excellent record in Tunisia and this program has an especially high payoff. Politically, the program will help prevent social instability that is being stirred up by Tunisia's neighbor—Colonel Qadhafi of Libya. This earmark is essential.

The earmark for Costa Rica provides badly needed economic aid for the showplace for democracy in Central America. Without such aid, Costa Rica's faltering economy could cause problems not unlike those in Nicaragua and El Salvador. This is a wise investment in the future.

EMERGENCY AID FOR POLAND

● Mr. KENNEDY. Mr. President, last September 23 the Senate approved unanimously an amendment which I introduced, and Senators PERCY and PELL cosponsored together with Senators CRANSTON, BIDEN, TSONGAS, MITCHELL, and LUGAR, authorizing $5 million in emergency relief assistance for Poland.

Today I am pleased to cosponsor with Senators KASTEN and PERCY an amendment which will insure that these funds are appropriated without any restrictions for Poland—in addition to funds for Costa Rica and Tunisia—as originally envisioned by the Senate.

I believe that at this critical time when millions of Poles must face the harsh winter without sufficient coal to heat their homes, without sufficient food to feed their families, without sufficient medicine for their sick, it would be unconscionable to place restrictions on desperately needed humanitarian assistance.

Over the past year the Polish people have struggled to achieve new and important freedoms. The right to form independent trade and farm unions, the right to vote by a truly secret ballot, the right of local managers and workers to participate in the economic decisionmaking process—all these rights are unique in the Soviet bloc, and the Polish people continue to show their determination to defend these gains of the past year.

But Poland's deteriorating economic situation threatens this hard-won progress, as well as the very stability of the nation. The people of Poland hear the promise of future freedom and prosperity, but they must wait in line for food, clothing, and gasoline for hours on end, only to be told that there is no more. They are told that they must lower the temperature in their homes to 55° Fahrenheit, so that Poland can export its coal to earn hard currency for its debt.

We cannot solve all of Poland's economic problems but we must try to make a difference where we can. And one area of acute shortages where our assistance can literally make the difference between life and death is the area of drugs and medical supplies.

The Polish people are facing a severe health care emergency. Polish industry is presently unable to produce the quantity of medicines and essential medical supplies necessary to the health and well-being of its people. Even very basic items are in short supply—everything from aspirin to antibiotics, from tongue depressors to syringes is largely unavailable. And perhaps the most vulnerable victims of these shortages are the children, whose resistance to disease is further diminished by nutritional deficiencies caused by chronic food shortages.

I have been in close touch with members of the Polish-American Congress and the Solidarity labor union, as well as with the Polish Ambassador regarding this issue. All agree that we can make a difference. Project HOPE is currently sponsoring a drive to relieve Poland's critical medical emergency through donated drugs and supplies from American pharmaceutical firms, which are distributed to the Polish hospitals free of charge by Solidarity and the Polish Ministry of Health. This established network can be geared toward the children of Poland by insuring that the American Children's Hospital in Krakow, which is administered by HOPE with AID funds, is kept well supplied.

The United States should proceed rapidly to provide this desperately needed medical and related emergency assistance to the people of Poland. By supporting the appropriations amendment before us today, the Senate will confirm its unanimous support for our foreign aid authorization for Poland last September. I look forward to working with members of the conference committee and the administration in insuring that these funds are used effectively in the areas of greatest need in Poland.●

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 639) was agreed to.

The PRESIDING OFFICER. Are there further amendments?

UP AMENDMENT NO. 640

Mr. KASTEN. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes an unprinted amendment numbered 640.

Mr. KASTEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 17, line 22, insert in lieu of the figure "$2,500" the figure "$4,000"; and

On page 17, line 23, insert in lieu of the figure "$140,000" the figure "$138,500".

Mr. KASTEN. Mr. President, this amendment is of a technical nature. The committee agreed to a request by the administration to increase representation and entertainment expenses for the Department of Defense in connection with the foreign military assistance program. We provided most of the request, but they have informed us that they would like a slightly different breakdown between the entertainment expenses and representational allowance. This amendment complies with that request. It is my understanding that Senator INOUYE has had an opportunity to review the request and agrees with it.

Mr. INOUYE. I am always pleased to agree with my colleague.

Mr. KASTEN. I thank the Senator for his cooperation.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 640) was agreed to.

UP AMENDMENT NO. 641

Mr. KASTEN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes an unprinted amendment numbered 641.

Mr. KASTEN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, strike the language on lines 10 through 15, and insert in lieu thereof the following:

"SEC. 502. Except for the appropriations entitled 'International disaster assistance', 'United States emergency refugee and migration assistance fund' and the special requirements fund within the appropriations entitled 'Military Assistance' and the special requirements fund within the appropriations entitled 'Economic support fund,' not more than 15 per centum of any appropriation item made available by this Act for the fiscal year 1982 shall be obligated or reserved during the last month of availability."

Mr. KASTEN. Mr. President, this amendment corrects an oversight by the committee with respect to its requirement that not more than 15 percent of any appropriation item made be made available during the last month of the fiscal year. The exceptions to this have been the various contingency or disaster related accounts, and because the committee has decided to appropriate funds for special requirements funds under the economic support fund and the MAP program, we should therefore add those two programs as exceptions under this section.

I understand that Senator INOUYE has no problem with this, as it is a technical change.

Mr. INOUYE. It is a good amendment.

Mr. KASTEN. I thank the Senator for his help and cooperation.

I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 641) was agreed to.

UP AMENDMENT NO. 642

Mr. KASTEN. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes an unprinted amendment numbered 642.

On page 3, line 12, in lieu of the figure "$1,678,305,878" insert the figure "$1,687,728,491".

Mr. KASTEN. Mr. President, this is a technical amendment adjusting the callable capital figure for the World Bank so that it conforms with the amounts provided in paid-in capital to the special capital increase and the general capital increase of the World Bank. The old figure reflected a different breakdown between these two replenishments.

Once more, it is my understanding that the Senator from Hawaii has had an opportunity to review this amendment, and he agrees with it.

Mr. INOUYE. My chairman is correct.

Mr. KASTEN. I thank the ranking minority Member for his help and cooperation.

I move the adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 642) was agreed to.

UP AMENDMENT NO. 643

Mr. KASTEN. Mr. President, on behalf of Senators PERCY and SARBANES, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) on behalf of Mr. PERCY and Mr. SARBANES proposes unprinted amendment numbered 643.

On page 13, line 17, delete the number "$3,063,500,000" and insert in lieu thereof the number "$3,083,500,000".

Mr. KASTEN. Mr. President, I note that the Senator from Maryland is here in the Chamber, and I yield to him to speak on behalf of this amendment.

Mr. SARBANES. I thank the chairman of the subcommittee.

Mr. President, I am very pleased to join the distinguished Senator from Illinois, chairman of the Senate Foreign Relations Committee, in introducing this amendment.

The additional $20 million in FMS credits for Greece will bring the appropriation for this purpose in the current fiscal year to the level authorized by the Foreign Relations Committee thereby keeping military aid to Greece and Turkey proportionately the same as in fiscal year 1981. It will have no effect on budget outlays. It is, however, a very significant and constructive step reaffirming established U.S. policy with respect to Greece and the Eastern Mediterranean since section 620C(b)(4) of the Foreign Assistance Act states that U.S. security assistance "shall be designed to insure that the present balance of military strength among countries of the region, including Greece and Turkey is preserved."

Adoption of this amendment will carry forward and indeed reinforce the solid working relationship between the United States and Greece. The peoples of the United States and Greece are joined by historic and traditional ties that reach back to the early days of the two countries, and these ties are cemented by a mutual commitment to democratic principles and the rule of law. The amendment proposed by the distinguished senior Senator from Illinois and myself reflects the importance attached to maintaining and strengthening that relationship, and contributes to that end.

Mr. KASTEN. Mr. President, this amendment would increase the foreign military credit sales ceiling by $20 million.

As I understand the Senator's intent, he is suggesting that this add-on be made available for Greece. The amendment is aimed at the ceiling guarantee level, thus it has no budgetary affect.

Mr. President, I support this amendment. It is my understanding that the amendment has been reviewed and agreed by the Senator from Hawaii.

Mr. INOUYE. I am pleased to join in the support.

Mr. KASTEN. I, therefore, am pleased to accept it on behalf of the majority and the minority of our committee.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. KASTEN. I am pleased to yield to the Senator from Illinois.

Mr. PERCY. Mr. President, I am very pleased to join together with the distinguished Senator from Maryland (Mr. SARBANES) on this amendment which does add $20 million in foreign military sales financing for Greece.

This increase would provide $280 million for Greece which preserves the 7 to 10 ratio of military aid between Turkey and Greece.

There is no budget impact to this increase since FMS financing is off-budget. The loans are made at the cost of money to the U.S. Government.

The full $280 million was previously authorized by the Senate and is especially important to Greece at a time when a new government is taking office. By taking this action at this time, the Senate can send a signal to the new government in Greece that the United States wants to work together with Greece to help it preserve its security.

I might say parenthetically that I have been very disturbed by the newspaper reports of the anti-American attitude expressed by the crowds outside the Embassy in Greece.

We are not trying to say that this particular program is an answer to that. It was done long before those outcries. We in this country understand dissent as well as any other country. Here they have democracy working. They have the right to be anti-American or pro-American, whatever they want.

But the continuing policy that we are pursuing in this country and in this Congress is to show our good faith, to show our friendship with the people of Greece, the interdependence that we have with the people of Greece, and I believe that our record through the years will support those who in Greece believe that close ties between the United States of America—its Government and its people—and Greece, is in the best interests of both countries and the free world.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Wisconsin.

The amendment (UP No. 643) was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. INOUYE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Are there further amendments to be proposed?

Mr. KASTEN. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 644

Mr. PERCY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) for himself and Mr. PELL, proposes unprinted amendment numbered 644.

Mr. PERCY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 5, line 7, delete the number "$216,138,000" and add in lieu thereof "$218,638,000".

On page 5, line 12 delete the number "$5,000,000" and add in lieu thereof "$7,500,000".

Mr. PERCY. Mr. President, this amendment increases the amount available for the United Nations Environment program by $2.5 million. The authorizing bill passed by the Senate earmarks $10 million for UNEP. The appropriations bill currently allocates only $5 million for this program. This amendment splits the difference between these two earmarks.

I believe that the managers of the bill have agreed to accept this amendment.

Mr. KASTEN. Mr. President, the amendment suggested by Senator PERCY would add another $2.5 million for the United Nations environment program.

I would like to point out that the committee was very generous with this Institution. We are recommending the appropriation of $5 million, $3 million or 150 percent more than the budget request.

The committee took this position despite our deep concern over two problems which have plagued this institution. The first problem has been consistent reports that the professional staff of UNEP is all but in open revolt with management. The second, more well known problem, was that institution's blatantly political action in turning down the low bid for construction of its headquarters building because the low bidder was an Israeli construction firm.

While under the circumstances I believe our recommendation is adequate and justifiable, I also recognize the Senator feels strongly about this, and I would like his assurance that his committee will look into some of these problems with the management of this Institution. The position of support taken by the subcommittee was in spite of deep concern over these two problems that have plagued this Institution.

Under these circumstances, our subcommittee was not in any way pleased or satisfied with the direction that this Institution was taking, and we sought in our hearings to demonstrate our strong concern.

I agree to the amendment of the Senator from Illinois reluctantly, but in my agreement I ask that he assure us that his committee will work with us and look into the problems that I have just spoken of because I know that the Senator does not wish to condone this kind of poor management and blatant political consideration.

If you can assure us that you will join with us in trying to solve some of the management problems of this agency I would reluctantly agree to your $2.5 million amendment for the U.N. environment program.

Mr. PERCY. I want to express concern also, and say that I share the Senator's concern, and can pledge to him that the Committee on Foreign Relations will fully look into this matter and advise the distinguished Senator from Wisconsin as to our findings.

Mr. KASTEN. With that understanding, we will go forward on this particular project, and I can assure the Senator we will do so together. Our concerns are mutual. Under those circumstances I will support the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment (UP No. 644) was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

THE INTERNATIONAL FUND FOR AGRICULTURAL DEVELOPMENT

Mr. DANFORTH. Mr. President, I am concerned about the way in which S. 1802 deals with the U.S. payment to the International Fund for Agricultural Development (IFAD) in fiscal year 1982.

Let me begin with a bit of historical background about IFAD. IFAD was created in response to a recommendation of the World Food Conference in 1974.

It resulted directly from a proposal by the OPEC countries, which was actively supported by the United States. It was established in 1977 as a United Nations specialized agency, beginning operations in December of that year.

The United States made a generous contribution to IFAD of $200 million for the initial 3-year period, 1978–80. Other developed countries contributed $370 million, for a total of $570 million from the developed country side. OPEC contributions totaled $430 million for the initial 3-year period.

The issue before the Senate now is the level of the U.S. payment to IFAD for fiscal year 1982. The Senate has already passed the fiscal year 1982 foreign aid authorization bill, which includes a U.S. contribution to the replenishment of $180 million, of which no more than $45 million is to be made available in fiscal year 1982. S. 1802 as reported provides no payment in fiscal year 1982, leaving open the question of possible U.S. payments in fiscal year 1983 and fiscal year 1984.

In view of our historic support for IFAD, it troubles me that the United States would defer any contribution to the replenishment until at least fiscal year 1983—that is, October 1, 1982.

It is my understanding that the chairman of the subcommittee has three specific problems with making a U.S. contribution to the IFAD replenishment in fiscal year 1982. The first has to do with how much of the funding load is to be borne by the OECD—Organization for Economic Cooperation and Development—countries, including the United States, and how much by OPEC nations. The second problem has to do with the size of the IFAD staff, and the third concern has to do with the question of whether or not IFAD's unique mission still exists.

On the subject of cost-sharing, the original plan for IFAD was that the OECD–OPEC funding ratio was to be 50 to 50. The initial funding was 57 to 43, OECD–OPEC, and in the replenishment, the ratio would be 58 to 42. This is movement in the wrong direction, and we should do everything possible to reverse that direction and reestablish a 50 to 50 ratio. At the same time, we must be careful not to jeopardize or overlook the fact that $180 million in U.S. participation is leveraging $440 million from other OECD countries and $350 million from OPEC.

There is some question about whether or not OPEC is actively working to bring its contribution up to $450 million. The committee report expresses concern that that decision will not come until next summer. There are new indications from the President of IFAD that a decision may in fact be reached later this month. If this happens, some of the credit belongs to the Senator from Wisconsin for his diligence and concern in this matter. However, if this should occur, I would hope that a way could be found for us to respond in kind.

On the subject of professional staff size, I understand that at its origin IFAD was to have no more than 30 people. I am the last person to endorse bigger staffs, nor do I claim to be an expert on IFAD's staff needs. However, I am told that the administration has already initiated discussions with IFAD officials and other governments along the lines of the IFAD staff limit of 75 called for in the foreign aid authorization bill. I would hope this development could resolve this problem.

With regard to the final problem of IFAD's mission, I, too, would like to see an emphasis on the rural poor and on having IFAD work through other institutions rather than set up its own programs. I am not sure, however, that the record on this point is as "dismal" as the committee suggests.

Recent reports on IFAD—both the one done by our own GAO and one by the U.S. International Development Cooperation Agency, November 1980—credit IFAD with directing its resources toward the poorest countries and their small farmers. Individual IFAD projects have also been credited with introducing basic changes which have benefited small farmers in various countries.

I guess the real question is to what extent the entire program is put at risk with our failure to provide funds in fiscal year 1982. I am told that IFAD's president believes that the whole financial package would collapse if we do not meet our commitments.

It seems to me that the nature of this program, the emphasis on small farming, and the funding support from OPEC and other nations are very important concepts which should not be jeopardized. I am aware that the IFAD replenishment received considerable attention at the Cancun summit, which concluded, and I quote, that—

> IFAD requires prompt replenishment of its resources so that it may continue its operations without interruption.

The administration support for IFAD is clear, if not as visible as some of us would like. They sought $45 million early this year. That figure was adjusted downward to $39.6 million in the revised September budget. I would like to read a letter I received today from AID Administrator Peter McPherson reaffirming the administration support:

Hon. JOHN C. DANFORTH,
U.S. Senate,
Washington, D.C.

DEAR SENATOR DANFORTH: I am writing to you to make clear the Administration's position with regard to funding for the International Fund for Agricultural Development (IFAD). Most recently, Administration support for IFAD has been manifested in a request of $180 million as the United States' contribution to the replenishment of IFAD, with a first installment of $39.6 million to be appropriated for FY 1982.

The Administration's request was accepted by both the Senate Foreign Relations and House Foreign Affairs Committees. However, the Senate Committee adopted a Sense of Congress provision which noted its concern over the failure of OPEC countries to provide at least half of the contributions to IFAD, as

well as over certain staffing and implementation problems. The Senate Appropriations Committee also looked closely at these issues and felt, without foreclosing the possibility of funding for FY 1983, that they warranted closer examination before the Committee would be willing to appropriate funds. Thus, the Committee recommended that no funds be made available for IFAD for FY 1982.

I believe there is now greater appreciation on the part of IFAD as to the seriousness with which the Congress views these funding and organizational issues. We will, of course, continue to work with IFAD to assure that its original purposes can be met in a manner consistent with its prior commitments to the United States and other donors.

Of course, any action you might take during consideration by the Senate of the foreign assistance appropriation bill which is consistent with the President's request, would receive our support.

Sincerely,

M. PETER MCPHERSON.

In light of all this, it would be a great tragedy if the United States was perceived as the country that jeopardized this program's future, especially in light of positive signals received recently from OPEC.

It is my understanding that that is not the case. I am assured that in fiscal year 1983 the door is open for the United States to meet its funding commitment. I hope that the door is not closed for fiscal year 1982 if OPEC shows a willingness to meet its commitment and the other IFAD problems are resolved.

At any rate, OPEC and the other IFAD funding participants should know of the continuing U.S. commitment toward IFAD's goals and objectives.

I have been asked by Senators HATFIELD, LEAHY, EAGLETON, PERCY, and PELL, to express their support for these same sentiments.

Mr. KASTEN. Mr. President, I would simply like to state to the Senate and to the Senator from Missouri that the door is always open.

In his comments he pointed out that we have decided to defer funding for IFAD, and I might also remind the Senator from Missouri that the Arab countries have deferred their decision, as well, until next summer.

But our action is not meant to indicate to anyone that the door is closed on this question or that we do not look with favor and interest upon this program if the commitments of the other member countries are, in fact, met.

CYPRUS

Mr. PERCY. On page 9, lines 2 and 3 of S. 1802, the committee bill would provide that "not more than $7.5 million shall be available for Cyprus." The International Security and Development Cooperation Act of 1981 earmarks not less than $10 million for Cyprus.

I would note that in the Foreign Relations Committee markup a figure of $15 million was first considered, so that the $10 million earmark is already a compromise figure.

These funds would be used not only for refugee assistance but also for educational exchange. The $10 million figure in the authorizing bill represents a $5 million reduction from fiscal year 1981.

I understand that the continuing resolution in the House bill would provide $15 million for Cyprus in fiscal year 1982. Would it therefore be fair to assume that the conference report for the continuing resolution would provide at least $10 million for Cyprus and that it could be earmarked with language similar to that on page 9, lines 2–3 of S. 1802?

Mr. KASTEN. I believe that given the levels and earmarking for Cyprus in this bill and in the House continuing resolution that the assumption of the Senator from Illinois may well be correct.

Mr. PERCY. I thank my distinguished colleague very much indeed.

UP AMENDMENT NO. 645

Mr. PERCY. Mr. President, I send to the desk an amendment and I ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 645:

On page 9, lines 22 to 25, delete everything after the number $34,160,000.

Mr. PERCY. Mr. President, I ask unanimous consent that Senators PELL and BIDEN be added as cosponsors to this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. The amount to be appropriated as recommended by the Appropriations Committee reduces the President's revised request by about $2.5 million for international narcotics control.

Personally, I disagree with a reduction in this all important program to keep illegal drugs off America's streets, but I will not contest the reduction.

Although I imagine it makes Senator NUNN and other members of the Permanent Investigating Committee, who have spent so much time with me on drug abuse, unhappy when we look at the cost effectiveness of efforts that we make to try to reduce drug abuse in this country, and we recognize the tremendous cost of drug abuse running into the billions of dollars alone just on street crime. Anything we can do to reduce drug abuse is cost effective in my judgment.

This amendment deletes the prohibition on funds to the United Nations Fund for Drug Abuse Control. This program is aimed primarily at Pakistan. Now I understand that there may be some temporary absorption problems with UNFDAC, but this is no reason to prohibit funds for that program. Such a prohibition will be read in Pakistan as a sign that we are no longer interested in controlling the flow of illegal drugs from that area. I should think that simply reducing the funds for UNFDAC is sufficient and no prohibition is required. The President needs some flexibility in this area.

The Foreign Relations Committee has received a letter from the administration stating that no funds would be obligated for UNFDAC in fiscal year 1982 unless Congress receives a reprograming notice. I ask unanimous consent that that letter be placed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, D.C., November 12, 1981.

Hon. ROBERT W. KASTEN, Jr.,
Chairman, Subcommittee on Foreign Operations, Committee on Appropriations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: In discussions which were held this afternoon between Mr. James Bond of the Senate Appropriations Committee Staff and Mr. Hans Binnendijk of the Senate Foreign Relations Committee staff with Mr. Joseph H. Linnemann of the Bureau of International Narcotics Matters, Mr. Linneman requested that the prohibitive language restricting the use of funds for the United Nations Fund for Drug Abuse Control be dropped from S. 1802.

If this can be done, the Administration would make a thorough review of our UNFDAC program needs and before proceeding to obligate any funds for this purpose the Bureau through the Department would submit a Notice of our Intention to Reprogram to both the Senate and the House of Representatives pursuant to Section 634 of the Foreign Assistance Act.

I hope this proposal is acceptable to you.

Sincerely,

RICHARD FAIRBANKS,
Assistant Secretary for Congressional Relations.

Mr. PERCY. With this assurance I do believe this amendment may be acceptable to the managers of the bill.

Mr. KASTEN. Mr. President, concern has been expressed by Senators PERCY, D'AMATO and others regarding the committee's action which cut funding for the United Nations Fund for Drug Abuse Control and put in the bill language prohibiting funding for that program.

The reason for the committee's action is that in the hearings we discovered that the pipeline for the U.N. fund remains quite large, and it is obvious that the program does not need any new funds. That situation has not changed.

However, I do understand the concern that has been expressed with reference to the prohibition which we have put in the legislation, and I am, therefore, willing to accept the amendment dropping the prohibition. However, it is nonetheless understood that the cut that we made to the program includes the cut from the U.N. fund. This is not going to hurt this program, as, in fact, they have already indicated that they intended to use money budgeted for the U.N. fund as a contingency fund for bilateral programs. Even now there is a reprograming pending which would use one of the $2 million available for the U.N. fund for a program in Mexico.

I am pleased that the Senator has asked that the letter from Mr. Richard Fairbanks, Assistant Secretary of State for Congressional Relations, be included in the RECORD. This letter indicates that the Department will not go forward with any funding for UNFDAC unless a reprograming is submitted in the normal reprograming fashion.

So with that understanding, I accept the amendment of the Senator from Illinois.

Mr. PERCY. I thank my distinguished colleague very much indeed.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment (UP No. 645) was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 646

Mr. PERCY. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) for himself and Mr. PELL proposes an unprinted amendment numbered 646.

Mr. PERCY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19 line 12, after the word Committees, insert the words "and the relevant authorizing committees".

Mr. PERCY. Mr. President, the current provision of section 512 requires that the Appropriations Committee approve any transfers of funds between appropriation accounts.

The Senate Foreign Relations Committee has informally received assurances from the administration that it would receive the same treatment concerning such transfers as does the Appropriations Committee.

This amendment simply formalizes that arrangement.

Mr. KASTEN. Mr. President, section 512 of this bill has been carried in the appropriation legislation for several years. It provides that transfers may not be made between accounts without the prior approval of the Appropriations Committees.

This amendment would add the authorizing committees to that approval process. While the authorizing committees are, of course, entitled to require such approval in its own legislation, I have no objection to including them here, and, therefore, on behalf of the majority, I am willing to accept the amendment of the Senator from Illinois.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

The amendment (UP No. 646) was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AFRICAN DEVELOPMENT FOUNDATION

Mr. PERCY. Mr. President, on page 8, lines 11 to 12 of the bill there is deleted all funding for the African Development Foundation. I address this question to my distinguished colleagues, the managers of the bill. As you know, this program was authorized at the initiation and the initiative of the House of Representatives. I do not intend to move to delete this prohibition, but just simply I want the record to show that the Senate Committee on Foreign Relations supports the African Development Foundation.

I hope that between now and the conference we can discuss this program, and if you become convinced of its merits I hope you can recede to the House's position on this issue.

Mr. KASTEN. In response to the question of the Senator from Illinois, I would hope that we could, in fact, between now and the conference discuss this program. I would be more than anxious to do so. If, as the Senator says, we become convinced of the merits, we could certainly consider working with the House on this particular issue.

Mr. PERCY. Mr. President, I thank my distinguished colleague very much.

I would like to add that it is my understanding that the distinguished chairperson of the African Subcommittee of the Foreign Relations Committee, Senator KASSEBAUM, is supportive of this position, as well.

I was interested to note that the committee's report discusses the claim of the Sea Oil & General Co. against the Government of Indonesia. I am a strong supporter of American investors abroad, and I commend the committee for its efforts to resolve this longstanding dispute. At the same time, we have vital strategic and economic interests in Indonesia. I am concerned that the language of the report, directing that no funds be obligated for assistance to Indonesia until the claim is settled, will jeopardize these interests. Perhaps we can arrive at a different approach which will stimulate a settlement of the claim without posing such a serious risk to our interests in Indonesia.

Mr. KASTEN. The committee was disturbed by the continued lack of progress toward a resolution of the case. It was our intention to send an unmistakable message to the Government of Indonesia that Indonesia cannot expect U.S. assistance to continue unless it respects the rights of U.S. investors. At the same time, I share the Senator's concern regarding the vital interests of the United States in Indonesia. I am hopeful that the case can be settled promptly and that we will therefore avoid any interruption of assistance to Indonesia.

Mr. PERCY. I share the Senator's hope for prompt settlement, but I am concerned that even with the best of intentions, settlement may not be possible before the Foreign Assistance Act becomes law. The case is by no means one-sided. It involves complex issues of fact and law. If we attempt to force a settlement within a relatively short period under a threat that assistance may be terminated, we may drive the Indonesians into an extreme position and thus lessen or eliminate the possibility of a settlement.

Under these circumstances, the claim would remain unsettled and our interests in Indonesia would be severely damaged. I support the committee's efforts to reach a settlement, but I believe the approach reflected in the report may be counterproductive because it threatens an extreme sanction in the very near future.

Mr. KASTEN. The case has dragged on for several years without substantial progress toward settlement. Under these circumstances, the committee felt that strong action was required.

Mr. PERCY. The Senator is correct in noting that progress toward settlement has been extremely slow in the past. Within the last month, however, the Government of Indonesia has retained the law firm of White & Case to examine the case and to advise the Government regarding its resolution. I have been informed that the Washington office of White & Case is actively pursuing the case and expects to make its recommendations to the Government of Indonesia in the near future. At the same time, the Department of State, obviously responding to the committee's expressed concerns, has urged the Government of Indonesia at the highest levels to resolve this matter in order to avoid serious damage to our relations. The Indonesians have replied that they are doing their utmost to resolve the case and will act promptly upon the recommendation of their lawyers. One possibility would be the submission of the case to arbitration. I believe that progress toward a resolution of this claim is finally underway, due in large measure to the committee's strong expression of concern. I fear, however, that if the directive contained in the committee's report becomes effective, it may destroy the current impetus toward a settlement.

Mr. KASTEN. I am encouraged by the Senator's remarks. I believe it is important for the Senate to express its strong and continuing interest in a resolution of this case. At the same time, I appreciate the Senator's concern that our efforts in this regard not be counterproductive. Can the Senator suggest an approach which will effectively promote a settlement without risking the disadvantages he fears may result in the committee's directive?

Mr. PERCY. I recommend for the Senator's consideration the approach taken by the Appropriation's Committee of the House in its report on the same bill. The House report "urges the State Department to press for an immediate settlement and to delay obligation of funds in fiscal year 1982 until a full report has been made to the committee and discussions held." I believe this language reflects the strong concern which this body has regarding the continued lack of a settlement, but provides sufficient latitude and time for the resolution of the claim either through negotiations or arbitration. Does the Senator agree?

Mr. KASTEN. I believe the approach taken by the House may be acceptable. However, given the delays which have occurred in the past, I believe it is necessary to monitor the case very closely and to press for a prompt resolution of the claim.

Mr. PERCY. I share the Senator's concern, and I expect the State Department to take all available measures to promote a settlement and to keep the committee fully and completely informed of the status of this case.

Mr. KASTEN. With that understanding, I may be able to support the approach taken by the House Appropria-

tions Committee, providing the case is resolved, or if substantial progress toward resolution of the case is made.

Mr. PERCY. I thank the Senator for his patience and consideration, and I offer my full support of his efforts to resolve this case.

Mr. President, that concludes the items the Senator from Illinois intended to bring up. I will remain in the vicinity of the floor in the event other items do come up on which the comments of the Senator from Illinois would be necessary.

I see another distinguished member of the Foreign Relations Committee, Senator HELMS, in the Chamber. I do not always give him my proxy, but I always value his counsel and advice.

Mr. HELMS addressed the Chair.

The PRESIDING OFFICER. The Senator from North Carolina.

Mr. HELMS. I thank the Chair and I thank the distinguished chairman of the Foreign Relations Committee.

I might say, Mr. President, that I just left a rat race called the conference between the House and the Senate on the farm bill. I see the distinguished occupant of the chair smiling, because he is also a member of that conference. But he could not be there because he has to be here presiding so he does not know the fun he missed, but I will tell him about it.

UP AMENDMENT NO. 647

(Purpose: To prohibit the availability of funds for the United Nations Institute for Namibia)

Mr. HELMS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendnment numbered 647.

On page 5, line 13, before the period insert a colon and the following: "*Provided further*, That none of the funds appropriated under this heading may be available for the United Nations Institute for Namibia".

Mr. HELMS. Mr. President, the appropriation bill includes $500 million of the American taxpayers' funds for the so-called Institute for Namibia, to be funded through the voluntary contributions to the United Nations.

Mr. President, at this very moment some delicate negotiations are in progress with regard to the terms for an election for the independence of Namibia. The United Nations has designated SWAPO, a terrorist organization, as the sole and authentic representative of the people of Namibia, even though SWAPO has never participated in an election in Namibia, and in fact refuses to do so. SWAPO believes that power comes out of the barrel of a gun, or maybe out of United Nations support.

One of the sticking points in the proposed election arrangements is whether or not the United Nations should oversee the elections, and provide peacekeeping troops during the election process. But South Africa has rejected these proposals, correctly asserting that the United Nations does not come into the election process with clean hands. The United Nations, by designating SWAPO, that terrorist group, as the representative of the people of Namibia, has already taken sides in the dispute.

As a matter of fact, Mr. President, the United Nations—and this is no surprise to anybody who has observed the United Nations over the years—the United Nations has been funding SWAPO for years through various devices, such as the Institute for Namibia, the Fund for Namibia, and various so-called humanitarian and educational organizations.

Mr. President, let the record be clear that the Institute for Namibia is a Marxist organization, intended to indoctrinate its students in the principles of Marxism and revolution. Our distinguished colleague, the junior Senator from California (Mr. HAYAKAWA) has told us on more than one occasion on this floor how, during his visit to the institute, the walls were adorned with pictures of Marx and Lenin.

Moreover, the State Department has acknowledged in the past that the Institute caters only to SWAPO members, and that members of other political factions have been literally driven out. In 1979, the then Assistant Secretary of State for International Organizations, Mr. Charles Maynes, acknowledged in a letter to me that even the bulk of the members of SWANU, which is SWAPO's revolutionary competitor, had withdrawn from the Institute because of harassment from SWAPO. Needless to say, there have been no moderate students at the Institute whatsoever.

So the purpose of this amendment is, I hope, obvious. It is more than the $500,000 that is involved. What is involved is the question of what will happen if we continue to fund this outfit. Obviously, we will prejudice the negotiations to which I alluded earlier and we will contribute to the impression that the United Nations is an biased intervenor in what should be a free political process.

Frankly, Mr. President, I am deeply disturbed that this funding should remain in a bill approved by the Reagan administration. I do not believe the President himself knows one thing about this. Even though this may involve what amounts to a small sum of money around this place—$500,000—it is a significant sum to the American taxpayers, and the political impact of its inclusion in this bill would be all out of proportion to the size of the amount.

So, Mr. President, the pending amendment simply provides that none of the funds appropriated under this heading may be available for the United Nations Institute for Namibia. It would not reduce the overall funding, but it would prevent any U.S. contributions to the Institute.

Mr. President, I ask unanimous consent that my statement and insertions of October 12, 1979, when we last took up this subject, be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE LEADING FUNDS FOR THE INSTITUTE OF NAMIBIA

[Friday, October 12, 1979]

AMENDMENT NO. 512

(Purpose: To prohibit funding for the Institute for Namibia)

The PRESIDING OFFICER. The pending question is the amendment of the Senator from North Carolina numbered 512.

Mr. HELMS. I thank the Chair.

Mr. President, the pending amendment is very simple. It would cut one-half million dollars from the so-called voluntary contributions to the United Nations intended for the U.N. Institute for Namibia.

Let us take a good close look at this institute. It is an educational arm of the Soviet-backed terrorist organization, SWAPO. I think it is an insult to the American taxpayer to even contemplate using U.S. funds for this purpose.

The U.S. funding is just one increment, however, of millions of dollars which the United Nations intends to funnel into this institute over the next 3 years.

In a recent letter to me, the Assistant Secretary of State for International Organization Affairs, Mr. Charles Maynes, has virtually confirmed that the so-called Institute for Namibia is nothing in this world but a SWAPO front. Although the Secretary attempts to make a distinction between military activities and educational activities, the fact remains that a grant to this institute is a grant to support SWAPO's revolutionary activity. I intended to go into more detail about this letter in a moment. Hopefully, it will help my colleagues to understand better the enormous range of funding which the United Nations provides to SWAPO, which it regards as "the sole and authentic representative of the Namibian people."

Mr. President, to that the Senator from North Carolina says "horseradish," because the truth is that SWAPO has no legitimate claim to represent the Namibian people, except the claim of terror. By funding SWAPO, the United States will make it impossible to have free elections in Namibia. There is a whole range of political groups in Namibia, both black and multiracial, who are dedicated to democratic principle; but SWAPO rejects democratic principles. Yet it is proposed under this bill to send U.S. taxpayers' money to the aid of SWAPO. A good example is described by Secretary Maynes himself, where he relates how SWAPO forced other political groups to leave the Institute.

I do not believe that the United States can be a party to funding even the educational arm of a terrorist group that rejects democratic principles.

It is understandable why the anti-American bloc at the U.N. should support such programs; but it is incomprehensible why the United States should support them.

The fact is that even though these programs are allegedly "educational" they in fact support the terrorist programs of Marxist revolutionaries in southern Africa. The United Nations has declared SWAPO to be the sole and authentic representatives of the people of Namibia and South Africa. They did this on the basis of the groups' terrorist activities and not upon any realistic assessment of the political strength of the organizations. It is clear Marxist dogma that a Marxist organization is the authentic representative of the people whether the people agree with it or not. It is the same doctrinaire drive for control that proclaims that Gus Hall's Communist Party of the U.S.A. is the authentic representative of the American people. Anybody who believes that will believe anything.

Since the U.N. has already proclaimed SWAPO to be the sole and authentic representative of the people of Namibia, to take

just one example, SWAPO has become the beneficiary of millions of dollars of U.N. funding. These funds come from both assessed and voluntary contributions. In the bill before us today, we are dealing only with voluntary contributions, but no one can get the true picture without looking at both.

According to an article which appeared last year in the publication American Relations, the U.N. has set up three special agencies to support revolution in southern Africa. These include the U.N. Commissioner for Namibia, the U.N. Council for Namibia, and the U.N. Fund for Namibia, which in turn funds the Namibia Institute, which is what this amendment addresses. According to the article, the U.N. Commissioner for Namibia is the U.N.'s government in exile for Namibia, with three offices in New York, Lusaka, and Botswana, with a total budget of $1,722,500, for 1978–79. The U.N. Council for Namibia has 25 member nations with a budget of $1,581,700 for 1978–79. The Council also recognizes SWAPO as the "sole and authentic representative of the people of Namibia," and funds SWAPO's New York office to the tune of $182,200.

The U.N. Fund for Namibia is a trust fund account established in 1971, which has received $950,000 from the assessed U.N. budget, and $1,303,874 from voluntary contributions. In 1974, the U.N. General Assembly approved the establishment of the Institute for Namibia. The Fund for Namibia gave the Institute $846,549 by March 1977. However, the United Nations Development Fund also gave the Institute $3,750,000 from voluntary contributions.

It is the category of voluntary contributions that we are talking about here.

Concerned about the funding of such outfits at the Institute for Namibia, I wrote to the Assistant Secretary of State for International Organizations Affairs, Mr. Charles Maynes, about the veracity of these figures and other information I had received. Secretary Maynes confirmed them both in outline and detail and added even more disturbing information. A complete copy of Secretary Maynes' letter is on the desk for every Senator. We had it distributed last night and it is here again this afternoon, and I hope Senators will take a look at it.

Mr. President, I also ask unanimous consent that the letter of Secretary Maynes and its attachments be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HELMS. In response to my questions, Secretary Maynes wrote:

"All of the Institute's students are Namibians. The bulk of them appear to be members or supporters of SWAPO. However, some of the students are also supporters of another Namibian liberation movement, SWANU, and some profess no political preference whatever. Professional staff members are listed on an enclosed table and are citizens of a variety of countries."

I am quoting, Mr. President, and I continue to quote the Secretary:

"Acting on behalf of the President, and after a careful review of our Embassy in Lusaka, Secretary Vance determined on February 6, 1979, that no fiscal year 1979 funds for the UN Institute for Namibia will be used to support the military or paramilitary activities of SWAPO. Although it is clear that there are some members of the faculty at the Institute who favor SWAPO and have expressed their preferences, these expressions, as well as those by groups who favor other political parties, have occurred within a climate of academic freedom that permits a range of political expression as well as the right to keep silent. There have been incidents between supporters of SWAPO and SWANU at the Institute. As a result of one incident a group of SWANU supporters left the Institute. However, our Embassy in Lusaka, maintains frequent contacts with the Institute, believes that these incidents have not affected the integrity of the Institute's academic program."

All that I just read was a precise quote from the Secretary's letter.

Mr. President, I am bound to ask has any Senator ever heard of such nonsense?

Here we have a case where the Secretary, Mr. Maynes, admits that "the bulk of the students appear to be members or supporters of SWAPO." Then he goes on to speak of what he calls "incidents"—and I hope the reporter will put quotation marks around the word "incidents"—where the climate of repression became so great the the minority organization, SWANU, had to leave the Institute. Can any Senator in his right mind vote to send a half million dollars to an outfit like that? Five hundred thousand dollars of the American taxpayers' money.

We are going to see momentarily. But what kind of double talk is this about "academic freedom" from the Secretary?

Mr. President, I believe the facts of the matter are somewhat different. Let us nail down one thing forever more: SWAPO is a terrorist organization which murders innocet people, destroys property, and all the rest of it. SWAPO has chosen to declare war against the black people of Namibia. It has even declared war against those who even dissent within the SWAPO movement. Oh, that is great academic freedom; $500,000 of the taxpayers' money to support an outfit like that. How absurd can we get?

The head of SWAPO, Sam Nujoma, had the dissenters arrested and imprisoned in Zambia. Oh, what a great fellow. By all means we ought to send him $500,000 of the taxpayers' money.

Mr. President, Senators had better not take a poll among the American people on this question.

He had the dissenters arrested and thrown in jail, and when a writ of habeas corpus was brought on behalf of these prisoners—you know, the ones who disagreed with the terrorists—this man, Sam Nujoma, had them spirited across the border to Tanzania, where the Tanzanian Marxist dictator, Jules Nyerere, has no compunction about legal niceties. He is not troubled about academic freedom and liberty. Oh, no. About 2,000 SWAPO dissenters have disappeared into Nyerere's jails and have never been seen again.

I will amend that. About 150 were released last year. That leaves 1,850 people who are either dead or locked in some dark prison cell because they committed the heinous crime of dissenting within SWAPO, the terrorist outfit.

Among those 150 were Andreas Chipanga, one of the original founders of SWAPO, and Dr. Kenneth Abrahams, a distinguished medical doctor with an international reputation. You see, they had committed the unpardonable sin of establishing a new political party, the SWAPO-Democrats, a party which rejects the terrorist tactics of Nujoma. Politically, they would be similar to the British Labor Party or the German Social Democrats.

Similarly, SWANU has joined a group called the Namibia National Front, a coalition of parties with a leftist orientation. Although SWAPO, SWAPO-D, and SWANU reject ethnic concepts of politics, the truth is that their base of support is tribal, coming mainly from the Ovambo and Herero tribes. None of them has any authentic claim to represent a majority even of their dominant tribes, much less Namibia as a whole.

The majority party is the Democratic Turnhalle Association, a multiracial democratic movement that recognizes the ethnic reality of the 11 ethnic groups in Namibia. In the elections held last December, DTA won not only a majority of the votes cast, but an absolute majority of both registered and prospective voters.

Mr. President, the Senator from North Carolina has been in direct contact recently with all of the democratic parties—that is with a little "d"—in Namibia, and I can attest to the fact that there is a healthy political spectrum operating there. I do not support the political views and aims of all these parties, but I do support their right to exist and to go before the electorate in free and fair elections.

However, the United Nations does not support their right to exist. The United Nations recognizes only the terrorist organization, SWAPO, as the sole and authentic representative of the Namibian people. Moreover, it provides extensive political patronage to SWAPO, not only through the Namibia Institute, but through millions of dollars in assessed and voluntary contributions.

So here the U.N. is setting itself up to be the impartial judge of elections in Namibia, but the U.N. itself is heavily financing one party, SWAPO—the one party that is determined to seize power through the barrel of the gun, rather than through the ballot box.

So the bottom line of this amendment, Mr. President, should be very clear: This hypocrisy has got to stop. We cannot pretend that financing so-called "educational and academic" programs such as the Institute of Namibia has nothing to do with the war against freedom being carried on by SWAPO. Of course, it has everything to do with it. The people of this country, the citizens and taxpayers of the United States, must not be required to fund this terrorist Institute. But unless this pending amendment is adopted, that is precisely what is going to happen.

Mr. President, I ask unanimous consent that the article from American Relations entitled "How the United Nations Finances Terrorists" be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 2.)

Mr. HELMS. I thank the Chair, and I yield the floor.

"EXHIBIT 1

DEPARTMENT OF STATE,
Washington, D.C.

Hon. JESSE HELMS,
U.S. Senate.

DEAR SENATOR HELMS: Thank you for your letter of March 23, regarding SWAPO's relationship to the United Nations. We have requested information from our Mission to the UN and several foreign posts to respond to some of your questions, but I wanted to provide you now with the information available in the Department.

I would like to begin by noting that from 1946 on the Namibian problem has been uniquely internationalized because, alone among countries handling a League of Nations mandated territory, South Africa refused to transfer the Mandate to the UN. This set South Africa on a collision course with the UN which has affected international treatment of the issue ever since.

Regarding the treatment of political parties inside Namibia, the Security Council and the General Assembly have followed different courses. The Security Council has recognized no Namibian party as superior to any other. Through its approval of the Western settlement Proposal and its authorization of the formation of UNTAG by the Secretary General, the Council has clearly taken a stand in favor of the solution advocated by the Contact Group and originally agreed to by all parties to the settlement, including

South Africa. The operations of the United Nations Transition Assistance Group (UNTAG) in Namibia will take place under the overall authority of the Security Council. The whole purpose on the proposed transition is to prepare for and conduct elections under United Nations supervision and control in which all Namibian political parties can take part on an equal basis. In this context, it is clear that SWAPO will have a position no more nor no less favorable than any other political party. Moreover, the record of the United Nations for impartiality in peacekeeping situations, such as in the Middle East and Cyprus, is very good indeed. There is every reason to believe that UNTAG will acquit itself in a similarly unbiased fashion.

"Regarding the decision of the UN General Assembly to endorse SWAPO as the "sole and authentic representative of the Namibian people", many African states felt that early international recognition of one of the parties in Angola might have helped to prevent the civil war in that country. It was against this history that they decided to accord some recognition to SWAPO. Other members, agreeing that South Africa's continuing control of Namibia was illegal, accepted the African position. The Assembly arrived at this decision in 1973, well before the April 1977 beginning of the Western Five Power initiative on Namibia.

"Although the U.S. has not accepted that SWAPO is the 'sole and legitimate representative of the Namibian people,' the U.S. does regard the South African occupation in Namibia as illegal and has since 1966 when the UN General Assembly, in Resolution 2145 of October 28, revoked the mandate which had been granted to South Africa by the League of Nations on grounds that South Africa was taking no action to bring the territory toward independence, that it had extended apartheid to Namibia, and that it had refused to recognize that the authority of the League of Nations for mandated territories had passed to the United Nations. The United States supported and voted in favor of that resolution in 1966. We also supported Security Council Resolution 264 of March 20, 1969, which recognized the UNGA action as well as the advisory opinion of the International Court of Justice which, in 1971, upheld the GA resolution by ruling that the South African occupation of Namibia was in fact illegal.

"The following information is in response to the specific questions contained in your letter.

"1. TRAVEL COSTS FOR SWAPO MEMBERS

"We have had difficulties in identifying the exact travel cost for each individual but it appears that your figures for the travel expenses involved in paragraphs A–C of your letter were reached by taking the estimated total travel expense for all delegates, and dividing that figure by the number of delegates to attend. If that is the case, then I suggest that the figures involved may not be precisely accurate inasmuch as the travel expenses for any given representative may have been somewhat greater or smaller than those of another depending upon the distance traveled. Moreover, in at least some of these instances the proposed number of delegates did not attend the conferences in question, not all of the travel money was used, and some of it was returned to the original funding source.

"Under UN regulations, the organization pays the travel costs to key meetings of a limited number of delegates from each country, including the U.S. Although the exact amounts may not be correct, nevertheless the premise of the questions A, B, and C is accurate, i.e., that the United Nations does pay the travel expenses incurred by representatives of SWAPO to attend various international conferences taking place generally within the UN system. Because UN members consider South African occupation of Namibia, illegal, it is argued that it cannot represent the interests of Namibia at international meetings; consequently, provisions for SWAPO to attend have been made. The United States voted against the UNGA resolution calling for UN funding for this purpose. However, the resolution was adopted, I should note that these and other expenses which you mentioned were provided by Dr. Martti Ahtisaari, in his capacity as Commissioner for Namibia, and were taken from UN 1977 assessed budget funds.

"2. UN COMMISSIONER FOR NAMIBIA

"The activities of the UN Commissioner for Namibia are funded through the regular assessed budget of the United Nations. The Commissioner has offices located in New York, Lusaka, Zambia and Gaborne, Botswana. The distribution of the staff and resources in 1979 according to information provided by the UN is as follows:

	Established posts	Temporary posts	Resources (thousands)
New York	1 ASG	1 P–5	$514.0
	1 D–1	1 P–4	
	2 P–5	1 P–3	
	4 P–2/1	1 G–5	
	1 G–5	2 G–4	
	4 G–4		
Lusaka	1 D–1	2 P–3	345.2
	1 P–2	3 G–5	
	6 LL		
Gaborone	1 P–4		113.8
	1 P–3		
	1 G–4		
	2 LL		

"The employees in the Commissioner's office are international civil servants, and no record is kept whether they are members or supporters of SWAPO since the UN does not request information on political affiliations.

"3. THE UN COUNCIL FOR NAMIBIA

"The Council for Namibia is funded through the regular assessed budget of the United Nations. The Council for Namibia was created in 1967 by the General Assembly, once the South African mandate was revoked, to be the legal administrator of the territory until it attained independence. The U.S., and the Security Council, have never recognized this role for the Council.

"Resolution 33/182 authorized the expansion of the Council from 25 to 31 members. The present membership is composed of the following:

"Algeria, Angola, Australia, Bangladesh, Belgium, Botswana, Bulgaria, Burundi, Chile, China, Colombia, Cyprus, Egypt, Finland, Guyana, Haiti, India, Indonesia, Liberia, Mexico, Nigeria, Pakistan, Poland, Romania, Senegal, Turkey, USSR, United Republic of Cameroon, Yugoslavia, Venezuela, and Zambia.

"The Council meets in New York as required. During 1977 it was allocated 156 meetings on the basis of three meetings per week; however, actually only 86 meetings were held (including its standing committees and informal meetings). During 1978 the Council held a total of 97 meetings, 21 of which were Plenary Sessions and the balance were standing committees and informal meetings. The representative of SWAPO participates in the work of the Council as an observer.

"4. THE UN FUND FOR NAMIBIA

"The General Assembly established the UN for Namibia in 1971 to provide general development assistance to Namibia. In 1973 the Council for Namibia was named trustee of the Fund. The principal source of funding for the UN Fund for Namibia is voluntary contributions made by UN member states and from UNDP, although during 1979 some $500,000 of the Fund's budget will come from the regular UN assessed budget, in accordance with UNGA Resolution 32/9. The actual amounts contributed by member states vary from year to year. An enclosed table provides a breakdown of contributions made by member states in 1978, as well as amounts pledged in 1979. The United States does not contribute to the Fund.

"5. THE INSTITUTE FOR NAMIBIA

"A. Funding

"The principal source of funding for the Institute for Namibia is voluntary contributions from UN member states. However, as the Institute received $100,000 from the Fund for Namibia in 1977, a case could be made that some of the money given by the Fund to the Institute could be derived from the $500,000 provided to the UN Fund for Namibia from the assessed budget. Contributions from member states vary from year to year. Member states' contributions during 1973 amounted to $1,740,500; unpaid pledges, as of 31 December 1978, $57,900. In addition, in 1978 $15,000 was contributed by the UNHCR, $15,000 by UNESCO, and $42,000 was provided from public donations. An enclosed table provides a breakdown of contributions made in 1976 and 1977 as well as amounts pledged in 1979, in accordance with UNGA Resolution 33/182C.

"The second primary source of funding for the Institute is the United Nations Development Program, which has reserved $3.75 million from the Second Cycle (1977–1981) Indicative Planning Figure for Namibia for support of the Institute. Annual UNDP contributions accordingly average in the neighborhood of $800,000.

"B. Origins and political preferences of institute students

"All of the Institute's students are Namibians. The bulk of them appear to be members or supporters of SWAPO. However, some of the students are also supporters of another Namibian liberation movement, SWANU, and some profess no political preference whatever. Professional staff members are listed on an enclosed table and are citizens of a variety of countries.

"Acting on behalf of the President, and after a careful review by our Embassy in Lusaka, Secretary Vance determined on February 6, 1979, that no fiscal year 1979 funds for the UN Institute for Namibia will be used to support the military or para-military activities of SWAPO. Although it is clear that there are some members of the faculty at the Institute who favor SWAPO and have expressed their preferences, these expressions, as well as those by groups who favor other political parties, have occurred within a climate of academic freedom that permits to keep silent. There have been incidents between supporters of SWAPO and SWANU at the Institute. As a result of one incident a group of SWANU supporers left the Institute. However, our Embassy in Lusaka, which maintains frequent contacts with the Institute, believes that these incidents have not affected the integrity of the Institute's academic program. It also seems clear that the degree of partisan support for SWAPO within the student body is subordinate to the basic Institute climate of academic freedom. The support of the United States, and the United Nations for the Institute is predicated on the maintenance of this academic freedom.

"6. ADDITIONAL FUNDING FOR THE COMMISSIONER FOR NAMIBIA, THE COUNCIL FOR NAMIBIA, THE FUND FOR NAMIBIA, THE INSTITUTE FOR NAMIBIA, AND UN SYSTEM PROJECTS WHICH MIGHT BENEFIT SWAPO MEMBERS

"The UN is unable to provide information concerning the source from which Agency contributions to the Institute are made because this information is not requested when a contribution is received. However, except

as noted above. I am unaware of any funding provided to the Commissioner for Namibia, the Council for Namibia, the Fund for Namibia or the Institute for Namibia by any of the UN specialized agencies which you mentioned, UNDP or ECOSOC. However, UNDP and UN specialized agencies are involved in a number of humanitarian projects which benefit refugees throughout southern Africa. Frequently the refugees reside in camps, the administration of which is shared by a national liberation movement and the officials of the countries in which the camps are located. Moreover some of the refugees who reside in the camps and who benefit from the projects may be members or supporters of a particular liberation movement. A partial response to your questions in this area includes the following:

"UNESCO.—Two educational projects supported by UNDP which could benefit SWAPO members and which, taken together, total $356,500. One of these provides teachers' salaries and equipment at the Namibia Health and Education Center in Zambia; the other provides similar assistance at SWAPO's school for Namibian children in Angola.

"FAO—To my knowledge FAO does not provide funds for projects. However, it does provide food assistance to some Namibian refugees, some of whom may be members or supporters of SWAPO.

"UNICEP.—Provides no funding to the listed organizations but it does provide assistance to refugees from Namibia, some of whom may be SWAPO members or supporters.

"ITU.—One UNDP funded project which sends 35 fellows selected by SWAPO to the Postal and Telecommunications Training College at Ndola, Zambia at a cost of $344,400 for a three-year period.

"IAEA and WMO.—Neither of these specialized agencies provide funds to any of the four named Namibian organizations and I am unaware of any contributions which they might have made to projects which could benefit SWAPO.

"ILO.—The US is no longer a member of ILO, and the Department has no information regarding its expenditures. However, ILO Geneva has informed us that ILO regular budget funds have been used for manpower planning in cooperation with the Institute for Namibia. In addition, the ILO will be an executing agency for the Nationhood Program for Namibia and will engage in programs financed by the UNDP and the UN Fund for Namibia. In these activities, the ILO will be working with the UN Commissioner for Namibia and the Institute for Namibia. However, the ILO has not worked with or funded the activities of the UN Council for Namibia.

"WHO.—Namibia, represented by the Council for Namibia, is an associate member of the World Health Organization. The 28th UN General Assembly, in Resolution 3111, requested UN specialized agencies to take steps to enable the UN Council for Namibia to participate fully in the work of these agencies. In pursuit of that resolution, the World Health Assembly, in May 1974, admitted Namibia as an associate member and invited the UN Council for Namibia to designate a representative to participate in the work of the WHO. WHO has an office located in Lesotho which devotes its attention to Namibia. In 1978 the WHO program in Lesotho consisted of support for the representative in Lesotho, consultants in health services, and fellowships for health manpower development. WHO funds earmarked for Namibia in 1978 totaled $25,500, and $24,300 has been allocated for 1979.

"7. REDUCTIONS

"Regarding your inquiry about the allocation of reductions in the amount of $619.2 of the Secretary General's estimates $2,604.9 for Namibia under Section 3 of the budget (A/33/445/Add. 4), the attached Table sets forth in detail for each item the amounts allotted by the UN for 1979 and reflect savings available from the 1978 appropriation and the reduction made by the Fifth Committee. The resultant amount appropriated for 1979 is also shown.

"As I noted above, I will provide a final followup response to your request as soon as the remainder of the information which you need becomes available.

"Sincerely,

"CHARLES WILLIAM MAYNES,
"Assistant Secretary for International Organization Affairs."

EXHIBIT 2

HOW THE UNITED NATIONS FINANCES TERRORISTS

The Charter of the United Nations states that the first priority of the international organizaion is "to maintain international peace and security." Yet, in the name of peace, the United Nations in recent years has become a major source of support and legitimacy to ten revolutionary organizations which have depended upon terror as a primary weapon of influence and power.

A case in point is the assistance given to SWAPO, the "South West African Peoples Organization." SWAPO is the organization which has figured prominently in the highly touted Namibia settlement, popularly attributed to the leadership of U.S. Ambassador to the UN, Andrew Young, and his chief assistant, Ambassador Donald F. McHenry. At the end of July, SWAPO finally accepted proposals offered by South Africa and a five-nation UN Security Council committee for a settlement based upon elections watched by UN observers.

SWAPO's ability to hold out against the settlement was based on the twin foundations of diplomatic and financial assistance from the UN and military aid and terrorist training from the Soviet Union. Its trump card was its willingness to use murder and arson against the black peoples of South West Africa to blackmail the West. Terror was the weapon that finally pried from the United States the concession to support

turning over the highly strategic deep water port of Walvis Bay to the future Namibia—in other words, to SWAPO and its Soviet ally.

Now that elections are in prospect, the question of aid to SWAPO ought to be reexamined. SWAPO never had a mandate from the black peoples of South West Africa, much less from the total population. SWAPO leaders constantly emphasize that they believe in control, not in majority rule based on democratic principles. Nor is there any evidence that SWAPO's vision of a Marxist-Leninist society is what the people of South West Africa want. In fact, the evidence is just the opposite, for SWAPO itself has become badly split. UN aid to SWAPO places the United States in the position of throwing its support to one side in a dispute—not only giving the leadership cabal of SWAPO an unfair advantage over the SWAPO dissidents, but over the democratically oriented political parties as well.

SWAPO's political base is rooted only in the Ovambo peoples—about 46 percent of the residents of South West Africa. And even SWAPO's control over the Ovambo is not based on shared ideals or free consent; it is based upon systematic terror raids upon the innocent. The prospect of free elections gives the Ovambo an opportunity to escape from SWAPO's power. Perhaps that is why SWAPO has chosen to step up the terror in recent weeks, bringing into doubt its good faith in accepting the proposed settlement.

SWAPO'S SOVIET AND CUBAN SUPPORT

Under the leadership of San Nujoma, SWAPO has moved closer and closer to the Soviet bloc, almost in direct proportion to the strength of his support from the UN. Nujoma visited Moscow in August 1976, where he received promises of more sophisticated weapons for SWAPO. In October of that year, he went to Cuba as the guest of the Cuban Communist Party's Central Committee, where he had talks with Fidel Castro and Ernesto Viega, head of Cuba's trade union movement, who gave him promises of Cuba's "unshakeable support."

The Soviet commitment was renewed during Nujoma's meeting with the Soviet ex-president Podgorny in Lusaka on March 29, 1977. In July 1977, large Soviet transports, similar to Boeing 707's unloaded large quantites of military equipment in Luanda, including ground to-air missiles and ground-to-ground missiles. Some of the ground-to-air-missiles found their way to the SWAPO base in Cassinga in the south of Angola.

To what extent such supplies have been transferred to SWAPO is not known; but in a speech the year previously to the UN Security Council, South African Ambassador R. F. "Pik" Botha (now Foreign Minister) reported that the Soviet weapons delivered to Angola included:

. . . multiple-barrel 122–MM rocket launchers; 122–MM rocket launchers; 122–MM field guns; 100–MM motars; 82 MM recoilless guns; 75–MM recoilless guns; RPG–7 anti-tank rocket launchers; Sagger anti-tank missiles; T34 tanks; mobile bridging equipment; BTR–52 infantry fighting vehicles; MIG–21 aircraft; MIG–17 aircraft; Flat D–91 aircraft; Alouette III with air-to-ground missiles; Harvard T–6's; SAM–7 ground-to-air missiles 14.5 ZPU anti-aircraft, and so on.

These were the weapons, backed up by Cuban mercenaries, that Agostinho Neto used to seize Angola in the struggle against black guerrilla groups led by Holden Roberto and Jonas Savimbi. Such was the potential threat flashed by Nujoma in the face of the American negotiators.

In December 1977, Nujoma went to East Germany and met with the East German Communist Party chief Erich Honecker and Politburo member Hermann Axen, with whom Nujoma signed a written compact of cooperation for 1978 and 1979.

As early as 1965, various groups of SWAPO agents had been trained in guerrilla warfare in Moscow, China, Algeria, Korea, Egypt, Ghana and Tanzania. Using these skills principally against the Ovambo, they gained an ascendancy over that population group, but picked up very little support among other black African peoples in South West Africa. Instead, many of these joined in with the South African-sponsored Democratic Turnhalle Alliance, a multiracial group dedicated to democratic principles. Among the most prominent among the Turnhalle leaders was the distinguished moderate, Chief Clemens Kapuuo, leader of the Hereo people.

ASSASSINATION OF KAPUUO

The main threat to SWAPO came from the democratic forces of the Turnhalle Alliance, just as the main threat to the Patriotic Front in Rhodesia came from Bishop Abel Muzorewa and the democratic black leaders. The campaign of terror against the common people was stepped up (see insert accompanying this issue), but a specific decision was made to assassinate moderate black leaders.

On February 7, 1978, two SWAPO agents burst into a political meeting at Okahao with submachine guns with the intent to murder Kapuuo. Kapuuo escaped, but another leader, Toivo Shiygaya, and his body guard were killed. Other fire aimed toward the unarmed crowd wounded a young boy. The SWAPO murders escaped in the confusion.

Meanwhile, Nujoma, in a television interview, was saying:

"We are not fighting for a reform in the colonial system. We are fighting to liquidate the entire colonial system and to achieve genuine liberation.

". . . The question of black majority rule is out—we are not fighting even for majority rule. We are fighting to seize power in Namibia for the benefit of the Namibian people. We are revolutionaries. You can talk to Kapuuo. Kerina and all those reactionaries about majority rule and not to SWAPO."

But there was to be little opportunity to talk to Kapuuo about anything, because Kapuuo lay dead in Windilock from bullets fired by two SWAPO assassins on March 27.

THE CASSINGA STRIKE

On May 4, South African security forces, in a surgical strike, attacked a SWAPO base as Cassinga, in southern Angola. SWAPO apologists immediately assailed the attack as an assault on a "refugee" camp. On May 5, the UN General Assembly passed a resolution severely condemning South Africa for its attack, and expressing full and unqualified support for the continuation of the "armed liberation . . . of the Namibian people under the leadership of SWAPO."

"Armed liberation" was a much more honest description of the Cassinga base than "refugee" camp. The only refugees in the camp were some 100 children who had been abducted by SWAPO at gunpoint from a mission school in South West Africa. The South African Security forces found formidable defense works, such as trenches, bunkers and underground shelters. Large quantities of Soviet and Eastern bloc weapons were found and destroyed, and men—and women—in uniform were captured in the trenches.

Also captured in Cassinga were motion pictures of training exercises of SWAPO troops in uniform on the parade grounds. Journalists who saw the films later identified various landmarks in the films that were evident in aerial photographs taken before the battle.

More to the point, captured documents indicated that SWAPO's code name for the base was MOSCOW. And further, documents showed that an agreement existed for the military and political training of 70 SWAPO members in the real Moscow—of whom 20 were already there.

THE IMPORTANCE OF WALVIS BAY

The strong Soviet and Marxist orientation of SWAPO makes more significant the maneuvering of the UN over the fate of Walvis Bay, the only developed deepwater port between Capetown and Luanda. The UN also condemned South Africa for "its decision to annex Walvis Bay"—an event that occurred over 100 years ago. Although South Africa has never claimed to have sovereignty over South West Africa (a territory originally held in mandate from the League of Nations), Walvis Bay has always been treated as sovereign territory. Whatever the future of South West Africa, South Africa cannot afford the strategic danger of a Soviet base in Walvis Bay. Nor could Western Europe remain easy at the prospect of a Soviet naval base bisecting the oil life-line from the Persian Gulf.

Walvis Bay was the trump card ostensibly played by Ambassador McHenry in winning Sam Nujoma's acceptance of the five-nation proposals for Namibia, proposals already accepted by South Africa. South Africa, however, had not agreed to include Walvis Bay in the settlement; the only agreement was to negotiate about the future of Walvis Bay with the new, democratically elected government of Namibia. However, the United States went around South Africa and agreed to a separate resolution on Walvis Bay that was not part of the settlement, but implied U.S. support for handing it over to SWAPO.

In July the UN accepted the settlement, and the UN Secretary General sent a delegation to South West Africa to prepare for voter registration and for elections. But at the same time, SWAPO stepped up its terrorism with more raids and killings (see insert), a move which casts doubt upon the sincerity of Nujoma's acceptance of the free electoral process.

Within SWAPO, Nujoma himself is under fire. His relations with Agostinho Neto, the head of the Cuban-backed Angola regime, have cooled since Neto was sobered by the South African strike on Cassinga. He has been strongly attacked by his rivals for his penchant for silk shirts and lavish hotel suites. More important is the imminent return of Andreas Chipanga, who is organizing what he calls SWAPO–D: SWAPO–Democratic.

Chipanga is bringing with him 11 former officers of SWAPO who had been locked up first in Zambia and then in Tanzania for criticizing Nujoma's high living and alleged Swiss bank accounts. When a writ of habeas corpus was brought in Zambia for their release from prison, Zambian authorities whisked them across the border to Tanzania where habeas corpus has been abolished by the "African socialism" of Julius Nyerere. Eventually even Nyerere was forced by African pressures to release Chipanga and his friends. They have been waiting in London for details of the electoral procedures to be established.

Aside from a commitment to democracy—and that is a highly significant difference—it is not clear how the principles of SWAPO–D differ from SWAPO. In addition, there is another political group, the Namibia National Front, that is to the left of the moderate Democratic Turnhalle Alliance. There is hope, therefore, that the citizens of the new Namibia will have a chance to make a democratic choice in the proposed elections. Yet the unyielding support of the United Nations for one and only one black political group out of a number of black political groups casts into doubt even the UN's commitment to democracy.

For the UN to single out one group as the "official" liberation group, which is to be the sole recipient of UN funding, assistance and political support is to take sides unjustly in an affair which ought to be the internal business of Namibians. But it is even more unthinkable that the UN would put the

money collected from member nations behind a group that advocates and practices terrorism—a group that continues to step up terrorism even after a democratic settlement has been agreed to by all parties.

The role of the United States in giving diplomatic support to SWAPO, in the face of SWAPO's overwhelming pro-Soviet, anti-Western, Marxist-oriented bias is almost to guarantee that a regime hostile to the United States and to the West will be given power. If SWAPO were the only alternative, a case might be made for working with SWAPO to gain influence. But the evidence is that there are many alternatives, some black, some multi-racial, most of them democratic. Neither the United States nor the United Nations should take sides in a manner to foreclose a truly democratic, multi-party, multi-racial society in Namabia. Yet the record shows that both the U.S. and the UN have been taking sides. They have used the agencies of the UN to funnel huge amounts of cash and services to assist in the development of a society that is more amenable to Soviet interests than to the interests of the West.

HOW UN ASSISTANCES FUNNELED TO SWAPO

The very complexity of the UN and its allied agencies makes it difficult to trace total funding to terrorist organizations such as SWAPO. The United Nations itself is financed both through assessed and through voluntary contributions from member nations. Some of the specialized agencies are similarly financed through assessed and voluntary contributions, while others are financed purely through voluntary contributions. To make matters more difficult to untangle, some voluntary organizations simply channel funds through the administrative staff of another UN agency with special expertise for the execution of the project—a staff that could be supported by assessed funds.

The significance of the distinction between assessed and voluntary contributions is that the United States is assessed, just like a tax, for a sum equivalent to 25 percent of the assessed budget. But depite the whopping chunk of the tab which the United States pays, its influence in deciding the priorities of UN spending is minimal, since the Third World has the votes to override any objections. Although other nations, such as the Soviet Union, refuse to pay or underpay some of their assessments, the United States has seldom done anything but hand over a blank check.

As for voluntary contributions, the U.S. generally chooses to pay about 25 percent of the budgets established for most of the specialized agencies, although in some cases the proportion is much lower. In a few cases, such as after the withdrawal of the U.S. delegation from the Communist-dominated International Labor Organization (ILO), the United States pays nothing.

The official policy of the United States is that all so-called development funds for humanitarian purposes should come from voluntary contributions (development funds are the main source of contributions to terrorist groups). Yet, more and more, the UN bureaucracy has been increasing the amount and scope of development funds included in the assessed contributions, over which the United States has very little control. When this money is diverted to terrorist groups, the U.S. is thus in the position of supporting terrorism willy nilly.

Nevertheless, the United States still contributes freely to development funds in the voluntary budget, even though the U.S. knows that the priorities include terrorism.

Even when the funds do not come from the United States directly, the projects are often planned and operated by administrative personnel who are paid from the assessed funds, into which the U.S. has paid 25 percent.

THE REGULAR UN BUDGET

The regular (assessed) UN budget is a major source of funding for SWAPO. Three special agencies are under direct control of the main UN body:

(a) The UN Commissioner for Namibia
(b) The UN Council for Namibia
(c) The UN Fund for Namibia, which in turn funds The Namibia Institute

The UN Commissioner for Namibia is the UN's government-in-exile for Namibia. It has three offices in New York, in Lusaka, and in Botswana. The office in New York is the largest, with a budget of $1,129,200. The office in Lusaka, which is located, coincidentally, in the same city as the office of the Soviet Ambassador to Zambia, V. G. Solodovnikov, former director of the Soviet Africa Institute, and widely regarded as the director of Soviet field operations in Africa. It has a budget of $331,400. The office in Botswana has a budget of $261,900. Thus the total budget for the UN Commissioner for Namibia for 1978–79 is $1,722,500. These funds come directly from the assessed budget of the United Nations, of which the United States pays 25 percent.

The UN Council for Namibia has been considered by the UN as the administering authority for Namibia since 1967, although the Council's attempt to enter Namibia in 1968 was a failure. The Council has 25 member nations, and holds plenary sessions in Lusaka, the most recent being in March. The 1978–79 budget is $1,581,700. The Council recognizes SWAPO as "the sole and authentic representative of the Namibian people," and pays $182,200 for SWAPO's office in New York City. All of these funds come directly from the assessed budget of the United Nations, of which the United States pays 25 percent.

The UN Fund for Namibia is a trust fund account established in 1971, which has received $950,000 from the assessed UN budget, and $1,303,874 from voluntary contributions. In 1974, the UN General Assembly approved the formation of the Institute for Namibia, which opened its doors in Lusaka in August, 1976. The most recent available information shows that the Fund for Namibia, had given $846,549 to the Institute by March, 1977. However, the UN Development Fund, which will be discussed in detail below, has also given $3,750,000 to the Institute from voluntary contributions. The Institute has a Senate of 11 members appointed for five-year terms.

The Commissioner, the Council, and the Institute are closely interrelated and consult with SWAPO at every step. In 1976, all the members of the Council, as well as the Commissioner, participated in the International Conference in Support of the Peoples of Zimbabwe and Namibia, held in Maputo, Mozambique, from May 16 to May 21. Prior to the Lusaka meeting this year, three consultation missions were sent by the Council, one going to Gabon, Algeria and Nigeria, one to Mozambique and Tanzania, and the third to Angola, Botswana and Zambia. Each mission was composed of five members of the Council and a representative of SWAPO.

Still further aid is provided by the UN High Commissioner for Refugees, which in 1977 provided $45,500 from voluntary contributions for aid to Namibian refugees. The High Commissioner for Refugees in addition, using funds provided by the Institute for Namibia, established a health clinic in Botswana for Namibian refugees, at a cost of $40,000. There is no way to determine whether such assistance went to bona fide refugee civilians, or whether it went to the military camps of the SWAPO terrorists.

UNICEF AND THE UNDP

Much assistance is also provided through agencies associated with the UN Economic and Social Council and through the independent agencies.

UNICEF, for example, whose special mission is concerned with children, provided funding of $455,900 to the World Health Organization (WHO) to establish a health institute for Namibian refuges in Tanzania. These funds came from voluntary contributions.

But by far the most ambitious program of assistance to SWAPO is arranged through the Economic and Social Council's United Nations Development Program (UNDP). The UNDP is supposed to be the UN's major arm for channeling development funds to underdeveloped nations. But the UNDP has interpreted that mandate to include assistance to the so-called liberation movements, including SWAPO.

Typically, UNDP projects consist not of cash transfers, but of the funding of special projects to provide specific assistance, thus putting supplies, facilities, and expertise at the disposal of the terrorist groups. The UNDP provided aid to projects benefiting SWAPO in 1976–77 amounting to at least $7,297,042, all of it coming from voluntary contributions. Within the UNDP there is a special account, called the Colonial People's Trust Fund, whereby contributor nations can earmark contributions for specific projects.

Among the UNDP projects included in the above amount are some which the UNDP funded directly, and some which were funded using the specialized UN agencies as the executing entity. Among those funded directly was the $3,750,000 grant previously listed for the Institute for Namibia. The UNDP also provided $120,000 for an emergency airlift of foodstuffs to Namibian refugees in Angola, with the food itself provided by the World Food Program. No one knows how much went to "refugee" camps such as the military base in Cassinga. The UNDP also provided $31,500 to SWAPO for "education and training in the field of public information."

By funding projects indirectly, the UNDP takes advantage of the special expertise of the specialized agencies. For example, through the World Health Organization, UNDP has provided:

$198,000 for the Namibian Health and Education Center in Zambia.

$23,382 for a second grant to the above.

$739,000 for the Tanzania Health Center.

$52,000 for the Namibian Health and Education Center in Angola.

An undetermined amount for SWAPO members included in general health assistance to all southern African liberation movements.

Through UNESCO, UNDP has provided $151,500 in general educational assistance to SWAPO, and $205,000 for educational assistance to SWAPO in Angola.

Through the International Labor Organization (ILO), the UNDP has provided $1,570,838 for 200 SWAPO and Patriotic Front (Rhodesia) trainees in Botswana, Zambia and Tanzania for a two-year project. Some of the trainees will receive further training at the ILO Training Center in Turin, Italy.

Through the International Telecommunication Union (ITU), the UNDP has provided $344,400 for training in radio, postal and telecommunications skills. Such skills, of course, have both a civilian and military application.

Through the Food and Agriculture Organization (FAO), the UNDP has provided $58,208 for the SWAPO farm in Zambia, $29,382 for the SWAPO farm in Angola, and $23,832 for "assistance in agriculture" to SWAPO. It is not clear whether these farms are for training in agricultural skills, or for providing food for the military bases in Angola and Zambia.

In addition to the UNDP funding, some of the above agencies provide benefits to SWAPO with funds from other sources. For example, the FAO has provided $1,025,000 in foodstuffs for refugees in Angola from volun-

tary contributions of its own. In addition, the World Food Program, closely allied with FAO, has provided an undetermined amount of food assistance to the Institute for Namibia.

Furthermore UNESCO has budgeted $4.426 million in 1979–80 for assistance to all the African liberation movements, including SWAPO. The proportion of assistance to SWAPO cannot be determined. This money will be used for the education of refugees and candidates sponsored by liberation organizations, for certain specialized training of qualified personnel, and for training in "respect for cultural identity." In addition to the $4.426 million from UNESCO's own budget, UNDP is planning to give UNESCO an additional $3.087 million—3 percent of its budget—for these purposes.

SUMMARY OF AID TO SWAPO

Because of the peculiarity of UN finances and the proliferation of quasi-independent UN agencies and mutual interfunding of the same projects, it is difficult to arrive at a specific total for aid to SWAPO. Although the data in this article is taken only from official UN and Congressional sources, it is far from complete, and comes from different time frames. For example, we have only been able to trace $950,000 in assistance taken from assessed budgets between 1971 and 1977. But for the proposed biennium 1978–79, the UN plans to spend $3,304,200 from assessed funds just for the Commissioner of Namibia and the Council for Namibia. It must be assumed that similar, although perhaps lesser, amounts were spent on these offices in the past.

As for funds from voluntary contributions, the amounts for projects mentioned in this article total $8,686,416 in the past. But it should be noted that UNESCO alone, just one agency, plans to spend $7,513,000 in the 1978–79 biennium. We have been unable to assemble total projections of spending for SWAPO for the biennium.

UN AID TO OTHER TERRORISTS

Although this analysis has concentrated upon aid to SWAPO, that group is not the only terrorist organization which has received funding, project assistance, diplomatic support and international legitimacy. At least nine other such groups have received regular support, although in some cases the groups finally seized power, and funding was shifted to normal development assistance.

Not surprisingly, the ten are all so-called "liberation" groups whose prime purpose is to overthrow Western-oriented administrations in certain territories and install "neutral" dictatorships of one kind or another—almost always overtly Marxist. The same groups almost always receive weapons, training and operational financing from Soviet, Chinese or Eastern bloc countries.

Given the power blocs that make up the United Nations, it is not surprising that the United Nations cloaks these essentially anti-Western operations with respectability. Nor is it surprising that the shibboleth of anti-racism is used as a convenient cover for what is actually a strategic move to deny strategic materials and geo-political locations to the support of the West. What is surprising is that money provided by the United States and Western European nations makes up the bulk of the financing provided by the UN to the terrorists.

THE APPROVED LIBERATION GROUPS

Only liberation groups which have received the stamp of approval from the Organization of African Unity (OAU) and the UN seem to be eligible for UN funding. The ten groups have included:

The Palestine Liberation Front.

The Patriotic Front (ZANU and ZAPU in Rhodesia).

The African National Congress to Azania (ANC-South Africa).

The Pan African Congress to Azania (PAC-South Africa).

Movimento Popular de Libertacao de Angola (MPLA).

Movement for the Liberation of Djiboute (MDL).

Front for the Liberation of the Coast of Somalia (FLCS).

Mouvement de Liberation National des Iles Comores (MOL).

Front National pour la Liberation de l'Angola.

And, of course, SWAPO.

What all of these groups have in common, besides a Marxist outlook in economics and political control, is a rabid anti-Western attitude. The UN refuses to support non-Marxist movements, such as Jonas Savimbi's UNITA in Angola, or Bishop Abel Muzorewa's UANC in Rhodesia. They are not considered to be "National Liberation Movements (NLMs).

DEFINITION OF "TERRORIST"

Although the favored groups are officially considered NLMs by the UN, all of them more correctly ought to be termed terrorist groups. Some of their defenders seek to maintain that one man's freedom fighter is another man's terrorist but the word "terrorist" is used here advisedly to denote groups which, as a matter of tactics, conduct murder raids against defenseless civilians, plant explosives in non-military targets designed to injure civilians at random, and abduct or assassinate citizens of wealth or political importance.

The use of terrorism is never justified, not even when it is applied in the name of social justice. The kidnapping, torture, or murder of innocent civilians is never justified by an appeal to Marxist-Leninist concepts, making literal the theory of "class warfare." No amount of oppression can ever justify actions whose principal target is the people who are supposed to be "liberated." The Western ethic rejects the idea of collective guilt, and recoils from the political murder of innocents. The appearance of terrorism as a polticial strategy, therefore, almost always denotes an attack on Western values and interests.

In aiding terrorists movements, the UN consistently casts its aid in the guise of humaniterian assistance. The programs bear the label of health assistance, education or food for refugees. The UN never reveals whether the health facilities are used to treat terrorists wounded in the act of killing innocent civilians, or whether education includes technical training in military specialties, such as telecommunications, or whether the "refugees" are terrorists with knives or guns in their hands.

Yet, as was clearly established in the South African raid on Cassings, these putative refugee camps can be something far more sinister. Every such camp undoubtedly will include wives, children and hangers-on; but in no sense can they be considered as innocent citizens forced into exile by oppression. They have willingly chosen the way of the sword; and they have turned it against their own people instead of against the authorities they denounce as oppressors. It is a sign of the times that the West willingly chooses terror instead of justice, and eargerly finances its own destruction.

SUMMARY OF SWAPO TERRORIST INCIDENTS SINCE JANUARY 1978

JANUARY 5.—An Ovambo man was shot by a gang of terrorists. A number of AK 47 cartridge cases were discovered near the body.

January 8.—A private car with 10 civilian passengers detonated a Russian landmine. Four of the passengers were killed outright and six were seriously injured.

February 7.—The Ovambo Minister of Health, Mr. Shiygaya, was assassinated with a Russian-made pistol after a political meeting in Ovambo.

February 21.—A group of terrorists abducted 119 children and their teacher from the St. Mary's Mission School in Ovambo.

March 3.—Headman Mangola Kanyala was killed by a group of terrorists. His body was mutilated and his wife and children abducted.

March 25.—Another Headman, working for the South African Police, was shot by terrorists using a Russian-made pistol.

March 27.—Two terrorists assassinated the leader of the Herero people, Mr. Clemens Kapuuo. Mr. Kapuuo was widely regarded as a possible future leader of an independent Namibia.

April 18.—Two Ovambo children were killed by a Russian hand-grenade.

April 21.—An attempt was made on the life of the Ovambo's Minister of Justice, Mr. Tara Imbili.

April 22.—A bus was hijacked on the road between Oshakati and Ruacana. The bus with about 70 to 80 people on board was taken to Angola.

April 24.—South African forces made contact with 20 terrorists approximately 10 km south of the Angolan-South West African border. After a skirmish, the terrorists withdrew into Angola.

April 24.—A vehicle of South Africa forces was ambushed by SWAPO terrorists approximately six km south of the Angolan-South West African border. Security forces returned fire following which the terrorists withdrew to the safety of Angolan territory. A South African soldier was killed in this incident.

April 28.—A SADF patrol was attacked approximately 25 km east of Ruacana.

April 29.—Shots were fired at the border post at Ruacana. Fire was not returned.

April 29–30.—Landmines of Communist origin were set to explode at the new homes built for the members of the Ovambo Cabinet and the Legislative Assembly building at Ongwediva.

April 30.—A SADF patrol was attacked by approximately 10 SWAPO terrorists 45 km east of Enana. One SADF member was killed.

May 1.—Heavy fire was brought down on a SADF patrol approximately 43 km south east of Enana. A follow-up operation was mounted and the enemy fled over the Angolan border.

May 2.—The water pipeline running between Ondangua and Oshikango was sabotaged. (This pipeline is esssential for the livelihood of the local inhabitants.)

May 3.—Heavy fire was directed at the guard post and buildings at Ruacana including structures of the water scheme. Several buildings were damaged. Fire was not returned.

May 20.—South African security forces encountered armed SWAPO elements from across the South West Africa-Angolan border on South West African territory.

May 22.—Further contact made with armed SWAPO elements in South West Africa.

May 23.—South African forces in the Ruacana area were fired on from Angolan territory. A member of the South African security forces was wounded.

May 26.—South African forces in the Ruacana area were again fired on from Angolan territory.

May 31-June 2.—Armed SWAPO elements again engaged in South West African territory.

June 4.—Two armed men were arrested at a point northwest of Outspl. Two Tokarev pistols, one R1 rifle and a hand-grenade which they had obtained from Angola were found in their possession.

June 21.—Two terrorists dragged Mrs. Paulus Shilango out of her house, killed her and fled back across the border into Angola.

This incident occurred two km south of Oshikango.

June 30.—Near Oshikango a South African transport aircraft flying from west to east over South West African territory was fired upon from Angolan territory.

July 4 and 7.—South African security forces were ambushed by armed elements from across the South West Africa-Angola border on South West African territory at the following positions:

(a) 17 degrees 52S 16-degrees 17E (approximately 10 km west of Okankolo)

(b) 17 degrees 53S 16 degrees 55E (approximately 60 km east of Okankolo)

July 7.—Security forces encountered armed elements from across the South West African-Angolan border on South West African territory at 17 degrees 35S 16 degrees. The encounter led to exchange of fire and a member of security forces was wounded

July 7.—30 km northeast of Odangua, on Omahenge area, a member of the local population, Nambamy Kange, was kidnapped by SWAPO terrorists.

July 13 and 15.—The following three incidents occurred as a result of landmines planted by SWAPO terrorists who infiltrated from Angola into the Omahenge area:

(a) Approximately 12 km northeast of Oshigambo a vehicle was badly damaged in a landmine explosion.

(b) Approximately 16 km south of Oshikango four members of local population died and eight were seriously injured in three explosions.

(c) Approximately 10 km south of Oshikango a further two landmines were detected.

July 20.—Approximately 120 SWAPO terrorists divided into four groups crossed the Angolan-South West African border into South West Africa between beacon 22 and beacon 31.

July 31.—Security forces made contact with SWAPO terrorists approximately 20 km east of Oshikano in Jati strip. Two terrorists were wounded and taken back across the border into Angola.

An unknown number of SWAPO terrorists were reconnoitering in South West Africa south of beacons 6–10.

July 16.—An Ovambo, Mrs. Helena Kanine, believed to be a DTA organizer, was murdered by SWAPO terrorists in the Ondangwa area.

July 25.—Approximately 20 km north of Ondangwa, a deputy chief, Mr. Japhet Shilumba, was murdered in his shop by eight SWAPO terrorists. Mr. Shilumba was shot in the back of the head with a Makarov pistol. The shop was afterwards plundered.

July 27.—Mr. P. Nipukulula, a teacher at Eembahu 20 km from the Angolan border, was murdered by a SWAPO terrorist who shot him twice through the head and then stabbed him through the throat and heart with a bayonet. Wife of the deceased was threatened and shop ransacked. Empty AK 47 cartridge cases were found on the scene of the murder.

July 29.—Approximately 12 km west of Eenhana a water pipeline was brown up.

July 30.—Eight telephone poles were blown up by SWAPO terrorists approximately 2 km south of Oshikango.

July 22 and 24.—South African security forces approximately 35 km west of Ruacana were fired on from Angolan territory. In the second incident; two members of security forces were wounded.

July 31 and August 2.—The following incidents occurred as a result of landmines planted by SWAPO terrorists who infiltrated from Angola into South West Africa.

(a) Four security force vehicles were damaged.

(b) Landmines were defused by security forces. One member of security forces slightly injured.

(c) A private vehicle detonated a TM 46 landmine approximately 30 km south east of Enans. Two members of local population killed and two seriously injured.

(d) A private vehicle detonated a TM 46 landmine approximately 7 km west of Enana. One member of local population was killed and a member of the homeguard injured.

(e) A TM 3 mine was discovered and lifted by security forces approximately 55 km south of Omhulu.

August 12.—Security forces were ambushed by SWAPO terrorists approximately 60 km east of Onkankolo. Three members of security forces were killed.

August 13.—Terrorists fired on South African police patrol approximately 20 km south west of Eenhans.

August 13.—Security forces were fired upon while drawing water approximately 5 km east of Oahikango.

August 12 and 13.—Following incidents occurred as a result of landmarks planted by SWAPO terrorists who infiltrated from Angola into South West Africa:

(a) One TM 46 landmine was discovered and lifted approximately 2 km north of Singalumwe.

(b) One TM A3 landmine connected to TM 46 landmine discovered and lifted approximately 17 km west of Umbulu.

(c) A vehicle detonated a TM A3 landmine in the vicinity of Oshikango. A local resident, Mr. David Ohepo, was killed.

August 12.—A member of the local population, Mr. Elia Shikolola, was murdered by two SWAPO terrorists approximately 20 km south of Oshikango.

August 12.—A TM A3 landmine was discovered and lifted at approximately 18 km north west of Outapi. Tracks of 12 terrorists were found.

August 13.—A TM landmine connected to a TM A3 landmine was detonated by security forces vehicle approximately 15 km south east of Eenhana and one member of the security force slightly injured.

August 13.—A security forces bush hat was found booby trapped with a hand-grenade approximately 20 km west of Onkankolo.

August 14.—A TM 46 landmine was discovered and lifted approximately 17 km north east of Singalamwe.

August 15.—Security forces made contact with a group of SWAPO terrorists moving north toward the Angolan border 20 km east of Oshikango. After exchange of fire terrorists fled across border into Angola.

August 15.—One TM 46 landmine booby trapped with a hand-grenade was discovered and lifted approximately 16 km northeast of Singalamwe.

August 15.—A damaged TM 46 landmine was discovered approximately 15 km northeast of Onkankolo.

August 16.—A manhole on a water pipeline was blown up by SWAPO terrorists approximately 8 km south of Oshikango.

August 16.—Security forces encountered a group of terrorists approximately 5 km east of Oshikango. The group was preceded by two women armed with AK 47 rifles. Terrorists scattered after exchange of fire.

Mr. HELMS. I thank the Chair. I yield the floor.

Mr. INOUYE addressed the Chair.

The PRESIDING OFFICER (Mr. WARNER). The Senator from Hawaii.

Mr. INOUYE. Mr. President, I find it necessary to speak in opposition to the amendment submitted by my friend from North Carolina. This Institute was created in 1976 by the United Nations General Assembly and it aims to train Namibian students for middle level positions in the civil service of an independent Namibia. The curriculum includes 3 years of basic secondary education. There is training in English, mathematics, political science, law and society, administration, history, economics, and education.

Research is conducted in areas of relevant concern. Examples are constitutional options for Namibia, agrigarian and land reform, health and education surveys, and urban housing. The curriculum does not include military training.

Mr. President, the donors are primarily western countries. Since 1978, the U.S. contribution has been $500,000 annually, which is approximately 18 percent of the total. Other donors include Canada, Western Germany, the Netherlands, and most of the Scandinavian countries.

The Reagan administration has asked for this money as a demonstration of the administration's support for an independent Namibia.

The U.S. contribution to the program is intended to demonstrate U.S. support for peaceful transition by preparing Namibians to administer their country at independence.

One of the weaknesses that history has shown whenever a colonial nation has left its colony has been the lack of preparation. This is replete throughout Africa. I believe the United States does not wish to have this repeated again in Namibia, a possible hot spot.

We have been assured that this is not a training school, a military school for SWAPO, nor is it a Marxist orientation center for Namibians.

It has been closely monitored. It is located in Zambia.

Mr. President, I think the sum is small, but I consider that this is in our national interest. If we should decide to move out of this activity, we may be inviting the very people we do not want involved to move in. There is a struggle going on at this time for the minds, the souls, and the hearts of Namibians. This is a small investment. I think it is an investment that will be appreciated by Namibians, and it is a small investment that will go a long way.

For the past 3 years, this amendment has been presented to the Senate. For the past 3 years the Senate has rejected it. I would hope that once again we reject this amendment.

Mrs. KASSEBAUM. Mr. President, I would agree with much of what the distinguished Senator from North Carolina says regarding the United Nations Institute. It has been a questionable institute.

My reservation at this time with this particular amendment is in the timing of it when there are some very delicate negotiations ongoing regarding the independence of Namibia. One of the very successful contact groups has just been in southern Africa meeting with some heads of state. There seem to have been some very positive efforts with regard to their Constitution and elections in Namibia.

I wonder if the Senator from North Carolina would consider language where-

by no funds would go to the Institute unless the President would feel it was so desirable.

Mr. HELMS. Mr. President, if the distinguished Senator will yield, the Senator from Kansas and I have discussed this previously. She has suggested language which is perfectly acceptable to me because it serves the purpose that both of us want to serve.

The language which we have drafted jointly would add, at the end of the pending amendment, the words "except if the President determines and submits in writing to Congress that providing such funds will promote an internationally recognized settlement in Namibia".

If that language is acceptable to the distinguished Senator from Kansas, I will send it to the desk as a modification.

Mrs. KASSEBAUM. I think that says it very well and I would be very supportive of the amendment with that language added.

Mr. HELMS. I thank the able Senator.

Mr. President, the distinguished Senator from Kansas makes a fine contribution to the Foreign Relations Committee and to this Senate.

UP AMENDMENT NO. 647, AS MODIFIED

Mr. HELMS. Mr. President, I send the modification to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment, as modified, will be stated.

The legislative clerk read as follows:

On page 5, line 13, before the period insert a colon and the following: "*Provided further*, That none of the funds appropriated under this heading may be available for the United Nations Institute for Namibia", except if the President determines and submits in writing to Congress that providing such funds will promote an internationally recognized settlement in Namibia.

Mr. KASTEN. Mr. President, I congratulate the Senator from Kansas and the Senator from North Carolina on their cooperative effort. On behalf of the majority I am pleased to accept the amendment, as modified.

Mr. INOUYE. Mr. President, with the perfecting amendment I will concur.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

Mr. TSONGAS. Mr. President, I will not concur in the amendment, as modified.

The Senate a couple of years ago wrote a chapter in the history of Rhodesia when, in the process of trying to resolve the issues peacefully, the Senate, in its wisdom last year, or, rather, in April 1979 and the summer following, despite pleas to not involve itself in lifting sanctions against Rhodesia, ignoring pleas to let a peaceful process endure, saw fit to lift sanctions. None of our allies did the same thing.

That did not become law because, fortunately, the House of Representatives, the so-called other body, had more sense. They were not spooked. Because the House of Representatives saved the Senate from its wisdom, there was peace in Rhodesia, now Zimbabwe. Had the wisdom of the Senate prevailed, there would have been bloodshed, violence, civil war, and Soviet entree into Rhodesia.

Rather than the Senate realizing it made a mistake, rather than being thankful the blood is not on our hands, what do we do? We do it again.

We are now in the process of trying to resolve the issue of Namibia. Can you tell me how agreeing to this amendment, while they are negotiating the Namibian settlement, helps? It does not. Whose blood is it? It is not ours, obviously, but it is theirs.

The amount of knowledge in this body of the Third World is lamentable. You do not vote on a Third World end result because you do not want to go back and defend it.

This would be the same situation. We would vote in a reactionary way, hoping the House would save us, and, if it does not, well, "They are the ones who bleed. To heck with it."

It is very hard to understand why something like this would come up. The only people who are served by it are internal parties in Namibia who want to hang on and hang on, and the only other party which could possibly be pleased by this are the Soviets.

This amendment plays right into the hands of the Soviet Union propaganda in Africa. Why do you want to do it? We might as well write to the Kremlin and say, "Dear Sirs: Please forward whatever amendments you think would be helpful in pursuing your policy in Africa. We will pass them without reservation."

That is the de facto effect of what we are doing, Mr. President. You cannot find one European country that would endorse this. The amendment is introduced and we fall over.

Chester Crocker, who is the Assistant Secretary of State for African Affairs, does not share my view of how to proceed in Southern Africa, but I think he is sincere, I think he is intelligent, I think he is openminded, and I have stepped back and not tried to interfere whatsoever with negotiations in Southern Africa. I have not uttered a word, but given him the leeway to try to resolve it. I think those on the other side of the issue have the same obligation. This amendment undermines that effort. So we get it up, we modify it with language, then we swallow it.

After a while, Mr. President, I shall get to the point, when something like this comes up and we know we will somehow get around it, that I shall let it go through without getting upset. But it represents the worst of what this body is about.

There are human beings whose lives are affected by what we do in this body. We did not give a damn in Rhodesia, did we? All those people would have died—well, that is their problem.

It is not their problem, Mr. President.

We wonder why we are having trouble dealing with Africa. Look no farther than this amendment.

Mr. President, I object to this amendment and even if I am the only one to vote against it, at least I shall not have to explain it later on to myself. I demand a rollcall on the amendment.

I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second?

Mr. KASTEN. Mr. President, will the Senator from Massachusetts yield for a question?

Mr. TSONGAS. Yes.

Mr. KASTEN. I want to be sure on what measure he is demanding a rollcall. There will be an amendment offered on elimination of funding for Zimbabwe. That is not the amendment before us at this moment. The amendment before us at this moment has to do with funding for the Institute of Namibia. I want to be sure the Senator is asking for a RECORD vote—I assume most of his text had to do with Zimbabwe. I wonder if he could not allow this amendment to be accepted by a voice vote, and then we may have a RECORD vote and some discussion on the amendment of the Senator from North Carolina dealing with the question of the total elimination of funding for Zimbabwe, which I understand may be before us momentarily.

Mr. TSONGAS. Mr. President, I was speaking to the amendment that would eliminate money for the Namibian Institute. That is not an institute that I would subscribe to. My objection is to our willingness willy-nilly to intervene, to have an impact that can only be negative in terms of the negotiations. I would prefer that these kinds of amendments be fought so that at least the word goes out that there is at least a nucleus of people in the Senate who recognize the implications of what we are doing and are willing to vote no. Even if it is only one or two people, some Africans reading this transcript will not think we all are somehow party to this kind of very irresponsible, very rhetorical, very dogmatic, inflammatory movement.

The PRESIDING OFFICER. The Chair seeks clarification from the Senator from Massachusetts concerning his pending request for the yeas and nays. Is that request still pending?

Mr. TSONGAS. Mr. President, I demand the yeas and nays on the issue of the Namibian Institute if for no other reason than that one Member of this body is going to vote no.

Mr. INOUYE. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. INOUYE. What is the pending business?

The PRESIDING OFFICER. The amendment of the Senator from North Carolina No. 647 as modified by the Senator from North Carolina in accordance with the suggestions made by the Senator from Kansas. As I understand it, the Senator from Massachusetts has requested the yeas and nays on that amendment as modified.

The question is, Is there a sufficient second?

Mr. INOUYE. Mr. President, may we have the clerk read the full amendment as modified?

The PRESIDING OFFICER. First, we have to establish, under the rules, if there is a sufficient second to the request for the yeas and nays.

The Chair puts the question to the Members of the Senate, Is there a suf-

ficient second? There is not a sufficient second.

Mr. TSONGAS. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. TSONGAS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TSONGAS. Mr. President, I shall yield to the request of the Senator from Hawaii and the Senator from Kansas, but I want the record to indicate my strong opposition to any amendment which deals in this fashion and, hopefully, the administration will see it in its interest to take advantage of the modifying amendment. Hopefully, we shall go through this again perhaps next year, but I want it to be made very clear that I, for one, object to this kind of intervention and the human toll that it represents.

I thank the Chair.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina as modified.

The amendment (UP No. 647), as modified, was agreed to.

Mr. HELMS. I move to reconsider the vote, Mr. President.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 648

(Purpose: To prohibit the availability of funds for Zimbabwe while North Korean military personnel are in Zimbabwe)

Mr. HELMS. Mr. President, I send an unprinted amendment to the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 648.

On page 23, between lines 4 and 5, insert the following:

SEC. 522. None of the funds appropriated by this Act may be made available after January 1, 1982, for the purpose of furnishing assistance for Zimbabwe while any military adviser or technician or other military personnel of the Democratic People's Republic of Korea is in Zimbabwe.

Mr. HELMS. Mr. President, this amendment is one which may disturb my friend from Massachusetts. He has already alluded to it. As he indicated in terms of his position on the amendment just approved, he wished to be on record in opposition to that amendment. By the same token, I offer this amendment to sound a warning not only to the Senate but also to the Reagan administration, with which I think I have fairly satisfactory credentials in terms of support.

The pending bill includes an appropriation of $75 million for assistance to Zimbabwe. That $75 million figure has a familiar ring. The Senator from Louisiana, whom I observe listening intently to this debate, may recall that that was the precise amount that was appropriated for Nicaragua, and this Senator twice stood in this spot and implored Senators not to put that money in the hands of the Sandinistas. The Senator from North Carolina did not prevail on either occasion, and I anticipate that the Senator from North Carolina will not prevail on this occasion. However, I feel that I owe it to my conscience at least to make the point and sound the warning.

As to the $75 million in this bill for assistance to Zimbabwe, we debated this issue at length when the matter came up on the authorization legislation. Briefly, today, the facts are the same as they were then. The Prime Minister of Zimbabwe, one Robert Mugabe, is a self-proclaimed Marxist who is trying to set up a one-party Marxist state in Zimbabwe, in defiance of the Lancaster House accords. Moreover, Mr. Mugabe is presently host to a large number of North Korean military personnel who are busily engaged in training a special unit for the repression of political dissent in Zimbabwe—Zimbabwe, of course, having been formerly known as Rhodesia.

Mr. President, I acknowledge that the precise number of North Koreans in Zimbabwe at this time has been a matter of debate. I believe that it is uncontested, however, that the first contingent numbered 106 and arrived some time in midsummer. That is the number that the State Department is sticking to. However, other information, entirely credible to the Senator from North Carolina, which has appeared in distinguished European publications such as the Economist, in Britain, and Die Welt, in Germany, places the number of North Koreans in Zimbabwe at over 200.

Furthermore, I have received reports from individuals who have interviewed witnesses in Zimbabwe who have seen more North Koreans coming in by way of the railroad to Beira, Mozambique, and which place the number closer to 500. The exact number, I submit, is not important. What is important is the principle.

It is also highly significant that the training that the North Koreans are giving in Zimbabwe, in part, involves the use of weapons which North Korea had supplied to Mr. Mugabe before independence, while he was a terrorist—in fact, during his period of terrorist activity.

Mr. President, this is a matter of great concern to this Senator. Mr. Mugabe's turning to North Korea for assistance at this time is a matter of utmost gravity. The type of communism in North Korea is one of the most rigid and brutal in the world. It is a brand of communism that Mr. Mugabe has always admired, and it is not at all surprising to this Senator that Mr. Mugabe now turns to the North Koreans for training, as he moves inexorably toward a more repressive society. The North Koreans are known to be ruthless and effective fighters in the world.

I do not question the sincerity of Senators in this body who still hold out hope that Mr. Mugabe, by some magical turn of events, may turn into a moderate and that he still wants to have a Western-style society in Zimbabwe. It is possible, though not at all probable, in the view of this Senator. I hope that my distinguished colleagues who hold that hope are correct, and I hope they will be proved correct. However, it seems to this Senator from North Carolina that what we are witnessing is a transition toward—not away from—a classic Marxist state. They propose to do it with $75 million of the American taxpayers' money.

So my fear is—we have seen it elsewhere, Nicaragua being a good example—that what appears to be a period of moderation is merely a transition period toward that classic Marxist state.

As I said at the outset of my remarks, Mr. President, was had a similar debate along the same lines on the Senate floor about a year or two ago with respect to the prudence of giving aid to Nicaragua. Some of my distinguished colleagues, for whom I have the utmost respect and affection, at that time thought, as some think with respect to Zimbabwe today, that we were witnessing in Nicaragua a period of moderation and that it would be appropriate to help the private sector in Nicaragua. I tried to argue at that time that such assistance would simply give the Marxists in Nicaragua even more control over the private sector and that it would bring about a more rigid Marxist state.

Now where are we with respect to Nicaragua? At the present time, the administration wholeheartedly agrees that Nicaragua is now totally under Marxist control and is a surrogate in Central America for Cuba and the Soviet Union in stirring up revolution.

Mr. President, I submit that the situation in Zimbabwe is absolutely analogous to the situation in Nicaragua a year or so ago. What we are observing is a transition period. In my view, we should not be giving any aid to Zimbabwe at all.

Nevertheless, I am still willing to give Mr. Mugabe a chance to prove that he is in fact a moderate. Before he receives aid from the United States, he should give the American taxpayers and the U.S. Government a signal that he is not abandoning his ties to the West. That signal should come only in the form of the removal of the North Korean troops recently in Zimbabwe. Why should we be giving financial and moral assistance to a country that is using one of the most despicable regimes in the world to train troops for internal control of dissent? How can we justify that to the U.S. taxpayers?

I do not know about other Senators, but I could not go home and send that proposition to my people of North Carolina.

This amendment merely provides that no assistance can be given to Zimbabwe while any military advisers or technicial or other military personnel of the so-called Democratic People's Republic of Korea is in Zimbabwe.

I hope Senators will consider how the vote on this amendment may look to the taxpayers in their respective States a year from now. How accountable are we to the decent, upstanding citizens of the United States who will have grave

doubts about the provision of assistance to a government headed by a Marxist, that is using North Korean Communist troops to train a praetorian guard to keep itself in power? If Mr. Mugabe is the friend of the West that he pretends to be, he will not hesitate to rid his country of North Korean military personnel. North Korea is a country that we have never signed a peace treaty with, that we do not even recognize in diplomatic relations. How can we collaborate with such a nation, even indirectly, at this time? Maintaining North Korean troops there is an unfriendly act, and we should withhold aid if they are not removed.

I yield the floor.

Mr. PERCY. Mr. President, I shall be very brief because we previously voted on a similar amendment on October 22 and by a vote of 14 to 61 rejected the amendment of the distinguished Senator from North Carolina.

Mr. President, the preponderance of assistance to Zimbabwe—military and especially economic assistance—continues to come from the West. The Reagan administration has chosen to stand with our Western friends in supporting a country which holds great promise for us in economic and political terms.

Economically, the U.S. private sector has taken a special interest in Zimbabwe's future. The U.S. Chamber of Commerce has established a special chapter there. There is a United States-Zimbabwe Trade Council.

Diplomatically, Zimbabwe has reacted positively to the efforts of the Reagan administration to work with South Africa and the other key parties to reach a Namibian settlement. The Reagan administration believes that a settlement is vitally important to our security interests in Africa.

A vast number of our Western friends have decided that Zimbabwe is a country worth supporting. In addition to the Reagan administration and Prime Minister Thatcher's government, the Governments of France, West Germany, Canada, Belgium, Holland, and the Scandinavian countries provide aid to Zimbabwe—just to name a few.

With regard to the presence of North Korean personnel in Zimbabwe, I would emphasize that our British friends continue to play the overwhelmingly predominant role in training and equipping the Zimbabwean Armed Forces.

To cut off all aid because Zimbabwe's leader has accepted an offer of a very small amount of training, cost-free, from a nation which supported him prior to independence, would be very shortsighted.

Mr. President, I believe that the administration's request for assistance to Zimbabwe makes good sense, and I urge my colleagues to oppose this amendment.

Mrs. KASSEBAUM. Mr. President, I will say to the distinguished Senator from North Carolina that we do have to be accountable in our voting record, though we are also here to exercise some thoughtful judgment on some very perplexing and complex issues.

We have had this debate before on October 22 when a similar amendment was offered to the Foreign Assistance Authorization Act.

The situation has not really changed since then.

I have been trying to follow very closely what the troop situation is in Zimbabwe, and the State Department has said that there are no more troops coming in than that were there at that time and at that time their figures were about 100, or 106, as a matter of fact, to be exact.

Salisbury is a small town about the size of Topeka, Kans., and I think if there were an unusually large troop movement of North Korea troops coming into the Salisbury, there would be many who would be very aware of this.

Zimbabwe is a country of important political, economic, and strategic interests to the United States. The U.S. relationship with Zimbabwe is based on this administration's understanding of the importance of all of southern Africa to America's security and prosperity.

There is a consistent and well-thought-out policy that has been approved by the President and which applies to the whole region.

One of the principal goals of our southern African policy is to halt the spread of Soviet influence in the region and with this I heartily concur with the Senator from North Carolina.

Within the Zimbabwe government there exists a wide variety of opinions concerning the future of that country.

For us to withdraw our economic assistance to Zimbabwe would strengthen the hands of those within the Zimbabwe government who wish to move that country into a closer relationship with the Soviet Union and its allies.

As chairman of the Subcommittee on African Affairs, I believe we simply cannot adopt policies that will increase the influence of the Soviet Union in southern Africa.

Rather we should be seeking to counter the existing Soviet influence through a positive foreign policy.

Foreign assistance such as the proposed aid to Zimbabwe is an essential element in an energetic and positive foreign policy.

I certainly share with the Senator from North Carolina concern about the level of Soviet influence in Zimbabwe, but I differ with him on the best method of countering that influence.

Rather than withdrawing from the leading role we are playing in Zimbabwe I would increase our involvement in that country. I would do this because I believe that the principles for which we stand, fair play, individual liberties, and human dignity, are the most powerful principles that the world has ever known, and I am convinced that our principles will inevitably triumph, but they cannot triumph if we close the door and refuse the hand of friendship.

Prime Minister Mugabe will have an important role to play in our search for a settlement and an end to foreign military pressure in southern Africa. In order to gain his cooperation in achieving our foreign policy goals, a careful diplomacy must be practiced.

The Reagan strategy in southern Africa is working. Slowly but surely the United States is achieving results in protecting American national interests in this increasingly important region of the world.

Foreign policy by legislation in the middle of sensitive political negotiations is dangerous and as it clearly undermines the President's credibility in dealing with foreign leaders.

Mr. President, on the last day of September the Senate voted to free the President's hands in another country in southern Africa. Our action had an impact on his ability to negotiate successfully with the parties in the region because it demonstrated to the world that he had the full confidence of the Senate in his regional strategy.

To now vote to undermine that strategy by removing a key element in it would be I believe a tragic mistake.

This policy has the full support of the Secretary of State and of the President.

For these reasons I hope this amendment will not be successful.

Mr. INOUYE. Mr. President, I wish to associate myself with the eloquent remarks of our distinguished friend from Kansas.

I wish to add that if we carry this amendment to its logical conclusion by suggesting that none of the funds appropriated by this bill would be made available for the purpose of furnishing assistance to any country while military experts or advisers or technicians of a Communist country may be in its area we would have to cut out aid to Poland, we would have to cut out aid to Jordan. Incidentally, Jordan just purchased SAM-6's from the Soviet Union. We would have to cut out any sort of relationship with Tanzania, Zambia, Zaire, India, and several others.

If we took that attitude, we would just isolate ourselves and we would lay the red carpet out for the forces of the Socialist world.

I hope that we do not make that mistake. We have made that mistake too often.

I can recall as a young man when we, for some unknown reason, decided to support a man called Fulgencio Batista. I think he was about as bad as any dictator in this century. With this man Fidel Castro, again we had an opportunity to have someone on our side, but we decided since he was a Marxist he was no good, and we continue to be troubled by that decision.

I hope that we do not repeat that decision here.

Mr. HELMS. Mr. President, I, was tempted to say gee, I do not quite know how to respond in the proper way to such a charming, lovely, and intelligent Senator as is the able and distinguished Senator from Kansas.

Yet I do not want her to misinterpret what I am about to say as a statement made in a caustic manner because it is not.

But as I listen to her and as I listen to my dear friend from Hawaii (Mr.

INOUYE). I felt that I was hearing a replay of the same thing that I heard when we debated on this floor the question of sending $75 million to the Sandinistas in Nicaragua.

I think it is pretty generally agreed that aid to Nicaragua was an inappropriate move. But I heard on that day, "Oh, we must hope." Hope for what? Hope that a leopard will change its spots? Hope that a Marxist will all of a sudden stop being a Marxist and start being a moderate?

I have got to say in all honesty, Mr. President, that I did not anticipate that I would see the policy being pursued here as one that would come from the Reagan administration. But the more I enquired, the more I found out. The so-called "country plan" which outlined the proposal for aid to Zimbabwe was worked up by whom? It was worked up by the Carter administration. It was prepared, Mr. President, by the Carter diplomats on the ground in Zimbabwe in the rush of excitement after independence. They broke all records to get emergency aid to Zimbabwe last year, and they wanted a grander proposal.

It was completely completed on paper within a few days after President Reagan came into office. It was printed for distribution in February of 1981, and Ronald Reagan, by that time, did not even have the seat of his chair warm.

Maybe I misunderstand the situation, Mr. President, but I thought the people of this country voted for a change last November, not only economic change but a foreign policy change. I do not think they voted to have the U.S. Government continue to support the spread of socialism or Marxism or communism in Africa.

I do not think the American people expected that the Carter plan—and that is what we are talking about, the Carter plan—to give $75 million to Zimbabwe would be adopted in toto.

What we have here, Mr. President—and I say this with all due respect for and affection for an administration which I have done my best to support—are the same bureaucratic ideas that were repudiated I think by the voters in November of 1980.

For that reason, if I am the only Senator to vote against sending this $75 million to Zimbabwe, so be it.

I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. TSONGAS. Mr. President, just as a point of information on the part of the White House, Jimmy Carter has not been there for 10 months. This is a proposal from the Reagan administration, and I support it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Tennessee (Mr. SASSER), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from New York (Mr. MOYNIHAN) are necessarily absent.

I further announce that the Senator from Alabama (Mr. HEFLIN) is absent because of a death in the family.

I also announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

The PRESIDING OFFICER (Mr. DANFORTH). Is there any other Senator in the Chamber who desires to vote?

The result was announced—yeas 26, nays 67, as follows:

[Rollcall Vote No. 381 Leg.]

YEAS—26

Armstrong	East	Long
Byrd, Harry F., Jr.	Ford	Mattingly
Byrd, Robert C.	Garn	McClure
Cannon	Grassley	Nickles
Chiles	Hatch	Proxmire
DeConcini	Hawkins	Randolph
Denton	Hayakawa	Symms
Domenici	Helms	Thurmond
	Humphrey	Warner

NAYS—67

Abdnor	Glenn	Packwood
Andrews	Gorton	Pell
Baker	Hart	Percy
Baucus	Hatfield	Pressler
Bentsen	Heinz	Pryor
Biden	Hollings	Quayle

Durenberger	Mitchell	Zorinsky
Eagleton	Murkowski	
Exon	Nunn	

NOT VOTING—7

Goldwater	Leahy	Weicker
Heflin	Moynihan	
Kennedy	Sasser	

So Mr. HELMS' amendment (UP No. 648) was rejected.

Mr. INOUYE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. RANDOLPH. Mr. President, I respectfully request a rollcall on passage of the pending bill.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

UP AMENDMENT NO. 649

The PRESIDING OFFICER. The Senator from Rhode Island is recognized.

Mr. PELL. Mr. President, on behalf of the senior Senator from New York and myself, I send an unprinted amendment to the desk and ask that it be considered.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Rhode Island (Mr. PELL), for himself and Mr. MOYNIHAN, proposes an unprinted amendment numbered 649.

On page 19, between lines 8 and 9, insert the following:

SEC. 551A. None of the funds appropriated or made available pursuant to this Act shall be available to any country in which on November 21, 1979, the United States Embassy and other U.S. Government property was attacked, and in which attacked American citizens died, and which has not paid full compensation in United States dollars to the United States Government for all damage done to U.S. Government property, for all damage done to property of United States citizens, for all expenses incurred by the United States Government directly and indirectly as a result of the attack, and for the loss of life of American citizens and of employees of the United States Government. For purposes of this section, full compensation shall include, but not be limited to, the cost of rebuilding and repairing all U.S. Government buildings damaged or destroyed in the attack; the cost of replacing or restoring all furnishings damaged or destroyed; the cost of replacing or restoring the lost, damaged or destroyed personal property of United States citizens and of local employees of the United States Government; the cost of renting, or otherwise acquiring office and housing space to replace the offices and United States Government housing rendered unusable; the cost of evacuating dependents of U.S. Government employees and the additional costs occurring to the United States Government for the support of dependents outside of the country from which they were evacuated; the amount of additional expenditures by the United States Government required to protect properly United States Government property and personnel remaining in the country after November 21, 1979; expenses incurred by the United States Government in assembling and presenting claims for damages resulting from the November 21, 1979, attacks, including legal fees; and appropriate sums for the benefit of the families, heirs and assigns of the United States citizens and local employees who died in the November 21, 1979, attacks. Appropriate sums to compensate for loss of life shall be not less than the greater of (1) compensation received by the families, heirs, and assigns of those who lost their lives, or (2) $500,000 for each life lost.

Mr. PELL. Mr. President, this is an amendment the Senator from New York had considered introducing. Unfortunately he could not be here so I am introducing the amendment with the Senator from New York as a cosponsor.

Mr. President, 2 years ago Americans watched in horror as mobs seized or sacked American Embassies in Iran, Pakistan, and Libya. Now, the administration is proposing to provide one of those countries, Pakistan, with $3.2 billion of taxpayers money; and $100 million is appropriated for Pakistan in this bill.

Mr. President, the amendment is simple. The operative paragraph says "None of the funds appropriated or made available pursuant to this Act shall be available to any country in which on November 21, 1979, the United States Embassy and other U.S. Government property was attacked * * * and which has not paid full compensation in United States dollars to the United States Government for all damage done." In effect, the amendment says to Pakistan, "Pay for the damage done to our Embassy before the enactment of this bill or you will lose the $100 million in assistance."

Mr. President, it was almost 2 years ago that a mob in Islamabad attacked and completely gutted our Embassy. For more than 5 hours the military government of President Zia ul-Hag did absolutely nothing in spite of increasingly desperate pleas for help from American diplomats trapped in the burning Embassy. In this attack, two Americans died as did two Pakistani employees of the U.S. Government. A few minutes more and our entire diplomatic staff in Islamabad would have been incinerated.

On that same day the American center in Lahore was burned to the ground as was our center in Rawalpindi. There were also destructive attacks on our consulates in Lahore, Karachi, and Peshawar.

Mr. President, it defies belief that the military regime could not have properly protected the U.S. Embassy, if it had been so inclined. The failure of the Government of Pakistan to protect the U.S. Embassy was a gross failure to live up to its obligations under international law and, speaking bluntly, constitutes toleration of an act of terrorism.

Two years after the attack the Government of Pakistan has still not finished paying the bill for the attack. I recognize Pakistan has recently paid for some of the damages caused. However, the Government of Pakistan still owes some $7 million for items such as furnishings, vehicles, and equipment. In addition, Pakistan has offered no compensation to the families of the deceased.

The amendment would require Pakistan to pay for these costs. In addition, Pakistan would have to compensate the U.S. Government for the cost of evacuating U.S. citizens, an evacuation made necessary by Pakistani refusal to properly protect American citizens in Pakistan, and for necessary security expenses. Finally, the amendment includes very modest compensation—$500,000 per life—to the families of the deceased.

Mr. President, I do not believe the U.S. taxpayer should pay 1 cent for the outrage that occurred 2 years ago in Pakistan. I sincerely regret that the Pakistani Government has not seen fit to live up to its obligations. However, I cannot see pouring billions into a "new relationship" with a country that will not pay the few million in damages for which it is so clearly responsible.

The amendment does not prohibit assistance to Pakistan. In fact, it does not even name Pakistan. Simply by fulfilling its obligations under international law, Pakistan can escape the effects of this amendment.

Mr. President, by approving this amendment, we will send a message to Pakistan that our patience is at an end. By paying before the enactment of this bill, Pakistan can still get the $100,000,000. Surely 2 years is long enough for a settling of accounts.

Mr. President, passage of this amendment will also send a clear message to the world that we expect our Embassies and diplomats to be treated with decency and respect. No country should think it can get away with the kind of terrorism that occurred 2 years ago in Islamabad. This is an amendment that I think will be applauded by Foreign Service officers everywhere and by the American people. I urge the passage of the amendment.

Mr. President, I do not intend to ask for a rollcall vote if this matter can be accepted. If it cannot be accepted, I shall ask for a vote.

Mr. INOUYE. Mr. President, it is with great reluctance that I speak against the amendment. The Department of State has advised the committee that, as of this moment, all claims made against the Government of Pakistan have been honored by the Government of Pakistan. As of this moment, of the claims submitted, $18 million have been paid. There are $4 million more not completely processed. However, the Government of Pakistan is in the process of entering into appropriate contracts so that these remaining $4 million in claims can be resolved.

Mr. President, I have to say that this amendment is unnecessary. Moreover, I think at this time, when we are trying to send a friendly message to Pakistan, it may send a wrong one. I hope that the Senate will be against this amendment.

Mr. KASTEN. Mr. President, I, too, reluctantly oppose the amendment of the Senator from New York. It is my hope that the Senator from Rhode Island will not ask for a rollcall vote despite the fact that it cannot be accepted by either the majority or the minority on the committee.

Essentially, Mr. President, the amendment would, for all practical purposes, eliminate assistance to Pakistan. The Senator from Hawaii is correct: negotiations are now under way to resolve these problems. The Government did not burn down the Embassy. I do not know of any cases in which payment for the loss of foreign property such as this, in which the U.S. property has been paid for, has been backed by the United States.

Finally, Mr. President, at this time, with the changes that we are seeing in this region, we have to recognize the importance of Pakistan. I think it is absolutely crucial.

For those reasons, Mr. President, we have to oppose the amendment of the Senator. It is my strong hope that he will not insist on a record vote.

Mr. PELL. I suggest, Mr. President, that we are not asking for aid from other countries. Pakistan is asking for aid from us. The burning of the Embassy was 2 years ago this week. So far, accounts have not been settled. Furthermore, the issue of compensation for loss of life has not been considered. My hope is that this will spur Pakistan to move ahead and settle up their just debts.

Is there any possibility of an assurance by the chairman and the ranking member that every effort will be made to insure that the Pakistani Government will comply or fulfill their just debts to the United States in this regard?

Mr. KASTEN. On behalf of the subcommittee, Mr. President, and I believe I can also speak on behalf of the administration, I assure the Senator from Rhode Island that we shall do everything we can to assure that the negotiations which are now underway continue at the most rapid rate, and that we shall work on these negotiations. I shall do everything I can to press the administration and the Pakistani Government to come to agreement on all legitimate questions.

Mr. PELL. Can the Senator provide assurances that we will seek fair compensation for the loss of life?

Mr. KASTEN. I cannot make any firm assurance on the question of compensation for loss of life, because I do not know of any precedent for compensation for loss of life. I can assure the Senator and the Senate that I shall bring this point forward strongly and say this was the subject of important debate on the floor of the Senate. A number of Senators are concerned about this issue, and I would like for these concerns to be taken into consideration.

Mr. PELL. Does the ranking minority member feel the same way?

Mr. INOUYE. Yes, sir, Mr. President.

Mr. PELL. Given these assurances, I am prepared to withdraw the amendment.

Mr. HARRY F. BYRD, JR. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. HARRY F. BYRD, JR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. INOUYE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HARRY F. BYRD, JR. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Rhode Island.

Mr. ROBERT C. BYRD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. INOUYE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

TREASURY, POSTAL SERVICE, AND GENERAL GOVERNMENT APPROPRIATIONS, 1982

MOTIONS MODIFYING COMMITTEE AMENDMENTS TO H.R. 4121

Mr. HATFIELD. Mr. President, on September 22, the Committee on Appropriations reported H.R. 4121, an act making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies for fiscal year 1982. One week later, the President submitted a new package of budget cuts, including numerous reductions in the programs funded in the Treasury/Post Office appropriation bill.

The committee has carefully considered all of the President's newest proposals, and has adopted them wherever possible. At a meeting of the committee on October 22, the committee voted to reduce the already reported appropriations for the Departments and Agencies funded in this bill by $432 million.

Mr. President, I ask unanimous consent that committee amendments to H.R. 4121 be modified in accordance with the committee action of October.

I further ask unanimous consent that a revised bill be printed, reflecting the modifications just agreed to in the committee amendments.

The PRESIDING OFFICER. Without objection, it is so ordered.

The committee modification of its reported amendments to H.R. 4121, providing further reductions in budget authority and outlays, is as follows:

Page 2, line 15, strike $36,007,000 and insert in lieu thereof $35,029,000.

Page 3, line 1, strike $22,300,000 and insert in lieu thereof $20,149,000.

Page 3, line 11, strike $14,279,000 and insert in lieu thereof $12,566,000.

Page 3, line 15, strike $209,304,000 and insert in lieu thereof $153,826,000.

Page 3, line 23 strike $148,850,000 and insert in lieu thereof $120,473,000.

Page 5, line 19, strike $52,206,000 and insert in lieu thereof $45,941,000.

Page 6, line 4, strike $206,625,000 and insert in lieu thereof $184,000,000.

Page 6, line 14, strike $168,436,000 and insert in lieu thereof $148,224,000.

Page 6, line 20, strike $864,772,000 and insert in lieu thereof $812,886,000.

Page 7, line 3, strike $933,513,000 and insert in lieu thereof $901,813,000.

Page 7, line 12, strike $617,428,000 and insert in lieu thereof $602,628,000.

Page 7, line 17, strike $500,000 and insert in lieu thereof $440,000.

Page 11, line 11, strike $946,240,000 and insert in lieu thereof $869,240,000.

Page 34, line 6, strike $16,000,000 and insert in lieu thereof $14,795,000.

Page 34, line 15, strike $12,404,000 and insert in lieu thereof $11,000,000.

FOREIGN ASSISTANCE AND RELATED PROGRAMS APPROPRIATIONS, 1982

The Senate continued with the consideration of S. 1802.

The PRESIDING OFFICER. The question is on agreeing to the amendment (UP No. 649). On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Alaska (Mr. MURKOWSKI) would vote "nay."

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY), the Senator from New York (Mr. MOYNIHAN), the Senator from Tennessee (Mr. SASSER), and the Senator from Arkansas (Mr. PRYOR) are necessarily absent.

I further announce that the Senator from Vermont (Mr. LEAHY) is absent because of illness.

I also announce that the Senator from Alabama (Mr. HEFLIN) is absent because of death in the family.

I further announce that, if present and voting, the Senator from New York (Mr. MOYNIHAN) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 36, nays 55, as follows:

[Rollcall Vote No. 382 Leg.]

YEAS—36

Baucus	Dodd	Pell
Biden	Eagleton	Pressler

Glenn	McClure	

NOT VOTING—9

Goldwater	Leahy	Pryor
Heflin	Moynihan	Sasser
Kennedy	Murkowski	Weicker

So Mr. PELL's amendment (UP No. 649) was rejected.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. KASTEN. Mr. President, I ask unanimous consent that Senator KENNEDY be listed as a cosponsor on the amendment by myself and Senator PERCY regarding funding for Poland and other countries.

The PRESIDING OFFICER. Without objection, it is so ordered.

ASSISTANCE TO LEBANON

Mr. MITCHELL. I wish to ask two questions of the majority floor manager, Mr. KASTEN.

My questions concern our Government's fiscal year 1982 ESF assistance program for Lebanon. During the Senate's consideration of the foreign assistance authorization bill (S. 1196), this body agreed by a unanimous voice vote to an amendment concerning Lebanon offered by my distinguished colleague from Massachusetts (Mr. KENNEDY). The Kennedy amendment provided that of the ESF funds authorized to be appropriated in fiscal year 1982, "* * * $5,000,000 shall be available only for Lebanon for relief and rehabilitation programs of international and private voluntary agencies."

Is it the understanding of the Senator from Wisconsin that this $5 million figure constitutes a floor for U.S. funding of the relief and rehabilitation activities in Lebanon of international and private voluntary agencies?

Mr. KASTEN. Yes, that is my understanding. In adopting the Kennedy amendment, the Senate acknowledged the great relief and rehabilitation needs of Lebanon and the special ability of private and international voluntary agencies to meet these needs in Lebanon.

Mr. MITCHELL. Is it also the belief of the distinguished majority floor manager that the Kennedy amendment does not preclude the United States from providing ESF assistance to other programs in Lebanon which do not involve private and international voluntary agencies, should it see fit to do so? In other words, does my colleague from Wisconsin share my view that the intention of the Senate in adopting the $5 million funding floor was to establish an adequate level of funding for PVO activities, but not at the expense of other worthwhile ESF programs?

Mr. KASTEN. Yes, that is my belief.

Mr. MITCHELL. I thank the Senator from Wisconsin.

(By request of Mr. PELL, the following statement was ordered to be printed in the RECORD:)

● Mr. KENNEDY. Mr. President, as the distinguished Senator from Maine (Mr. MITCHELL) has stated, we sponsored and the Senate unanimously adopted an amendment to the foreign assistance authorization bill last September to provide $5 million for relief and rehabilita-

tion assistance to Lebanon. Our action was taken in clear recognition of the plight of the thousands of Lebanese who have been victims of the fighting in that troubled land.

When the authorization bill passed the Senate, we noted that the $5 million in relief assistance represented a small but important commitment to the rehabilitation of Lebanon. I am pleased that the Senate today is reaffirming our commitment to Lebanon and stating clearly that we expect the administration to use supplemental funds available in this appropriation bill to increase assistance to Lebanon.

I thank the floor manager of the bill for the understandings on this important point, and I am pleased to join with my good friend Senator MITCHELL in the further understandings achieved today.●

Mr. HAYAKAWA. Mr. President, I rise in support of S. 1802, the foreign assistance appropriations bill.

Security and development assistance are essential components of U.S. national security and foreign policy. Both serve our long-range interest of providing a stable international environment by assisting our friends and allies to acquire and maintain the means with which to prevent major economic crises and deter external aggression. The Soviet Union has, through an unparalleled buildup of conventional and nuclear forces and assistance to client states, posed increasing challenges to our important interests in East Asia and the Pacific, the Middle East, Africa, and Latin America. The United States must continue its efforts to develop a coherent strategy that will counter the Soviet challenge by both strengthening our military forces and providing economic and security assistance to those nations which share our objectives of world peace and international cooperation.

In East Asia our interests are significant. The region contains a large reservoir of raw materials which supply the industrial base of the Western democracies with tin, rubber, tungsten, titanium, and zirconium. And, some of the world's most important sealanes pass through the region carrying the vital flow of petroleum from the Middle East to our Asian allies: Japan, the Philippines, and Australia.

Meanwhile the growth of Soviet military and naval forces in the area is increasingly troubling. The Soviet Union maintains 44 divisions in Asia and nearly 2,000 aircraft. The Soviet Navy also has been expanding far beyond the U.S.S.R.'s own defensive needs. About one-third of Moscow's submarine force now operates in the Pacific and there are reports that submarines armed with cruise missiles are in the vicinity of the strategic Straits of Malacca, so vital to allied shipping concerns. The Soviet threat to the sealanes is further increased by its access to Vietnam's naval base at Cam Ranh Bay.

The biggest immediate threat to peace and security in Asia is Vietnam, whose Soviet-supplied troops now occupy Cambodia and operate in strength along the Thai-Cambodian border. Thailand's major priority must be to defend itself against this experienced and well-equipped force of 80,000. In addition to its military burdens, Thailand is also faced with providing sustenance for the ever-increasing number of Vietnamese, Lao, and Khmer refugees who have sought sanctuary within its borders.

Mr. President, I believe S. 1802 is an important step forward in our efforts to secure U.S. strategic interests in the Pacific and to protect the immediate security of our Asian allies. The bill proposes to increase certain aspects of security assistance in response to Soviet challenges in the area and to provide continued funding for Thailand, the Philippines, Indonesia, Malaysia, Singapore, and Burma with consideration for the special increased needs of these countries. The bill also recognizes the importance of assisting projects specifically planned to address basic human needs in agriculture, education and health care.

I want to commend S. 1802 for recognizing Thailand's strained resources as a "front-line" state and for encouraging the administration to provide for the repayment of its military assistance over an extended period of time. I also want to commend S. 1802 for providing for the full funding of the international military and education program, a program which not only trains foreign military personnel about military organization, tactics, strategy, command, and control but also enlightens them about the political and social advantages of democratic institutions. The hundreds of thousands of foreign military personnel who have and will participate in the IMET program are important channels through which we can further our goals of encouraging freedom and preserving human rights.

Security and economic assistance are vital parts of a sound strategic posture. We must increase these efforts if we are to halt Soviet aggression and if we are to provide a framework for cooperation between the United States and those countries which feel threatened by an expanding Soviet military presence.

Mr. DOMENICI. Mr. President, S. 1802 as reported by the Appropriations Committee provides new budget authority of $11.5 billion for fiscal year 1982. Of this amount, more than one-third is designated for the Export-Import Bank.

With possible late requirements for the October 1981 pay raise and the administration's request for a special defense fund, the reported bill is $0.7 billion below the subcommittee's budget authority allocation under the first budget resolution and $0.1 billion below the subcommittee's outlay allocation.

The credit guarantee limitation on the Export-Import Bank in the reported bill is $1 billion above the credit budget assumptions of the first budget resolution. This increase could result in higher budget outlays in future years.

The Senate bill is $0.4 billion in budget authority and $0.1 billion in outlays above the House-reported bill, with possible later requirements taken into account.

The President's September budget request for programs and activities funded in this bill, with later requirements, represents roughly a 12-percent reduction in budget authority and a 2-percent reduction in outlays from his March budget request. The Senate-reported bill is about 8 percent in budget authority and 2 percent in outlays below the levels requested by the administration in March.

In both cases, about one-third of the reduction was accomplished by moving $0.5 billion from the on-budget direct credit program for foreign military sales (FMS) to the off-budget FMS guarantee program. This procedure is not consistent with sound budgetary practice.

With later requirements, the Senate reported bill exceeds the President's September budget request by $0.5 billion in budget authority and $0.1 billion in outlays.

The bill provides increases of $0.8 billion for the Export-Import Bank, $0.03 billion for voluntary contributions to international organizations and programs, and $0.02 billion for Peace Corps over the levels requested by the President in September. These increases are partially offset by decreases of $0.3 billion for the various multilateral development banks and $0.1 billion for bilateral development assistance and refugee programs.

The bill, as reported, however, is consistent with the authorization levels and other provisions of the Omnibus Reconciliation Act.

Mr. President, I ask unanimous consent that a table showing the relationship of the reported bill, together with possible later requirements, to the congressional budget and the President's budget requests be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Foreign Operations Subcommittee

[In billions of dollars]

	Fiscal year 1982	
	BA	O
Outlays from prior-year budget authority and other actions completed	0.1	6.0
S. 1802 (H.R. 4559, as reported in Senate)	11.5	3.3
Possible later requirements:		
Special Defense Acquisition Fund	0.3	0.02
October 1981 pay raise	0.01	0.01
Total for Foreign Operations Subcommittee	12.0	9.2
First budget resolution level	12.7	9.3
House level (as reported)	11.6	9.1
President's March request	13.1	9.4
President's September request	11.5	9.2
Foreign Operations Subcommittee compared to:		
First budget resolution level	−0.7	−0.1
House level	+0.4	+0.1
President's March request	−1.1	−0.2
President's September request	+0.5	+0.1

Mr. KASTEN. Mr. President, I know of no further amendments on either side on this bill, and I move we go to third reading.

The PRESIDING OFFICER. Are there any further amendments? If there are no further amendments, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and to be read a third time. The bill was read the third time.

Mr. BAKER. Mr. President, there will be no more rollcall votes this evening.

The PRESIDING OFFICER. The question is, Shall the bill, as amended, pass? The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER), the Senator from Texas (Mr. TOWER), and the Senator from Connecticut (Mr. WEICKER), are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Massachusetts (Mr. KENNEDY), the Senator from New York (Mr. MOYNIHAN), the Senator from Arkansas (Mr. PRYOR), the Senator from Tennessee (Mr. SASSER), and the Senator from Mississippi (Mr. STENNIS), are necessarily absent.

I further announce that the Senator from Vermont (Mr. LEAHY), is absent because of illness.

I also announce that the Senator from Alabama (Mr. HEFLIN), is absent because of death in the family.

The PRESIDING OFFICER. Is there any Senator in the Chamber who wishes to vote?

The result was announced—yeas 57, nays 33, as follows:

[Rollcall Vote No. 383 Leg.]

So the bill (S. 1802), as amended, was passed, as follows:

S. 1802

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for foreign assistance and related programs for the fiscal year ending September 30, 1982, and for other purposes, namely:

TITLE I—MULTILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

INTERNATIONAL FINANCIAL INSTITUTIONS

CONTRIBUTION TO THE INTER-AMERICAN DEVELOPMENT BANK

For payment to the Inter-American Development Bank by the Secretary of the Treasury, for the United States share of the replenishment of the resources of the Fund for Special Operations, as authorized by the Act of June 3, 1980 (Public Law 96–259), $173,177,000, to remain available until expended: and $48,053,477, for the United States share of the increase in subscriptions to the paid-in capital stock, as authorized by the Act of June 3, 1980 (Public Law 96–259), to remain available until expended.

LIMITATION ON CALLABLE CAPITAL SUBSCRIPTIONS

The United States Governor of the Inter-American Development Bank may subscribe without fiscal year limitation to the callable capital portion of the United States share of such increase in capital stock in an amount not to exceed $609,582,129.

CONTRIBUTION TO THE INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

For payment to the International Bank for Reconstruction and Development by the Secretary of the Treasury, for the United States share of the increase in subscriptions to the paid-in capital stock, as authorized by the International Financial Institutions Act, $37,168,491, to remain available until expended, and $109,720,549 for the General Capital Increase, as authorized by section 39 of the Bretton Woods Agreements Act, to remain available until expended.

LIMITATION ON CALLABLE CAPITAL SUBSCRIPTIONS

The United States Governor of the International Bank for Reconstruction and Development may subscribe without fiscal year limitation to the callable portion of the United States share of such increases in capital stock in an amount not to exceed $1,687,728,491.

CONTRIBUTION TO THE INTERNATIONAL FINANCE CORPORATION

For payment to the International Finance Corporation by the Secretary of the Treasury, $14,447,900, for the United States share of the increase in subscriptions to capital stock, as as authorized by the International Financial Institutions Act, to remain available until expended.

CONTRIBUTION TO THE INTERNATIONAL DEVELOPMENT ASSOCIATION

For payment to the International Development Association by the Secretary of the Treasury, $532,000,000, for the second installment of the United States contribution to the sixth replenishment, as authorized by section 17 of the International Development Association Act, to remain available until expended.

CONTRIBUTION TO THE ASIAN DEVELOPMENT BANK

For payment to the Asian Development Bank by the Secretary of the Treasury, for the United States share of the increase in subscriptions to the paid-in capital stock, as authorized by the International Financial Institutions Act, $4,713,851, to remain available until expended; and for the United States contribution to the increase in resources of the Asian Development Fund, as authorized by the Act of June 3, 1980 (Public Law 96–259), $111,250,000, to remain available until expended; and as authorized by the International Financial Institutions Act, $7,847,869, to remain available until expended.

LIMITATION ON CALLABLE CAPITAL SUBSCRIPTIONS

The United States Governor of the Asian Development Bank may subscribe without fiscal year limitation to the callable capital portion of the United States share of such increase in capital stock in an amount not to exceed $42,632,409.

CONTRIBUTION TO THE AFRICAN DEVELOPMENT FUND

For payment to the African Development Fund by the Secretary of the Treasury, $41,666,667, as authorized by the Act of June 3, 1980 (Public Law 96–259), for the United States contribution to the second replenishment of the African Development Fund, to remain available until expended.

INTERNATIONAL ORGANIZATIONS AND PROGRAMS

For necessary expenses to carry out the provisions of section 301 of the Foreign Assistance Act of 1961, and of section 2 of the United Nations Environment Program Participation Act of 1973, $218,638,000: *Provided,* That not less than $134,500,000 shall be available only for the United Nations Development Program: *Provided further,* That not more than $38,000,000 shall be available for the United Nations Children's Fund: *Provided further,* That not more than $7,500,000 shall be available for the United Nations Environment Program: *Provided further,* That none of the funds appropriated under this heading may be available for the United Nations Institute for Namibia, except if the President determines and submits in writing to Congress that providing such funds will promote an internationally recognized settlement in Namibia.

TITLE II—BILATERAL ECONOMIC ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

For expenses necessary to enable the President to carry out the provisions of the Foreign Assistance Act of 1961, and for other purposes, to remain available until September 30, 1982, unless otherwise specified herein, as follows:

AGENCY FOR INTERNATIONAL DEVELOPMENT

Agriculture, rural development, and nutrition, Development Assistance: For necessary expenses to carry out the provisions of section 103, $637,485,000: *Provided,* That of this amount the funds provided for loans shall remain available for obligation until September 30, 1983.

Population, Development Assistance: For necessary expenses to carry out the provisions of section 104(b), $190,000,000: *Provided,* That of this amount the funds provided for loans shall remain available for obligation until September 30, 1983: *Provided further,* That not more than $32,000,000 shall be available for the United Nations Fund for Population Activities: *Provided further,* That none of the funds appropriated under this heading may be available for the World Health Organization's Special Program of Research, Development and Research Training in Human Reproduction.

Health, Development Assistance: For necessary expenses to carry out the provisions of section 104(c), $120,405,000: *Provided,* That of this amount the funds provided for loans shall remain available for obligation until September 30, 1983.

Education and human resources development, Development Assistance: For necessary expenses to carry out the provisions of section 105, $101,000,000: *Provided,* That none of the funds appropriated under this heading may be available for scholarships for South African students in accordance with the last sentence of section 105(a) of the Foreign Assistance Act of 1961 (as added by title III of the International Security and Development Cooperation Act of 1981): *Provided further,* That of this amount the funds provided for loans shall remain available for obligation until September 30, 1983.

Energy and selected development activities, Development Assistance: For necessary expenses to carry out the provisions of sections 106 and 107, $120,000,000: *Provided*, That of this amount the funds provided for loans shall remain available for obligation until September 30, 1983.

Loan allocation, Development Assistance: Of the new obligational authority appropriated under this Act to carry out the provisions of sections 103 through 107, not less than $316,265,300 shall be available for loans for the fiscal year 1982: *Provided*, That loans made pursuant to this authority to countries whose annual per capita gross national product is greater than $730 but less than $1,180 shall be repayable within twenty-five years following the date on which funds are initially made available under such loans and loans to countries whose annual per capita gross national product is greater than or equal to $1,180 shall be repayable within twenty years following the date on which funds are initially made available under such loans.

American schools and hospitals abroad: For necessary expenses to carry out the provisions of section 214, $12,000,000.

International disaster assistance: For necessary expenses to carry out the provisions of section 491, $27,000,000: *Provided*, That of the funds appropriated under this paragraph, not less than $10,000,000 shall be used for earthquake relief and reconstruction in southern Italy.

Sahel development program: For necessary expenses to carry out the provisions of section 121, $92,515,000, to remain available until expended: *Provided*, That no part of such appropriation may be available to make any contribution of the United States to the Sahel development program in excess of 10 per centum of the total contributions to such program: *Provided further*, That none of the funds appropriated under this heading may be used for the African Development Foundation.

Payment to the Foreign Service Retirement and Disability Fund: For payment to the "Foreign Service Retirement and Disability Fund", as authorized by the Foreign Service Act of 1980, $32,552,000.

Economic support fund: For necessary expenses to carry out the provisions of chapter 4 of part II, $2,623,500,000: *Provided*, That of the funds appropriated under this paragraph not less than $806,000,000 shall be available for Israel, not less than $771,000,000 shall be available for Egypt, not less than $100,000,000 shall be available for Sudan, not less than $5,000,000 for Poland, not less than $5,000,000 for Tunisia, and not less than $15,000,000 for Costa Rica: *Provided further*, That not more than $7,500,000 shall be available for Cyprus: *Provided further*, That $2,000,000 of the funds appropriated under this heading shall be available only for scholarships for South African students in accordance with the last sentence of section 105(a) of the Foreign Assistance Act of 1961 (as added by title III of the International Security and Development Cooperation Act of 1981).

Peacekeeping operations: For necessary expenses to carry out the provisions of section 551, $14,000,000.

Operating expenses of the Agency for International Development: For necessary expenses to carry out the provisions of section 667, $331,000,000.

Trade and development: For necessary expenses to carry out the provisions of section 661, $6,907,000.

Housing and other credit guaranty programs: During the fiscal year 1982, total commitments to guarantee loans shall not exceed $150,000,000 of contingent liability for loan principal.

International narcotics control: For necessary expenses to carry out the provisions of section 481, $34,160,000.

USE OF CERTAIN POLISH CURRENCIES

Subject to the enactment of authorizing legislation, during the fiscal year 1982, the equivalent in currency or credit of $70,000,000 in Polish zlotys (received by the United States from the April 1981 sale of United States Government-held dairy products to Poland) shall be available for use in Poland to serve United States interests, including use for activities of common benefit to the people of the United States and the people of Poland, such as joint programs in energy, agriculture, education, science, health, and culture, or for humanitarian activities.

INTER-AMERICAN FOUNDATION

For expenses necessary to carry out the functions of the Inter-American Foundation in accordance with the provisions of section 401 of the Foreign Assistance Act of 1969, and to make such contracts and commitments without regard to fiscal year limitations, as provided by section 104 of the Government Corporation Control Act, $12,000,000.

OVERSEAS PRIVATE INVESTMENT CORPORATION

The Overseas Private Investment Corporation is authorized to make such expenditures within the limits of funds available to it and in accordance with law (including not to exceed $8,000 for entertainment allowances), and to make such contracts and commitments without regard to fiscal year limitations, as provided by section 104 of the Government Corporation Control Act (31 U.S.C. 849), as may be necessary in carrying out the program set forth in the budget for the current fiscal year.

During the fiscal year 1982 and within the resources and authority available, gross obligations for the amount of direct loans shall be not less than $9,950,000 or more than $10,000,000.

During the fiscal year 1982, total commitments to guarantee loans shall be not less than $99,950,000 or more than $100,000,000 of contingent liability for loan principal.

INDEPENDENCE AGENCY

PEACE CORPS

For expenses necessary to carry out the provisions of the Peace Corps Act (75 Stat. 612), $105,000,000: *Provided*, That none of the funds appropriated in this paragraph shall be used to pay for abortions.

DEPARTMENT OF STATE

MIGRATION AND REFUGEE ASSISTANCE

For expenses, not otherwise provided for, necessary to enable the Secretary of State to provide, as authorized by law, a contribution to the International Committee of the Red Cross and assistance to refugees, including contributions to the Intergovernmental Committee for European Migration and the United Nations High Commissioner for Refugees; salaries and expenses of personnel and dependents as authorized by the Foreign Service Act of 1980, allowances as authorized by sections 5921 through 5925 of title 5, United States Code; hire of passenger motor vehicles; and services as authorized by section 3109 of title 5, United States Code; $473,000,000; *Provided*, That these funds shall be administered in a manner that insures equity in the treatment of all refugees receiving Federal assistance: *Provided further*, That no funds herein appropriated shall be used to assist directly in the migration to any nation in the Western Hemisphere of any person not having a security clearance based on reasonable standards to insure against Communist infiltration in the Western Hemisphere: *Provided further*, That not more than $7,426,000 of the funds appropriated under this heading shall be available for the administrative expenses of the Office of Refugee Programs of the Department of State.

TITLE III—MILITARY ASSISTANCE

FUNDS APPROPRIATED TO THE PRESIDENT

MILITARY ASSISTANCE

For necessary expenses to carry out the provisions of section 503 of the Foreign Assistance Act of 1961, including administrative expenses and purchase of passenger motor vehicles for replacement only for use outside of the United States, $63,500,000, to remain available for obligation until September 30, 1983.

INTERNATIONAL MILITARY EDUCATION AND TRAINING

For necessary expenses to carry out the provisions of section 541 of the Foreign Assistance Act of 1961, $41,976,000.

FOREIGN MILITARY CREDIT SALES

For expenses necessary to enable the President to carry out the provisions of sections 23 and 24 of the Arms Export Control Act, $990,900,000: *Provided*, That of the amount provided for the total aggregate credit sale ceiling during the current fiscal year, not less than $1,400,000,000 shall be allocated to Israel.

During the fiscal year 1982 and within the resources and authority available, gross obligations for the principal amount of direct loans, exclusive of loan guaranty defaults, shall not exceed $990,900,000.

During the fiscal year 1982, total commitments to guarantee loans shall not exceed $3,083,500,000 of contingent liability for loan principal.

SPECIAL DEFENSE ACQUISITION FUND

There are authorized to be made available for the special Defense Acquisition Fund for the fiscal year 1982, $341,000,000.

TITLE IV—EXPORT-IMPORT BANK OF THE UNITED STATES

The Export-Import Bank of the United States is authorized to make such expenditures within the limits of funds and borrowing authority available to such corporation, and in accordance with law, and to make such contracts and commitments without regard to fiscal year limitations, as provided by section 104 of the Government Corporation Control Act, as may be necessary in carrying out the program set forth in the budget for the current fiscal year for such corporation: *Provided*, That none of the funds available during the current fiscal year may be used to make expenditures, contracts, or commitments for the export of nuclear equipment, fuel, or technology to any country that has detonated a nuclear explosive after the date of enactment of this Act other than a nuclear-weapon State, as defined in Article IX of the Treaty on the Non-Proliferation of Nuclear Weapons, and that is eligible to receive economic or military assistance under this Act.

LIMITATION ON PROGRAM ACTIVITY

During the fiscal year 1982 and within the resources and authority available, gross obligations for the principal amount of direct loans shall be not less than $4,695,000,000 nor more than $4,700,000,000. During the fiscal year 1982, total commitments to guarantee loans shall be not less than $9,215,000,000 nor more than $9,220,000,000 of contingent liability for loan principal.

LIMITATION ON ADMINISTRATIVE EXPENSES

Not to exceed $15,115,000 (to be computed on an accrual basis) shall be available during the current fiscal year for administrative expenses, including hire of passenger motor vehicles, and services as authorized by section 3109 of title 5, United States Code: *Provided*, That (1) fees or dues to international organizations of credit institutions engaged in financing foreign trade, (2)

necessary expenses (including special services performed on a contract or a fee basis, but not including other personal services) in connection with the acquisition, operation, maintenance, improvement, or disposition of any real or personal property belonging to the Export-Import Bank or in which it has an interest, including expenses of collections of pledged collateral, or the investigation or appraisal of any property in respect to which an application for a loan has been made, and (3) expenses (other than internal expenses of the Export-Import Bank) incurred in connection with the issuance and servicing of guarantees, insurance, and reinsurance, shall be considered as nonadministrative expenses for the purposes of this paragraph.

TITLE V—GENERAL PROVISIONS

SEC. 501. None of the funds appropriated in this Act (other than funds appropriated for "International organizations and programs") shall be used to finance the construction of any new flood control, reclamation, or other water or related land resource project or program which has not met the standards and criteria used in determining the feasibility of flood control, reclamation, and other water and related land resource programs and projects proposed for construction within the United States of America under the Principles and Standards for Planning Water and Related Land Resources dated October 25, 1973.

SEC. 502. Except for the appropriations entitled "International disaster assistance", "United States emergency refugee and migration assistance fund" and the special requirements fund within the appropriations entitled "Military Assistance" and the special requirements fund within the appropriations entitled "Economic support fund", not more than 15 per centum of any appropriation item made available by this Act for the fiscal year 1982 shall be obligated or reserved during the last month of availability.

SEC. 503. None of the funds appropriated in this Act nor any of the counterpart funds generated as a result of assistance hereunder or any prior Act shall be used to pay pensions, annuities, retirement pay, or adjusted service compensation for any persons heretofore or hereafter serving in the armed forces of any recipient country.

SEC. 504. None of the funds appropriated or made available pursuant to this Act for carrrying out the Foreign Assistance Act of 1961, may be used for making payments on any contract for procurement to which the United States is a party entered into after the date of enactment of this Act which does not contain a provision authorizing the termination of such contract for the convenience of the United States.

SEC. 505. None of the funds appropriated or made available pursuant to this Act for carrying out the Foreign Assistance Act of 1961, may be used to pay in whole or in part any assessments, arrearages, or dues of any member of the United Nations.

SEC. 506. None of the funds contained in title II of this Act may be used to carry out the provisions of section 209(d) of the Foreign Assistance Act of 1961.

SEC. 507. Of the funds appropriated or made available pursuant to this Act, not to exceed $100,000 shall be for representation allowances of the Agency for International Development during the fiscal year 1982: *Provided*, That appropriate steps shall be taken to assure that, to the maximum extent possible, United States-owned foreign currencies are utilized in lieu of dollars: *Provided further*, That of the total funds made available by this Act under the headings "Military Assistance" and "Foreign Military Credit Sales", not to exceed $4,000 shall be available for entertainment expenses and not to exceed $138,500 shall be available for representation allowances: *Provided further*, That of the funds made available by this Act under the heading "International Military Education and Training", not to exceed $125,000 shall be available for entertainment allowances: *Provided further*, That of the funds made available by this Act for the Inter-American Foundation, not to exceed $2,500 shall be available for entertainment and representation allowances. *Provided further*, That of the funds made available by this Act for the Peace Corps, not to exceed a total of $4,000 shall be available for entertainment expenses.

SEC. 508. None of the funds appropriated or made available (other than funds for "International organizations and programs") pursuant to this Act for carrying out the Foreign Assistance Act of 1961, may be used to finance the export of nuclear equipment, fuel, or technology or to provide assistance for the training of foreign nationals in nuclear fields.

SEC. 509. Funds appropriated by this Act may not be obligated or expended to provide assistance to any country for the purpose of aiding the efforts of the government of such country to repress the legitimate rights of the population of such country contrary to the Universal Declaration of Human Rights.

SEC. 510. None of the funds appropriated or made available pursuant to this Act shall be obligated or expended to finance directly any assistance to Mozambique, except that the President may waive this prohibition if he determines, and so reports to the Congress, that furnishing such assistance would further the foreign policy interests of the United States.

SEC. 511. None of the funds appropriated or otherwise made available pursuant to this Act shall be obligated or expended to finance directly any assistance or reparations to Angola, Cambodia, Cuba, Laos, the Socialist Republic of Vietnam, or Syria.

SEC. 512. None of the funds made available by this Act may be obligated under an appropriation account to which they were not appropriated without the written prior approval of the Appropriations Committees and the relevant authorizing committees of both Houses of the Congress.

SEC. 513. No part of any appropriation contained in his Act shall be used for publicity or propaganda purposes within the United States not authorized before the date of enactment of this Act by the Congress.

SEC. 514. No part of any appropriation contained in this Act shall remain available for obligation after the expiration of the current fiscal year unless expressly so provided in this Act.

SEC. 515. No part of any appropriation contained in this Act shall be used to furnish assistance to any country which is in default during a period in excess of one calendar year in payment to the United States of principal or interest on any loan made to such country by the United States pursuant to a program for which funds are appropriated under this Act.

SEC. 516. None of the funds appropriated or made available pursuant to this Act shall be available to any international financial institution whose United States' representative cannot upon request obtain the amounts and the names of borrowers for all loans of the international financial institution, including loans to employees of the institution, or the compensation and related benefits of employees of the institution.

SEC. 517. None of the funds appropriated or made available pursuant to this Act shall be available to any international financial institution whose United States' representative cannot upon request obtain any document developed by the management of the international financial institutions.

SEC. 518. None of the funds appropriated or otherwise made available by this Act to the Export-Import Bank and funds appropriated by this Act for direct foreign assistance may be obligated for any government which aids or abets, by granting sanctuary from prosecution to, any individual or group which has committed or is being sought by any other government for prosecution for any war crime or an act of international terrorism, unless the President finds that the national security requires otherwise.

SEC. 519. None of the funds appropriated or made available pursuant to this Act for direct assistance and none of the funds otherwise made available pursuant to this Act to the Export-Import Bank and the Overseas Private Investment Corporation shall be obligated or expended to finance any loan, any assistance or any other financial commitments for establishing or expanding production of any commodity for export by any country other than the United States, if the commodity is likely to be in surplus on world markets at the time the resulting productive capacity is expected to become operative and if the assistance will cause substantial injury to United States producers of the same, similar, or competing commodity: *Provided*, That such prohibition shall not apply to the Export-Import Bank if in the judgment of its Board of Directors the benefits to industry and employment in the United States are likely to outweigh the injury to United States producers of the same, similar, or competing commodity.

SEC. 520. The Secretary of the Treasury shall instruct the United States executive directors of the International Bank for Reconstruction and Development, the International Development Association, the International Finance Corporation, the Inter-American Development Bank, the Asian Development Bank, the African Development Bank, and the African Development Fund to use the voice and vote of the United States to oppose any assistance by these institutions, using funds appropriated or made available pursuant to this Act, for the production of any commodity for export, if it is in surplus on world markets and if the assistance will cause substantial injury to United States producers of the same, similar, or competing commodity.

SEC. 521. None of the funds made available under this Act for "Agriculture, rural development, and nutrition, Development Assistance," "Population, Development Assistance," "Health, Development Assistance," "Education and human resources development, Development Assistance," "Energy, private voluntary organizations, and selected development activities, Development Assistance," "Science and technology, Development Assistance," "International organizations and programs," "American schools and hospitals abroad," "Trade and development program," "Sahel development program, "International narcotics control," "Economic support fund," 'Peacekeeping operations," "Operating Expenses of the Agency for International Development," "Military assistance," "International military education and training," "Foreign military credit sales," "Inter-American Foundation." "Peace Corps," or "Migration and refugee assistance," shall be available for obligation for activities, programs, projects, type of materiel assistance, countries, or other operation not justified or in excess of the amount justified to the Appropriations Committees for obligation under any of these specific headings for the fiscal year 1982 unless the Appropriations Committees of both Houses of Congress are previously notified fifteen days in advance.

This Act may be cited as the "Foreign Assistance and Related Programs Appropriations Act, 1982".

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business, not to extend beyond the hour of 7:25 p.m., in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

MILITARY CONSTRUCTION NEEDS

Mr. PRESSLER. Mr. President, I should like to note my support for the improvements at Ellsworth Air Force Base which were recently funded by the Senate's fiscal year 1982 military construction authorization bill.

A total of $36,880,000 is approved for major construction activities at Ellsworth, which is a key Strategic Air Command base located near Rapid City, S. Dak. These projects include an air-launched cruise missile facility, a flight simulator facility, and upgrading of the base's sewage treatment facilities.

In addition to these major projects, funds have also been provided for smaller construction projects which include an energy conservation investment program.

Mr. President, these are all badly needed construction projects at this important airbase. It is significant that the Ellsworth construction program recommended by this bill is second in size among all SAC bases inside the United States. That is, only one other SAC base in the United States would have more military construction under the provisions of this bill.

I point out, however, that much more work needs to be done to put Ellsworth AFB in a condition warranted by its strategic importance. I have inspected Ellsworth facilities on several occasions and have been briefed at length on what needs to be done to further strengthen the mission capability of this installation.

It is my hope that the fiscal year 1983 through fiscal year 1986 budget requests for Ellsworth will include funding for a much needed single enlisted persons barracks or dormitory, as well as funding of a new vehicle maintenance building and a security headquarters building.

Also, although the base maintenance and repair funding falls outside the scope of the military construction bill, it is important to note that the backlog of BMAR projects is still very substantial—both at Ellsworth and at other U.S. military facilities at home and around the world.

I am one who believes that we should be very careful not to allow funding for exotic new weapons programs, some of which could even be obsolete before they are ready for operation, to drive down funding for the essential nuts and bolts of our national defense.

This includes doing maintenance and repair work on a timely basis, so that bases like Ellsworth are not faced with ultimately costlier replacement construction.

ARMS CONTROL NEGOTIATIONS WITH THE SOVIET UNION

Mr. WARNER. Mr. President, I wish to call to the attention of my colleagues the letter sent by Senator HENRY M. JACKSON to President Reagan on March 24, 1981. In this letter, our distinguished colleague from the State of Washington articulates clearly and concisely the pressing need for the United States to engage in serious and comprehensive arms control negotiations with the Soviet Union.

He correctly envisions such an effort to be an essential part of a major peace offensive in which we must engage if we are to deny the Soviets the propaganda advantage they are currently exploiting to such good effect in Europe.

Since this letter was sent, events in Europe and the United States have added further impetus to the suggestions made by Senator JACKSON. Even those of us who have long admired and followed with interest the record of this great American legislator and pioneer in the field of arms control are struck by the prescience and timeliness of Senator JACKSON's remarks.

Since the Senator's letter was sent, President Reagan has proposed a program designed to modernize and restore credibility to our strategic deterrent. The President's program is an essential parallel to our policy of seeking meaningful and equitable limitations on strategic weapons at reduced levels.

In fact, I am convinced that the President's program is a necessary prerequisite for the achievement of such limitations—only a strong and balanced program of strategic force modernization will provide the incentive for the Soviets to negotiate sound and verifiable arms control agreements.

The concerns cited in the Jackson letter and the recommendations made therein provide a valuable background for all Members of the Senate on the eve of President Reagan's foreign policy address scheduled for tomorrow, November 18, 1981.

I ask unanimous consent that the full text of Senator JACKSON's letter and its enclosures be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNITED STATES SENATE,
Washington, D.C., March 24, 1981.

The PRESIDENT,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: Following up on my recent talk with you, I want to underscore the importance of your launching a dramatic, sustained American peace offensive at a very early opportunity.

I welcome the emphasis you have put on the goal of East-West arms reduction. I am persuaded the time is ripe for you to put forward a bold and imaginative proposal for serious arms reductions—a proposal challenging the Soviets to join with us in concluding an arms reduction agreement in a manner that enhances stability in the nuclear balance at sharply reduced levels of strategic forces.

We should not allow the Soviets to preempt the issue of peace. Right or wrong, our allies—particularly in Western Europe—are of the view that our country and the new Administration are unwilling to play a responsible role in the restraint of nuclear arms. You and I know this is not true, but it is a bad perception which the Soviet leaders exploit.

The fact is the Soviets are making headway with their peace propaganda among our allies in Europe; they are getting a free ride with their depiction of you and the United States as war-loving. Certain circles in West Europe, especially left-wing elements, have fallen under Moscow's spell, and are having an influence on the leadership of parties and governments out of all proportion to their numbers.

What is missing is a relentless drive on our part to shift to our side the initiative for peace—for real peace and stabilizing arms reductions. Let the Soviets respond and react to U.S. proposals—repeated, repeated and repeated. Make Moscow at least show its true colors.

This country is determined, under your leadership, to revitalize its defenses and enhance deterrence. But we do this because the defense of freedom leaves us no alternative. We are a people of peace. We take no satisfaction in channeling the genius of this nation into the building of armaments. We would far rather participate in programs for enhancing the quality of life and ending poverty and disease for decent people everywhere.

This is the down-to-earth truth that President Eisenhower sought to convey to the world in his famous address of April 16, 1953. It is the truth that I believe you should now emphasize—by a far-reaching, innovative drive on behalf of serious mutual arms reductions.

The point is that strategic forces on both sides are larger than they need to be, provided that we can negotiate with the Soviets toward a common ceiling at a sharply lower level.

The urgent task of your Administration is to fashion a plan and strategy that would provide for the mutual reduction of Soviet and American strategic nuclear forces in a stabilizing manner. Some of our friends and allies believe that any smaller number of nuclear weapons is better than a bigger number. Obviously this is not so; what counts are matters of size, deliverability, accuracy, vulnerability, mix, balance and the like. I am confident it is not beyond the capacity of your Administration to develop a responsible proposal that if agreed to by the Soviets would provide a long-term stabilization of the strategic balance on the basis of equality at a reduced level of deterrence.

I do not foresee the Soviet leaders initially welcoming such an effort. In 1974, I outlined and urged a SALT proposal to stabilize the strategic balance through substantial reductions in U.S. and USSR strategic forces.

In mid-February 1977, after meeting with President Carter and at his request, I supplied him with a detailed analysis of the severely flawed nature of the then current SALT II draft text, advising a fresh start based on salvaging a more balanced, equal agreement to avoid winding up with a disastrous, unacceptable result that would widen and deepen the Soviet strategic margin still more.

In March 1977, President Carter proposed in the SALT talks certain mutual force reductions and a ban on the deployment of new ICBM's. While I had no responsibility for his specific proposals, once they were offered, I strongly supported them. But the Administration retreated at the first Soviet objection: it did not even try to convince the Russians.

And the SALT II treaty turned out to be an unequal charter for a massive Soviet strategic buildup. Far from putting a damper on the arms competition, it added fuel to the fire.

I am under no illusion about the difficulty of negotiating a fair and balanced arms reduction treaty with the Soviets. It will take hard bargaining, patience and time. Certainly, one speech won't do it—that is just

the kickoff. The campaign must be pressed month after month, year after year if necessary. But our nation should not be deterred from championing a noble cause only because our adversaries may continue to act ignobly.

Such a genuine peace offensive on our part is an honorable counter to the shabby Kremlin slogans of peace and plenty. It will clarify to our friends and allies our dedication to stabilizing nuclear arms reduction negotiations. As a minimum, it will put Moscow on the propaganda defensive. It keeps open the possibility of achieving over time real and significant steps in the direction of such a stabilizing disarmament.

At a time when the Soviet economy is in deep difficulty, we can make a convincing case that a redirection of their emphasis away from the military sector is the best way to improve their economic well-being.

If our initiative proved successful, it would permit both sides to shift resources from the buildup of nuclear arsenals to the building up of their economies. It could mean billions of dollars in savings on strategic weapons systems. It could alleviate the atmosphere of mistrust and fear that has for so long clouded East-West relations. The energy of our peoples could be devoted to purposes more constructive and more enduring than the amassing of nuclear weapons—to the struggle against hunger and disease and human squalor, to the provision of houses instead of silos, tractors instead of ICBM's, and medicines instead of nuclear explosives. It would be a turning point in East-West relations of historic proportions.

I am taking the liberty of enclosing a speech I delivered on the Senate Floor on May 1, 1953 in support of President Eisenhower's plan for "real disarmament." I am also including an April 22, 1974 address which was my effort at that time to articulate the American vision of a peaceful world, and to assure our bargaining position for stabilizing, mutual arms reduction.

With best regards.

Sincerely yours,

HENRY M. JACKSON,
U.S. Senator.

Enclosures.

REMARKS OF SENATOR HENRY M. JACKSON

Mr. President: Not every member of this body will subscribe to every last sentence of the foreign policy address the President of the United States delivered on April 16. But when the President offered the world a plan for the regulation of armaments and the use of the monies thereby saved for assistance to the economically underdeveloped areas of the world, I believe he spoke for all of us—Republicans and Democrats alike. The President's words were these:

"This government is ready to ask its people to join with all nations in devoting a substantial percentage of any savings achieved by real disarmament to a fund for world aid and reconstruction. The purposes of this great work would be: To help other peoples to develop the underdeveloped areas of the world, to stimulate profitable and fair world trade, to assist all peoples to know the blessings of productive freedom.

"The monuments of this new kind of war would be these: Roads and schools, hospitals and homes, food and health.

"We are ready, in short, to dedicate our strength to serving the needs, rather than the fears, of the world."

In saying this, the President gave voice to the longings in the heart of every good American. This nation of ours is determined, grimly determined, to build every single tank and plane and atomic bomb needed to punish aggression and prevent World War III. But we do this because the defense of freedom leaves us no alternative. We are a people of peace. We take no satisfaction in channeling the genius of this nation into the building of sterile armaments. We would rather, far rather, be participating in great programs for lifting poverty and disease from the shoulders of decent people everywhere.

It is this down-to-earth truth that the President's speech tried to make known to the world.

You will recall, Mr. President, that three years ago, and again in 1951, our late and beloved colleague, Senator Erien McMahon, sponsored a resolution asking the Senate to go on record as supporting the objectives outlined in the President's speech of April 16—the objectives of rascal-proof regulation of weapons production, and the use of resources thereby saved for constructive tasks on a world-wide basis.

Senators from both sides of the aisle joined with Brien McMahon in sponsoring Senate Concurrent Resolution 47. Along with Republicans and other Democrats, I introduced an identical resolution in the House of Representatives at the same time. This resolution proposed:

"That the Congress of the United States advocate and recommend an immediate special session of the General Assembly of the United Nations for the single purpose of stopping the armaments race by speeding agreement upon effective and enforceable disarmament and control covering conventional armaments, biological and chemical agents, and atomic and hydrogen bombs;

"That the Congress of the United States, as tangible evidence of its good faith, pledge itself to appropriate and to make available to the United Nations—when an effective and enforceable system of world-wide disarmament and control takes effect—a substantial portion of all money saved for a period of five years, such sums to be expended by the United Nations for peaceful development of atomic energy, technical assistance programs to underdeveloped areas, and general economic aid and assistance to all war-ravaged countries."

It may well be that President Eisenhower's words were inspired by recollection of this resolution. But this is of little import—Brien McMahon took no pride of authorship in his plan for peace with justice.

I need not remind this chamber that no person of our generation worked harder to enlarge the armed might of the United States than Senator McMahon. It was my privilege to sit on the Joint Committee on Atomic Energy while he served as its honored Chairman. I observed his total dedication to the twin cause of multiplying our atomic strength and, hand in hand with this, finding some way of abolishing these frightful armaments, and all other weapons as well, from the arsenals of the world.

When he peered into the future, Brien McMahon saw what the President of the United States saw. He saw what all of us must see, unless we close our eyes to the meaning of the onrushing arms competition. If the road before us continues without turning, the future promises at best a world living in fear of annihilation—a world in which our treasures are drained away in the manufacture of weapons which cannot feed a single hungry person or ease the pain of a single man or woman racked by disease. And that is the best we can hope for if armaments continue piling up on both sides of the Iron Curtain at an accelerating rate. If history is to be our guide, we must assume that eventually such an armaments race will spill over to outright global war.

In truth, the future holds only two eventual alternatives: atomic war—a war made hideous beyond imagination by the new destroyers of men and all their workers, or atomic peace—a peace made rich beyond imagination by the power of modern science and technology freed for peaceful tasks.

Mr. President, I will now reintroduce Senate Concurrent Resolution 47. A resolution of identical wording has already been reintroduced in the House. Senators from both parties are joining with me in this resolution. I am particularly proud to have as one of my co-sponsors the Chairman of the Foreign Relations Committee, the Senior Senator from Wisconsin.

I would not presume for an instant to predict that the Soviet rulers will be willing to join with us and the other nations of the free world in a plan for carrying on a world-wide crusade against hunger and disease and human squalor. I see nothing in the conduct of the new Soviet regime which would make for confidence on this score.

Yet I cannot believe that our nation must be deterred from subscribing to a noble goal simply because our adversaries may continue to act ignobly. This country has prospered and grown great in the service of noble causes, and we can forget this only at our peril.

As a minimum, moreover, the resolution on whose behalf I now speak will let men everywhere know who bears the responsibility for the fears and tensions that now beset the world. It tells the Kremlin: Put up or shut up. If this resolution is adopted by the Congress, and if the Soviet rulers refuse to join in a program which will give the world tractors instead of tanks, houses instead of barracks, and medicines in place of explosives—if the Kremlin refuses to become partner to such a program, the communist slogans of peace and plenty will become a mockery.

I urge with all the power at my command that every member of the Senate, by supporting this resolution, now unite behind the President of the United States in our quest for lasting peace.

[From the CONGRESSIONAL RECORD, Apr. 23, 1974]

ARMS REDUCTION, DETENTE AND SALT

Mr. MANSFIELD. Mr. President, as Senator JACKSON said in his address of April 22 to the Overseas Press Club:

"The issue facing us is not whether we want a détente, but how to achieve a real détente that will produce results favorable to a more peaceful world."

We are now negotiating with the Soviets in SALT II, and the outcome of these negotiations can decisively affect the real meaning détente will have. I believe it is of the utmost importance that SALT II follow a course that is consistent with the national security of the United States and the prospects for a SALT II Treaty based on United States-Soviet equality.

In this spirit, Senator JACKSON has set forth a U.S. SALT proposal to stabilize the strategic balance through substantial reductions in the strategic forces of both the United States and the Soviet Union. As he said:

"It is time for serious arms reductions by both sides—a stabilizing disarmament."

I wish to bring to the attention of my colleagues the full text of Senator JACKSON's constructive and statesman-like address. I urge the widest reading of his remarks. If agreed to, Senator JACKSON's program would mark an historic turning point in East-West relations, and could dramatically increase the confidence of all the world's people in the prospects for a cooperative and stable peace.

I ask unanimous consent that the full text of Senator JACKSON's address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

DETENTE AND SALT

(By Senator HENRY M. JACKSON)

In recent years, and especially in recent months, the foreign policy of the Nixon Administration has been centered on the development of a relationship between East

and West which they have called detente. No matter how hard or in which direction it has been punched—in the Middle East, in the SALT negotiations, on matters of human rights—the foreign policy of the Administration has revolved, like a tether ball, around the pole of that detente.

The detente has gone from a dream to an incantation without acquiring a definition along the way. And we have been left without a clear sense of where we are going or, for that matter, a common understanding of where we have been.

In its most fundamental sense detente must mean a relaxation of tensions accompanied by an effort to achieve mutual accommodation through the negotiating process. Defined in this manner, as a process of negotiation, it has the broad support of the American people. But like any process, the process of detente must be judged by the substantive results of the negotiations themselves and by the actual behavior that follows after agreements are negotiated.

Thus the issue facing us is not whether we want a detente, but how to achieve a real detente that will produce results favorable to a more peaceful world.

The centerpiece of the 1972 Moscow summit and the first test of the product of detente was the treaty on anti-ballistic missiles and the interim agreement on strategic offensive weapons—SALT I. I had considerable misgivings about the SALT I outcome, especially the interim agreement. The military advantage that the interim agreement conferred on the Soviets was in my judgment, an inauspicious beginning.

Now we are engaged in SALT II and it is this set of negotiations, perhaps more than any other, that will determine what real meaning detente will have. I welcome this opportunity to share with you a proposal that could stabilize the strategic balance through substantial reductions in the strategic forces of both the United States and the Soviet Union. In the course of my remarks tonight, which are directed to the SALT II negotiations, I have tried to develop a new direction in the effort to bring strategic arms under control—a direction based on the search for the sort of wide-ranging disarmament that would do much to bring us closer to a genuine detente and a more peaceful world.

In recent months we have seen the development by the Soviet Union of a significant number of new weapon systems incorporating an impressive range of new and costly technology. Not only have the Soviets achieved a genuine MIRV capability, but they have done so by developing two quite distinct MIRV technologies.

They have tested a whole new generation of intercontinental ballistic missiles, land and sea based, incorporating new technologies as well as new launch techniques. They have developed a mobile, land-based ICBM.

They have moved to increase by a very substantial factor the throw weight of their missile forces despite the fact that they already enjoy a threefold advantage in this area. These developments, all of which have come to light since the SALT interim agreement which was supposed to limit offensive weapons, have individually and in combination, added significantly to the offensive potential of the Soviet missile forces.

In assessing the significance of these developments, all of which are consistent with the often ambiguous terms of the SALT interim agreement, it is necessary to digress for a moment to consider the rationale by which the interim agreement was defended.

The numerical disadvantage into which the United States was frozen by the SALT I interim agreement was held by some to be effectively offset by our technological superiority. The most obvious American technological advantage—obvious in part because of the frequency with which Dr. Kissinger reiterated it—lay in the fact that we had achieved a MIRV capability and the Soviet Union had not.

Today our monopoly in MIRV technology has vanished like last year's snow and the lead in this area that we still possess by virtue of our earlier development of MIRV's can be expected to diminish rapidly as time goes on. This is neither novel nor surprising. In the long run—made longer if we find ourselves forced into a technological arms race and shorter if we do not—technology tends to even out.

That is the history of technology; and it is, in particular, the history of military technology. Given the numbers and throw weights agreed to in the SALT I interim agreement, under which the Soviets enjoy a protected advantage, technological equality will mean Soviet superiority in strategic weapons.

In the final analysis, an arms control agreement will not be stable if it freezes for one side an advantage in quantity while the other has to rely on an edge in quality that it cannot maintain. In the interim agreement we agreed to inferior numbers but the Soviets did not agree to inferior technology. We should never have presumed—I, for one, did not—that they would fail to seek the combination of superior numbers and comparable technology that add up to overall superiority; and this is precisely the direction that they have chosen.

In the current SALT II negotiations the Soviets are seeking to consolidate the advantage they obtained in the interim agreement while pressing for equality in technology. Again and again when the interim agreement was before the Senate I warned that this would be the Soviet strategy at SALT II. My amendment to the authorization for the interim agreement placed the Congress and the Administration on record on this issue by insisting that the interim agreement was not an acceptable basis for a SALT II treaty.

Now, with negotiations underway, we find that, just as expected, the Soviets have actually hardened their position. Far from viewing SALT II as an occasion to search for the sort of stable strategic balance that can result only from equality, they are insisting on a SALT II arrangement that would widen and deepen their strategic margin still further.

The response of the Administration to this situation has been disappointing in the extreme. For rather than concentrating on the design and presentation of an arms control proposal that could form the basis for a long-term stabilization of the strategic balance, the Administration has concentrated on quick-fix, short term proposals that can be readied in time for the forthcoming June summit meeting in Moscow.

In their desire to preserve the impression of momentum in the SALT negotiations, the Administration has abandoned its previous conviction that the essential purpose of a follow-on agreement should be to rectify the imbalance of SALT I. In their haste to meet an arbitrary and politically expedient self-imposed June deadline, the Administration has now begun to entertain Soviet proposals which are inimical to the national security of the United States and to the prospects for a SALT II treaty based on U.S.-Soviet equality.

Kept on such a course, SALT II is doomed to fail in the supreme mission of reducing the risk of mutual destruction. Indeed, instead of putting a damper on the arms race, such a failure would add fuel to the fire.

Given this situation, I am persuaded the time is ripe for the United States to put forward a bold and imaginative proposal for serious disarmament—a proposal that will test uncertain Soviet intentions by inviting them to join with us in concluding a far-reaching agreement to bring about a measure of stability in the nuclear balance at sharply reduced levels of strategic forces.

Instead of arms limitation agreements that do not limit, it is time for serious arms reductions by both sides—a stabilizing disarmament.

In outlining my proposal it is useful to begin by recalling the numbers agreed to under the terms of the SALT I interim agreement, according to which the United States may have no more than 1,054 intercontinental ballistic missiles. This force consists principally of Minuteman missiles that are termed "light" (in contrast to "heavy") under the definitions worked out in conjunction with the interim agreement. For their part, the Soviets are permitted 1,618 intercontinental ballistic missiles of which approximately 1,300 are of the "light" variety.

The other 300 Soviet ICBMs are "heavy"—so heavy, in fact, that these 300 alone carry as much "throw weight" as the entire permitted U.S. force of 1,000 Minuteman missiles. With respect to the Soviet missile force the terms "light" and "heavy" are misleading because the missile that the Soviets apparently intend to deploy as a substitute in the "light" category for the missiles in that category at the time of the interim agreement are several times more powerful, several times "heavier" than our comparable systems.

At sea the interim agreement provides that the United States may have up to 44 missile-firing nuclear submarines containing 710 launch tubes. The Soviets are permitted up to 62 comparable submarines, with 950 launch tubes, in addition to a number of older type submarines. The Soviets are now engaged in building up to these levels.

I believe that strategic forces on both sides are larger than they need to be, *provided* that we can negotiate with the Soviets toward a common ceiling at a sharply lower level.

Therefore I propose that we invite the Soviets to consider a SALT II agreement in which each side would be limited to 800 ICBMs and to no more than 560 submarine-launched missiles, equivalent to 35 missile-firing submarines of the Poseidon type. Long range strategic bombers, which were not included under the interim agreement, would also be limited to 400 on each side. Because the throw weight of the Soviet missile force is so much greater than that of our own, the two SALT delegations would be instructed to negotiate a formula for varying these basic numbers so as to bring the throw weight of the two intercontinental strategic forces into approximate equality.

The numbers resulting from the negotiating process need not be precisely the numbers outlined here, although I believe that significant variation from these numbers, if essential to successful negotiation, ought to move in the direction of further reductions rather than upward adjustments.

Because the strategic forces of the countries are structured differently at present and because we are always searching for ways in which to reduce the potential vulnerability of our deterrent, the treaty need not follow the precise numbers for each type of weapon system I have suggested—so long as the aggregate total of intercontinental strategic launchers was 1,760 or less. Reductions to a level of equality would be carried out, in phases, over a period of time to be negotiated.

A treaty reflecting the essential features that I have outlined here would represent a real and significant step in the direction of stabilizing disarmament. It would put to rest many of the misgivings that we now have that the Soviets are seeking to attain strategic superiority by consolidating their advantage in SALT I. It would permit both sides to shift their resources from the building up of nuclear arsenals to the building up of their economies.

The Soviet Union has turned to the United

States for economic assistance, for our capital, our agricultural produce and our advanced technology. So long as the Soviets suport the greatly exaggerated military sector of their economy at anything approaching current levels, an American program of subsidized economic transactions and the transfer of sophisticated technology, whatever its intended purpose, will inevitably amount to aid to the Russian army, naval and air forces.

At a time when the Soviet economy is in great difficulty we ought to be able to persuade them that a reordering of their priorities away from the military sector is the best way to achieve economic well-being. Adoption of my proposal could be an important step along a path that could lead eventually to billions of dollars in savings on strategic weapons systems.

It would enable us both to reorder our priorities.

If agreed to, it would mark a turning point in U.S.-Soviet relations of historic proportions. It would carry us to the brink of peace.

Such an accord could transform the atmosphere of mistrust and apprehension that has clouded the horizon of East-West relations since the end of World War II. It would add immeasurably to the confidence of both our peoples, indeed, of all mankind, that the grim prospect of thermonuclear war can be set aside and our energies devoted to purposes more constructive and more enduring than the amassing of the weapons of war. It would be, if ever there was one, a genuine conceptual breakthrough.

In the new and more hopeful world that would result, we could look forward to a broadening of the foundation of mutual accommodation, a deepening of the spirit of cooperation in trade and commerce, science and technlogy and the arts, and in the freer movement of people and ideas.

This is a program for the beginning of a more peaceful world. It is worthy of our best efforts. And I am committed to do whatever I can to bring it about.

I am under no illusion about the difficulty of negotiating an arms reduction agreement along the lines outlined here. It will take time and hard bargaining. The view of some in the Administration that force reductions are not negotiable is premature; and there are many who do not share this judgment. After all, it was Henry Kissinger himself, who warned—in his book "The Necessity for Choice"—that to reject sound proposals because they appeared to be non-negotiable was to acquiesce in negotiating on Soviet terms.

Some weeks ago I urged the President to consider the program that I have outlined here tonight. The response has not been encouraging. The refusal of the Administration to consider seriously a program for Soviet-American force reductions is as disappointing as the tendency to seek a quick cosmetic agreement in June is dangerous.

There is no critical point for negotiations that will be passed if June comes and goes without a follow-on SALT arrangement. There is nothing unique about the month of June that would justify an extension of the SALT I interim agreement and thereby legitimize its terms beyond 1977 and prejudice the prospects for a meaningful and stabilizing SALT II treaty.

I am not content to let the matter rest upon the complex and multi-purpose judgments of an embattled White House, or with a Department of State whose passion for momentum is sometimes indifferent to the direction in which it is headed. I have today requested, as Chairman of the Arms Control Subcommittee of the Senate Committee on Armed Services, that the Secretary of Defense undertake an immediate and thorough assessment of my arms reduction proposal for transmission to the Subcommittee.

Adoption of this proposal would mark a radical departure from the tentative and often marginal approach to arms control that we have followed in SALT. Reductions on the scale I am proposing will encounter opposition, not least of all from those in the military services whose training, experience and orientation are likely to militate against strategic force reductions in general, and extensive reductions in particular. While it would be imprudent to discard the professional judgment of the military and irresponsible to ignore their advice, I believe that we must not allow their skepticism to stand in the way of a proposal which will enhance our security.

I am confident that American military planners can be persuaded of the advantages of bilateral cutbacks in strategic weapons and that they too, in the final analysis, reflect the hopes we all share for a more stable strategic balance and a more peaceful world. I would hope that the Soviet military, which has been unreceptive to proposals such as this in the past, would give careful consideration to the promise of a better life for the Soviet people, who could be freed from part of the enormous burden of the arms they now bear. Here the job of persuasion must fall to the Politburo, and to them I am simply saying: Let us break with the troubled past and seek a more fruitful and secure future for both our peoples.

AVERELL HARRIMAN

Mr. PERCY. Mr. President, as Gov. Averell Harriman quite appropriately receives numerous tributes these days on his celebration of 90 vigorous and illustrious years, I was especially struck by Philip Geyelin's column in the Washington Post of November 14.

Respected journalist Phil Geyelin has concisely captured several Averell Harriman traits that are central to the significant service Averell Harriman has given his country.

First, as a man of considerable private fortune and active clout in the business world, he did not have to undertake—or stick to—a second career of public service at all. That he did it, and stuck with it, marks Averell Harriman as the very personification of the most able of individual Americans' commitment to the common welfare that is fundamental to the healthy functioning of our democracy.

Second, he kept his eye resolutely on the object of the exercise—the national security and the national welfare.

It was not beneath Governor Harriman's dignity to take a position at the Department of State in the 1960's less high ranking than the one he had previously held. The sole criterion for him was that there was an important job to be done that he was well qualified to do. Not for Averell Harriman are the ego trips so common to the official Washington scene, all too often to the detriment of our Government's policies and reputation.

Finally, and most important of all, in his half century of public service Averell Harriman has amassed an unparalleled depth of experience with key international issues and actors.

When I met with Soviet leaders in the Kremlin a year ago, I was facing in President Brezhnev a man who had already led his country for 16 years. Foreign Minister Gromyko has been in that position for 24 years. Defense Minister Ustinov has had similar defense industry responsibilities since 1941. They were facing their fourth U.S. administration in 6 years. Dealing with, negotiating with, nations as powerful and dedicated to their own self-interest as the Soviet Union is tough, serious business. It is highly desirable that we have available public servants who have been on the scene long enough to know how to represent the United States effectively in such situations.

In Averell Harriman, we have been so blessed. And he, in turn, has been blessed to have by his side his devoted, beautiful, and talented wife, Pamela, and the devoted support and undying admiration of their host of friends.

Mr. President, I ask unanimous consent to have printed in the RECORD the full text of the Phil Geyelin's November 14 Washington Post column.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

AVERELL HARRIMAN: A GIANT

(By Philip Geyelin)

It was August 13, 1950. W. Averell Harriman was returning home from one more delicate mission—as President Truman's emissary to General Douglas MacArthur. He was about to take up another dicey piece of business as Truman's foreign policy coordinator.

Reporting in a late evening "newsmakers" broadcast, Walter Cronkite had this to say of the former almost-everything in American politics and diplomacy whose 90th birthday tomorrow was dedicated this week, at a fund-raising dinner, to the fortunes (material as well as political) of his beloved Democratic Party:

"Harriman could have been a playboy. He was born with a $70,000,000 silver spoon in his mouth . . . went to Groton and Yale . . . [then] into banking, became an eight-goal polo player, even developed a sort of upper-class stoop, a slight bow to boredom. But this millionaire was made of considerably sterner stuff. . . . Today Harriman seems to be a man devoted solely to selfless service to his country."

"Selfless service"—it sounds smarmy, unless you happen to be fed up to here with the rancid condition of American statescraft as it comes across these days: the obsession with "turf"; the "guerrilla warfare"; the who's-up-who's-down, who's-on-the-skids speculations of breathless analysts. Against that backdrop, a review of the record of Averell Harriman shines bright as a timely reminder to today's pushers and shovers of the purposes they are supposed to be serving—of what public service, at its best, is all about.

What it was all about, in Averell Harriman's case, was almost a half-century of reflexive, fire-horse pawing and champing at the fire bell's first ring. When Cronkite spoke of a "tall, stooped, unsmiling man who wearily climbed down from the big Constellation at Washington's National Airport," Harriman was 59 at that time and "wearily" was apparently the operative word. The way people talked about him 31 years ago made Harriman sound sometimes like a prime candidate for early retirement.

New York Times columnist C. L. Sulzberger, in an album of memoirs entitled "A Long Row of Candles," offered these snapshots of that period: "When Averell came in, he looked ghastly. He is visibly overtired and

thin . . . [and on another occasion] He looks tired and worn . . . [and on another] He really looked bushed . . . [and again] He looked poorly and has a tic in his eye . . . [and in 1951] Last week he worked straight through from 8 a.m. until 7 a.m. the following morning. That's too much for a man of sixty."

As it turned out, it wasn't. He had already served two presidents over 17 years: Franklin D. Roosevelt, as New Deal manager, lend-lease coordinator in London, wartime ambassador in Moscow; and Harry Truman as promotor and roving ambassador for the Marshall Plan. Still ahead was a mind-boggling succession of jobs: ambassador to London, secretary of commerce, nuclear test ban negotiator, undersecretary of state, Vietnam peace negotiator, and a half-dozen special presidential missions—not to mention governor of New York.

He voted for Al Smith in 1928 and became a Democrat for life because he was "very disturbed by the fallacies of the Republican Party, both domestic and foreign," he explained in a long conversation the other day. "I am just about always disturbed about something—you have to be."

He says he "can't get as excited about some things as I used to when I could put on a hat and do something about it." But when I called on him, he was hunched up, inches away from his television set. Israeli Prime Minister Menachem Begin was holding forth on ABC's "Issues and Answers," and if Harriman wasn't excited, his muttering suggested that he was, let's say, disturbed.

He was also philosophical. "Every situation always looks the worst it's ever been," he replied, when asked about the current international scene. "But these questions get solved because they have to be solved."

Does the man who dealth with Roosevelt and Churchill and Stalin subscribe to the theory that these men were giants—and that there are no giants on the contemporary stage? "History makes them giants, because what they do becomes important," is his answer. "But they are not giants when they do it—there will always be somebody around to do what's needed."

Without vanity but by way of illustration, he recalls that "everybody thought I was crazy" to accept a comedown from undersecretary of state to assistant secretary in the 1960s. "But it didn't bother me, because I knew I had a job to do. When something needed doing, I usually started to do something about it." He doesn't think that's unique—"there are many Americans who can do something about these things."

He's probably right. But there are not many—or at least not all that many now in action—who fit the test of selfless service set down by George Kennan, Harriman's No. 2 man in Moscow in the war years. In his "Memoirs" in 1967, Kennan wrote of Harriman:

"No diplomatist ever executed more punctiliously [his] instructions. . . . None—be it said to his eternal credit—was ever less inclined to distort the record however imperceptibly, in order to show himself and his performance off to good advantage. . . . The United States has never had a more faithful public servant."

DIANE DAVIES HARDIN

Mr. PERCY. Mr. President, at one time or another, we all come to realize how very much our lives have been enriched and made worthwhile because of the way we have been touched by a close friend. My own life has been so affected by a number of good friends, one of whom is Dave Hardin of Wilmette, Ill. He is an ordained minister, business leader, and chairman of Market Facts, Inc. of Chicago.

Through the years, I have not only been priviledged to know him as a friend, but I know what a devoted husband and father he has been.

Dave recently lost his wife Diane. At the funeral services in early September, he gave the eulogy himself. I wish to share it with my colleagues so that they might also share in the tragedies and joys of the bond between Dave and Diane and in the wonderful relationship Diane had with her beloved husband, wonderful children, and the world around her.

I ask unanimous consent to have printed in the RECORD the eulogy to Diane Davies Hardin.

There being no objection, the eulogy was ordered to be printed in the RECORD, as follows:

DIANE DAVIES HARDIN

(December 20, 1931–August 31, 1981)

For the past few years, it became fairly clear that I was likely to outlive Diane. Naturally, as we tend to do, I thought often about what her family and friends should know about her and what I would like to say about her. I felt several compelling reasons for wanting to say something.

First, I had a sense of injustice about her life and wanted to be sure that others shared it. Second, I had a strong need for people to admire Diane, because I felt she had done so much with such a poor start and not enough caring in her life. So, I waited and then on Monday night, Diane quietly slept her way into the Lord's hands.

In the past few years as her faith has grown more positive, so did her thoughts and her words. Her last word on Monday night, in response to my question about whether she was warm enough, was "Absolutely". Like all marriages, one of us was never warm enough, and she was that person in our marriage. About an hour later, she said "yes" to God and off she went.

When I sat down last night to organize the thoughts that I have had for several years about her unfortunate scenerio, the words simply wouldn't come. Finally, it came to me that I was dead wrong about why I wanted to say something. Her life was not an unfortunate one at all. It was a challenging and all inspiring adventure. Diane had been on a journey for her Lord. She had had an assignment, she had finished it and she had gone home. And, I hope she is enjoying what we are saying here today.

She certainly had a difficult and a hard life—separated from her father at the age of four, a victim of too many divorces, and too many homes, and too many schools, and not enough caring—eleven schools in twelve years, and no one caring to get her to college. A gentle, but very weak mother who sold everything in their house but Diane's bed and bureau to cover an alcoholism problem when Diane was eleven years old.

What was the real result for Diane? It was to become a person who could listen, who could empathize, who could understand the hurt and loneliness of others.

Then fourteen years ago she discovered she had multiple sclerosis and her world gradually collapsed. Most of you know the progression—the cane, the walker, the wheelchair, the terrible fatigue, the humiliating incontinence, the blindness and finally the inability to speak. Where did it lead? It led us to a lot of places. It led to a service on a Sunday morning in March, ten years ago, at a CLC meeting where Ben Johnson said, "If you want Jesus Christ to take over your life, just stand up where you are". Diane mumbled, "Why am I fighting the Lord any longer? With tears in her eyes, she stood up and committed herself to the Lord for good.

And she took me with her—it took me a little longer, but she took me with her. And, I think she nudged a few of the rest of us on the way.

That journey led us to the Christian healing services of Katherine Kuhlman, truly a saint, a great servant of God. A spiritual healing occurred, as we saw God at work in an unquestionable, unbelievable fashion.

One of the songs we are going to sing today was Diane's great favorite (we always sang it there); "How Great Thou Art".

It led her to a life of constant time alone with God, unable to read or watch television, she chose to listen mostly to the Moody Bible radio station. She once told me, "You know, I know so much now about God and the Bible, and I don't think anyone knows that".

Her sense of humor never left her. While she knew she was on a journey for God, it wasn't her choice of routes—it never is—and she once said, "I know the Lord loves me, but I really think some dumb angel has misplaced my file." Or, one night, when I came home she said, "What did it look like", and I said "What did what look like?" She said, "The truck that hit me".

Just two weeks ago today we were in Boston on vacation. Someone had provided us with a boat, and we were going out into the Boston Harbor. When we took the wheelchair down to the dock, and lifted her over the railing, her shoes fell off. I was always letting her shoes fall off.

The shoe fell into the water between the dock and the boat. It was the only pair of shoes we had with us. We eventually got it out, but when the captain was trying to fish it out, she mumbled to me, "It's okay, I don't use it much".

Her life became almost cloistered. She knew what to do with it most of the time. She wouldn't watch soap operas because she thought they were addictive and not very meaningful for where she was. Instead she prayed, and she pondered. And, as a result, I honestly think Diane became reconciled to the whole world. Even to the point of reviewing all of her relationships and writing her mother-in-law to ask forgiveness for not having always loved her enough.

She sensed problems for her friends and she prayed for them. Once she prayed for some carpeting to be delivered at a friend's home on time; and I said, "That's an interesting prayer." Her response was, "Their marriage needs that carpeting to be delivered on time". And I'm sure it did.

She loved you all. I think her attitude was personified by the way she responded to people who would show her snapshots or pictures of their child or their grandchild. They would hand them to her, she would look at them and say, "How lovely" or "how cute". And, a good share of the time she was holding them upside down.

She felt so lucky to have Nancy and Jan and Amy. She cried with joy when she first saw Amy in the hospital, because as she said, "You know I wouldn't know how to raise a boy".

Last night I asked the girls and a couple of her friends for some words to describe her. I heard words like: "gentle", "serene", "accepting", "unselfish", "loving without judgment", "caring, courageous and uncomplaining".

Now, lest you begin to feel I have kind of lost touch with reality, let me tell you there was a lot of anger and there was a lot of tears, but that's part of the process of our journey—each of our journeys. If there is one meaningful thing that Diane would like to see come of this memorial service, it would be to see us all do a little more caring—see us all take a step or two that we might not otherwise take, in memory of her, to care for

someone—to make a call or see someone—to forgive someone that we might not otherwise forgive for something.

What that would really be if we did it—what an event it would be for her and for our Lord. To close, I just want to say that Diane's life was not deprived. She was just on a journey for the Lord—a powerful journey for me—a great one for our girls, our families, and our friends. We love you all for coming.

Jesus said in Matthew, "Come unto me all ye who labor and are heavy laden, and I will give you rest". Diane is resting now.

PRESIDENT CARTER'S SUCCESS IN FOREIGN POLICY

Mr. PELL. Mr. President, last week the Boston Globe featured a very thoughtful piece by columnist William V. Shannon on the achievements of former President Jimmy Carter in the area of foreign affairs. Mr. Shannon cites 10 important successes including the Camp David agreement, the negotiation of SALT II, and normalization of relations with China to support his argument that President Carter has an impressive record as a "peacemaker and a peacekeeper." He suggests that history will prove Jimmy Carter to be one of America's better Presidents. I readily agree.

In his 4 years as President, Jimmy Carter approached some of the most complex problems in foreign policy with courage, persistence, and determination to find solutions that would promote peace, security and the dignity of the individual. His successes should be recognized and applauded. I hope that in time President Carter will receive the credit which he so justly deserves for making important contributions to international peace and stability.

Mr. President, I highly recommend Mr. Shannon's column to my colleagues and ask unanimous consent that the full text of his column be inserted in the RECORD at this point.

There being no objection, the column was ordered to be printed in the RECORD, as follows:

SCORE 10 FOR CARTER

(By William V. Shannon)

One year ago today, Jimmy Carter lost the White House to Ronald Reagan. In my view, it was a serious misjudgment by the American people. They substituted a talker for a doer, a showhorse for a workhorse.

When historians begin to arrive at a consensus, they will rank Carter as one of our better Presidents. Since I spent all but the first few months of Carter's term serving abroad as one of his ambassadors, I am not a wholly disinterested witness. I am also more familiar with his record in foreign affairs than in domestic policy. On that foreign record alone, however, he has at least 10 achievements that will make his historical reputation secure.

Number one: He negotiated the Camp David agreement. I can think of no other President who mastered the intricacies of a complex major dispute as Carter mastered the Israel-Egypt dispute and who played so crucial a personal role in moving that dispute from stalemate to solution. Begin and Sadat shared the Nobel Peace Prize but both would probably have agreed that Carter was the man who deserved it.

Number two: He initiated the Panama Canal treaties and shepherded them to ratification. The United States still has serious problems in Central America, but think how much worse they would be if the canal were still a festering issue and guerrilla warfare against our troops in the Canal Zone were a real or potential danger. There was no natural constituency favoring the treaties. Insofar as there was any public interest, it was hostile. In achieving ratification, Carter carried off a brilliant tour de force of political initiative and creativity.

Number three: Carter made possible the peaceful transition from white-controlled Rhodesia to black-controlled Zimbabwe. There was strong pressure from the American business community in 1979 to recognize the "internal settlement" of Ian Smith and Bishop Muzorewa. Sen. Jesse Helms (R-N.C.) rounded up 39 senators in support of a resolution to have the United States drop its support for UN sanctions against Rhodesia. If Carter had caved in to this pressure, Smith and Muzorewa would never have gone to the London conference that produced last year's settlement. That is why Prime Minister Mugabe of Zimbabwe virtually endorsed Carter for re-election when he visited the White House in September 1980.

Number four: Carter extended full diplomatic recognition to Mainland China, finishing what Nixon began. Carter, who was trying to put our relations with every Communist country on a realistic basis, would have renewed relations with Cuba and Vietnam if either of those countries had been willing to meet him half-way.

Number five: Working through the canny politicking of Robert Strauss abroad and on Capitol Hill, the Carter Administration concluded the multilateral trade agreement and had it approved by Congress. This was the most important victory for liberalized trade since the Kennedy Administration.

Number six: When it was necessary to do so, Carter stood up to the Russians. After their invasion of Afghanistan, he had the courage in an election year to propose unpopular measures such as draft registration, a ban of US participation in the Olympics and a ban on further grain sales to the Soviets. Reagan criticized the first two and has now abandoned the third. Americans may think he is tougher than Carter, but does the Kremlin?

Number seven: Carter persuaded Greece to resume full military participation in the North Atlantic Treaty Organization and persuaded Congress to resume arms sales to Turkey.

Number eight: Carrying forward the bipartisan policy of previous administrations of wooing Eastern European countries to loosen their ties with the Soviet Union, Carter returned the crown of St. Stephen to Hungary. This symbol of Hungarian nationhood had been in US hands since 1945. Carter's return of the crown was of much more lasting significance in Eastern Europe than his vastly overcriticized delay in visiting Yugoslavia after Tito's death.

Number nine: He negotiated the second Strategic Arms Limitation Treaty. In the post-Afghanistan atmosphere, he had to postpone seeking ratification of SALT II. But if he had been re-elected along with a Democratic-controlled Senate, he would have sought and in all likelihood achieved its ratification this year. It is worth remembering that Carter was never defeated on a major foreign policy issue in Congress in four years.

Number ten: Carter stood up for human rights around the world. After the disgusting cynicism of Nixon and Kissinger, he restored America's good name.

As a peacemaker and a peacekeeper, Carter in four years compiled an exemplary record. He need not fear posterity's judgment.

THOMAS F. GILBANE'S MAGNIFICENT LEGACY

Mr. PELL. Mr. President, I would like to share with my colleagues the legacy of a dear friend who has built towering buildings but whose compassion and friendship has eclipsed even the magnificence of his buildings.

I would add here that, just yesterday morning, I had the opportunity to participate in the ground breaking of one of his latest projects, the new Federal building in our capital city of Providence.

Thomas F. Gilbane, 70, died November 7 in Providence, R.I. Throughout his life, Tom used his many talents to enrich countless lives, particularly the lives of young Rhode Islanders.

A native of Providence, Tom was chairman and chief executive officer of the Gilbane Building Co., one of the largest construction firms in the United States.

Under his leadership, the company built or supervised the construction of some of the larger structures in the country—including the National Air and Space Museum here in Washington, D.C.

His company received the Build America Award—the highest honor conferred by the Associated General Contractors—for the National Air and Space Museum.

Although he left an outstanding and impressive physical legacy, Tom has left an even more outstanding spiritual legacy—one clearly built through his work with young Rhode Islanders and demonstrated by the enrichment of their lives.

Tom and his brother Bill were among the original board members of Big Brothers of Rhode Island, when it was first organized in 1952. He later served as director and clearly loved the work and the many young people it helped.

He joined the Boy Scouts in 1924 and became an Eagle Scout. He maintained his enthusiasm for scouting and his work earned many honors, including the Silver Buffalo Award—the highest honor the Boy Scouts can bestow for volunteer service to young people.

An outstanding athlete and college football coach, as well as an AAU shotput champion, Tom was a member of the National Football Foundation and Hall of Fame, the Brown Athletic Hall of Fame, the Providence Gridiron Hall of Fame, and the Rhode Island Heritage Hall of Fame.

No recounting of his achievements, however, can do more than hint at the scope and talent of a unique man and his good works. Nor can a recounting capture the spirit and genuine warmth of this remarkable individual.

I grieve with his family but I am thankful that Tom's life has improved the lives of so many others. All of our lives are enriched for having known him and we will miss him.

Mr. President, I would like to share with my colleagues some newspaper accounts of his contributions to Rhode Island and the Nation. I ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Providence Journal, Nov. 9, 1981]

THOS. GILBANE DIES; BUILDER, CIVIC LEADER

PROVIDENCE.—Thomas F. Gilbane, 70, builder, civic leader and renowned Brown Univer-

sity athlete, died Saturday in Rhode Island Hospital of apparent heart failure, a day after he was admitted. He was the husband of Jean Ann (Murphy) Gilbane.

Mr. Gilbane was chairman and chief executive officer of the Gilbane Building Co., one of the largest construction firms in the United States.

Born in Providence, Nov. 4, 1911, he was a son of the late William Henry and Frances (Freeman) Gilbane. He lived at 151 Grotto Ave. and had a summer home, "Eastaway," in Narragansett.

Mr. Gilbane led a company that was founded in Providence in the 1870s as a one-man carpentry operation by his grandfather, William Gilbane. The company grew into a national concern that has such projects to its credit as the National Air and Space Museum in Washington and the facilities for the 1980 Winter Olympics at Lake Placid, N.Y.

The Gilbane family came to Rhode Island from Ireland during the potato famine of 1845, when William Gilbane was one year old. The company he founded as a young man soon rose to prominence and was selected as the builder for the original Rhode Island Hospital, the Museum of Natural History and the Casino in Roger Williams Park, Pendleton House (part of the Museum of Art at the Rhode Island School of Design), several substantial homes on the East Side of Providence and the original Hope, Technical and Classified High Schools.

Under Thomas Gilbane's leadership, the company built or supervised construction of some of the larger structures in the country, including in recent years three Miller Beer breweries and strategic petroleum reserve facilities in Texas and Louisiana that cost about $350 million.

The company received the Build America Award for the National Air and Space Museum, the highest distinction conferred by the Associated General Contractors.

Mr. Gilbane, who became president-treasurer of the company in 1939, was in charge of its World War II construction projects, which included the Quonset Point Naval Air Station and housing at the Newport Naval Base.

The U.S. Navy awarded the company its traditional "E"—excellence—award for its performance during the war.

In 1975 Mr. Gilbane became chairman and chief executive officer of the company.

Recent construction projects in Providence by the Gilbane Building Co. include the Holiday Inn, the Regency apartment buildings, the Blue Cross-Blue Shield building, One Weybosset Hill, an office complex, and the Gilbane headquarters building on Cathedral Square.

A member of St. Sebastian's Church, Mr. Gilbane was named two months ago an associate chairman of the interfaith National Bible Week.

A former president of the Greater Providence Chamber of Commerce, Mr. Gilbane stressed the importance of good relations between management and labor as a necessity for economic growth. In 1958 he headed a labor-management committee seeking legislation to improve the business climate of Rhode Island.

"He was a progressive influence in the community and we're going to miss him greatly," said Edwin C. Brown, secretary-treasurer of the state AFL–CIO. "He made a great contribution to the community in the labor-management field and through a variety of organizations with which he was affiliated. His life was filled with good works."

One of Mr. Gilbane's favorite organizations was Big Brothers of Rhode Island, which he served variously as a director and in other capacities.

Robert F. Killian, executive director of the United Way agency, said, "Thomas Gilbane was one of our original board members back in 1952 when we were organized. He remained a good friend right up to the end. Tom Gilbane was certainly one of the finest men I have ever known.

"We at Big Brothers always felt free to call upon him and his brother Bill and they never let us down. I think the important thing about Tom Gilbane was that he really believed in what he was doing, and was not just behaving the way he thought a person in his position was supposed to.

"There was that special personality thing about him, too. I didn't see him all that much, but I always felt when I was in his company as if I had known him all my life. Tom Gilbane was a great person. He just had it all."

A 1933 graduate of Brown University who majored in engineering and economics, Mr. Gilbane was a past president of the Brown Club of Rhode Island and a trustee emeritus of the university. He served on the school's Athletic Council and as director of the Brown Football Association in 1973–74.

Mr. Gilbane received an honorary degree from Brown in 1958.

He made his mark in football and track and became a member of Brown's Hall of Fame. He played center on the Brown football team for three years, graduating in 1933. The 1932 team was unbeaten and unscored on through seven games, but lost to Colgate on Thanksgiving Day. Mr. Gilbane's brother, William, was also a star of the team.

Mr. Gilbane held the interscholastic record in the shot put and discus throw when he graduated from Hope High School, and at Brown he became the national Amateur Athletic Union champion and a record holder in the shot put.

Mr. Gilbane served from 1936 to 1940 as coach of freshmen football at Brown, and in 1935 as head coach of varsity football at Westminister College in New Wilmington, Pa.

He had been a member of the Narragansett Council of the Boy Scouts of America since 1924 and had held several leadership posts in New England scouting. A former scoutmaster, he received the Silver Antelope Award in 1972 and served as chairman of the National Eagle Scout Association from 1974 to 1976. He received the Distinguished Eagle Pin in 1975.

Mr. Gilbane also served at various times as a director of the Providence Community Fund, a member of the advisory board of Salve Regina College and a director of Butler Hospital.

Among his other civic and social areas of interest were the Coast Guard Academy Foundation, the Industrial Foundation of Rhode Island, Providence Council of Knights of Columbus, Bishop Hendricken Council, Fourth Degree, Knights of Columbus, American Chapter of the Sovereign Military Order of Malta, Knights of the Holy Sepulchre, the National Football Foundation, the Emma Pendleton Bradley Hospital, the Sophia Little Home, Women and Infants Hospital, and the Rhode Island Society for Prevention of Blindness.

Mr. Gilbane also served at various times as chairman of the Harvard Parents Committee, president of the Rhode Island chapter of the Associated General Contractors of America, president of the Providence Gridiron Club, president of the Greater Providence Chamber of Commerce, a board member of the state affiliate of the American Heart Association and a board member and trustee of various business and financial institutions in the region.

Besides his wife, he leaves five sons, Thomas F. Gilbane of Shaker Heights, Ohio, Robert V. Gilbane of Rumford, Richard T. Gilbane of Houston, Tex., John D. Gilbane of Narragansett, and James M. Gilbane, a student at Harvard University; a daughter Jean M. Gilbane of New York City; a brother, William J. Gilbane of Providence, the president of Gilbane Building Co.; a sister, Virginia Choquette of White Plains, N.Y., and five grandchildren.

The funeral will be held tomorrow in the Cathedral of SS. Peter & Paul with a Mass of Christian Burial at 10:30 a.m. Burial in Swan Point Cemetery will be private.

[From the Evening Bulletin, Nov. 10, 1981]

THOMAS F. GILBANE

He was offensive center and defensive linebacker on Brown's greatest football team, the 1932 Bruins that were undefeated until the final game of the season against Colgate.

After the season, which was his senior year, he was selected to play for the East in the annual Shrine Game at San Francisco. During the week of preparation for the game the athletes toured the Shrine Hospital for Crippled Children. It was an experience he never forgot. He has mentioned it many times through the years.

In all probability he would have maintained his interest in youth anyway, but that incident gave a spark to his later activities.

He joined the Boy Scouts in 1924, became an Eagle Scout, and retained his interest in them throughout his lifetime. He has served in many capacities in scouting hierarchy and has been honored with several awards, among them the Silver Antelope, the Distinguished Eagle Pin and finally the Silver Buffalo Award, highest honor the Scouts can bestow for volunteer service to young people.

He was director of Big Brothers of Rhode Island. Cy Killian, executive director of the organization said, "He was one of the original board members along with his brother Bill, and they never let us down."

Other columns of this newspaper have been devoted to his business and charitable activities, and his work as a Catholic layman, but this pertains to his sports interests and those of youth.

Tom was first president of the Providence Gridiron Club, past president of the Brown Club of Rhode Island, and trustee emeritus of his Alma Mater.

He coached football at Westminister College and at Brown, and besides his gridiron accomplishments he was AAU shotput champion, and his shotput record at Brown stood until broken by his nephew, Paul Choquette. He also managed to find summer jobs for Brown athletes in his construction company. He never failed to give a pat on the back or pass on a compliment.

He was a member of the National Football Foundation and Hall of Fame, the Brown Athletic Hall of Fame, the Providence Gridiron Hall of Fame and the Rhode Island Heritage Hall of Fame.

He and Bill were as close as brothers could be. They played and worked together throughout their entire lifetime, and now there will be a great void in Bill's life.

Hundreds of us have lost a good and loyal friend, and the state has lost a most outstanding citizen.—Lanning.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

DEDUCTION FOR COST OF ADVERTISING PLACED IN A FOREIGN MARKET—MESSAGE FROM THE PRESIDENT—PM 93

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States; which was referred to the Committee on Finance:

To the Congress of the United States:

On September 9, 1980, President Carter sent a message to the Congress concerning the Canadian tax law which denies a deduction for Canadian income tax purposes for the cost of advertising placed with a foreign broadcast undertaking and directed primarily at the Canadian market. President Carter determined that this provision within Canadian law is an unreasonable practice which burdens U.S. commerce within the meaning of section 201(a)(2)(B) of the Trade Act of 1974, as amended (19 U.S.C. 2411(a)(2)(B)). President Carter further determined that the Canadian practice resulted in the loss of access by U.S. broadcasters to more than $20 million in advertising revenues annually.

President Carter, under provisions of the Trade Act of 1974, proposed legislation which would amend the Internal Revenue Code to deny a deduction, otherwise allowable under the Code, for expenses of an advertisement placed with a foreign broadcast undertaking and directed primarily to a market in the United States. This restriction would apply only if a similar deduction is denied to advertisers in the country in which such station is located for the cost of advertising directed primarily to a market in that country when placed with a U.S. broadcast undertaking. It would, therefore, be applicable to Canada.

Section 301 of the Trade Act of 1974 requires that if the President determines that action by the United States is appropriate to respond to any act, policy, or practice of a foreign country that is unjustifiable, unreasonable or discriminatory and burdens or restricts United States commerce, he shall take all appropriate and feasible action within his power to obtain the elimination of such act, policy or practice. The intent of section 301 is to resolve disputes and thereby eliminate the unjustifiable, unreasonable or discriminatory trade practices which burden or restrict United States commerce. The Canadian tax law is the subject of one such dispute. Notwithstanding a good faith effort on the part of the United States Trade Representative to resolve the dispute and have the offending practice eliminated, this dispute has not been resolved. Therefore, I am acting under the authority of section 301 to recomend legislation similar to the amendment proposed by President Carter. This amendment to the Internal Revenue Code would mirror the Canadian law as it applies to broadcast undertakings, i.e., it would deny a tax deduction for expenses of advertisements placed with a foreign broadcast undertaking and directed primarily to a market in the U.S. This restriction would apply only if the laws of the country in which such foreign broadcast undertaking is located deny a similar deduction to advertisers in that country. Thus, the legislation will establish a disincentive to the transfer of U.S. advertising revenues to foreign broadcast undertakings only if the laws of the country in which such broadcast undertakings are located create a similar disincentive vis-a-vis U.S. broadcast undertakings. Thus, if Canada should repeal its law, the amendment will cease to apply to Canada. It would be effective with respect to deductions attributable to transactions entered into on or after the date of introduction of this bill.

At this time, the mirror image legislation is an appropriate response to the Canadian practice. The intent of such legislation is not to erect new barriers to trade, but rather to encourage the Canadians to eliminate their unreasonable and restrictive practice. I recognize, however, that this amendment by itself may not cause the Canadians to resolve this dispute. Therefore, I note that I retain the right to take further action, if appropriate, to obtain the elimination of the practice on my own motion under the authority of section 301(c)(1). Hopefully, this will not be necessary.

This legislative proposal is being submitted at this time because I believe it is imperative that the Government of Canada be made to realize the importance the U.S. Government attaches to the resolution of this issue. I urge its early passage.

RONALD REAGAN.

THE WHITE HOUSE, *November 17, 1981.*

MESSAGES FROM THE HOUSE

At 3:21 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 841. An act to name the United States Post Office Building in Portsmouth, Ohio, the "William H. Harsha United States Post Office Building";

H.R. 1710. An act to authorize the use of the frank for official mail sent by the Law Revision Counsel of the House of Representatives;

H.R. 2494. An act to designate the John Archibald Campbell United States Courthouse;

H.R. 4506. An act to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Illinois, as "Melvin Price Lock and Dam"; and

H.R. 4569. An act to designate the United States Post Office Building in Hartford, Connecticut, as the "William R. Cotter Federal Building".

HOUSE BILLS REFERRED

The following bills were read twice by unanimous consent, and referred as indicated:

H.R. 841. An act to name the U.S. Post Office Building in Portsmouth, Ohio, the "William H. Harsha United States Post Office Building"; to the Committee on Governmental Affairs.

H.R. 1710. An act to authorize the use of the frank for official mail sent by the Law Revision Counsel of the House of Representatives; to the Committee on Governmental Affairs.

H.R. 2949. An act to designate the John Archibald Campbell United States Courthouse; to the Committee on Environment and Public Works.

H.R. 4506. An act to name the lock and dam authorized to replace locks and dam 26, Mississippi River, Alton, Ill., as "Melvin Price Lock and Dam"; to the Committee on Environment and Public Works.

H.R. 4569. An act to designate the U.S. Post Office Building in Hartford, Conn., as the "William R. Cotter Federal Building", to the Committee on Governmental Affairs.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–2227. A communication from the Clerk of the United States Court of Claims, transmitting, pursuant to law, a copy of the Court's judgment in the case of the Greek Nation of Oklahoma v. the United States; to the Committee on Appropriations.

EC–2228. A communication from the Assistant Secretary of the Air Force (Research, Development, and Logistics), transmitting, pursuant to law, a report on the study with respect to converting the transient aircraft maintenance function at Randolph Air Force Base, Texas, and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–2229. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, a status report on projects assisted under Section 608 of the National Housing Act; to the Committee on Banking, Housing, and Urban Affairs.

EC–2230. A communication from the Executive Director of the Neighborhood Reinvestment Corporation, transmitting, pursuant to law, a report on the activities and fiscal status of the Neighborhood Reinvestment Corporation; to the Committee on Banking, Housing, and Urban Affairs.

EC–2231. A communication from the Chairman of the U.S. Consumer Product Safety Commission, transmitting, pursuant to law, the fiscal year 1983 budget request of the Commission; to the Committee on Commerce, Science, and Transportation.

EC–2232. A communication from the Assistant Secretary of Energy (Conservation and Renewable Energy), transmitting, pursuant to law, the comprehensive program management plan for the Federal Wind Energy Systems Program; to the Committee on Energy and Natural Resources.

EC–2233. A communication from the Assistant Secretary of State (Congressional Relations), transmitting a draft of proposed legislation to implement the Inter-American Convention on International Commercial Arbitration; to the Committee on Foreign Relations.

EC–2234. A communication from the Assistant Secretary of State for Congressional Relations, transmitting, pursuant to law, the text of an agreement between the United States and Taiwan relating to the protection of information; to the Committee on Foreign Relations.

EC–2235. A communication from the Acting Assistant Legal Advisor for Treaty Affairs, Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the sixty day period prior to November 10, 1981; to the Committee on Foreign Relations.

EC–2236. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC–2237. A communication from the Chairman of the Board of Directors of the Tennessee Valley Authority Retirement Sys-

tem, transmitting, pursuant to law, statements, tables, and general information on the TVA retirement plan; to the Committee on Governmental Affairs.

EC–2238. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on October 27, 1981; to the Committee on Governmental Affairs.

EC–2239. A communication from the Chairman of the Federal Election Commission, transmitting, pursuant to law, a copy of the fiscal year 1982 request of the Commission for a supplemental appropriation; to the Committee on Rules and Administration.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–607. A resolution adopted by the Citizens' Party of Connecticut, opposing the decontrol of natural gas; to the Committee on Energy and Natural Resources.

POM–608. A resolution adopted by the Legislature of the Territory of Guam; to the Committee on Energy and Natural Resources.

"RESOLUTION NO. 170

"Be it resolved by the Legislature of the Territory of Guam:

"Whereas, for several years, Guam has been attempting to achieve economic self-sufficiency. With relief from certain federal regulations not applicable to its marketplace, Guam could become self-sufficient. These laws were imputed on Guam during the colonial days when Washington lobbyists were concerned about a possible massive influx of inexpensive foreign-made products into the American marketplace. Those laws, of course, became outdated in 1946 when the Philippines received its independence. Unfortunately, Guam has never been able to gain relief from these laws; and

"Whereas, recent changes in federal tax and budget policies have brought the issue of Guam's economy to a head. For years, Guam's representatives have attempted to convince Washington that with certain amendments to Guam's Organic Act and other federal laws, Guam could become economically self-sufficient. Therefore, Guam would be far less dependent on federal financial assistance at a considerable savings to the American taxpayer; and

"Whereas, the territory has commissioned several economic studies conducted by prestigious organizations. Very recently, Professor Arthur B. Laffer submitted the results of an in-depth study on Guam's economic growth potential and negative results of continuing the application of certain federal laws to Guam. These studies confirm Guam's position that its real economic problems can only be resolved by federal action aimed at eliminating the federal legal obstacles now retarding Guam's attempts at achieving economic self-sufficiency. The gravity of the problem now facing Guam compels immediate action to amend restraining federal laws: and

"Whereas, the history of Guam's economy has been punctuated by a history of federal administration at times restrictive in its impact to the territory. In the opinion of many economists, Guam's development often times was severely retarded by certain federal laws or policies made applicable to this territory. From 1898 to 1950, Guam was a military reservation administered by the U.S. Navy. From 1951 to 1962, federal security clearances were imposed on travelers, businessmen and even residents of Guam seeking to return to their homeland. After 1962, that security clearance requirement was lifted, and for the first time, market incentives and investment incentives began to attract enterpreneurs destined to become pioneers of Guam's private sector. It was only after the first election of our Governor in 1970 that the island of Guam started on the road to normal civilian operation. The local government has been struggling to achieve increased authority over Guam's internal affairs ever since; and

"Whereas, a private economic base has been established on Guam, now it only needs nourishment to flourish. That nourishment is, in part, the freedom to grow without undue restraints or confinements; now, therefore, be it

"Resolved, That the Sixteenth Guam Legislature requests the assistance of the President in establishing an Economic Advisory Commission for Guam to operate in association with the White House Domestic Council and the Council of Economic Advisers. The object of the Commission would be not only to examine specific federal laws now restraining Guam's economy but also to propose model legislation or policies to effectively deal with establishing a self-sufficient Guam; and be it further

"Resolved, That a Presidential Advisory Commission to study initiatives which could be taken to permit growth in Guam's economy—they could recommend specific federal deregulatory initiatives which could make Guam a productive American community and an example to the world instead of a ward of the State . . . and the effect would be a rapid and dynamic success; and be it further

"Resolved, That this plea comes at a time when Guam must vigorously pursue all policies which will allow Guam to stand on its own two feet and successfully survive the adversity associated with the dramatic transition current policies have forced upon Guam; and be it further

"Resolved, That the economic studies mentioned above provide specific recommendations which the Presidential Economic Advisory Commission on Guam should consider whether:

"1. Guam should be exempted from quotas established under Headnote 3(a) of the U.S. Tariff Schedules. Guam must become truly a free port wherein anything that is the manufacture of or the growth of this island leaves it duty free and enters any other American port duty free without regard to quotas established under Headnote 3(a).

"2. Certain provisions of the Jones Act should be amended so as to permit the use of foreign bottoms for fishing within Guam waters by American fishermen.

"3. Guam should be exempted from federal minimum wage laws and be allowed to control importation of alien labor at wage rates the local government deems fair and equitable.

"4. Guam should be permitted special treatment under the Immigration and Naturalization Act to permit local certification of immigrant workers and foreign investors; and

"5. The Internal Revenue Act should be amended to permit the government of Guam to adopt its own income tax incentives for investors and businesses; and be it further

"Resolved, That the Speaker certify to and the Legislative Secretary attest the adoption hereof and that copies of the same be thereafter transmitted to the Honorable Ronald Reagan, President of the United States of America; to the Honorable George Bush, Vice-President of the United States of America; to the Honorable Strom Thurmond, President Pro-tem of the United States Senate; to the Honorable Thomas P. O'Neill, Speaker of the House of Representatives, United States Congress; to Senator Lowell P. Weicker; to Professor Arthur B. Laffer; to the Secretary of the Interior; to Mr. Pedro San Juan, Director Designate, Office of Territories; to Congressman Antonio B. Won Pat; and to the Governor of Guam."

POM–609. A resolution adopted by the San Diego County Republican Party, supporting legislation to make English the official language of the United States; to the Committee on the Judiciary.

POM–610. A petition from a citizen of Alma, Georgia, relative to union violence in America; to the Committee on Labor and Human Resources.

POM–611. A petition from a citizen of Houston, Tex., relative to union violence in America; to the Committee on Labor and Human Resources.

POM–612. A petition from a citizen of Orlando, Florida, relative to outlawing monopoly bargaining in the Federal service; to the Committee on Labor and Human Resources.

POM–613. A resolution adopted by the Republican National Hispanic Assembly of Texas, urging the Reagan Administration to continue its efforts to bring more Hispanics into the Administration at high level positions; ordered to lie on the table.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S.J. Res. 57. Joint resolution to provide for the designation of February 7 through 13, 1982, as "National Scleroderma Week".

By Mr. THURMOND, from the Committee on the Judiciary, with amendments, and an amendment to the title:

S. Res. 98. A resolution to designate February of each year as "American History Month".

By Mr. HATFIELD, from the Committee on Appropriations, without amendment:

S. 1857. An original bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97–273).

By Mr. HATFIELD, from the Committee on Appropriations, with amendments:

H.J. Res. 357. Joint resolution making further continuing appropriations for the fiscal year 1982, and for other purposes.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

Lawrence W. Pierce, of New York, to be United States Circuit Judge for the Second Circuit;

Clarence A. Beam, of Nebraska, to be United States District Judge for the District of Nebraska;

John Bailey Jones, of South Dakota, to be United States District Judge for the District of South Dakota;

Emmett Ripley Cox, of Alabama, to be United States District Judge for the Southern District of Alabama;

Cynthia Holcomb Hall, of California, to be United States District Judge for the Central District of California;

Robert J. Wortham, of Texas, to be United States Attorney for the Eastern District of Texas for the term of four years;

Alan H. Nevas, of Connecticut, to be United States Attorney for the District of Connecticut for the term of four years;

John W. Gill, Jr., of Tennessee, to be United States Attorney for the Eastern District of Tennesse for the term of four years;

Joseph P. Russoniello, of California, to be United States Attorney for the Northern District of California for the term of four years;

Philip N. Hogan, of South Dakota, to be United States Attorney for the District of South Dakota for the term of four years;

J. Jerome Perkins, of Indiana, to be United States Marshal for the Northern District of Indiana for the term of four years;

Denny L. Sampson, of Nevada, to be United States Marshal for the District of Nevada for the term of four years;

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second times by unanimous consent, and referred as indicated:

By Mr. DURENBERGER (for himself, Mr. BAUCUS, Mr. HATCH, Mr. BRADLEY, Mr. HEINZ and Mr. DANFORTH):

S. 1854. A bill to make permanent the exclusion of gross income of national research service awards; to the Committee on Finance.

By Mr. BENTSEN (for himself and Mr. TOWER):

S. 1855. A bill to make section 457(e)(1) of the Internal Revenue Code of 1954 inapplicable to certain State judicial plans; to the Committee on the Judiciary.

By Mr. HEINZ:

S. 1856. A bill for the relief of Francesco Bellizzi and Maria Bellizzi, husband and wife, and their children, Marco Bellizzi and Dina Bellizzi; to the Committee on the Judiciary.

By Mr. HATFIELD (from the Committee on Appropriations):

S. 1857. An original bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes; placed on the calendar.

By Mr. CANNON (for himself and Mr. LAXALT):

S. 1858. A bill to declare that the United States holds certain lands in trust for the Washoe Tribe of Nevada and California and to transfer certain other lands to the administration of the U.S. Forest Service; to the Select Committee on Indian Affairs.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DURENBERGER (for himself, Mr. BAUCUS, Mr. HATCH, Mr. BRADLEY, Mr. HEINZ, and Mr. DANFORTH):

S. 1854. A bill to make permanent the exclusion from gross income of national research service awards; to the Committee on Finance.

NATIONAL RESEARCH SERVICE AWARDS

Mr. DURENBERGER. Mr. President, today I am introducing, along with Senators BAUCUS, HATCH, BRADLEY, HEINZ, and DANFORTH, legislation to bring a permanent solution to the issue of the tax status of awards granted by the Public Health Service for biomedical research training—national research service awards (NRSA's). In 1977 the Internal Revenue Service ruled that NRSA's were not scholarships because recipients must engage in health research or teaching or equivalent service for a period equal to the length of the award. Thus, NRSA's did not qualify under section 117 of the code exempting the entire amount of the scholarship for degree candidates and up to $300 per month—$3,600 per year—for a total of 3 years for nondegree candidates.

Each year since that time Congress has passed legislation to treat NRSA's as scholarships under section 117. The latest extension expires at the end of this year. By providing for a permanent inclusion of NRSA's under section 117, the Congress would relieve itself of the burden of periodic extension of the moratorium on full taxation of the awards. Further, such an exemption would be in keeping with the intention of both the Senate and House authorizing committees.

The most recent expression of intent by the authorizing committees is found in the statement of managers in the Omnibus Budget Reconciliation Act of 1981. After citing other expressions of intent over the years since the Internal Revenue Service first ruled NRSA's taxable, the managers stated:

National Research Service Awards are not made for the purpose of receiving services designated by the grantor. Rather, the payback requirement offers benefits to the Nation from the participation of NRSA recipients in the research enterprise. As the Committee does not believe that the payback requirement is a quid pro quo, the tax exemption should be applicable.

As a member of the committee with jurisdiction over the tax issue and as chairman of its Subcommittee on Health, I concur with my colleagues on the authorizing committees. NRSA's are the primary means of assuring an adequate manpower pool for our Nation's health research enterprise. Taxation of these awards would severely limit the effectiveness of this program in encouraging our country's most promising, aspirant scientists to direct their careers toward much-needed biomedical research. Further, these awards are the principal incentive offered prospective physician investigators to enter medical research and forgo the considerably greater financial rewards of private sector practice.

The awards are not large, and taxing them would certainly diminish their attractiveness. Degree candidates receive between $7,040 and $13,040 to cover tuition, fees, and living expenses. Postdoctoral trainees receive a larger sum—between $13,380 and $18,780, but these are people who could be receiving substantially more for other activities, and their exclusion is limited to $3,600 per year.

It is clear that taxation of these awards is not in keeping with the intention of the original legislation, and that such taxation would create an economic disincentive to accepting national research service awards without any significant concomitant benefit to the U.S. Treasury. Consequently, I believe that the Nation's interests are served best by maintaining these awards as fellowships under the Tax Code.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1854

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That paragraph (2) of section 161(b) of the Revenue Act of 1978 (relating to exclusion from gross income for national research service awards) is amended by striking out "during calendar years 1974 through 1980" and inserting in lieu thereof "after December 31, 1973".

● Mr. BAUCUS. Mr. President, my respected colleague from Minnesota, the chairman of the Finance Committee's Subcommittee on Health, Senator DAVID DURENBERGER, is today introducing legislation providing that national research service awards (NRSA's), traditionally treated as scholarships or fellowship grants for tax purposes since their inception in 1974, be permanently given this tax status. As the ranking minority member of the Health Subcommittee, I am most pleased to be a cosponsor of this bill—one clearly deserving of bipartisan support.

The NRSA program, by assuring a highly qualified manpower pool for the Nation's biomedical research enterprise, has significantly contributed to scientific progress in the battle against disease and premature death. Taxation of the full amount of the tuition payments and stipends provided by this program would create a serious disincentive to the students and young scientific investigators training for careers in biomedical research with the assistance of NRSA's.

Since 1977, when the Internal Revenue Service ruled, in Revenue Ruling 77-319, that amounts received from the NRSA program must be included in gross taxable income, the erosion of the value of these Federal awards has been prevented by a series of congressional moratoriums on their full taxability. It is now clear that IRS has no intention of reversing its ruling, and it is thus time for the Congress to end its periodic enactment of these moratoriums by making the current tax treatment of NRSA's permanent tax policy. In doing so, the Congress would significantly enhance the incentive offered by NRSA's whose recipients have, for the past 4 years, not known from 1 year to the next whether their modest financial resources would be decreased through taxation.

The committee's responsible for authorizing the NRSA program, Labor and Human Resources in the Senate and Energy and Commerce in the House, have on several occasions emphatically stated that the IRS ruling is a misinterpretation of their intent in creating the award program. They have clearly indicated that any service "payback" required is not intended for the purpose of the grantor—the Federal Government—receiving services from the grantee as is implied by the IRS ruling that such payback or quid pro quo. Rather, as stated by the authorizing committees in the conference report on the budget reconciliation bill, "the payback requirement offers benefits to the Nation from the participation of NRSA recipients in the research enterprise."

The viability and purpose of Federal support for research training should not be allowed to be undermined by the erroneous interpretation of the law by the IRS. As a member of the Finance Committee which has jurisdiction over tax matters, I intend to lend Chairman DURENBERGER my full support in bringing this matter to a favorable close before the current moratorium on full taxation of NRSA's expires on December 31, 1981.●

● Mr. HATCH. Mr. President, I am pleased to join Senator DURENBERGER in introducing a bill which makes permanent an existing tax exemption for income derived from national research service awards (NRSA's). The NRSA's provide support for pre- and post-doctoral students of the biomedical and behavioral sciences in areas of national

need and have undoubtedly contributed to the recent rapid advances in biomedical research as exemplified by the recombinant DNA technology. Indeed Congress has many times recognized the importance of the training program to the maintainence of the Nation's Biomedical and behavioral research efforts.

It should be recognized that although the NRSA's do contain pay-back clauses, their primary function is to train investigators for entry into areas of national need in the boimedical and behavioral sciences. The NRSA's are granted competitively and thus seek out the best available candidates. This insures the elements of scholarship so essential to our scientific enterprise.

Dr. Donald Fredrickson, former Director of the National Institutes of Health, and many others, have often discussed the difficulty in attracting talent to research fields. In particular the number of physicians entering research training has rapidly declined since the early 1970's. While there is no immediate cause for alarm concerning the future supply of scientific manpower overall, we must be aware of the trends and react appropriately. The stipends of the NRSA's have not kept pace with inflation and the prospect of taxation would further detract from the subsistence levels the NRSA's provide. A congressional failure to provide tax exemptions for NRSA recipients will result in a true disincentive for bright young students to enter research areas associated with our national needs.●

By Mr. BENTSEN (for himself and Mr. TOWER):

S. 1855. A bill to make section 457(e)(1) of the Internal Revenue Code of 1954 inapplicable to certain State judicial plans; to the Committee on the Judiciary.

TEXAS JUDGES BILL

● Mr. BENTSEN. Mr. President, today I am introducing legislation which would address a technical, unintended problem caused by section 457 of the Internal Revenue Code of 1954. This legislation is in the nature of a technical correction to section 457, since it is fair to say that had Congress perceived this problem when first enacting section 457 in 1978, some effort would have been made to cover the situation that bill should remedy.

Section 457 was adopted to clarify the taxation of benefits under optional salary reduction arrangements sponsored by State and local governments. Congress wrote section 457 to the code to accomplish two things: First, to establish structural requirements which deferred compensation salary reduction plans would have to meet to earn favorable tax treatment; and second, in section 457(e) to specify the tax treatment of salary reduction planned benefits which failed to meet the structural requirements.

If a plan fails to satisfy the requirements of an eligible State deferred compensation plan, then compensation deferred under such plan is currently includable in a participant's income for the first taxable year in which there is no substantial risk of forfeiture—that is, upon vesting. The Internal Revenue Service recognized at the time it promulgated the proposed section 457 regulation that there are State plans that are the regular retirment plan of the State but which do not qualify as eligible State-deferred compensation plans under the code. Thus, participants in these plans would appear to be subject to the severe tax treatment requiring the inclusion of all such deferred compensation taxable income immediately upon vesting.

Mr. President, this is a very harsh result and in some cases is one which probably goes well beyond what Congress was attempting to get at by the adoption of section 457. In fact, in the preamble to the proposed regulations the Internal Revenue Service acknowledged that it is unclear whether this result was intended. The reforms brought about by section 457 were an attempt to prevent situations where employees of State and local government defer recognition of income through optional deferred compensation agreements with their employers. The bill I am introducing today in no way weakens that reform. This legislation is narrowly drawn and provides no loophole for the kind of optional preferred compensation arrangements limited by the 1978 act.

The bill I am authorizing would add to the exceptions from section 457 State judicial plans that are the regular, exclusive, mandatory plan for service as an elected State judge. The bill would not allow additional, optional contributions by judges that would affect the concludable compensation.

Since I believe that this legislation is essentially a technical correction to the 1978 provision, and is in no way intended to carve out a "safe harbor" for the newly adopted plans, I have included a limitation in the bill that would apply the exception to only those plans continuously in existence since December 31, 1978, the point after which section 457 became effective. Further, in light of the technical correction nature of this legislation, the provisions of the bill are generally effective with respect to taxable years beginning after December 31, 1978.●

By Mr. CANNON (for himself and Mr. LAXALT):

S. 1858. A bill to declare that the United States holds in trust for the Washoe Tribe of Nevada and California and to transfer certain other lands to the administration of the U.S. Forest Service; to the Select Committee on Indian Affairs.

LEGISLATION RELATING TO CERTAIN INDIAN LANDS

Mr. CANNON. Mr. President, I introduce for myself and my distinguished colleague, Senator LAXALT, a bill to provide for the transfer, in trust, of certain portions of the Stewart Indian School complex in Nevada to the Washoe Tribe in Nevada and California. Involved in the transfer are some 2,890 acres.

The Bureau of Indian Affairs announced its decision early in 1980 to close the Stewart Indian School. The facility was closed in September of 1980. Subsequent to that action, the Washoe Tribe leased all lands associated with the Stewart School excluding the school grounds themselves. The purpose of the tribe was to increase its agriculture production capabilities. This agriculture pursuit will continue under the provisions of this bill. I emphasize that the lands involved in this bill are those associated with the Stewart School but do not include the school facility itself. The school facility is the subject of competing claims which have yet to be resolved.

The Stewart properties included in this bill lie within the recognized aboriginal lands inhabited by the Indians at the time of white entry and lend strength to the claim of the tribe to this legislative transfer. The Washoe number some 1,500 individuals of which some 500 live within three established colonies in western Nevada and one colony in northern California. The tribal leadership has as a major goal the initiation of economic and development programs designed to meet the needs of the tribal members. Central to that goal is the expansion of the tribe's land base. The Stewart lands will supplement existing ranch lands consisting of 795 acres, permitting an intensive ranch development project.

The Washoe request for this land is supported by the Inter-Tribal Council of Nevada. Adjoining private landowners have also approved the Indian request.

I believe the claim of the Washoe Tribe to this land has merit. It would provide a boon to tribal efforts to achieve self sufficiency and would maintain the traditional uses of the property. I urge its early attention.

Mr. LAXALT. Mr. President, I am pleased today to cosponsor legislation with my distinguished colleague from Nevada, Senator CANNON, to transfer to trust status for the Washoe Tribe of Nevada and California ranch land surrounding the old Stewart Indian School in Nevada.

The land involved in this legislation was originally a part of the Stewart Indian School complex that was closed by the Bureau of Indian Affairs in September 1980. Located in the Carson Valley of Douglas County, the Stewart ranch parcel includes approximately 2,890 acres of ranch and farm lands. The parcel was originally held in fee status and was acquired by the United States for the school site in 1939 and 1940.

I believe that the Washoe Tribe's overall goal of achieving economic self-sufficiency can be greatly enhanced by acquiring these parcels into trust status, thereby complementing the tribe's existing ranch operations. The tribe, in conjunction with its existing lease on the ranch property, has developed a detailed ranch plan which calls for intensive reorganization and development of the resources on the ranch to increase productivity.

Mr. President, prior to our introduction of this bill, Senator CANNON and I asked the tribe to meet with several conditions. These included meeting with adjacent landowners to identify and resolve their concerns, meeting with Carson City officials to discuss that city's needs relative to water rights, and gaining the support of all other tribes in Nevada, and the preparation of a com-

prehensive master plan. The tribe has met all of these conditions and I am convinced that this legislation is in the best interests of all concerned. I look forward to its prompt passage.

ADDITIONAL COSPONSORS

S. 312

At the request of Mr. LEVIN, the Senator from New Hampshire (Mr. RUDMAN) was added as a cosponsor of S. 312, a bill for the relief of Maria and Timofei Chmykhalov, and for Lilia, Peter, Liubov, Lidia and Augustina Vashchenko.

S. 1675

At the request of Mr. HATFIELD, the Senator from Michigan (Mr. RIEGLE), and the Senator from Nebraska (Mr. EXON) were added as cosponsors of S. 1675, a bill to help eliminate world hunger and malnutrition and promote global security.

S. 1814

At the request of Mr. JEPSEN, the Senator from Washington (Mr. GORTON), and the Senator from Texas (Mr. TOWER) were added as cosponsors of S. 1814, a bill to amend title 10, United States Code, to require the Secretary concerned to comply with the terms of certain court orders in connection with the divorce, dissolution, annulment, or legal separation of a member or former member of a uniformed service and which affect the retired or retainer pay of such a member or former member, and for other purposes.

SENATE JOINT RESOLUTION 123

At the request of Mr. HAYAKAWA, the Senator from Florida (Mr. CHILES), the Senator from Mississippi (Mr. COCHRAN), the Senator from Maine (Mr. COHEN), the Senator from Arkansas (Mr. PRYOR), the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Wisconsin (Mr. KASTEN) were added as cosponsors of Senate Joint Resolution 123, a joint resolution authorizing the President to proclaim "National Disabled Veterans Week".

SENATE CONCURRENT RESOLUTION 45

At the request of Mr. GRASSLEY, the Senator from South Carolina (Mr. HOLLINGS), the Senator from South Carolina (Mr. THURMOND), the Senator from Arizona (Mr. DECONCINI), and the Senator from Idaho (Mr. SYMMS) were added as cosponsors of Senate Concurrent Resolution 45, a concurrent resolution expressing the sense of the Congress with respect to the rights of the people of Afghanistan.

AMENDMENTS SUBMITTED FOR PRINTING

DEPARTMENTS OF COMMERCE, JUSTICE, AND STATE, THE JUDICIARY, AND RELATED AGENCIES APPROPRIATION ACT, 1982

AMENDMENT NO. 633

(Ordered to be printed.)

Mr. HELMS proposed an amendment to the bill (H.R. 4169) making appropriations for the Departments of Commerce, Justice, and State, the judiciary, and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON THE JUDICIARY

Mr. GRASSLEY. Mr. President, I ask unanimous consent that the Judiciary Committee be authorized to hold a markup during the session of the Senate today, Tuesday, November 17, to discuss S. 1630, the Criminal Code bill.

The PRESIDING OFFICER. Without objection, it is so ordered .

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Wednesday, November 18, to hold a business meeting on pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Committee on Energy and Natural Resources be authorized to meet during the session of the Senate on Thursday, November 19, at 10 a.m., to hold a confirmation hearing on the nominations of:

Pedro Sanjuan to be Assistant Secretary of Interior for Territorial and International Affairs;

Vernon Wiggins to be Federal Cochairman of the Alaska Land Use Council; and

Janet McCoy to be High Commissioner of the Trust Territory of the Pacific Islands.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

NATIONAL DEFENSE

● Mr. TOWER. Mr. President, this summer, the CBS Television Network broadcast a five-part "Defense Special" in which it was suggested that the United States was about to embark on a colossal defense spending spree with few questions asked and with very little debate. To the contrary, I believe the debate has been vigorous and well joined.

It is worth remembering that the foundation for this debate was developed during the late 1970's as the public became increasingly aware of the deficiencies in our defense capabilities in the face of an ever-strengthening Soviet threat. You may recall that just 1 year ago it was virtually impossible to find a major newspaper or periodical or a television commentary dealing with defense, that did not decry the dismal state to which our military forces had been allowed to deteriorate. We had an All-Volunteer Army full of category IV's who could not fight; a Navy with too few ships and too few men to safely put to sea; and an Air Force whose fighters could not launch for want of spare parts and proper maintenance. It was a deplorable situation, but one that the press and media dutifully reported.

Curiously, just 1 year later, it is difficult to find a publication or media commentary that does not suggest defense cuts are now entirely appropriate. Yet what has changed in that brief year? Soviet investment in force modernization and expansion continues unabated. While the condition of our own forces, so deplorable just a year ago, has changed little.

Mr. President, our hope of maintaining a military strong enough to insure our security and discourage Soviet aggression lies not in a politician's promise but in the commitment of a nation. Only with the full and vigorous support of the American people can we hope to restore our Nation's defenses. And we will have this support only if the public remains fully informed.

There are those among the press who have continued to report this issue objectively. They have served the public by reporting the facts rather than manipulating them to fit an editorial conclusion. They have retained the distinction between opinion and fact and take care that their readers know which is which. An editorial published in late September in the Detroit News appraising the CBS Defense Special reflects this philosophy. It represents a standard of journalism from which many could benefit.

I urge all my colleagues to read this exceptional editorial and I ask that it be printed in the RECORD.

The editorial follows:

CBS NEWS AND NATIONAL DEFENSE

The role of loyal opposition is better suited to Britain's parliamentary system than to the American political process that depends upon bipartisan consensus on crucial issues like national defense.

But this reality hasn't dissuaded CBS News from attempting to assume the role. The network's penchant for inveighing against military preparedness was demonstrated—again—when CBS News recently devoted five prime-time hours to a "documentary" entitled "The Defense of the United States."

The series, aired on five consecutive June evenings, was considered so worthy by CBS executives that they rebroadcast it in August. And though the network claimed the documentary expressed no point of view, executive producer Howard Stringer admitted that the program "did draw some conclusions."

Indeed it did.

The CBS "message" was so blatantly antimilitary that the American Security Council demanded equal time for rebuttal. John Kester, former special assistant for defense in the Carter administration, charged CBS with exhibiting "the least honest and most seductive" efforts of "the old anti-defense crowd" to conclude "that money spent on national defense is wasted."

Meanwhile, CBS News President Bill Leonard explained that America was "ready to embark on this colossal defense spending spree with few questions asked and very little debate." Series anchorman Dan Rather solemnly agreed, hoping that the documentary would "start the debate rolling in every town and city in America."

There was no mistaking the network's position in the debate. The advisers and interviewees for the series were fairly consistent in their concern about America's drift toward Armageddon. Loaded terms like "Iron Triangle" (the connection between the Pentagon, Congress, and defense contractors), "military-industrial complex," and "closed society" were used liberally. The segment concerning weapons procurement was entitled "The War Machine."

During the whole of the five-part program, there was no mention of the Soviet arms

surge that precipitated President Reagan's response. CBS chose to ignore that while the Soviets spend 11–15 percent of their gross national product (GNP) on the military, the United States spends only 5 percent. Nor was there a reference to Russia's annual defense effort, which in recent years has been nearly 50 percent larger than America's.

Walter Cronkite was brought forth to dismiss the specter of the Soviet buildup, noting, "As for the military spending, the figures are also misleading. Our two systems, our two economies, are so different that to compare the costs of tanks and rocket launchers is just about as meaningful as comparing the costs of a college education."

Rather than dwelling upon the numerical differences, CBS suggested that Americans should be wary of "the largest peacetime military budget in our history" to confront "an enemy who we are told is stronger and more dangerous than ever."

Never mind that the Soviet submarine fleet is the world's largest or that the USSR boasts 4.8 million troops compared to America's 2.1 million. Once again Mr. Cronkite assured viewers that only 10 percent of the Soviet ships "are actually out at sea" and the Russian forces contain "half a million men . . . trained as border guards and construction workers."

Mr. Cronkite failed to add, however, that 100 percent of the Soviet Navy is combat ready, or that Russian border troops are equipped as infantry with automatic weapons, armored vehicles, light artillery, and assault aircraft.

Defense Secretary Weinberger was permitted to assert that the Soviet Union is an expansionist power. Yet CBS cameras gave only a passing glance to a map that the secretary was using to illustrate his point. Then Mr. Cronkite declared: "You can get yourself pretty frightened looking at all the administration's maps and charts of Soviet aggression and military spending. But like so many of our perceptions of the Soviet Union, it tells you only half the story, the half the administration uses to press its case for higher and higher defense budgets."

And if that wasn't soothing enough, Mr. Cronkite laid the Russian threat to rest by concluding, "Since 1960, Soviet influence around the world has actually declined." That astonishing statement omits some nagging exceptions: Afghanistan, Angola, Cambodia, Chad, Congo, Cuba, Ethiopia, Grenada, Guyana, Laos, Libya, Mozambique, Nicaragua, Syria, South Yemen, and Vietnam.

CBS, oddly, was more concerned about American belligerence. Two segments concentrated upon the U.S. strategy of fighting a limited nuclear war in Europe that could lead to the continent's devastation. The network was similarly worried about what it characterized as a self-fulfilling prophecy: U.S. military leaders, mesmerized by the nuclear option, might be tempted to launch a pre-emptive strike against the Russians.

An oft-repeated theme throughout the series was that an arms race is futile because neither side can win. Correspondent Richard Threlkeld answered his own rhetorical question, "Do weapons really make us strong?" by adding, "That depends on how you define national security." Commenting on the "conventional wisdom" that promotes military expenditures, Mr. Threlkeld was obviously more impressed by the counter argument that defense spending will destroy the economy. Yet he wearily concluded that Congress rarely asks "hard questions" about defense requests.

The facts suggest otherwise. During the past two decades, Congress has not only asked questions, but it has slashed military spending. Several recent examples come to mind.

In 1973 the Senate cut the Navy's F–14 aircraft request by 73 percent and the Air Force's B–1 by 22 percent. The House voted for major cuts in funding for the F–15 aircraft, ship construction, and the anti-ballistic missile. A 1975 House committee cut appropriations for the Airborne Warning and Control System (AWACS) aircraft by 50 percent. That same year, a Senate committee delayed approval of the B–1 bomber, a move that resulted in the airplane's eventual cancellation. In 1976 the Senate pared the MX missile funding request by 39 percent while denying a Navy appeal for a nuclear-powered strike cruiser. Meanwhile the House reduced the Navy cruise-missile program by 40 percent.

Even today, when the "hawks" are supposedly ascendant, Congress has decided to cancel the Pentagon's NAVSTAR Global Positioning System that would put 18 navigation satellites into space directed by a huge ground-control station. The Air Force request for funds to create a new generation of jet fighters has been denied. And the Navy's appeal for $121 million to design a new class of ships was similarly rebuffed. All told, the House Armed Services Committee has canceled funding for 31 separate weapons projects whose potential costs were in the tens of billions of dollars.

During this period, the Soviet arms buildup dwarfed the U.S. military output. Accordingly, Henry Kissinger gingerly accepted Russia's numerical advantage in the 1972 SALT I agreement because, he concluded, "If you project the existing building program of the Soviet Union into the future you will . . ." see "why we believe that . . ." this ". . . is a good agreement."

Yet CBS News persists in promoting the myth that U.S. military leaders are blindly committed to winning a maniacal arms race at all costs. The charge is hardly original, and we suspect it will continue to be popular among those who equate national defense with self-destruction.

When all is said and done, of course, we must concede that CBS is entitled to its opinions. But it's well to remember that the network has a long history of denigrating the American military, and of selecting its data with a pronounced anti-U.S. bias. It consistently draws its materials through the stained filter of mid-Manhattan dovishness, thus producing portraits of the Pentagon that can only merit the warm endorsement of the nation's adversaries.

We don't know who is responsible for the puzzling slant of CBS News, but we do know that CBS is one of only three major national networks, an arrangement Walter Lippmann once compared to the nightmare vision of an America with only three printing presses.

CBS News is enormously influential, possessing as it does a shared monopoly of national television journalism. One would think, therefore, it would be more conscious of its privileged position and exercise its first ethical imperative, that of advising the viewer that a program of editorial comment, based on the network's understanding of events and circumstances, is just that—and is by no means a balanced analysis of American preparedness and the Soviet threat.●

SENATOR EAST ADDRESSES NORTH CAROLINA TEXTILE MANUFACTURERS ASSOCIATION

● Mr. HELMS. Mr. President, this past Friday, my distinguished colleague from North Carolina (Mr. EAST) addressed the annual meeting of the North Carolina Textile Manufacturers Association in Palm Beach, Fla.

Senator EAST spoke to the NCTMA on the need for the U.S. Government to take a tougher stand on foreign textile and apparel imports. He rightly pointed out that—

The issue here is not "protection" versus "free trade," but rather whether Americans will defend their legitimate economic interests as vigorously as our trading partners defend theirs.

Senator EAST emphasized that—

Given the cutthroat practices that characterize the international market these days, it is a little naive to talk about "free" trade—as if foreign governments did not give every possible advantage to their own commercial interests.

Senator EAST said:

The critical test will be the outcome of the negotiations on the Multifiber Arrangement that resume in Geneva on November 18. The present MFA, which expires on January 1, is patently unfair to American textile and apparel interests.

Mr. President, in order that my colleagues might have the benefit of Senator EAST's comments, I ask that the text of Senator EAST's speech be printed in the RECORD following my remarks.

The text of the speech follows:

MULTIFIBER ARRANGEMENT

STATEMENT OF SENATOR JOHN P. EAST

I would like to take this opportunity, as a guest of the North Carolina Textile Manufacturers Association, to reaffirm my view that our government must take a tougher stand on foreign textile and apparel imports.

Some 2.7 million Americans, in every region of the country, depend on the fiber/textile/apparel complex for their livelihoods. In Los Angeles, for example, 10 percent of the jobs are in textiles and apparel; in Philadelphia, 21 percent; in Miami, 22 percent; and in New York City, 33 percent.

If the flood of imports continues unchecked, business failures and massive unemployment will result. Minorities and women, who make up a large part of the labor force, will suffer most. The illiterate and unskilled among them will have little hope of finding work elsewhere.

We must not allow this to happen. The issue here is not "protection" versus "free trade," but whether Americans will defend their legitimate economic interests as vigorously as our trading partners defend theirs.

Textiles and apparel are vital and viable industries. In the last 20 years, textile productivity gains alone have averaged 4 percent a year—double the rate for manufacturing in general. All things being equal, these industries can compete.

But all things are not equal. I will not discuss the fact that foreign workers must toil under wage scales and working conditions that would be intolerable in America. Nor will I discuss the more favorable tax structures bestowed by many foreign governments. I am confident that the tax cuts and regulatory reform initiatives undertaken by the Reagan administration will enable American enterprise to hone its competitive edge without sacrificing quality of life.

I will not even discuss the fact that this country shoulders a disproportionate burden for the defense of the free world. It is possible for some of our trade partners—notably Japan—to assume a greater share of that burden, but it is not possible for some others.

What I will discuss here is the question of differing economic systems and economic policies. There is no question that foreign businesses enjoy a greater degree of encouragement and support from their respective governments than their American counterparts receive from ours. Subsidized interest rates, officially-sanctioned cartels and mo-

nopolies, tariff and nontariff barriers to imports are but a few of the benefits that foreign governments accord their major industries.

I am not suggesting that we follow their example by say, repealing the antitrust laws or by merging the Labor and Commerce Departments. We neither can nor should resort to the "state capitalism" devices utilized by our rivals.

What I am saying is that given the cutthroat practices that characterize the international market these days it is a little naive to talk about "free" trade—as if foreign governments did not give every possible advantage to their own commercial interests. I have never met an American exporter who could not argue persuasively that it is easier for foreign companies to do business here than for Americans to do business abroad.

In this light, then, the problems faced by the textile and apparel manufacturers may be properly viewed not as someone else's hard luck story, but as a symbol of the problems faced by all American businesses that must compete internationally. In the same way, the attitude that our government assumes on this issue will be a good indicator of the line it will take on trade issues generally.

The crucial test will be the outcome of the negotiations on the Multifiber Arrangement that resume in Geneva on November 18. The present MFA, which expires on January 1, is patently unfair to American textile and apparel interests. It allows foreigners to increase their exports to this country at a minimum rate of 6 percent a year, at a time when our domestic market can be expected to grow only 1.5 percent a year. Various loopholes in the present treaty, which allow for switching and borrowing from established quotas, allow exporters to increase some shipments by as much as 24 percent.

These loopholes must be plugged, and a new arrangement must be negotiated that will restrict the growth of imports to the growth of the domestic market. I have not hesitated in the past to emphasize this need to U.S. Trade Ambassador Bill Brock and to President Reagan, and I will not hesitate to speak out forcefully in the future. I would hope that the American business and labor communities will recognize the very real stake that they have in the outcome of this issue, and they will add their voices to mine.●

ATLANTIC ELECTRIC, UTILITY OF THE YEAR

● Mr. WILLIAMS. Mr. President, it is with great pleasure I bring to the attention of my colleagues that the Atlantic Electric Utility Co. of my State of New Jersey has been selected as the Electric Utility of the Year for 1981 by Electric Light & Power magazine.

This award recognizes the exemplary work Atlantic Electric has accomplished over the past year for its customers, shareholders, and employees. The dedication to its position as a public utility and the progressive nature of its management has enabled this company to outshine its contemporaries in the industry and to faithfully fulfill its goals as a utility.

Unlike other electric utilities in our country today, Atlantic Electric is in an unusual position. Most companies are experiencing a reduction in demand for electric service both as a result of increased conservation efforts and population decreases in their service areas. Atlantic Electric, however, is working hard to meet rising demand, which is expected to continue for the foreseeable future as the trend of population growth in the region persists.

Mr. President, under normal circumstances, it would be difficult for any utility to effectively respond to such noticeable changes in its service area. Today an even greater burden has been placed on the entire industry by the lingering economic problems which continue to plague our country. Yet, under the able and innovative leadership of Mr. John D. Feehan, the president and chief executive officer of Atlantic Electric, this modest-size utility has met this demand and I am confident they will continue to provide for the needs of the southern one-third of New Jersey.

The November issue of Electric Light & Power magazine contains a special report in honor of Atlantic Electric as Utility of the Year. This article provides an excellent view of this utility and the fine job it has done, and I highly recommend it to my colleagues. Again, I offer my sincere congratulations to John Feehan, his workers, and Atlantic Electric for earning this prestigious award.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

ATLANTIC ELECTRIC IS 1981 AWARD UTILITY

Atlantic Electric Co. has been named Electric Light & Power's 1981 Outstanding Electric Utility of the Year. The utility was chosen by a panel of industry judges to be the 13th winner of the annual award.

EL&P Editor Robert Lincicome said the award was based on an impressive three-year financial record, the utility's leading role in converting oil-fired generating capacity back to coal, and an innovative communication program.

Utility president and chief executive officer John Feehan expressed appreciation for the award and noted that the company faces even stiffer challenges in coming years. With growth in demand in recent years sparked by the introduction of nine gambling casinos and hotels in Atlantic City, the utility must deal with unprecedented capital requirements that total twice the company's current assets in the next decade, Feehan said. (One interesting technique being explored for raising capital at Atlantic Electric is explained in the article below.)

Over the past three years the utility has recorded an almost unmatched record of improvement in earnings: a seven percent gain in 1978 to $2.21 a share; another seven percent increase in 1979 to $2.36 a share; and an eleven percent rise in 1980 to a record $2.36 a share.

Part of the impressive earnings record is due to the company's swift replacement of imported oil with coal as a power plant fuel. When the company's largest generating station, the B. L. England station, was converted to oil for environmental reasons in the early 1970s the company retained all the coal-burning equipment and kept it maintained. The station was back on coal one month after the 1973 Arab oil embargo, making it the first utility to convert back. The company is now converting its other major station, the Deepwater plant, back to coal also and is aiming at reducing its oil dependence to 10 percent.

GOALS FOR THE 80'S

1. Reduce construction expenditures holding annual levels to below 12 percent of capitalization.

2. Maximize internal generation of cash in order to reduce outside financing (minimum of 50 percent internal generation).

3. Increase the return on equity to a level high enough to allow common stock to sell at or above book value.

4. Provide customers with reliable electric service at a price that reflects their contribution to cost.

5. Minimize load growth while maintaining a viable economy.

ELECTRIC UTILITY OF THE YEAR FOR 1981: ATLANTIC ELECTRIC FINDS GOLD IN REDUCED GROWTH, NEW DIRECTION

(By Robert A. Lincicome and Robert W. Smock)

Small but mighty is perhaps the most apt description of Atlantic Electric.

The utility, which serves some 380,000 customers in southern New Jersey, was selected by EL&P's panel of industry judges to be the 1981 recipient of the magazine's annual award of excellence. The award is the thirteenth to be given since the program was initiated in 1969.

Among the major factors highlighting the company's award-winning performance were the following:

A virtually unmatched record of improvement in earnings over the past 3 years and a 28-year history of annual dividend increases every year.

An impressive program for reducing dependence on imported oil, predating general industry concerns, that has decreased oil usage from 67 percent of total company generation in the early 1970's to less than 20 percent today, plus achieving a diverse balance of fuel sources;

An operating record founded on high availability and reliability of all major components;

An aggressive, open two-way communication aimed at improving the understanding of customers, regulators, legislators and company management for the positions, problems and needs of each other;

A flexible, innovative approach to dealing with the problems imposed by new social and economic imperatives.

STEADY STRENGTHENING

Although EL&P's award was based largely on the strength of the company's 1980 performance, recognition also was given to the company's almost-constant strengthening over the past 8 years. The growth trend dates back to the time current president John D. Feehan assumed the chief executive officer's post and began to address what was then beginning to develop as a new era of trials and tribulations for the electric industry.

Feehan, an affable, easy-going executive was the right man for the times. He and his staff approached the mid-70's with a flexible, but pragmatic philosophy. The questions were not about how to reshape the developing environment to fit the plans of the utility, but rather how to best adapt the company's programs and plans to conform to the stricter imperatives of the times in the best interests of its customers and shareholders.

RESULTS

The results? After suffering a down-grading of its debt issues just after Feehan assumed the CEO's position, the company has steadily climbed back, getting a firmer grip on its construction program, improving its capital structure and moving away from its former heavy dependence on imported oil.

Following the post-embargo ups and downs of the mid-70's, Atlantic Electric posted a 7 percent earnings gain in 1978, to $2.21 per share. The next year, 1979, it added another 7 percent earnings gain, to $2.36 per share. Last year, earnings per share of common rose an additional 11 percent, to $2.62. Through June of this year, it has jumped upward by 64 percent over the same period in 1980 on the strength of the 16 percent rate relief granted by the New Jersey Board of Public Utilities in September, 1980. Dividends, which have been increased every year for 27 years went up again in

1980, a 28-year record equalled by only a few utilities.

The 1980 increase in earnings came on revenue gains of 27 percent. However, expenses increased even faster, 28 percent, although kWh sales were up only 6 percent.

Return on common equity, as a result of the $50 million rate increase received in September 1980, rose to 11.6 percent by year-end, and by mid-1981 was almost 14 percent, above the statutory 13.75 percent allowable ROR granted by the P.U.B.

Moreover, Atlantic Electric has been granted emergency rate relief aimed at recovering a portion of the $76-million deficiency in fuel adjustment clause collections, which will improve the quality of its earnings in 1982. The balance of the levelized energy adjustment under-recovery will be subject to further rate actions in 1982.

In non-financial areas Atlantic Electric also has made substantial progress.

It has moved ahead in its quest to regain in former AA bond rating. The company is now rated A+ and is continuing its program to gain the AA rating in the near future. To this end it has launched, and is continuing an aggressive information program to keep rating houses, as well as individual brokers, up-to-date in their knowledge of the company and its performance.

The company also continues to work hard to gain better understanding of its needs and problems by consumers. To accomplish this the company is conducting an active two-way communication program with its customers.

And for employees, the company is pursuing its goals of more and better training, affirmative action programs and direct two-way communications with company management. Labor satisfaction appears to be strong. As one union member remarked, "The only way they'll get rid of me is to shoot me!"

GOALS-ORIENTED PROGRESS

John Feehan and his four senior vice presidents have made Atlantic Electric's small size a virtue. They work hard at it.

Feehan is a strong believer in setting specific goals and objectives at all levels, and of measuring progress against those goals. "We don't make 'em all," he remarked, "but we achieved a lot more than if we'd reacted to outside developments."

For example, a review of 1980 goals shows the company did achieve a 10 percent step up of its public relations programs. It simplified its bill format to make it easier for customers to understand, but it failed to achieve its goal of initiating one new conservation initiative, nor did it reduce peak demand growth to zero. For share holders, the company improved earnings performance 11 percent and dividends 7.6 percent compared to its 6 percent goal for both. It did not achieve its goal of regaining its former AA bond rating. Operationally, it did return two targeted generating units to coal and launched a corporate planning function and corporate model as planned. It achieved its affirmative action goals but fell short of its training goal and its goal of no fatal accident.

THREE KEYS TO SUCCESS

Corporate officers point to three unique reasons for the company's success: planned diversity, open two-way communications and total flexibility in its approaches to meeting financial and management goals.

To Feehan and his staff, planned diversity means diversity in just about everything; in management, loads, capacity, and fuel sources.

Because of its modest size, Atlantic Electric has been able to buy small participation in large generating units of other, bigger utilities. This has spread involvement over many different kinds of units . . . including nuclear, which it could never have afforded on its own . . . and providing the economies of scale where they otherwise could not have been attained.

The diversity of generating sources, in addition to providing a diversity of fuel bases also contributes to overall system reliability and insulates the company from the devastating effects an outage of a single, major station might otherwise cause. It has, says J. L. Jacobs, senior vice president-finance, been a major factor in the company's low forced outage rate, which has allowed the company to participate in the Pennsylvania-Jersey-Maryland (PJM) interconnection with reserves well under the average 22 percent margin required. It also has enabled Atlantic Electric to curtail construction of some 125 MW of new capacity, representing nearly 10 percent of total system capacity.

Communications is one of Feehan's major concerns. "Credibility," he says, "tends to work conversely to the size of customers' bills." The most promising approach to combatting this, he said, was to develop a personal relationship, a realistic alternative given the utility's size.

A first approach was to establish two-way conference telephone hookups with high school classes in certain specified communities. It was Feehan's personal project; CEO to student, direct, not a downline function. The conference calls allowed Feehan to discuss company activities and concerns, as well as broader energy issues, to answer specific questions or respond to rumors and myths. Over four years, 36 of these phone conferences have been held. Not only have they been effective in helping students understand the nation's as well as the region's energy problems, and the needs and concerns of the company, but there has been a side benefit of better understanding by parents.

Another effective communications program has been the company's series of roundtables. The first of these were held with editors, publishers and educators; then were broadened to include customers. These later consumer roundtables are free-wheeling monthly meetings with Feehan and with his four senior vice-presidents. Consumer participation is by invitation. Typical participants are representatives of consumer or environmental groups, people who have written complaint letters about the utility to local newspapers or to the company directly, and local officials concerned about the utility service or issues.

Roundtable participants select the topics of discussion, not company officials. Many of the meetings revolve around the interaction of members, rather than from one-way messages from the company. Begun on a centralized basis, the roundtables now are held in each of the six counties served by the company.

In other communications areas, the conventional speakers bureau has been revitalized. Frequent meetings are held with the state regulatory commission. Open houses have been held at company plants. Energy Awareness Expositions have been held at local shopping centers. Meetings are held with small groups of employees to ensure understanding of company programs and to answer any and all employee questions.

Interestingly, the executive offices at Atlantic Electric are shirt-sleeve work areas. And, more often than not, the CEO, senior v.p.s and other managers answer their own phones.

The third area is the flexibility inherent in Atlantic Electric management. It is, perhaps, a characteristic of most small organizations that they can act or react swiftly, even reversing direction if need be. To the extent that Atlantic Electric is small by American electric utility standards, it enjoys this advantage. But the company is not really small in real terms, and its flexibility is really more a matter of attitude.

Feehan and his entire management team maintain open minds, seeking optimum solutions to the problems and obstacles facing them. Supported by a board of essentially outside directors, without ingrained industry preconceptions, Atlantic Electric's management is free to approach problems in new and creative ways, through non-traditional avenues.

It is this flexibility that made it possible for the company to meet the demands of Atlantic City's newest industry, gambling casinos. In a 3-year period, the company was called upon to compress its planning, engineering and construction functions to accommodate nine new casino customers, each with average peak demand equal to the systems' normal total annual peak growth.

And it is this flexibility that has allowed the company to move forward in a new direction for company development—toward a stronger company through aggressive promotion of conservation and a zero-demand growth future.

NEW DIRECTION

Looking at the future of Atlantic Electric, the most interesting aspect is the "new direction" for the company—a formal conservation program launched last April to allow the company to hold demand growth down and maintain control of its construction requirements.

Atlantic Electric faces a real problem. It is one of the few electric utilities in the Northeast experiencing vigorous growth in demand. The company's average increase in energy growth over the past 5 years has been more than 4 percent, spurred in part by the revitalization of the Atlantic City area economy resulting from introduction of gambling casinos. Last year, both peak and kWh demand increased by 6 percent.

The company's forecast sees demand rising at nearly 3 percent per year for the rest of the decade if left unchecked. In an effort to hold its construction requirements down over the past 5 years, the company has added little generating capacity. Its reserve capacity is at a relatively low level. Peak demand in 1980 was 1262 MW. while its generating capacity was 1435 MW, resulting in a 13.7 percent reserve. While this reserve is well below the level required of PJM interconnected pool members, AE gets by because of a combination of its size and its historically high availability and reliability levels.

CEO Feehan says that the capital cost, at current interest rate levels, of added capacity to meet unbridled demand over the next 10 years would be close to $2 billion. If demand continues to grow unchecked over the next 5 years the company would have to spend about $900 million on new construction. "That means," he explained to employees in one of a series of some 60 meetings held since last April, "that in the next 5 years we would have to double the $900 million we've invested in Southern New Jersey over the past 95 years. Continuing further on the same road we would have to triple our investment within the next 10 years."

Feehan simply doesn't believe it can be done. "It's just not in the cards," he says. Over the past 5 years the company has found it difficult enough to support capital spending totaling $280 million and to regain its AA bond rating (an as yet unachieved goal).

"We are convinced," Feehan told the annual shareholders' meeting in April, "that Atlantic Electric must embark on a new program which will meet the needs of the people of southern New Jersey while we make every reasonable and even some unreasonable efforts to reduce the massive construction program we face. We have got to lower our construction expenditures somehow."

The attempt to reduce capital requirements will have four elements:

An "aggressive" promotion of conservation,

Use of load management techniques,

Encouragement of alternative energy sources by customers such as solar water heating and windmills, and

"Pursuit of opportunities to have others make needed investments" for the company. These investments could be made by cogenerators, other utilities, government agencies, or anybody else, Feehan explains.

Can a significant reduction in growth and capital needs be achieved? Feehan hopes so but, more importantly, points out that the company has no choice but to make the attempt. Even if it can't fend off long-term growth, adds Senior Vice-President Jerrold Jacobs, the company may at least be able to buy some time and put off borrowing in the present market.

Also, progress in this direction will improve the quality of earnings, as well as the quantity, according to Vice-President-Control J. A. Salomone, a key to more favorable financing in the future.

It may prove impossible to influence demand, company officials agree. When the company was aggressively selling electricity it got one-third of the residential heating market; now that company "salesmen" are suggesting that customers look into natural gas, half of all new homes in the service territory are being built with electric heat.

Atlantic Electric is a firm believer in quantitative goals, and that appears to be a major reason for its success in recent years. Its goals for the future include holding residential rate increases below the inflation rate and improving its capital structure to 45–49 percent debt, 38–40 percent common, and 13–15 percent preferred. If the "new direction" works, it may achieve its goals.

STRENGTH THROUGH DIVERSITY

As mentioned, CEO Feehan is a strong believer in spreading risks or, as he calls it, "strength through diversity." Probably the best example of the pay off from that philosophy is the story of fuel conversions at Atlantic Electric's B. L. England station, which has two units which were built to burn coal.

As with most northeastern coal-burning power plants state air pollution authorities forced a switch to low-sulfur oil to reduce sulfur dioxide pollution. Commenting in 1971 on these regulations. Feehan—then a vice president of Atlantic Electric—said, "These measures have forced shift from coal to oil as a fuel with massive conversions along the east coast aggravating the shortage of oil. The low sulfur oil required is unique to only certain areas of the world; other sources must be desulfurized. We have been thrown into a Mid-east fuel market which is fraught with unrest, tax increases and threats to cutoff the supply."

Such warnings were not unusual back then, but Atlantic Electric carried the philosophy one step further. Even though it was forced to rely on imported oil for most of its generation, the company maintained its coal-burning capability at England station so that it could rapidly switch back. When the oil embargo struck in October, 1973, England was back on coal within a month, the first station to do so.

The company has reduced its dependence on oil from 62 percent to 20 percent right now and has set a goal of 10 percent oil by 1989 by completing the conversion back to coal at its Deep-water station. The company's current generating facilities and fuel mix looks like this:

Deepwater, 281 MW, coal/oil/gas

England, 449 MW, coal/oil

Various combustion turbines, 360 MW, oil and gas,

Ownership of shares of units operated by other utilities.

Keystone, 41 MW, coal,

Conemaugh, 65 MW, coal,

Peach Bottom, 157 MW, nuclear,

Salem, 1, 80 MW nuclear,

Firm purchases, 47 MW.

The company's goal is to broaden its fuel and generating diversity with the following planned additions (if necessary) for the rest of the decade:

Share of Salem 2, 83 MW, nuclear, in 1981,

Share of Hope Creek 1, 53 MW, nuclear, in 1986,

Share of Hope Creek 2, 54 MW, nuclear, in 1988,

Cumberland 1, a 290 MW coal unit to be built in 1988 and operated by the company which will own 260 MW of the total,

Share of Vienna 9, 125 MW, coal-fired, in 1988.

The basic philosophy, says Engineering Senior Vice President Frank Ficadenti, is to buy small shares of large units. The company feels that the construction of the Cumberland station is necessary, however, to maintain a reasonable amount of capacity directly under Atlantic Electric control.

Ficadenti, in charge of the company's forecasting effort, feels that the casino impact has peaked out. At one time a maximum of 25 gambling casinos were expected. At present there are eight operating, and one being completed. Several projects have foundered, leading Ficadenti to believe that saturation has been reached. The impact, however, is large and its ripples will be felt out into the future. Ficadenti calculates the total effect of bringing gambling to Atlantic City, both direct and indirect, at 125 MW by 1995.

The overall, 15-year forecast for the whole service territory, the southern one third of New Jersey, is for a compound growth rate of peak demand of 2.7 percent per year. With the added capacity outlined above, total generating capability will rise to 2223 MW by 1995, compared to 1483 MW now.

The fuel mix is now 26 percent oil, 47 percent coal, and 27 percent nuclear. By 1989, completion of the units shown and the planned conversions would change the fuel mix to 61 percent coal, 36 percent nuclear, and 13 percent oil.

COAL CONVERSION

The conversion back to coal is an "overriding goal" for the company in the opinion of Ernest Huggard, senior vice president in charge of operations. He explains that half the company's cost of doing business is fuel cost. With two units at the England station (totaling 290 MW) and one 80 MW unit converted at the Deepwater station, the difference in fuel cost is $60 million a year.

When the second unit at Deepwater (another 80 MW unit) is converted, another $10 million a year will be saved at today's prices. That $70 million total saving can be compared to Atlantic Electric's overall fuel and interchange energy expense of $200 million a year. The total cost to convert England and Deepwater will be $140 million, with the utility's cogeneration partner at Deepwater, DuPont, picking up $55 million of the expense.

The entire story of the coal conversion is a fascinating tale of engineering innovations, searches for fuel, and environmental compromises. In next month's EL&P we'll devote a separate feature article to explaining how Atlantic Electric helped lead the way in coal conversion and how the current conversion plant at the Deepwater station is progressing.

SMOOTH OPERATIONS

Vice president in charge of production, Henry Schwemm, is proud of the low company-wide forced outage rate, particularly in view of the large amount of coal-fired capacity. The practical effect of the smooth operation of the company's power plants is that its reserve obligation to the PJM interconnection is a low 10 percent, compared to a PJM planning requirement of 22 percent. The major factor in determining a company's reserve obligation is forced outage rate, explains Senior Vice President Huggard. Looking into the next 10 years, the company figures to save as much as $175 million in capital expense by avoiding the need to build 125 MW due to he reduced reserve obligation.

The key to high availability, says Huggard, "is a good planned maintenance program—and don't deviate from it." For example, the company used to have a normal, day-shift maintenance force at its major generating stations, Huggard explains. Now they have 24-hour, three-shift maintenance coverage at the England station. There's also heavy emphasis on planned outages. The two coal-burning cyclone-type boilers at the England station are each taken out twice a year for three to four week overhauls. These two boilers, now considered to be at mid-life, are slated for a major, $16 million rehabilitation. The cyclone furnaces, wall tubes, and most other heat exchange surfaces will be replaced.

Huggard explains that another reason for the company's availability record is the relatively low unit size. The largest company-owned and operated steam unit is 160 MW.

That philosophy can also be seen in the capacity expansion plan. The major new facility to be built and operated by the company, the coal-fired Cumberland unit, is to be only 290 MW in size. That's twice the size of the largest existing unit, but relatively small compared to what other utilities are planning for the eighties. "It's a manageable size for us," says Huggard.

The company is also proud of its gas-turbine maintenance group. "It's one of the most flexible, cost-effective programs we have," says Huggard. Atlantic Electric operates 350 MW of gas turbine capacity at six locations, all over its service territory.

The gas turbines are remotely operated, but require constant attention from one of two maintenance gangs. There's one group in the eastern part of the company's service territory and one in the west, each with its own mechanics, engineers, and support staff. The company negotiated the right to train the mechanics to cross traditional trade lines to attain the flexibility needed to work on gas turbines. The result has been extremely smooth running units with what Huggard claims is an extremely high start reliability.

John Born, vice president of electric operations, notes that the gas turbines are extensively used as synchronous condensers during high load periods. For example, the two most heavily used units devoted more than 12 percent of their running hours to synchronous condenser duty during 1980. For all gas turbines operated by Atlantic Electric, an average of 3.5 percent of running hours were dedicated to synchronous condenser duty.

Born points out that the concept of flexibility also applies to the company's transmission and distribution workforce of 300. "These people are not specialists," he says. Any member of a line crew can do any part of a job. Some crews are used to build new facilities, others for installation, others for maintenance and repair.

The company is divided into nine electrical operating districts, Born explains. District size ranges from 35 to 60 people. There is a separate group that handles transmission level underground work, submarine cable work, and the Atlantic City underground network. Each district also has from three to six people that specialize in buried distribution.

The company workforce has remained at the same level for the past 8 years, says Born, even though kWh sales have increased by one-third. One reason for this achievement is the institution of a work-force management system about 5 years ago, he explains. Currently, 99 percent of all T&D work is pre-engineered and written up ahead of time. A computerized system generates all the paperwork, a bill of materials, labor esti-

mate, etc. From 500,000 to 600,000 manhours of work a year is pre-planned. Born says that the company has relied on outside contract crews to supplement company crews but in the past year the contract force has been reduced by 25 percent.

A vehicle maintenance expense control system is being developed for the transportation maintenance force, Born adds. That group is responsible for the company's trucks, trenchers, tensioners, construction equipment, etc. All light vehicle maintenance is done at district garages, but the heavy work is now done at a central garage.

One of the trickiest operational problems was co-ordinating company crews with casino construction, explains senior vice president Huggard. Downtown Atlantic City is served by an underground duct network. The company didn't want to delay a casino opening by installing service too late and, on the other hand, didn't want to waste resources by installing too early, since each installation was a major project. (All but one of the casinos are served at 23tkV and they average about five megawatts each.)

The coordination was complicated by the prohibition on under-ground work in downtown Atlantic City during the annual summer tourist season, from June 1 to Sept. 1, adds Engineering Vice President Frank Ficadenti. In order to accommodate the nine new casinos, the entire electrical system had to be beefed up by adding one new 69-kV feeder to the "island" of Atlantic City, by upgrading the existing feeders, by building a new 69/23 kV substation, by adding a 69/23 facility at an existing sub, and by installing new duct banks (with as many as 12 ducts per bank.)

Somehow, it's all worked out and most of the work is now completed, Ficadenti feels. As many as 25 casinos were once forecast for the city, but with eight now in and one being completed, Ficadenti feels, "That's it."

The balance of the company's existing T&D projects are aimed at reinforcing the transmission system, chiefly the east-west ties between the load and generation centers on the Atlantic coast and the Delaware River valley.●

THE MARION COUNTY LAWYERS' CLUB

● Mr. LUGAR. Mr. President, I take this opportunity to submit for the RECORD a copy of a speech given by J. Clay Smith, Jr., acting chairman of the Equal Employment Opportunity Commission, to the Marion County Bar Association on October 24, 1981.

This speech reviews the historical and commendable contribution that have been made by Indiana's black lawyers in the pursuit of civil rights and of putting and end to discrimination.

As a strong supporter of extension of the Voting Rights Act. I support and encourage the continuation of the positive accomplishments and goals of the Marion County Bar Association.

The speech follows:

SPEECH OF DR. J. CLAY SMITH, JR.[1]

I am delighted that you invited me to the great state of Indiana—a state that has had within its borders such persons as Elwood Haynes of Kokomo, Indiana, an automobile inventor; Orville Wright, of Newcastle, Indiana, who invented the airship; and C. F. Jenkins, of Richmond, Indiana, who invented the movie machine. I am also delighted to be in Marion County, in which the Marion County Lawyers' Club was founded around 1925.

That the Marion County Lawyers' Club now renamed the Marion County Bar Association, and its members have made a substantial contribution to Marion County, the city of Indianapolis, the state of Indiana, and of course, to the nation is not arguable. The name of the Marion County Lawyers' Club was changed to the Marion County Bar Association on October 27, 1942. I do not know the names of the 1925 founders of the Marion County Lawyers' Club. However, in 1942 six lawyers were listed as incorporators of the Marion County Bar Association; namely, Moses Wilson Beene, James Battey, E. L. Moore, Will Porter, R. B. H. Smith, and E. L. Johnson. Except for Will Porter, these gentlemen also constituted the first board of directors of the association, along with three other lawyers; namely, Howard Hooper, W. W. Hyde and Robert Lee Brokenburr.

This paper will not attempt to cover the long and distinguished history of the Marion County Lawyers' Club. The contents of my remarks will review the Eighth Annual Convention of the National Bar Association, hosted by the Marion County Lawyers' Club on August 4–6, 1932, here in Indianapolis, Indiana.[2] Hence, I have entitled this paper, "The Marion County Lawyers' Club—1932: A Peep at the 1980's."

In 1932 Indianapolis had two bar associations—the Indianapolis Bar Association and the Marion County Lawyers' Club. At that time Paul G. Davis was president of the Indianapolis Bar Association and Forrest W. Littlejohn was president of the Marion County Lawyers' Club. The Indianapolis Bar Association had 400 members; there were approximately 1,000 lawyers in Indianapolis, and 1,110 lawyers in the state. The Marion County Lawyers' Club had approximately 50 members; there were approximately 50 Afro-American lawyers in Indianapolis and fewer than 60 Afro-American lawyers in the state. Records reveal that the Indianapolis Bar Association did not have a race restriction membership provision in 1932. This fact is gleaned from a speech by James M. Ogden, who in 1932 was the Attorney General of Indiana. In a speech during the National Bar Association convention, Mr. Ogden stated, "Some of your members [the members of the National Bar Association] are members of our organization [Indianapolis Bar Association] as well." NBA Proceedings at 61. Mr. Ogden's remarks were obviously referring to the members of the Marion County Lawyers' Club. This is an interesting fact since many volunteer bar associations denied Black lawyers admission as late as 1950. I do not know what the admission policy of the Indiana State Bar Association was or whether a state bar association existed at all.

In the 1920's and 1930's Afro-American lawyers practiced in five cities in Indiana: Gary, Michigan City, Richmond, South Bend and Indianapolis. According to a lawyers' directory published by the NBA in 1932, the following lawyers practiced law or lived in Indianapolis: (last name first) Austin, Elsie H., 229½ Indiana Ave.; Bailey, R.L., 46 Pa. Ave.; Battey, James M., 229½ Indiana Ave.; Beatty, J. W., 152½ E. Court St.; Beckwith, Frank R., 2232 Hovey St.; Beene, Moses W., 152½ E. Court St.; Brokenburr, Robert Lee, 45 Pa. Ave.; Browder, John, 152½ E. Court St.; Brown, Joseph K., Walker Bldg.; Bryant, Lawyer, 152½ E. Court St.; Bryant, James A., 229½ Indiana, Ave.; Grant, Marshall, 401 N. Senate St.; Grant, Wilbur H., 401 N. Senate St.; Henderson, W. E., 152½ E. Court St.; Henry, W. S. 229½ Indiana Ave.; Hooper, Howard, 227½ E. Washington St.; Hyde, W. W., 152½ E. Court St.; Jacobs, Carey, 1213 N. West St.; Johnson, E. L., 152½ E. Court St.; Littlejohn, F. W., 46 N. Pa., Ave; Longwood, Bee, 152½ E. Court St.; Moore, E. Lewis, 227½ E. Washington St.; Perry, H. R. 533 N. Senate Ave.; Ransom, F. B., 640 N. West St., Walker Bldg.; Richardson, Henry J. Jr., 229½ Indiana Ave.; J. Wellman Smith, 229½ Indiana Ave.; R. B. H. Smith, 152½ E. Court St.; Terrace A. C., 226 W. Vermont St.; Thurston C. H., 229½ Indiana Ave.; Williams Frank, 152½ E. Court St.

Several of the members of the Marion County Lawyers' Club held important positions in the National Bar Association. For example Freeman B. Ransom was a Vice President of the NBA and was a member of the Committee on Convention, the Committee on Legislation, and the Credentials Committee. Ransom was also a consultant to Mary McLeod Bethune in her capacity as Director of the Division of Negro Affairs, National Youth Administration. He is listed as a consultant to the 1939 Second National Conference on The Problems of The Negro and Negro Youth held in Washington. He served on the Committee on Civil Liberties and Political Suffrage, along with Ms. H. Elsie Austin another Hoosier, Afro-American woman lawyer. See Proceedings of The Second National Conference on The Problems of The Negro and Negro Youth, Washington, D.C., January 12–14, 1939, at p. 58.

Robert Lee Brokenburr was a member of the NBA Committee of Jurisprudence and Law Reform, the Publicity Committee and the Committee on Affiliation of Bar Associations H. R. Wilson was a member of the NBA Credentials Committee and the Committee on Annual Bar Day. Henry J. Richardson, Jr.[3] was a member of the National Bar Association Legal Directory Committee. Robert L. Bailey was an NBA member of the Budget Committee serving as Vice-Chair. Mr. Bailey was also Assistant Attorney General of Indiana.

The 1932 Convention was held in the Walker Casino—owned by the famous millionairess Madam C. J. Walker, an Afro-American woman, who for a time lived in Indianapolis. February 10, 1910, was the day that Madam Walker arrived in Indianapolis, Indiana. So impressed was she by the city's business possibilities for Blacks and the cordiality extended to her, she decided to make it her home. A home on North West Street with the factory in the rear became the first Madam C. J. Walker Manufacturing Company. Two years later, adjoining space at 644 North West Street was purchased for expansions. Two young lawyers, Freeman B. Ransom and Robert Lee Brokenburr, who romed with Mme. Walker, gave her free legal advice. Attorney Brokenburr filed the Articles of Incorporation on September 19, 1911, with Mme. Walker as the sole owner. F. B. Ransom gave up his law practice to become General Manager of the company until his death, in 1947, while Mr. Brokenburr retained his private practice, plus served as Assistant Manager. The company's growth rate was astronomical. Outside of the U.S., Walker products were in demand. The Foreign Trade Department was opened after her 1913 trip to Panama, Cuba and the West Indies. The Walker Company

[1] Dr. Smith received his A.B. from the Creighton University in Omaha, Nebraska, in 1964; J.D. from Howard University Schoool of Law in 1967; LL.M in 1970 and SJD in 1977 from the George Washington National Law Center, respectively. This paper is respectfully dedicated to Henry J. Richardson, Jr., and H. Elsie Austin, who both have touched many lives in Indianapolis, our nation and the world.

[2] See Proceedings of the 1932 National Bar Association Convention in Indianapolis, Indiana.

[3] See Richardson, Report of the Legal Aid Division of the National Bar Association, Inc., 1 National Bar Association Journal 130 (1942). At this writing Mr. Richardson is the oldest living member of the Marion County Bar Association.

gave employment to hundreds of Blacks, particularly during a time when America's economic future was bleak.

The splendid nature of the Walker Building was noted after welcoming remarks of the then Mayor of Indianapolis Reginald H. Sullivan by Perry W. Howard, a Republican National Committeeman from the State of Mississippi. Attorney Howard stated:

"We are delighted to be in Indianapolis; to be in this splendid building—the handiwork of a noble woman and constructed under the management of a gentleman for whom we have the highest regard as a member of the bar—Honorable F. B. Ransom—than whom we have no finer man in the country." Id. at 59.

I know that you have asked me to address the role of the black lawyer in the 1980's. With your permission, I choose to follow my own course of reviewing the mind of the Afro-American lawyer in 1932 which has a direct bearing on the issues of the 1980's. Hearing no objections—I shall proceed.

During the 1932 NBA Convention hosted by the Marion County Lawyers' Club some very profound concepts emerged from the mouths of now historic Afro-Americans. These concepts confirm my assessment of the strict confidence that Afro-American lawyers had in the judicial process and the judicial systems of America, and their total rejection of communism. For example, Perry Howard spoke about the consequence of the "lack of faith in our system of jurisprudence." Mr. Howard stated:

"We have faith in our courts and faith in the institutions of our country. We have faith in the Executive of our country. We are not going to turn communist and we are not going to turn anarchist, but with faith in God and the courts and learned in the law, we are going to fight it out for justice . . ." Id. at 60.

From the very begining of the Afro-American lawyer on this continent in 1845, the plight of the Black lawyer has been peculiar. Segregation retarded the Afro-American lawyer's growth and development to diversify his practice in specialized civil law areas, to diversify his client base, to break into corporate law firms, corporate and government legal offices and to diversify the courts of our nation at every level. Perry Howard noted this theme in his speech before the NBA in 1932 here in Indianapolis. He stated:

"Our colored attorney has a fight that is peculiar. Segregation has a tendency to prevent our receiving a fair deal. Learned as they are in the law, if we ever get what is coming it will have to be through the leadership of the lawyers of this country. From everywhere we have come and met on Indiana soil; we find here the best of our group—the National Bar Association—in the City of Indianapolis." Id. at 60.

This statement is very important because it asserts a position that is jurisprudential in nature and one which explains why the Afro-American bar exists today. From this statement we learn that Afro-American lawyers are unique; that race restrictions deterred Afro-American lawyers in the profession of law; that scholarship alone is not the sole test of upward mobility; and that the legal profession as a collective body must assert itself to eradicate discrimination and its impact.

In 1932 when the Afro-American lawyers met in Indianapolis, Herbert Hoover was the president of the United States. In the Spring of 1931, the depression in Europe reached panic proportions when a banking crisis struck Austria and spread rapidly into Germany. As you recall, the catastrophic crash of the Wall Street stock market in October, 1929, heralded the great depression. That depression spread to Europe. The economic conditions of Europe and it's economic isolation, and a worsening of its financial and political chaos, spawned Adolf Hitler.

In 1932 large segments of the American population were suffering from unemployment, bankruptcy and strife. Afro-Americans were in a perilous state. Black lawyers from all over the nation came to Indianapolis, Indiana to stake their claim deeper into America values, and simultaneously to hold America accountable for the plight of Black people. During the Indianapolis meeting, Jesse S. Heslip, from Toledo, Ohio, the president of the National Bar Association, gave the keynote address entitled, "Straight Ahead, We Cannot Detour, We Will Not Retreat." It is within the contexts of President Heslip's address that the conditions of the world of Black America and the role of the Black Lawyer in the 1930's are laid bare.

President Heslip spoke about the conditions existing in Western Europe, the British Empire, the Far East, in Africa and South America. He stated:

"Practically the whole of Western Europe is seething in misery. . . . The British Empire is facing the gravest future. . . . We are fully cognizant of the suffering in the Far East. . . . Africa is virtually broken. . . . South American Republics are daily engaged in civil commotion. . . ."

President Heslip then described the conditions existing in the United States. He said:

"The average citizen of these United States a few months ago looked upon this panorama with a sense of security from the agitation and distress which he saw in other parts of the world. With our statesmen, editors and bankers declaring in God-like fashion that 'prosperity was just around the corner' this average citizen felt himself God's selected saint. The United States boasts that it is the wealthiest and most enlightened nation of the family. Yet hardly any other nation, blessed with America's facilities, could so fail and neglect to provide ways and means of relief from these economic and political burdens as miserably, miserly and ignorantly as our Federal Government.

"With bank failures as common as daylight; with no sound and safe economic program proposed by either of our major parties; with farmers and urban homes staggering under unprincipled mortgage loan; with diseased parents and undernourished children uncared for; with smokeless factories, rusted machinery, and bankrupt business, and with approximately 12,000,000 unemployed, the United States offers only bread lines and soup kitchens as its relief to its distressed and tormented citizens.

"Unemployment is the rule of today. And with unemployment, selfishness and intolerance have increased to the point where substantial numbers of the American people are on the brink of extinction. . . .

"Along with this economic upheaval, there is an increasing racial prejudice. We find race prejudice in America greatly intensified and extending to almost every phase of our life. It is firmly believed that our economic condition, causing unparalleled unemployment, has given rise to more selfishness and more intolerance. . . .

"The Negro occupies the lowest and most unsafe position in America's economic program. We are the first wards of the public charity, as a rule, because we occupy a very insecure economic position. What can the Negro business and professional man expect in the way of economic safety and prosperity with any reasonable degree of permanency when he is primarily dependent upon Negro labor for patronage and support? All about us we see Negro homes falling under the crash of the judicial hammer at foreclosure sales; we witness Negro families scattered and broken by reason of poverty forced upon them through the inability of the chief bread winners to sustain them by decent labor; we find otherwise respectable Negro men and women seizing upon boot-legging and prostitution as means of livelihood, not by choice, but because of this most detestable and prejudicial economic scheme. The Negro church, school, and home are the background of our social life. With these institutions devastated by poverty may not the Negro business and professional men reasonably anticipate their own collapse?" Id. at 66, 69.

A point for emphasis here is president Heslip's concern about the impact of the economy on the profession of the practice of law by the Afro-American lawyer, and on the Afro-American population as a whole. Heslip's declaration that the "Negro occupies the lowest and most unsafe position in America's economic program" could be argued today. Heslip asserts that the "Negro lawyer must prepare himself to meet these issues . . . [and] become thoroughly grounded in constitutional law." Id. at 71. Finally, and in the tradition that characterizes the Afro-American lawyer's faith in our constitutional democracy, Heslip states that the "Negro lawyer . . . must be ready to face the nation's highest tribunal in search of justice for ourselves. . . . We are consecrated to the sacred task of extending to the Negro equal economic opportunity and the full indicia of peace, life and liberty." Ibid.

Other great speeches were given here in Indianapolis during the 1932 convention of the National Bar Association hosted by the Marion County Lawyer's Club. Walter White the Executive Secretary of the NAACP highlighted the need for federal intervention where state laws and state courts refused or failed to protect the constitutional rights of Blacks. White was not a lawyer, but as an official in the NAACP his presence at the convention was an important one. Mr. White stated that the NAACP's "next step will be a step further in giving federal courts the right to give redress when the state courts and the state itself do not take steps to give that redress." Id. at 74.

Several other important speeches were delivered during the 1932 meeting in Indianapolis. Mr. C. Frances Stradford [Chicago, Illinois] delivered an important paper entitled "Social Unrest and The Law," and Freeman L. Martin delivered a paper on the subject of "How To Stay In Court." Also in attendance and constantly mentioned in various speeches was Dr. Charles Hamilton Houston, Dean of the Howard University School of Law, who spoke on "The Effect of the Program Inaugurated for Lawful Enforcement of Law." And, highlighting the discrimination by the federal government, Thomas Campbell from Denver, Colorado gave a strong paper entitled, "Governmental Policy Regarding Employment at The Hoover Dam."

Women have always played a significant role in the Afro-American Bar—and so it was in Indianapolis in 1932. Two women were very influential during the convention; namely, Ms. Ollie May Cooper of Washington, D.C., the National Assistant Secretary of the NBA,[4] and Georgia Jones Ellis, of Chicago, Illinois, who delivered a significant paper entitled, "The Necessity of Universal Suffrage." And, I believe that H. Elsie Austin, who I have previously mentioned, and Bee Longwood were two of the few Black women lawyers in Indianapolis during the 1932 Convention.

Ms. H. Elsie Austin is a unique woman who has made a significant contribution to the law and to humankind itself. In 1930 Ms. Austin was graduated from the University of Cincinnati, College of Law. She is the first black woman graduate of this law school. From 1937–1939, she served as Assistant Attorney General in the state of Ohio and is the first black woman lawyer in the history of the nation to hold this position.

[4] See J. Clay Smith, Jr., Ollie May Cooper: "The Real Dean of Howard University School of Law," 20 How. L.J. 368 (1980); Note, Ollie Cooper, 94 Dies; Taught Law at Howard U., Washington Post, Col. 3, B5, April 17, 1981.

Also, Ms. Austin was elected as National Vice-President of the National Bar Association circa 1937. Presently, she resides in Washington, D.C. and sends her personal regards to the Marion County Bar Association.

In conclusion, you invited me to come to Indianapolis to discuss the role of the Black lawyer in the 1980's. Your role as Afro-American lawyers, your mission as Afro-American lawyers, your commitment as Afro-American lawyers, and your role as the now Marion County Bar Association is no different today than in 1932. The Marion County Bar Association must continue to assert its energy for the eradication of discrimination in the American workforce. You must take your stand on the principles undergirding affirmative action. In the tradition of two of your outstanding members—Howard Hooper and Mercer M. Marice, this association must seek, find and secure justice and knock on the doors of injustice and callousness which restricts equal opportunity—whether economic or employment affecting Black Americans.

I accepted the invitation of the Marion County Bar Association because of your history in America and because of your sustained desire to rid America of race distinctions and discrimination.

The Marion County Bar Association is important to me as a citizen of the United States and as Chairman of the U.S. Equal Employment Opportunity Commission.

To my knowledge, it has been a half century since the NBA held a convention in this city. The United States is indebted to the Marion County Lawyers Club (Association) for fifty-six years of leadership in the county, the city of Indianapolis, the state of Indiana and in the nation. I am happy that I have been able to articulate themes of the 1930's that laid the foundation for your banquet theme—The Role of Black Lawyers in the 1980's.●

AVERELL HARRIMAN

● Mr. PRYOR. Mr. President, one of the most distinguished public servants in the history of the United States, Averell Harriman, recently celebrated his 90th birthday. That milestone has received considerable attention and properly so. Few Americans, in the two centuries this Government has existed, have contributed more to the cause of peace and good will than Mr. Harriman.

Averell Harriman stands as a model of public service. As Governor, Ambassador, Cabinet member, and in other public offices, he has contributed significantly to our development as a nation and as a power in the modern world.

His influence, however, extends far beyond official records, and his spirit, his commitment, and his willingness to give time and talent have inspired men and women in this country and around the world.

The Washington Post of November 14, 1981, contained a column by Philip Geyelin on the remarkable Averell Harriman. Mr. President, I ask that this be placed in the RECORD.

The column follows:

AVERELL HARRIMAN: A GIANT

(By Philip Geyelin)

It was August 13, 1950. W. Averell Harriman was returning home from one more delicate mission—as President Truman's emissary to General Douglas MacArthur. He was about to take up another dicey piece of business as Truman's foreign policy coordinator.

Reporting in a late evening "newsmakers" broadcast, Walter Cronkite had this to say of the former almost-everything in American politics and diplomacy whose 90th birthday tomorrow was dedicated this week, at a fund-raising dinner, to the fortunes (material as well as political) of his beloved Democratic Party:

"Harriman could have been a playboy. He was born with a $70,000,000 silver spoon in his mouth . . . went to Groton and Yale . . . [then] into banking, became an eight-goal polo player, even developed a sort of upper-class stoop, a slight bow to boredom. But this millionaire was made of considerably sterner stuff. . . . Today Harriman seems to be a man devoted solely to selfless service to his country."

"Selfless service"—it sounds smarmy, unless you happen to be fed up to here with the rancid condition of American statescraft as it comes across these days: the obsession with "turf"; the "guerrilla warfare"; the who's-up-who's-down - who's - on-the-skids speculations of breathless analysts. Against the backdrop, a review of the record of Averell Harriman shines bright as a timely reminder to today's pushers and shovers of the purposes they are supposed to be serving—of what public service, at its best, is all about.

What it was all about, in Averell Harriman's case, was almost a half-century of reflexive, fire-horse pawing and champing at the fire bell's first ring. When Cronkite spoke of a "tall, stooped, unsmiling man who wearily climbed down from the big Constellation at Washington's National Airport," Harriman was 59 at that time and "wearily" was apparently the operative word. The way people talked about him 31 years ago made Harriman sound sometimes like a prime candidate for early retirement.

New York Times columnist C. L. Sulzberger, in an album of memoirs entitled "A Long Row of Candles," offered these snapshots of that period: "When Averell came in, he looked ghastly. He is visibly overtired and thin . . . [and on another occasion] He looks tired and worn . . . [and on another] He really looked bushed . . . [and again] He looked poorly and has a tic in his eye . . . [and in 1951] Last week he worked straight through from 8 a.m. until 7 a.m. the following morning. That's too much for a man of sixty."

As it turned out, it wasn't. He had already served two presidents over 17 years: Franklin D. Roosevelt, as New Deal manager, lend-lease coordinator in London, wartime ambassador in Moscow; and Harry Truman as promoter and roving ambassador for the Mashall Plan. Still ahead was a mind-boggling succession of jobs: ambassador to London, secretary of commerce, nuclear test ban negotiator, undersecretary of state, Vietnam peace negotiator, and a half-dozen special presidential missions—not to mention governor of New York.

He voted for Al Smith in 1928 and became a Democrat for life because he was "very disturbed by the fallacies of the Republican Party, both domestic and foreign," he explained in a long conversation the other day. "I am just about always disturbed about something—you have to be.'

He says he "can't get as excited about some things as I used to when I could put on a hat and do something about it." But when I called on him, he was hunched up, inches away from his television set. Israeli Prime Minister Menachem Begin was holding forth on ABC's "Issues and Answers," and if Harriman wasn't excited, his muttering suggested that he was, let's say, disturbed.

He was also philosophical. "Every situation always looks the worst it's ever been," he replied, when asked about the current international scene. "But these questions get solved because they have to be solved."

Does the man who dealt with Roosevelt and Churchill and Stalin subscribe to the theory that these men were giants—and that there are no giants on the contemporary stage? "History makes them giants, because what they do becomes important," is his answer. "But they are not giants when they do it—there will always be somebody around to do what's needed."

Without vanity but by way of illustration, he recalls that "everybody thought I was crazy" to accept a comedown from undersecretary of state to assistant secretary in the 1960's. "But it didn't bother me, because I knew I had a job to do. When something needed doing, I usually started to do something about it." He doesn't think that's unique—"there are many Americans who can do something about these things."

He's probably right. But there are not many—or at least not all that many now in action—who fit the test of selfless service set down by George Kennan, Harriman's No. 2 man in Moscow in the war years. In his "Memoirs" in 1967, Kennan wrote of Harriman:

"No diplomatist ever executed more punctiliously [his] instructions. . . . None—be it said to his eternal credit—was ever less inclined to distort the record however imperceptibly, in order to show himself and his performance off to good advantage. . . . The United States has never had a more faithful public servant."●

ADDITIONAL LAND FOR THE TRUSTOM POND REFUGE IN RHODE ISLAND

● Mr. STAFFORD. Mr. President, in reviewing the Interior Appropriations bill, I am reminded of the fine effort put forth by Senator JOHN CHAFEE in the effort to provide Federal funding for the purchase of additional land for the Trustom Pond Refuge in Rhode Island.

This acquistion is crucial not only to Rhode Island and New England, but also to the United States as a whole. We need to preserve precious pieces of land such as the Trustom Pond area for future generations to enjoy and for the protection of those fish and wildlife species which need these areas for their continued survival.

Mr. President, I would like to request that an article from the Narragansett Times, which illustrates the importance of this appropriation, be printed in the RECORD.

The article follows:

[From the Narragansett Times, Nov. 5, 1981]

SEN. CHAFEE TO THE RESCUE: TRUSTOM EXPANSION SQUEAKS BY

(By Craig N. Berke)

A joint Congressional committee yesterday approved $440,000 for the purchase of 60 acres of privately owned land to expand the boundaries of the Trustom Pond National Wildlife Refuge in South Kingstown.

The committee approval means that the appropriation is almost certain to be included in the U.S. Interior Department's land and water conservation budget that will be passed along to President Reagan.

Hope for the acquisition dwindled briefly yesterday, however, when the joint House-Senate conference committee killed the funding.

Members of the House earlier this year had approved $591,000 to purchase land adjacent to Trustom. But Senate members of the committee balked at the amount, and the House members gave up during caucus yesterday morning in Washington, D.C.

But when Rhode Island Sen. John H. Chafee, a strong backer of the Trustom package, heard that news, he marched over to the conference with aide Robert Hurley. The Republican senator pulled off some political wizardry, persuading Senate members of the committee to restore $440,000, the amount needed to buy the 60 acres owned by Joseph J. Young, Jr.

Because of rising property taxes, Mr. Young had threatened to sell his land for residential development if the Senate didn't allocate funds for the purchase this year. Mr. Young, an Arlington, Va., resident, repeatedly has lobbied for the federal purchase, wanting to keep his South Kingstown land undeveloped.

"It was like raising Lazarus from the dead," Mr. Young said of the Congressional action in a telephone interview from Washington yesterday. "At 9:30, it was a dead turkey, and at 12:30 it was alive again. I had left that meeting thinking it was a completely dead duck. An hour later, the action had been reversed. It was amazing."

The conference committee's report goes back to both houses for approval, before the budget goes to the President.

Congresswoman Claudine Schneider, who helped push for the original $591,000 approval in the House, said last night she was "thrilled we got at least $440,000." Noting the temporary death of the funding yesterday, Mrs. Schneider observed that "the Senate was not tuned in to this project at all" until Senator Chafee made his pitch.

Mr. Young's sale to the federal government would average $7,300 an acre, seemingly a bargain when one considers it had already been platted for development of prime shoreline homesites.

The appropriation was preceded by the August approval by the U.S. Department of Fish and Wildlife of the long-range plan to expand the 365-acre Trustom Pond refuge to about 965 acres.

Fish and Wildlife officials have said their first priority was purchasing Mr. Young's 60 acres.

The Rhode Island Audubon Society, upon learning of the government land acquisition plan, pledged to donate its 115-acre preserve on the east shore of Trustom Pond to the national wildlife refuge.

That leaves about 425 acres the federal government would still like to purchase outright, or at least secure their development rights, leaving them as open space. It has been estimated that $1.25 million would be needed to complete the purchase of the acreage surrounding the current boundaries.

"This is an extraordinarily important thing for the state and southeastern New England," Mr. Young said. "The prospect of having nearly 1,000 acres on the ocean, including one-and-a-half miles of ocean beach, is just marvelous."

The Trustom Pond area is a pristine wilderness adjacent to Moonstone Beach, which, other than a few family residences and farms, has been untouched since before the American Revolution. Alfred L. Hawkes, executive director of the state Audubon Society, calls it "one of the prettiest areas on the coast."

In January, when Mr. Young announced plans to develop as many as 100 house lots on his property, a local conservation group called Friends of Trustom Pond formed to try to save the unspoiled nature of the area.

The group mobilized local support, writing members of the state's Congressional delegation and getting the South Kingstown Town Council to renew a resolution to keep the area development-free.

Mr. Young said he is pleased with all Congressional representatives who played a role in the funding project, and described it as "a marvelous thing to see."

Mr. Young pointed out that between potential federal and state purchases in the Matunuck and Moonstone areas, as many as 2,000 acres may be preserved for open space.

If outright purchases are not possible, the next best thing may be securing the development rights, according to a regional spokesman for the U.S. Department of Fish and Wildlife.

Under such a plan, the government would pay the landowner half the property's value. The landowner would still hold title to the land, and would be permitted to maintain a residence on it. The owner also could use the land for anything other than new residential, commercial or industrial purposes. Permitted uses would include agriculture, hunting, trapping or fishing.●

DR. LORING HART

(At the request of Mr. ROBERT C. BYRD, the following statement was ordered to be printed in the RECORD:)

● Mr. LEAHY. Mr. President, like all Vermonters, I applaud the dedication and excellence shown by Dr. Loring Hart during his tenure as president of Norwich University. Norwich University is the Nation's oldest private military college, and one of the Nation's finest. Dr. Hart's own service is complete within the tradition expected by this fine university.

I ask that an article about Dr. Hart from the Sunday Rutland Herald and the Sunday Times Argus, October 25, 1981, of Vermont be printed in the RECORD.

The article follows:

HART BROUGHT SCHOOL INTO STEP WITH TIMES IN 10 YEARS AT HELM

NORTHFIELD.—Dr. Loring Hart is leaving his post as president of Norwich University in June, culminating a decade-long reign at the nation's oldest private military college. The school will not be long without him, though. Hart plans a return to the Northfield campus a year after he delivers his last commencement address as the school's 21st president.

The 56-year-old former English teacher might return to the Norwich classrooms; he has named that as one option after a planned 12-month sabbatical, or perhaps help in fundraising efforts for the university.

He leaves not the same homogenous military-oriented school he inherited in 1972 but a school so changed that founder Alden Partridge might not recognize it.

"The essential nature of the school up until about 1970 had remained virtually unchanged since 1819" when it was founded, says the gray-haired career educator.

When Hart took control of the school, it was an all-male, traditional college firmly rooted in the past. What the next president will run is a co-educational university with two campuses as different as day and night that costs $20 million to operate annually. The new president will find his administration is rushing headlong into an uncertain future, hustling to keep enrollment up and stretching curricula and development dollars to the limit.

Hart has naturally been given much of the credit for the school's metamorphosis during the past 10 years. He is generous, however, in passing around the plaudits. Hart believes his tenure has been successful largely because he made it his policy of including others in decisions. Says Hart: "I try never to make unadvised decisions."

It was a policy that endured from the beginning.

Hart's association with Norwich began in 1957, seven years after he graduated from Bowdoin College in Maine. He signed on as an English teacher and soon rose to department chairman. By 1968 he was, by his own admission, a dean and vice president "very much involved in things." In 1972, at the age of 46, he succeeded Barksdale Hamlett as president.

It was an unsteady time for Norwich. The anti-war sentiment of the Vietnam era was running high. The cadet population had fallen to fewer than 1,000. In a precedent-setting move, Hart orchestrated the 1972 merger with Vermont College. The private school was then in financial debt.

"It was considered to be a finishing school for debutantes," Hart remembers, recalling that enrollment had fallen significantly at the small two-year college.

The merger was the first of many steps Hart says were not intended to break traditions, but rather to bring Norwich into a more modern age.

"The need for change" to co-education, says Hart, "was inevitable."

"We thought we could maintain two campuses: one in Northfield, male and military and one in Montpelier, civilian and for women."

He got more than he bargained for. The impact of the merger was heavy and irreversible.

"Within two months women were demanding to live in these barracks, and their parents were demanding it," says Hart.

By 1974 the tide had turned completely. A 155-year-old barrier was broken and a handful of the women who had requested to live on the Norwich campus signed into the Corps of Cadets. Not until a year later would women be enrolled in federal service academies like West Point and Annapolis.

Hart's simple conclusion is that women have changed the very fabric of life for cadets. Those who before sought comfort in the familiar cloak of fraternity suddenly found themselves competing on every level with women.

Things were quite difficult for the first female cadets but they endured.

"They strengthened every aspect of university life," Hart recalls. At a time when military life was scorned, the admission of women gave Norwich "a sense of modernity . . . that we were with it."

There were other changes. The energy crisis of the mid-1970s played havoc with the school's budget and Norwich faced a deficit of about $750,000. Under Hart's leadership the school began a multi-faceted program designed to diversify the curriculum, raise capital and fill the empty beds on both campuses.

"We knew that if we didn't restore the campuses to capacity we would face major deficits," he says.

Hart proudly points out that the school's most successful development campaign ever pulled in $8 million. The curriculum was broadened and the faculty upgraded. The grand plans, guided by the raspy-voiced president who brought all the pieces together, eventually worked. This fall the freshman "rooks" were crammed three to a room. Enrollment at VC was near capacity. In their neat, carpeted offices admissions personnel had to be smiling just a little.

One episode stands apart from all others in this decade, though. Foreign students had been attending Norwich throughout the 20th century, but never so many as had come from Iran. The numbers grew and peaked in 1979 when 139 cadets enrolled at Norwich were receiving paychecks from the Imperial Navy of Iran.

Hart remembers the Iranian revolution and the hostage crisis as times of "great upheaval." But he says there were never political problems between Iranian cadets and their American counterparts.

He remembers making hasty arrangements

for the 85 Iranian cadets to leave in April 1980 when then-President Jimmy Carter ordered all Iranian government employees out of the U.S.

Though he sympathized with the young men, emotion can go just so far in the military, Hart says: "As young people I would have liked to see them stay and finish their educations. As officers of the Imperial Iranian Navy I wanted them to leave."

The summer's commencement exercises helped relieve some of the sadness brought about by the Iranian episode. But right behind it were stirrings of another issue—a rumored takeover of programs from financially ailing Goddard College.

The Plainfield school and Norwich eventually reached agreement for the university to take over four adult degree programs. But it was a hard road. Hart says that both college communities were misled by media reports of negotiations for transfer of the programs, and dismisses as "all nonsense" rumors at the time that the two schools considered merging.

He strongly denies Norwich ever "bought" programs: "We bought nothing from Goddard College. It had nothing to do with buying a program. I don't know how you would put a price on a program. We paid a transfer fee for records."

Even in the twilight of his tenure Hart still puts in those long days. He is in his office by 8:30 a.m. and the testimonial dinners sometimes last past midnight. He will not miss the travel or the late nights out on the road. Over the years he has visited dozens of cities, attended hundreds of fundraising events of all kinds, shaken the hands of thousands of alumni. It has been a far cry from his school days when college presidents "walked around the campus, taught a class, smoked their pipes and commented on the events of the day."

Those days are, of course, gone. College presidents today are money-making technicians, public relations whiz kids. Teaching, perhaps sadly, is too often an extracurricular activity for them now.

But Loring Hart is cut from another mold. Ironically enough, like MacArthur, he promises he'll be back.●

NOMINATION OF ELLIOTT ABRAMS

● Mr. HELMS. Mr. President, today the Committee on Foreign Relations heard the testimony of Elliott Abrams, whom the President has nominated to serve as the Assistant Secretary of State for Human Rights and Humanitarian Affairs. Mr. Abrams was warmly welcomed by the members of the committee, and his nomination was approved by a unanimous and bipartisan vote.

Mr. President, the Reagan administration has consistently espoused the fundamental rule of liberty in the conduct of our Nation's foreign policy. In nominating Mr. Abrams for this sensitive post, the President has given this young man a unique opportunity to articulate to the world the true character of the issues at stake in discussions about "human rights" throughout the world. The human rights debate is fundamentally a battle of ideas, Mr. President, and Mr. Abrams appears to be a man whose education and experience equip him well to carry on a forceful and persuasive articulation of the truth about the human rights.

I am often saddened by the remarkable consistency with which many so-called human rights arguments are made in favor of regimes and movements whose ultimate goal and historical practice consists in the revolutionary subjugation of a people to tyrannical rule by a narrow ideological party. It seems that some people will go to any extreme to defend leftist subversion, terrorism, and revolution anywhere in the world. They believe that no government is just unless it is Marxist. They believe that private property is "oppression." They believe that the family is an "obstacle to progress." They believe that religious faith is "the opiate of the masses."

The President, the substance of the human rights discussions normally reported in the international media is all too often polluted with these suppositions, however nicely disguised by legalisms and technical jargon. It is intellectually fashionable in many quarters these days to demean the family, to attack private property, to belittle religious faith, and to constantly heap abuse upon the values and traditions of our free Nation, while embracing unquestionably the most brutal of suppressions, so long as it promises, starry-eyed, the ideological deliverance of the people to a revolutionary utopia.

We all know where such revolution is coming from: The centers of export for totalitarian revolution around the world are common knowledge. North Korea has its agents in Latin America and Africa; Libya sends assassins to eliminate its enemies around the world; and Havana, Moscow, East Berlin and Peking all harmonize in the revolutionary symphony.

We must recall that, in the case of Argentina, of El Salvador, and of many other trouble spots in the world, it is precisely these revolutionary provocateurs who create the climate in which human rights violations are most likely to take place. Once the revolutionary insurgents have begun, their leftist allies in the propaganda network around the world begin to beat the drum about human rights violations, but always limit themselves to criticism of governments, not insurgents.

Those governments which they attack are usually those who are allied with the United States in opposition to Soviet imperialism—to call it by its proper name. It is my hope that what many perceive to be a vacuum in the human rights dialog, the lack of criticism of leftist governments and the revolutionary terrorists they support around the world, will be eliminated by a sober, informed and consistent balance in our approach to human rights.

Mr. Abrams has a unique opportunity as the administration's "point man" in matters concerning human rights; to expose the fallacies of the arguments which seek to dignify totalitarianism. Mr. President, the battle is one of ideas. As Solzhenitsyn has written, and as he told me himself in reference to Russia, his homeland, the enemy is falsehood, and it inevitably brings violence in its wake. I wish Eliott Abrams much fortitude and perserverence in the task that awaits him.●

A REGION OF INSECURITY U.S. INDIFFERENCE, SOVIET BUILDUP CREATE NEW DANGERS IN ASIA

● Mr. HAYAKAWA. Mr. President, the presence of the Soviet Fleet on all the world's oceans, the impressive military technology of the Soviet Union, and its aggressive shipbuilding program all provide conclusive evidence that Moscow looks to the oceans as a way of expanding its worldwide influence and military power.

The growth of Soviet armed strength in East Asia far beyond the U.S.S.R.'s own defensive needs is particularly troubling. Some of the world's most important sealanes pass through the area and is a major source of strategic raw materials for the free world.

"The United States ignores security matters in East Asia at its own risk," conclude David Fitzgerald and Michael Moodie in a September Sea Power Magazine article entitled "A Region of Insecurity: U.S. Indifference, Soviet Buildup Create New Dangers in Asia."

In recent years Moscow has built up its forces both quantitatively and qualitatively. It now has 44 divisions in Asia, totaling between 300,000 and 400,000 personnel. Most of these forces are deployed against China but there is a parallel buildup of between 10,000 and 12,000 men in the Kurile Islands north of Japan. Moscow has nearly 2,000 aircraft stationed in the Far East and about one-third of its submarine force. The Soviet Fleet is now deployed to the point where it could dominate the Pacific sealanes and, if it chose, blockade them. Also, the sealanes of the Western Pacific have been further endangered by recent Soviet access to Vietnam's naval base at Cam Ranh Bay, thereby increasing the mobility of the Soviet Pacific Fleet and simultaneously extending its reach.

The United States cannot ignore the Soviet threat to the sealanes of the western Pacific. Japan imports 75 percent of its oil through these avenues. Australia, the Philippines and the ASEAN states—Association of Southeast Asian Nations—depend on seaborne trade to maintain their dynamic economies. And most importantly, the United States imports large quantities of titanium, zirconium, rubber, tin, and tungsten from east Asia.

As Fitzgerald and Moodie note:

> In pursuing its interests and responding to developments in Pacific Asia, the United States will have to draw upon the full panoply of policy instruments at its disposal. Clearly, one of the most important of these instruments is the Navy . . . The big problem, of course, is one of numbers.

I wholeheartedly share the concerns of Messrs. Fitzgerald and Moodie about the increasingly uneasy security situation in the Asian Pacific region and our ability to respond. In 1964 our fleet numbered 917 active ships. It is now only 460. During the same period of time, the number of combat ships has declined from 440 to 310. Given the present world situation and the increased Soviet naval capabilities, our efforts to reverse that trend must continue.

Mr. President, Messrs. Fitzgerald and Moodie have written a thoughtful and timely article. I commend it to my colleagues and ask that it be printed in the RECORD.

The article follows:

A REGION OF INSECURITY: U.S. INDIFFERENCE, SOVIET BUILDUP CREATE NEW DANGERS IN ASIA

(By David Fitzgerald and Michael Moodie)

With the end of the Vietnam War, American defense planners turned their eyes away from the restless Asian littoral of the Pacific. Out of inclination, the Carter administration initially gave almost exclusive priority to the defense of Western Europe. Out of necessity, it was forced to focus on the Persian Gulf. As a consequence, little attention has been given to Asian security.

But to continue the previous policy of benign neglect would be a serious mistake.

The United States ignores security matters in East Asia at its own great risk. U.S. interests in the area are large, complex, and increasing. Some of the world's most important sea lanes pass through the region, carrying vital commodities not only to the United States but to key friends and allies such as Japan, the Philippines, and Australia. The region also constitutes a large reservoir of raw materials, most of which are in short supply in the industrial democracies. The United States itself imports large quantities of titanium, zirconium, rubber, tin, and tungsten from East Asia.

The continued economic vitality of the area is a further U.S. concern. Economically, the Pacific Basin is one of the most dynamic regions of the world, reflecting a rate of annual economic growth well above the world average. Japan and the members of the Association of Southeast Asian Nations (ASEAN), moreover, are among America's most important trading partners. Several of them also play a key regional role in the U.S. global security system, and would provide facilities, forces, and funds for a joint defense effort to confront commonly perceived naval and military threats.

Given those and other important American interests in the Asian-Pacific region, the United States has no choice but to respond to the increasingly uneasy security situation in the area. Problems already developing at a rapid rate in East Asia would have a particularly important impact on the U.S. Navy because they might well affect adversely, the forces available to the Navy to carry out its missions elsewhere in the world. Noted Asian scholar Robert Scalapino, writing in Foreign Affairs, suggested the twin hallmarks of the Asian scene today are "fragility and fluidity."

Two new geopolitical factors that threaten to disrupt Asia's fragile, fluid balance of power are the growth of Soviet naval and military forces in the area and increased domestic and regional political instability that could erupt into conflict at almost any time.

QUALITATIVE AND QUANTITATIVE BUILDUP

The growth of Soviet armed strength in Asia far beyond the USSR's own defense needs troubles many states in the area. In recent years Moscow has built up its forces in the Soviet Far East both quantitatively and qualitatively. Since the deterioration of Sino-Soviet relations, which almost came to a head during the 1969 border tensions, the Soviet Union has stationed about 44 divisions in Asia, totaling between 300,000 and 400,000 combat personnel. Included in that total are several armored divisions equipped with T-62 tanks and BM-21 rocket launchers. These forces are without question deployed against China. Because of the long-term buildup, more recent qualitative force improvements, such as the introduction of new tank units, have not generated excessive concern in most Asia capitals (other than Peking itself).

What is more worrisome to U.S. friends in the area, especially the Japanese, is the parallel Soviet buildup of forces in the Kurile Islands north of Japan. According to officials of the Japanese Defense Agency quoted in the 10 January 1980 issue of Aviation Week and Space Technology, there is in the Kuriles a nucleus of 10,000 to 12,000 men—a force which could easily be expanded to division size, and already equipped with MI-24 Hind D helicopters and heavy artillery.

Soviet military exercises on the Kuriles within sight of Japan's northernmost island of Hokkaido also have upset the Japanese. Such Soviet actions provide a handy defensive screen behind which Moscow could convert the Sea of Okhotsk and its approaches into a Soviet preserve.

Moscow also has nearly 2,000 aircraft stationed in the Far East. Included in the total are MiG-23, -25, and -27 fighters, a variety of transports, and TU-16 Badger, TU-95 Bear, and Backfire bombers.

While the Soviet ground and air buildup in the Far East is sobering, it is the growth of Soviet naval power in the region that generates the most intense concern. According to Stuart Johnson and Joseph Yager of the Brookings Institution, two trends characterize recent Soviet developments in the Far East: fleet modernization and a growing emphasis on antisubmarine warfare (ASW). About one-third of Moscow's submarine force, including Delta 2 ballistic missile submarines in the Sea of Okhotsk, now operates in the Pacific. Kresta-class cruisers and Krivak-class destroyers form the backbone of the surface fleet. The introduction of such first-line ships into the Soviet Pacific Fleet has of course greatly increased Moscow's capability to operate over longer ranges and for longer periods of time.

The arrival of the ASW carrier Minsk and its escorts in earrly 1979 substantially enhanced the already formidable capabilities of the Soviet Pacific Fleet. In all, the new ships assigned in recent years added 800,000 tons to the fleet and brought its total number to over 750 vessels. The Minsk can carry 30 to 35 aircraft, depending on the specific mix of V/STOL (vertical/short takeoff and landing) fighters and helicopters carried. Another important addition to the fleet has been the modern LPD (amphibious transport dock) Ivan Rogov, which gives the USSR an amphibious capability in the region for the first time.

In addition to fighting ships, the USSR operates intelligence ships almost constantly in the waters around Japan, and Soviet intelligence and reconnaissance aircraft frequently skirt Japanese airspace.

The threat generated by growing Soviet power in the Western Pacific is obvious. The Japanese are particularly concerned that the introduction of new amphibious capabilities heightens the danger that the Soviet Union will be able to launch a direct attack against Japan. The Japanese newspaper Sankei reported a Japanese Defense Agency assessment:

"If hovercraft are used it will be possible to land in Hokkaido within a little less than 20 minutes [from Soviet-occupied Kunashiri]. It means that Japan has been put into the situation where a dagger has been thrust at its throat."

The Japanese recognize, of course, that such Soviet action is most unlikely except in the context of a general breakdown of East-West relations.

A POTENTIAL FOR BLOCKADE

However, Japan shares a broader concern with all U.S. friends and allies in the region—namely, that the Soviet fleet now has developed to the point where it could dominate the Pacific sea lanes. Japan imports 75% of its oil from the Middle East. That oil must pass through the Malaccan, Lombok, and Sunda Straits, to say nothing of the constricted sea lanes around Japan itself, to get to Japan. The dynamic economies of the ASEAN states depend on seaborne trade traversing those same sea lanes.

There is now a real fear, therefore, that the Soviet Union could blockade those sea lanes. That fear is not diminished by reports which have circulated that Moscow has stationed submarines, armed with cruise missiles, in the vicinity of the Straits of Malacca where they would be in position to sink allied shipping in the event of hostilities.

The Soviet threat to the sea lanes of the Western Pacific has been exacerbated by a further development favorable to Moscow: Soviet access to Vietnam's naval base at Cam Ranh Bay. The importance of the base would be difficult to overestimate. First, it is close to the Straits of Malacca, Lombok, and Sunda. Second, its use brings Soviet military forces closer to the largest U.S. naval facility in the region, at Subic Bay in the Philippines. Third, it provides a convenient base for both ship and aircraft surveillance activities. Finally, and perhaps most important, access to Cam Ranh Bay greatly increases the mobility of the Soviet Pacific fleet, at the same time it extends its reach. Perhaps the fleet's most serious disadvantage is the geographic difficulty it faces in operating out of its bases in Soviet Asia at Vladivostok and on the Kamchatka Peninsula. With the exception of Petropavlosk, the Soviet ports are icebound several months each year. To reach the high seas, vessels operating from those ports must transit the choke points of Japan's Soya, Tsugaru, and Tsushima Straits. Moreover, Vladivostok is far distant from the most probable centers of Soviet naval activity in the Indian Ocean and South Pacific. Cam Rahn Bay, 1,000 miles south of Vladivostok, alleviates most of these shortcomings.

The potential threat inherent in growing Soviet power in Pacific Asia is not only military: there is a political dimension as well. In crises short of actual conflict, Soviet threats to shipping in the area could, if the Kremlin so decided, raise the cost of trade by driving up insurance rates or forcing merchant ships to take safer routes (south around Australia, for example) that are longer, more time consuming, and thus more costly. The Soviets thus could apply very heavy pressure on regional economies.

More important, the perception among Asian leaders of unchecked Soviet power in the region could make those decisionmakers more accommodating to Mocow's policies. Any such development would be particularly disturbing if the need to accommodate were strongly felt in Peking and/or Tokyo.

THREATS TO REGIONAL PEACE

The second major threat to U.S. interests in the Pacific Basin is the increasing regional instability flowing from historical regional rivalries, more recent domestic discontent, or lagging economic performance. The instability problem is most acute in Southeast Asia, although the still unsettled state of affairs on the Korean peninsula also could lead to a conflict situation. In South Korea domestic political difficulties pose an ominous threat; instability could well be the pretext for renewed aggression from the north.

Widespread conflict in Southeast Asia also could jeopardize the economic advances made by many of the region's non-Communist states. The biggest immediate problem is Vietnam, whose aggressiveness disturbs all states in the region. The threat of further fighting in Indochina remains high, although the level of tension in the area diminished somewhat during the past year. Conflict nevertheless continues in Cambodia, Thailand faces steady pressures against its border,

and Mainland China remains unhappy with the present stalemate. Given such tension and turmoil, prospects for stability are not high.

Regional stability could be further upset by domestic upheaval in, and/or internal challenges to, some Southeast Asian regimes. A common problem plaguing many of these countries is political strife stemming from racial, religious, or regional differences among their heterogeneous populations. The Philippines, for example, has been the scene of growing domestic political opposition to the Marcos regime—opposition marked, moreover, by increasing violence such as bombings last year in Manila, and the ongoing rebellions of Communists and Moslems. Discontent in Indonesia also has been on the rise, and both Malaysia and Thailand are facing domestic difficulties.

Such problems seriously hamper the ability of governments in the region to respond to external challenges and, at the same time, build an improved political and social infrastructure. Worse, instability virtually invites outside involvement. There is, consequently, a continuing potential for superpower confrontations. The fact that Moscow, Washington, Peking, and Tokyo are all keenly interested in Pacific Asian developments suggests an intricate, constantly changing minuet among those powers and, if confrontation is to be avoided, a degree of accommodation not always present.

A SYNERGISM OF CONCERN

Clearly, both trends—the growth of Soviet military power in Asia and increasing regional instability—are major concerns to American policymakers. U.S. problems in the area, moreover, are made even more difficult by the interaction of these trends. Regional instability, whether the result of conflict between states or violence within a given Asian nation, creates opportunities for an external actor with the power, and the will to exercise that power, to become involved.

In Asia today, that external actor is the Soviet Union. In the wake of Vietnam, there exists a strong perception that the United States has not been able to match long-term Soviet gains in Asia. The Soviet bid for hegemony in Asia, while perhaps less direct than in other regions of the world, is not seen to be countered by gun-shy America. That perception could change, of course, under the Reagan Administration, particularly since the Sidra Gulf incident. But the Sidra incident involved a direct attack against American aircraft; whether the same U.S. response is likely elsewhere, under less direct provocation, has yet to be determined. Domestic violence and regional conflict in Asia create further fears in the region that Moscow will try to exploit such problems while the United States sits idly by.

If the United States is to maintain its influence and support its clear national interests in Asia it must therefore be willing to demonstrate a strong national commitment to peace and security in the area. Such commitment must be made, moreover, within the context of a coherent foreign policy which to date has, in the opinion of some analysts, not yet been fully enunciated. In any case, there are important implications for the U.S. Navy.

A CRISIS OF NUMBERS

In pursuing its interests and responding to developments in Pacific Asia, the United States will have to draw upon the full panoply of policy instruments at its disposal. Clearly, one of the most important of those instruments is the Navy. As they have in the past, decisionmakers in Washington will undoubtedly, therefore, call upon the Navy—there really is no viable alternative—to support American interests across a wide range of geopolitical scenarios.

The impact of developments in eastern Asia on the role of the U.S. Navy must be viewed in three distinct contexts: wartime, crisis, and peacetime. In a general war situation the U.S. Navy in the Pacific would have three major missions. Optimally, it would bottle up the Soviet fleet in port. Second, it would have to maintain the security of the important sea lanes. Third, it would have to be ready to support land operations in the region as and wherever required.

But there are serious difficulties which could impede accomplishment of each of these wartime tasks. The big problem, of course, is one of numbers. The deployment of a U.S. carrier task force from the Seventh Fleet to the Indian Ocean has already demonstrated the great pressures that could be imposed on U.S. naval operations in the Pacific if a near-term conflict were global in scope. Since any shooting confrontation with the Soviet Union is likely to be worldwide, there is a serious question whether the U.S. Navy in the Pacific has the capability to adequately perform all of its wartime missions.

During a less-than-wartime crisis in the Pacific, whether directly involving the Soviet Union or not, the U.S. Navy's tasks would be: first, when and if appropriate, to exert political pressure, through asserting a naval presence in the area of crisis, for favorable resolution of the problem; and second, to offset any similar moves the Soviet Union might make with its own Pacific Fleet. (One example: the U.S. Navy might be dispatched to the chokepoints around Indonesia to prevent the Soviet Union from exerting uncontested pressure by threatening to close the straits.)

In their excellent Brookings study, "Force Without War," Barry Blechman and Stephen S. Kaplan identify the difficulties always facing decisionmakers who use naval power as an instrument of political influence. The omnipresent problems cited are made even more difficult today with the growth of the Soviet navy, which now, for the first time, poses a global obstacle to the unhampered use of American naval forces. Moreover, the increasing sophistication of the non-aligned states in Asia, and throughout the Third World, about the use of naval power as a political instrument, as well as the buildup of regional navies, may make them less susceptible in any case to friendly U.S. naval pressure. (Soviet naval pressure, less friendly, might for that reason be more successful.)

MUSCULAR PRESENCE

The peacetime role of the U.S. Navy in the Pacific is, simply, to promote stability and provide to America's friends and allies an overt, and muscular, symbol of the U.S. commitment to regional progress and development. The impact of the U.S. naval presence in the Western Pacific thus is as much psychological as it is political or military—as was well demonstrated by the consternation exhibited by U.S. friends in the region when, as mentioned earlier, the United States denuded the Seventh Fleet in order to send vessels to the Indian Ocean after the fall of the Shah of Iran and seizure of the American embassy in Tehran. An earlier example is the uproar that occurred after the U.S. "swing strategy"—calling for the shift of naval/military assets from the Pacific to the Atlantic in event of conflict with the Soviet Union—was publicized.

The Navy is not, of course, the only policy instrument on which American decisionmakers must rely in peacetime to promote regional stability in Pacific Asia. In fact, it is not, and should not be considered, the primary instrument. Rather, naval forces play a supporting role to political, economic, and diplomatic policies. Symbols of strength which certainly no hostile nation can safely ignore, they nevertheless should be used sparingly.

THE SUBIC IMPERATIVE

Obviously, whether during peacetime, in a crisis situation, or in time of war, the successful exploitation of naval forces in the Western Pacific depends in large part on those forces being on the scene—particularly since the sprawling geography of the area, as well as present military trends, demand immediate response if naval forces, or any other, are to be effective. That response can be timely only if naval forces are positioned in strength in the region on a continuing basis. And the factors determining a continuing presence are the number of ships in the fleet and the availability of support facilities.

For that reason alone, continued U.S. access to the Subic Bay naval base is extremely important. Were the U.S. Navy forced to leave the Philippines, it might be impossible to find adequate and/or early alternatives that would allow the Navy to respond as quickly to contingencies throughout the region. The Marianas have been suggested as one option, but they can only be considered a fall-back position, and would greatly increase the distance the fleet would be from probable areas of conflict and, therefore, lessen the time the U.S. Navy would have available to respond in times of crisis.

How the United States balances its need for continued access to Subic Bay with other foreign policy goals in the Philippines will thus be an extremely difficult policy problem for the Reagan administration to resolve.

The Subic facilities will be useless, of course, unless the Navy has the ships it needs to carry out all of its worldwide responsibilities. But, as mentioned earlier, the continuing deployment in the Indian Ocean demonstrates how overextended the U.S. Navy is at present. It is therefore difficult to conceive how American naval forces could, in the foreseeable future, respond effectively to simultaneous crises in the Indian Ocean and Pacific Asia. Thus, even in peacetime, the dispatch of forces to other areas has diluted the symbolic, supportive role the Navy plays in the Western Pacific.

HOW MUCH HELP FROM JAPAN?

The United States does not have to do the job alone, however, U.S. allies in the region can and must do more. Japan, in particular, can play a greater role in bolstering security in the Pacific.

Japan has, in fact, if somewhat belatedly, recognized the need to pay greater attention to military issues. At the end of December 1980 Tokyo announced it would increase its 1981 defense budget by 7.6%. While that increase is not as much as American officials want, it does represent a greater increase than was provided in the previous year's budget. Moreover, the summary of Japan's most recent White Paper on Defense demonstrates a new Japanese perspective, stating that "the White Paper is designed to include a description based upon the recognition that Japan must now consider her defense from a global perspective. . . . Because it was realized to be very important to grasp the situation in global scope, special chapters on military environments in the Middle East and Southeast Asia are included . . . for the first time this year."

There are, in naval terms, several tasks on which Japan could concentrate without violating its constitutional requirement to develop only defensive capabilities. If, for example, Japan would improve its maritime reconnaissance, build up its ASW capabilities, and take over the air defense of Japan itself, the end result would be a strengthening of U.S. forces in the region. Suffice it to say that the Japanese recognize these possibilities and are looking at a number of ways to improve their self-defense capacity in the areas stipulated.

Nevertheless, the question remains: Will Japan become more active in furthering the security of Pacific Asia? The answer depends to some extent on Japan's future relationship with the United States. At present, unfortunately—but understandably—the Japanese appear to retain a nagging fear, in the wake of the American debacle in Vietnam,

that the United States has little interest in Pacific security. That does not mean, however, that Japan itself will step in to play a more assertive role in maintaining peace in the region. On the contrary, it may make Tokyo more accommodating to prevalent security trends in the region. It is more likely that Japan will shoulder a greater defense burden if it is convinced it is doing so as a partner of the United States.

IMPROVED COMMUNICATIONS

Australia is another American ally in the region likely to play an increasingly important role in the years ahead. Australian Prime Minister Malcolm Fraser has stated that "Australia [has] an interest in seeing that Soviet power in the Pacific and Southeast Asia is balanced by the power of other major states or by appropriate regional arrangements." That interest stems, of course, from Australia's strategic location, its vast resources and growing economy, and its own longtime commitment to democratic ideals.

Moreover, although Australian leaders recognize that their country will never be able to handle regional security threats on its own, they are planning major improvements in Australia's defense capabilities. Said improvements include: higher manpower expenditures; the selection of a new combat aircraft (either the F–16 or F–18); and modernization of facilities in the country's northern and western regions.

In addition, the Australian navy is undertaking the largest peacetime shipbuilding and base modernization program in the country's history. Moreover, Australia some time ago offered the United States the opportunity to develop a naval facility at Cockburn Sound on its west coast, and approved U.S. use of communication facilities at the North-West Cape.

Japan and Australia are only two of the Pacific Asian states improving their defense capabilities. Others are following suit. Indonesia, for example, is building up its navy through the acquisition of corvettes, fast attack craft, and submarines, and is also upgrading its air force and overhauling and re-outfitting existing army equipment.

Like Indonesia, Thailand is a member of ASEAN and could play an important role in maintaining regional security—as it probably should; Thailand is the country most immediately threatened by Vietnam's aggression and must also cope with the tragedy of the ever-swelling numbers of Vietnam refugees. Guerrilla activities in some sections of Thailand compound the difficulties facing Thai leaders.

Thailand's major priority is, and necessarily must be, dealing with the country's short-term problems. Over the longer term, however, Thailand could become a key player in regional affairs. Politically, it has participated with its ASEAN partners in coordinating successful diplomatic campaigns against Vietnam and marshaling international support for the ASEAN cause. As a member of ASEAN, Thailand is also linked to some of the region's most vibrant economics. Like Australia, its strategic location makes it a natural link between the Indian and Pacific basins—the same location gives it the potential for being the site of facilities that might offset Soviet access to Cam Ranh Bay.

But to be an effective regional actor Thailand must improve its military capabilities. Bangkok hopes to continue bolstering its forces with additional procurement of highly versatile aircraft as well as fast attack missile patrol boats. That will help, of course. But unless the United States increases its own capability for assisting Thai and other indigenous forces, it must face the consequences of inadequately protecting American interests.

That may be the most important fact of geopolitical life in the region for U.S. decisionmakers to learn. Because, like it or not, none of the efforts of the other nations in the area can be truly effective without the continued presence of the United States in Asia. Only a major power can offset the adverse trends of recent years. The United States does not have to, and should not, work alone. It should, rather, ensure that its own efforts contribute to the development of a regional capability among friends and allies that will allow them to withstand pressures from potential adversaries.

The United States is a necessary but not all-sufficient component of the regional security system, informal as it may be. The U.S. Navy is a vital part of the American contribution to that system which, if it is to be effective and if U.S. goals in the area are to be achieved, must be given greater attention as a powerful and flexible policy instrument in the Pacific Asian region.●

SELECTIONS TO FEDERAL RESERVE BOARD—SENATE RESOLUTION 209

● Mr. GRASSLEY. Mr. President, I should like to compliment my able colleague from Iowa, Senator ROGER JEPSEN, for his excellent initiative, Senate Resolution 209. This measure is both important and timely.

On January 31, 1981, Frederick Schultz' term as a Governor of the Federal Reserve System expires. At that time, President Reagan will be able to select a new Governor, S. Res. 209 asks the President, the Senate, and the Senate Committee on Banking, Housing, and Urban Affairs to follow the Federal Reserve Act of 1913 in choosing a replacement.

The act states that not more than one Governor shall be selected from any one Federal Reserve district, and that due regard shall be given to a fair representation of financial, agricultural, and commercial interests as well as geographic divisions within the country. I regret to report we have strayed from the purpose of this act.

Agricultural interests have hardly received fair representation—of the 60 individuals who have been Governors since the Board's inception, only 7 of these have been from agricultural backgrounds and there has been no agricultural representation in the past 20 years. Only 23 individuals appointed since 1959 have had business experience, and only 1 of these was a small businessman.

The track record for the appointment of Governors from different geographic regions of the country has been equally poor. Each Governor is required to have some nexus with a different district, be it by virtue of birth, education or limited residence in a particular region of the United States.

If measured by the duration of their professional life spent in one region of the United States, over half of the individuals appointed to the Federal Reserve Board of Governors are from the east coast. Fewer than one-quarter are Midwesterners and a smaller number hail from the South.

During this time frame, only two Governors are from the West. Using a percentage of professional career as a measurement, the majority of Governors are from the East and were educated at ivy league colleges. While their contributions have been valuable, I think it is time to establish some regional and occupational balance.

The policies of the Federal Reserve Board of Governors have had a dramatic impact on small businesses and farmers. These individuals cannot enter the marketplace and negotiate a loan at a rate below prime. They are the individuals who borrow at a few percentage points above the prime and desperately need short term capital.

I think it is important for the President to seriously consider nominating an individual to fill Governor Schultz' vacancy with an agricultural or small business background. To effectively communicate this message, I urge all of my colleagues to cosponsor this important measure.●

PUBLIC HOUSING OPERATING ASSISTANCE

● Mr. DODD. Mr. President, I would like to bring to the attention of the Senate an impending crisis in the low-rent public housing program. This administration, in the name of economic recovery, is threatening to undermine this Nation's most significant housing resource for low-income people and a public investment that would cost $75 billion to replace today. This simply does not make good sense, in either economic or human terms.

I would ask to submit for the RECORD an article from the New York Times of November 11, 1981. As this article points out, the budget figures put forward by this administration for public housing operating subsidies will force many housing authorities across the country to close down critically needed low-rent housing units.

Let me review for a moment the budget figures with which we are dealing. Public housing projects have been funded at only 85.5 percent of their funding system which has already been shown to be inadequate and to have systematically underfunded public housing projects over the years, particularly for the large urban housing authorities.

The continuing resolution for fiscal year 1982 contains a supplemental appropriation for fiscal year 1981 in the amount of $148 million.

Despite the need for this supplemental as documented by the Department of Housing and Urban Development's own formula and figures, the administration is asking that this supplemental appropriation be deleted, and is refusing to distribute the funds provided in the continuing resolution. This cavalier attitude toward a critical housing resource for low-income people and a significant investment of public funds is totally irresponsible.

The budget figures for fiscal year 1982 are even more devastating. Despite a recognized need of $1.5 billion for public housing operating subsidies, only $1.205 billion has thus far been appropriated for fiscal year 1982, in accordance with the administration's original request.

This amount, according to the Department's estimates, will provide only 82 percent of required funding in the coming year.

However, these estimates appear over-

stated. The administration continues to attribute $60 million in increased income to the 1982 estimates, based upon the recent legislated increase in the rent-to-income ratio.

Yet, information from housing authorities across the country is that the income from rent will not increase and will actually decrease. This is due not only to the startup time required in implementing the rental increase, but much more importantly, to the erosion of the income of public housing tenants which will result from the recent changes to welfare payments and other low-income assistance programs.

The National Association of Housing & Redevelopment Officials estimates that the $1.205 billion will be adequate to fund housing authorities at a maximum of 79 percent of the documented need, and quite possibly less than that when actual income projections and utility rate increases are known.

Yet, the administration is requesting that these funds be reduced even further to a level of $1.06 billion, an amount adequate to support and maintain our 1.2 million public housing units at a maximum of 69 percent of required need.

Mr. President, this situation cannot go unchallenged. Housing authorities have little recourse for dealing with cuts of this magnitude.

The persistent underfunding in recent years has reduced or eliminated housing authority reserve funds to the extent that there is no cushion to absorb any cuts. Over 44 percent of all public housing expenditures are spent on utilities, and this percentage is significantly higher for certain housing authorities, particularly in the Northeast.

Since housing authorities cannot turn off the heat or lights, they will be forced to again reduce basic services such as maintenance and security.

The housing authorities in my State experience a particular difficulty in adjusting to a reduction in operating assistance due to the high cost of utilities. For example, the Bridgeport Public Housing Authority must spend 56.8 percent of its total budget for utilities. The authority has depleted already all reserve funds and has reduced staff by 25 percent over the past 2 years. Utilities represent 50 percent of the operating budget for the Hartford Housing Authority.

Under a severe austerity program, this agency is not replacing staff and has reduced support for maintenance and resident services.

This is not just a minor belt-tightening that we are discussing. Housing authorities will be forced to take such drastic moves as eliminating all security services, confining maintenance activities to emergency repairs only, and closing units as they become vacant because there will be no resources to prepare them for new occupancy or to maintain them if they were occupied.

An internal HUD memorandum on the subject predicts cutoffs of utilities and other essential services, massive layoffs of personnel, possible labor strikes, unit closures, vandalism, rent strikes, litigation and displacement. Yet, still the administration ignores this crisis.

Mr. President, these policies will result in a totally dilapidated inventory of publicly owned housing, which no level of resources will be able to recapture.

Unless we act quickly and responsibly, we will have totally destroyed the shelter and living environments of over 3.5 million low-income citizens in this country.

We must reject economic policies that are shortsighted and without a shred of good business sense. I hope my colleagues on the Appropriations Committee and the full Senate will join me in attempting to deal with this crisis now.

The New York Times article follows:

[From the New York Times, Nov. 11, 1981]

HOUSING OFFICIALS FEAR HARM FROM CUTBACKS

(By Robert Pear)

WASHINGTON, Nov. 10.—Housing officials from around the country warned today that public housing units were falling into disrepair and would deteriorate rapidly because of reductions being made in Federal housing subsidies.

Their warnings were buttressed by internal documents from the Department of Housing and Urban Development that forecast the same consequences: "critical cash flow problems" for most public housing authorities, "cutoff of utilities and other essential services," layoffs of maintenance workers, rent strikes, litigation and the "closing down of large numbers" of public housing units.

Philip Abrams, Deputy Assistant Secretary of Housing, said the concerns were valid but overstated. With improved management and with larger contributions from state and local governments, he said, public housing authorities could continue operations at current levels.

President Reagan has proposed reductions in the level of Federal housing subsidies as part of his overall effort to control the growth in Government spending. Subsidies in the last fiscal year totaled $962 million, or 85.5 percent of the amount for which local housing authorities were eligible under the established formula. For the current fiscal year, the Administration has requested $1.06 billion in subsidies, representing 69 percent of the "reasonable" service level indicated by the formula.

At a news conference here, Robert Maffin, executive director of the National Association of Housing and Redevelopment Officials, said:

"Local housing authorities are not crying wolf when they predict doom for public housing at the projected operating fund levels. Ninety thousand units of housing with a replacement value of $6 billion are already seriously deteriorated and could be permanently lost from the nation's housing stock unless remedial measures are taken immediately."

The Federal Government provides operating subsidies for 1.2 million units of public housing with 3.4 million tenants.

John Simon, general manager of the New York City Housing Authority, the nation's largest, with 146,000 units, said the city was already deferring maintenance of lawns and shrubbery at public housing projects.

CONCERN IN NEW CITY

If further reductions are approved by Congress, he said, the housing authority will have to cut back on elevator repairs, janitorial services, building security and social programs for tenants. Vandalism will almost certainly increase, according to a written analysis prepared by the city agency, and public housing will then "begin to mirror closely the very slum buildings which are found surrounding the projects."

Several local housing officials said their problems were becoming so serious that they might ask the Federal Government to take over management and operation of their projects. The housing authority in Jersey City has already inquired about the procedures for turning over its housing stock to the Federal Government.

Housing officials from Denver, San Francisco, Salt Lake City, Fort Worth, Milwaukee, New Orleans and Miami joined Mr. Maffin in warning that the proposed budget cuts, combined with the reductions already made, would seriously harm their operations. The Chicago Public Housing Authority has already experienced difficulty meeting its weekly payroll, Mr. Maffin said.

In a confidential memorandum to Philip D. Winn, the Federal Housing Commissioner, the staff of the Department of Housing and Urban Development said the proposed budget cuts "would result in nothing less than disaster for Boston and similar public housing authorities, probably forcing them to close down a substantial number of units."

The memorandum said the proposed cuts would "severely compromise the ability of public housing authorities to provide decent, safe and sanitary housing for low-income families" and would result in widespread vandalism.●

THE TRIDENT

● Mr. CHAFEE. Mr. President, last week was a truly historic one for this country's nuclear submarine program. On Wednesday, November 11, the Nation's first Trident class nuclear powered fleet ballistic missile submarine, the U.S.S. *Ohio*, was commissioned as an operating unit of the U.S. Navy. Three days later, on Saturday, November 14, the Nation's third Trident submarine, the *Florida*, was christened and launched.

And, Mr. President, last week we also received the announcement that one of this Nation's most distinguished naval officers, Adm. Hyman G. Rickover, is retiring after nearly 60 years of service to his country. Admiral Rickover has played a critical role in the design and construction of the *Ohio*, as he has in all of our nuclear submarines. The country owes him a great debt.

The commissioning of the U.S.S. *Ohio* was an extraordinary moment in history when, as the first ship of its class, the *Ohio* became the largest, fastest, and quietest strategic submarine the Navy has ever had at sea. The *Ohio* represents a major modernization of the sea-based component of our strategic deterrent forces. It provides us with survivable and reliable nuclear forces, thus enhancing our own security and helping to insure peace.

The awesome size and strength of the U.S.S. *Ohio* are meant to deter all potential enemies from our country. It is my hope, and I am sure it is the hope of every American citizen, that the missiles aboard the Trident submarines never be used, that her full striking force never be felt, and the technological genius which created her and sent her to sea never be proven in time of war.

The *Ohio* and her sister ships have been designed and built by the workers of the electric boat division of the General Dynamics Corp. Seven years in the making—from initial design through construction to commissioning—the *Ohio* is an impressive achievement by the men and women who created her and proudly

delivered her to the U.S. Navy. In facilities in Groton, Conn., and Quonset Point, R.I., 25,000 workers produced the *Ohio* and the *Florida*, and are working on six other Trident submarines. Each ship is 560 feet long—almost two football fields in length—and each is an accomplishment worthy of national recognition.

Electric Boat will deliver six *Los Angeles* class attack submarines, and one Trident submarine, to the U.S. Navy this year. This is an exceptional record for a shipyard, and an especially important one today, when the need for U.S. naval strength has never been greater.

Mr. President, I attended the commissioning of the U.S.S. *Ohio* on November 11, Armistice Day: a day of peace, a day of reflection on the wars that have ravaged this country. The success of the Trident submarines will be measured by their preservation of peace, by their protection of our country's shores, and by their deterrence of aggression.

This Nation's submarines have been a crucial element in preserving peace for the last 30 years. It is the hope of the men and women who build them, of the naval officers and men who serve on them, and of all Americans, that the Trident class submarines will continue in this role for at least another 30 years.●

DISABLED AMERICAN VETERANS—THEY PAID THE PRICE FOR PEACE

● Mr. HAYAKAWA. Mr. President, history has shown that Americans have the ability to put the tragedies of their wars behind them. Dwelling on the past, even a victorious one, delays seeing accomplishments in the future. This inborn capability is progressive and has led America to great achievements. But, when putting the past behind us means forgetting the sacrifices of the brave men and women who fought so hard to assure our continued freedom, then a grave wrong is being committed.

In an article authored by Sherman Roodzant, National Commander of the Disabled American Veterans, for Stars and Stripes, this potential error is brought to our attention. Mr. Roodzant, a Vietnam-era veteran and a fellow Californian, emphasizes the importance of not forgetting our veterans, particularly the disabled. These brave soldiers sacrificed their blood for our freedom—we must not forget them when they need us most.

Last week I introduced Senate Joint Resolution 123 which proclaims the week of November 7 through November 13, 1982, "National Disabled Veterans Week." My resolution seeks to bring to our Nation's attention the contributions and sacrifices of its 2½ million disabled veterans. I look forward to its final passage so that my 35 cosponsors and I may begin preparations for an exciting and meaningful week. With the help of insightful articles such as Mr. Roodzant's, this Nation is reminded that, in the process of putting the trying times of war behind us, we must not forget the brave who fought to insure our freedom.

I believe Mr. Roodzant brings out some very important concerns of our disabled veterans, and I hope my colleagues will take a moment to read his article. I ask that Mr. Roodzant's article be printed in the RECORD.

The article follows:

DISABLED AMERICAN VETERANS—THEY PAID THE PRICE FOR PEACE

(By Sherman E. Roodzant)

The screams of the wounded and the stench of gunpowder surrounded Robert Richardson, a private in America's Continental Army, but he fought on until a British cannonball struck his hand spike. It broke in two, one end tearing his belly open. The wind from the cannonball left his right arm useless. Richardson's blood had paid the price of peace and freedom. But, for the rest of his life, he was totally disabled.

For a while, the Continental Congress provided the Revolutionary War veteran a disability pension of half his military salary. It helped, but Richardson was unable to support himself on this meager allowance. Even this pittance ended shortly after the War of Independence when the new national government turned responsibility for disabled veterans over to the individual states and their Poor Law systems.

Life was tough—really tough—for Richardson and other patriots wounded in the struggle for free America from colonial chains. Many were reduced to begging.

Things are better for the 2½ million disabled veterans living in today's America. But, on Veterans Day this year, it's appropriate to recall what happened to the disabled veterans of our Revolutionary War. What happened to them established a pattern that has, to some extent, been played out after each of our country's nine wars—a pattern of forgetfulness that's playing itself out again today, just six years after the last American was killed in Vietnam, our most recent war.

Perhaps that's understandable. When wars end, people want to get back to normal, to peacetime life, leaving the turmoil and anxiety of war behind. Following the Vietnam War—the most unpopular war in our nation's history with the single exception of the Civil War—the process of forgetting has been unusually rapid. People want to bury the bitter social division of the Vietnam years.

That's good, but there's a tragedy in the way we're going about it: When people forget about wars, they tend to forget about the sacrifices that veterans, particularly disabled veterans, have made. And when the public forgets the needs of disabled veterans, so do their elected representatives.

Maybe that's why the VA hospital system has been hit by one budget cut after another for the past five years, forcing the VA to turn thousands of eligible veterans away from the doors of its health care facilities.

Maybe that explains why job programs for disabled and Vietnam era veterans have been kept too small to make a serious dent in the employment problems these veterans have experienced.

Maybe that's why we've seen, for the first time this year, curtailments in GI Bill education programs.

Maybe that's the reason veterans' preference in Federal employment was attacked so viciously back in 1977 and 1978.

Maybe that's why the VA and other Federal agencies were so slow initially in recognizing the seriousness of such problems as the defoliant Agent Orange, the exposure of Cold War veterans to radiation in atomic weapons tests, and the post-traumatic stress difficulties of half a million or more Vietnam veterans.

Can it be that the American people have forgotten their warriors as they go about the process of forgetting the trying times of war? The 700,000 members of the Disabled American Veterans believe this is exactly what happened . . . not just after Vietnam, but after World War I, World War II, and the Korean War as well.

They are acutely aware that no veteran of any war should ever be forgotten. Without the sacrifices these men and women made, there would be no United States.

Back in 1903, Theodore Roosevelt said something that nearly every American would probably agree with. "A man who is good enough to shed his blood for his country is good enough to get a square deal afterward," he declared.

Looking at veterans' programs realistically, it's unlikely that our country would ever let the plight of its disabled veterans get as bad as it was for Private Richardson and his disabled comrades following the American Revolution. But it would be a mistake to simply assume, without giving it much thought, that all of our political leaders are bending over backward to make sure veterans—even disabled veterans—are getting the kind of "square deal" Roosevelt was talking about.

On Veterans Day, 1981, we must ask ourselves a very basic question. Can we do too much to guarantee a square deal for a sailor whose arms were crushed when a Nazi torpedo smashed through the hull of his ship . . . for the pilot whose body was burned and disfigured when his plane was shot down over Korea . . . for the Marine whose legs were blown off by a Viet Cong booby trap in the Mekong Delta . . . or for the World War I soldier who lost his sight in the Battle of the Marne?

Every American owes these people a debt that can never really be repaid.●

ORDERS FOR WEDNESDAY

ORDER FOR RECESS UNTIL 10:30 A.M. TOMORROW

Mr. BAKER. Mr. President, I have conferred with the minority leader in respect to the requests I am about to put to arrange the schedule of the Senate on tomorrow.

I now would like to put the requests.

First, Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10:30 a.m. on tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF CERTAIN SENATORS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order, the distinguished Senator from Colorado (Mr. HART) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the distinguished Senator from Delaware (Mr. BIDEN) then be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER DESIGNATING PERIOD FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that, after the time allocated to the two Senators under the special orders, there be a brief period for the transaction of routine morning business, not to extend past the hour of 11:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, under the previous order, is there not a provision for the Senate to go into executive session and for a vote at 11:30 on the

resolutions of ratification on nine treaties, one vote to count for nine votes?

The PRESIDING OFFICER. The majority leader is correct.

ORDER TO RESUME CONSIDERATION OF H.R. 4169

Mr. BAKER. Mr. President, I ask unanimous consent that after the disposition of those treaties on tomorrow, the Senate return to legislative session and resume consideration of the State, Justice, Commerce appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE CONSIDERATION OF HOUSE JOINT RESOLUTION 357

Mr. BAKER. Mr. President, I ask unanimous consent that, at the hour of 1 p.m. on tomorrow, the Senate proceed to the consideration of the continuing resolution making appropriations for various Departments and Agencies of Government, House Joint Resolution 357.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object.

Mr. President, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

VOTE ON HELMS AMENDMENT NO. 633

Mr. BAKER. Mr. President, I inquire of the Chair, was there an order entered earlier today for a vote on the Helms amendment to the State, Justice, Commerce appropriations bill to follow on immediately after the vote on the resolutions of ratification?

The PRESIDING OFFICER. The vote was ordered in relation to the Helms amendment.

Mr. BAKER. The order has been entered for a vote on the Helms amendment after the vote on the resolutions of ratification, which begins at 11:30 a.m.?

The PRESIDING OFFICER. Yes, in relation to the Helms amendment.

Mr. BAKER. Mr. President, I assume it is not necessary to amend my unanimous-consent order just previously entered to accommodate that order, but I now do so. It will read that at 11:30 a.m. the Senate will go into executive session for the purpose of considering the resolutions of ratification of nine treaties to be ratified by a single vote to count for nine votes. At the expiration of time for that rollcall, under the order previously entered, the Senate will resume consideration of the State, Justice, Commerce appropriations bill, and a vote in connection with the Helms amendment will occur at that time, without further debate.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, then the balance of the order will read that after the disposition of the Helms amendment, the Senate will continue consideration of the State-Justice-Commerce appropriations bill until the hour of 1 o'clock.

Then I ask that the balance of my request be reiterated.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Now, Mr. President, I see no other Senators seeking recognition. I will inquire of the minority leader if there is any further business to be transacted on his side.

Mr. ROBERT C. BYRD. Mr. President, I know of none.

RECESS UNTIL TOMORROW AT 10:30 A.M.

Mr. BAKER. Mr. President, I know of no further business to come before the Senate. I move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10:30 a.m. tomorrow morning.

The motion was agreed to and, at 7:20 p.m., the Senate recessed until Wednesday, November 18, 1981, at 10:30 a.m.

NOMINATIONS

Executive nominations received by the Senate November 17, 1981:

THE JUDICIARY

Alvin I. Krenzler, of Ohio, to be U.S. district judge for the northern district of Ohio, vice Don J. Young, retired.

IN THE AIR FORCE

The following officers for appointment in the U.S. Air Force under the provisions of chapter 36, title 10, of the United States Code:

To be major general

Brig. Gen. Leon W. Babcock, Jr., [redacted] Regular Air Force.

Brig. Gen. Robert D. Beckel, [redacted] Regular Air Force.

Brig. Gen. John A. Brashear, [redacted] Regular Air Force.

Brig. Gen. Duane H. Cassidy, [redacted] Regular Air Force.

Brig. Gen. William M. Charles, Jr., [redacted] Regular Air Force.

Brig. Gen. Joseph H. Connolly, [redacted] Regular Air Force.

Brig. Gen. Charles J. Cunningham, Jr., [redacted] Regular Air Force.

Brig. Gen. Thomas G. Darling, [redacted] Regular Air Force.

Brig. Gen. William A. Gorton, [redacted] Regular Air Force.

Brig. Gen. Monroe W. Hatch, Jr., [redacted] Regular Air Force.

Brig. Gen. Paul H. Hodges, [redacted] Regular Air Force.

Brig. Gen. William L. Kirk, [redacted] Regular Air Force.

Brig. Gen. Donald L. Lamberson, [redacted] Regular Air Force.

Brig. Gen. Gerald D. Larson, [redacted] Regular Air Force.

Brig. Gen. William J. Mall, Jr., [redacted] Regular Air Force.

Brig. Gen. Charles McCausland, [redacted] Regular Air Force

Brig. Gen. Robert E. Messerli, [redacted] Regular Air Force.

Brig. Gen. Joseph D. Moore, [redacted] Regular Air Force

Brig. Gen. Richard D. Murray, [redacted] Regular Air Force.

Brig. Gen. David L. Nichols, [redacted] Regular Air Force.

Brig. Gen. Peter W. Odgers, [redacted] Regular Air Force.

Brig. Gen. George B. Powers, Jr., [redacted] Regular Air Force.

Brig. Gen. Richard W. Pryor, [redacted] Regular Air Force.

Brig. Gen. Bernard P. Randolph, [redacted] Regular Air Force

Brig. Gen. Robert H. Reed, [redacted] Regular Air Force.

Brig. Gen. Thomas C. Richards, [redacted] Regular Air Force.

Brig. Gen. Robert A. Rosenberg, [redacted] Regular Air Force.

Brig. Gen. Robert D. Springer, [redacted] Regular Air Force.

Brig. Gen. Thomas S. Swalm, [redacted] Regular Air Force.

Brig. Gen. William E. Thurman, [redacted] Regular Air Force.

Brig. Gen. Edward L. Tixier, [redacted] Regular Air Force.

Brig. Gen. Harold W. Todd, [redacted] Regular Air Force.

Brig. Gen. Kermit Q. Vandenbos, [redacted] Regular Air Force, Medical.

Brig. Gen. Brien D. Ward, [redacted] Regular Air Force.

Brig. Gen. Clifton D. Wright, Jr., [redacted] Regular Air Force.

HOUSE OF REPRESENTATIVES—*Tuesday, November 17, 1981*

(FIRST LEGISLATIVE DAY)

The House met at 12 o'clock noon and was called to order by the Speaker pro tempore (Mr. WRIGHT).

DESIGNATION OF SPEAKER PRO TEMPORE

THE SPEAKER pro tempore laid before the House the following communication from the Speaker:

WASHINGTON, D.C.,
November 16, 1981.

I hereby designate the Honorable JIM WRIGHT to act as Speaker pro tempore on Tuesday, November 17, 1981.

THOMAS P. O'NEILL, Jr.,
Speaker of the House of Representatives.

PRAYER

The Reverend Canon Charles A. Perry, the Washington Cathedral, offered the following prayer:

Almighty God, who has given us this good land for our heritage: We humbly beseech Thee that we may always prove ourselves a people mindful of Thy favor and glad to do Thy will. Save us from violence, discord, and confusion; from pride and arrogance, and from every evil way. Defend our liberties, and fashion into one united people the multitudes brought hither out of many kindreds and tongues. Endue with the spirit of wisdom those to whom in Thy name we entrust the authority of government, especially our Representatives in Congress here assembled, that there may be justice and peace at home, and that, through obedience to Thy law, we may show forth Thy praise among the nations of the Earth. In the time of prosperity, fill our hearts with thankfulness, and in the day of trouble, suffer not our trust in Thee to fail. Amen.

THE JOURNAL

The SPEAKER pro tempore. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. ROUSSELOT. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Chair's approval of the Journal.

The SPEAKER pro tempore. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. ROUSSELOT. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 301, nays 39, answered "present" 2, not voting 91, as follows:

Mr. HANSEN of Idaho changed his vote from "yea" to "nay."

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S.J. Res. 34. Joint resolution to provide for the designation of the week commencing with the third Monday in February 1982 as "National Patriotism Week."

PRIVATE CALENDAR

The SPEAKER pro tempore (Mr. MURTHA). This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

REMEDIOS R. ALCUDIA, CHRISTOPHER, EZRA, VERMILLION, AND PERISTELLO ALCUDIA

The Clerk called the bill (H.R. 1547) for the relief of Remedios R. Alcudia, Christopher, Ezra, Vermillion, and Peristello Alcudia.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

LASZLO REVESZ

The Clerk called the bill (H.R. 1352) for the relief of Laszlo Revesz.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AUTHORIZATION OF COASTWISE TRADING PRIVILEGES TO THE VESSEL "CAPT TOM"

The Clerk called the bill (H.R. 1797) to direct the Secretary of the Department in which the U.S. Coast Guard is operating to cause the vessel *Capt. Tom* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade.

There being no objection, the Clerk read the bill as follows:

H.R. 1797

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the provisions of section 4132 of the Revised Statutes of the United States (46 U.S.C. 11), or any other provision of law, the Secretary of the department in which the United States Coast Guard is operating shall cause the vessel Capt. Tom, owned by Mr. John W. Coston of Hampstead, North Carolina, to be documented as a vessel of the United States, upon compliance with the usual requirements, with the privilege of engaging in the coastwise trade and fishing so long as such vessel is owned by a citizen of the United States.

With the following committee amendments:

On page 2, strike lines 1, 2, and 3 and insert in lieu thereof "That, notwithstanding the provisions of section 27 of the Merchant Marine Act of 1920 (46 U.S.C. 883), or any other provision of law to the contrary, the Secretary of the department in".

On page 2, line 8, strike "Capt." and insert in lieu thereof "Capt".

The SPEAKER pro tempore. Without objection, the committee amendments are agreed to.

Mr. WALKER. Mr. Speaker, I object, and I ask that the question be put on the committee amendments.

The SPEAKER pro tempore. The question is on the committee amendments.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. The Chair will count.

Two hundred and nineteen Members are present, a quorum.

RECORDED VOTE

Mr. WALKER. Mr. Speaker, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 353, noes 0, answered "present" 4, not voting 76, as follows:

□ 1230

So the amendments were agreed to.

The result of the vote was announced as above recorded.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to direct the Secretary of the Department in which the U.S. Coast Guard is operating to cause the vessel *Capt Tom* to be documented as a vessel of the United States so as to be entitled to engage in the coastwise trade."

A motion to reconsider was laid on the table.

Mr. BOLAND. Mr. Speaker, I ask unanimous consent that further reading of the Private Calendar be dispensed with.

Mr. WALKER. Mr. Speaker, I object.

The SPEAKER pro tempore. Objection is heard.

Mr. BOLAND. Mr. Speaker, I move further reading of the Private Calendar be dispensed with.

POINT OF ORDER

Mr. SENSENBRENNER. Mr. Speaker, I make a point of order against the motion.

The SPEAKER pro tempore. The gentleman will state his point of order.

Mr. SENSENBRENNER. Mr. Speaker, clause 6 of rule XXIV, the second paragraph says that—

> On the third Tuesday of each month after the disposal of such business on the Speaker's table as requires reference only, the Speaker may direct the Clerk to call the bills and resolutions on the Private Calendar.

There is a precedent that the Private Calendar may be dispensed with, but that was only before the first bill was called on the Private Calendar.

I would state that since the first bill has been called on the Private Calendar, in order to comply with clause 6 of rule XXIV, the complete Private Calendar must be called unless dispensed with by unanimous consent. The unanimous-consent request has been objected to.

I believe that the point of order should be sustained and the motion should be ruled out of order.

The SPEAKER pro tempore. The Chair will note that under clause 6, rule XXIV on the first Tuesday of each month, a two-thirds vote is required to dispense with the call of Private Calendar, that call being automatic. The Speaker's authority to direct the call is discretionary on the third Tuesday, and so the rule is silent on the motion to dispense with the call, and consistent with that discretionary authority and absent any precedent to the contrary, the point of order should be overruled.

Mr. SENSENBRENNER. Mr. Speaker, I appeal the decision of the Chair.

Mr. FOLEY. Mr. Speaker?

The SPEAKER pro tempore. The gentleman from Washington.

Mr. FOLEY. Mr. Speaker, I move that the motion to appeal the Chair's decision be laid on the table.

The SPEAKER pro tempore. The question is on the motion to lay the appeal from the Chair's decision on the table.

The question was taken; and on a division (demanded by Mr. SENSENBRENNER) there were—yeas 75, nays 37.

Mr. SENSENBRENNER. Mr. Speaker, I object to the vote on the grounds that a quorum is not present and make the point of order that a quorum is not present.

Mr. FOLEY. Mr. Speaker, I have a privileged motion at the desk.

The SPEAKER pro tempore. The Clerk will report the motion.

The Clerk read as follows:

> Mr. FOLEY moves that when the House adjourns today it adjourn to meet at 4 p.m. today.

Mr. WALKER. Mr. Speaker, I move to table the motion.

The SPEAKER pro tempore. Under the last sentence of clause 4, rule XVI, that motion to adjourn is not debatable and therefore cannot be laid on the table.

The question is on the motion.

□ 1245

Mr. SENSENBRENNER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 191, nays 172, not voting 70, as follows:

[Roll No. 306]

Mr. O'BRIEN changed his vote from "yea" to "nay."

□ 1315

So the motion was agreed to.

The result of the vote was announced as above recorded.

Accordingly (at 1 o'clock and 19 minutes p.m.) the House adjourned until 4 o'clock p.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[*November 17 (first legislative day), 1981*]

2529. A communication from the President of the United States, transmitting an amendment to the request for appropriations for fiscal year 1982 (H. Doc. No. 97-112); to the Committee on Appropriations and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[*November 17 (first legislative day), 1981*]

By Mr. DAVIS (for himself, Mr. CARNEY, Mr. DREIER, Mrs. HOLT, and Mr. LENT):

H.R. 4996. A bill to transfer the Coast Guard from the Department of Transportation to the Department of the Navy; jointly, to the Committees on Merchant Marine and Fisheries and Armed Services.

By Mr. HUGHES:

H.R. 4997. A bill to amend title 28 of the United States Code to authorize the collection of fees for the processing of certain requests for Federal Bureau of Investigation identification records, and for other purposes; to the Committee on the Judiciary.

By Mr. MOTTL:

H.R. 4998. A bill to amend the Internal Revenue Code of 1954 to provide for the exclusion from gross income of certain retirement benefits received by individuals to the extent that such benefits do not exceed the maximum social security benefits payable to any individual; to the Committee on Ways and Means.

By Mr. WALKER (for himself, Mrs. HOLT, Mr. BLILEY, Mr. LUNGREN, Mr. HILER, Mr. GINGRICH, Mr. ROUSSELOT, Mr. CRAIG, Mr. KEMP, Mr. PARRIS, Mr. ASHBROOK, Mr. MCEWEN, Mr. HYDE, Mr. WEBER of Minnesota, Mr. MCGRATH, Mr. LOTT, Mr. SOLOMON, Mr. HANSEN of Utah, Mr. SMITH of Alabama, and Mr. ROBERTS of Kansas):

H.R. 4999. A bill to amend the Internal Revenue Code of 1954 to provide that the individual income tax rate reductions enacted by the Economic Recovery Tax Act of 1981 for 1982 and subsequent years shall take effect 6 months sooner than scheduled under such act; to the Committee on Ways and Means.

By Mr. GONZALEZ:

H.J. Res. 363. Joint resolution authorizing the President of the United States to proclaim the second week in May starting in 1982 as "Municipal Clerk's Week"; to the Committee on Post Office and Civil Service.

By Mr. OTTINGER:

H. Con. Res. 221. Concurrent resolution expressing the support of the Congress for the Alaska Natural Gas Transportation System and for further consideration of waivers of law regarding that system; jointly, to the Committees on Energy and Commerce and Interior and Insular Affairs.

MEMORIALS

Under clause 4 of rule XXII,

[*November 17 (first legislative day), 1981*]

223. The SPEAKER presented a memorial of the Legislature of the Territory of Guam, relative to establishment of a Presidential Economic Advisory Commission for Guam; jointly, to the Committees on Education and Labor, the Judiciary, Merchant Marine and Fisheries, and Ways and Means.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

[*November 17 (first legislative day), 1981*]

H.R. 870: Ms. OAKAR.

H.R. 1603: Mr. PORTER and Mr. OXLEY.

H.R. 2793: Mr. CONABLE, Mr. D'AMOURS, and Mr. DENARDIS.

H.R. 3632: Mr. HORTON, Mr. RICHMOND, and Mr. CONYERS.

H. Res. 250: Mr. ECKART, Mr. LEE, Mr. WON PAT, Mr. PRICE, Mr. DWYER, Mr. CARMAN, Ms. MIKULSKI, Mr. WAMPLER, and Mr. BARNES.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

[*November 17 (first legislative day), 1981*]

275. By the SPEAKER: Petition of Sterling Lyon, Premier of Manitoba, Canada, relative to the Garrison Diversion project, N. Dak.; to the Committee on Appropriations.

276. Also, petition of the Republican County Central Committee, San Diego County, Calif., relative to amending the Constitution of the United States to designate English as the official language of the United States; to the Committee on the Judiciary.

277. Also, petition of Jose Bayan Moscoso, Iloilo City, Philippines, relative to the Philippine Scouts; to the Committee on Veterans' Affairs.

(SECOND LEGISLATIVE DAY)

The House met at 4 p.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

The sum of Thy word is truth; and every one of Thy righteous ordinances endures forever.—Psalm 119: 160.

O God, as we move on with the necessary details that press upon us, we remember Your commandments and ordinances that speak the truth to people in every generation. With all the pressures of life, may we recognize our need to focus on the eternal verities and the timeless truths that have been the heritage of a free people. May all who seek to be truly human and desire to reflect Your love, bind together in harmony and peace that justice may roll down like waters and righteousness like an ever-flowing stream. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last legislative day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

Mr. WALKER. Mr. Speaker, pursuant to clause 1, rule I, I demand a vote on agreeing to the Speaker's approval of the Journal.

The SPEAKER. The question is on the Chair's approval of the Journal.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a guorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 336, nays 49, answered "present" 2, not voting 46, as follows:

So the Journal was approved.

The result of the vote was announced as above recorded.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

□ 1620

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The unfinished business of the House is the question of agreeing to the motion to lay on the table the appeal from the decision of the Chair which overruled the point of order made against the motion of the gentleman from Massachusetts (Mr. BOLAND) to dispense with the further call of the Private Calendar. The Chair had announced that the motion to lay on the table the appeal from the Chair's decision had been agreed to by a division vote of 75-37. And so the motion to lay the appeal on the table has been agreed to by a division vote.

The question is on the motion from the gentleman from Massachusetts (Mr. BOLAND) to dispense with the further call of the Private Calender.

Without objection, the motion is agreed to.

LEGISLATIVE PROGRAM

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, I take this time to announce to the House the program for the remainder of the day and for tomorrow.

Immediately upon conclusion of any routine business that may come by way of unanimous-consent requests, we intend to take up the rule on the conference report for S. 815, the defense authorization bill, and then take up the conference report, and hope to pass that this afternoon.

Having done so, we then would return to the suspensions listed for today, debate all five of the suspensions, but postpone any votes that might be demanded upon any of those suspensions until tomorrow.

On tomorrow, Wednesday, we would begin with votes on the suspensions that had been put over from today, then go to the conference reports on H.R. 3454, the Intelligence Authorization Act, and H.R. 4522, the District of Columbia appropriations.

Then we would go to the Department of Defense appropriations bill for fiscal year 1982.

Mr. MICHEL. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. I yield to the gentleman from Illinois.

Mr. MICHEL. At what time would we be coming in then in the morning—at 10 o'clock?

Mr. WRIGHT. We plan to come in at 10 o'clock.

The SPEAKER. The plan is to come in at 10 o'clock and work late tomorrow evening.

Mr. MICHEL. I thank the Speaker.

AUTHORIZING APPROPRIATIONS FOR NATIONAL ADVISORY COMMITTEE ON OCEANS AND ATMOSPHERE ACT OF 1977

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1133) to amend the National Advisory Committee on Oceans and Atmosphere Act of 1977 to authorize appropriations to carry out the provisions of such act for fiscal year 1982, and for other purposes, and ask for its immediate consideration in the House.

The Clerk read the title of the Senate bill.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

Mr. CARNEY. Mr. Speaker, reserving the right to object, it is not my intention to object. In fact, I stand in support of S. 1133 for the authorization of the National Advisory Committee on Oceans and Atmosphere Act and I would urge my colleagues to support such a bill.

Mr. JONES of North Carolina. Mr. Speaker, will the gentleman yield?

Mr. CARNEY. I yield to the gentleman from North Carolina.

Mr. JONES of North Carolina. Mr. Speaker, S. 1133 amends the National Advisory Committee on Oceans and Atmosphere Act of 1977 to provide authorizations for fiscal year 1982 and to provide two additional technical changes in the act.

The act of 1977 reestablished the Advisory Committee, more commonly referred to by its acronym, NACOA, with a more precise legislative mandate. Briefly, the Committee is composed of 18 Presidentially appointed members who have knowledge and expertise in marine and atmospheric policy areas. NACOA is mandated to review the progress of the marine and atmospheric science and service programs of the Federal Government and to advise the Secretary of Commerce of their recommendations for the programs. The Advisory Committee is instructed to report annually to the President and Congress on the status of the programs and to provide pertinent reports on the issues that are commissioned by either the President or Congress.

The Senate bill we are considering contains two differing provisions from H.R. 2448, which was reported out of the Merchant Marine and Fisheries Committee. Mr. Speaker, let me state that I firmly believe, given the differences between the Senate and House versions, that the proper course for this Congress is to support the passage of S. 1133.

The first difference rests in the amount of funding specified by the Senate. S. 1133 provides for a 1-year authorization of $555,000 for fiscal year 1982 which was recommended by the administration. The bill reported out of the Merchant Marine and Fisheries Committee recommended a 3-year authorization of $650,000 for fiscal year 1982 and such sums as may be necessary for each of fiscal years 1983 and 1984. The committee wishes to express its concern about considering a 1-year authorization for this program; however, we relinquish this concern in order to secure funding for the program during fiscal year 1982. The second matter deals with a technical amendment recommended by the administration and adopted by S. 1133. The provision would increase the

NACOA members' compensation from $100 per diem to the daily rate of GS-18, or approximately $192 per diem. During an oversight hearing held before the Committee, the Acting Chairman of NACOA testified that an increase in per diem was not necessary to maintain NACOA's present level of performance. Subsequently, the Merchant Marine and Fisheries Committee deleted this technical amendment from the administration's bill. The Committee on Merchant Marine and Fisheries would like to be on record as expressing reservations about the increase in per diem and suggest that this increase be considered a ceiling. It will remain within the discretion of the Chairman and members of NACOA to grant per diem at a lower rate than that of GS-18.

In conclusion, the members of the Committee on Merchant Marine and Fisheries have supported the efforts of the Advisory Committee which has provided qualified and knowledgeable reports and recommendations for the marine and atmospheric programs. I urge my colleagues to consider S. 1133 which contains a modest and administration-supported authorization figure of $555,000 for fiscal year 1982.

Mr. CARNEY. Mr. Speaker, I rise in support of passage of S. 1133, the fiscal year authorization for the National Advisory Committee on Oceans and Atmosphere (NACOA).

This bill would authorize this Advisory Committee at a level of $555,000 for fiscal year 1982 only. The bill would also give NACOA the option of raising its daily per diem rate for NACOA members from $100 per day to the GS-18 rate which is approximately $192 per day. I would like to emphasize here that this per diem increase is purely optional on the part of NACOA, and that NACOA may elect to maintain the current rate in order to live within their budget.

Although the Committee on Merchant Marine and Fisheries reported H.R. 2448, a bill which would have reauthorized NACOA for fiscal year 1982 at $650,000 and at such sums as may be necessary for fiscal years 1983 and 1984, in discussions with the other body, it was decided to proceed with a 1-year reauthorization at this time. We are hopeful that the White House will soon make its new appointments to NACOA, and we would urge the White House to view this reauthorization of NACOA as a signal of continued support in the Congress for an advisory body in the general area of oceans and atmosphere.

Historically, and especially under the leadership of the late Donald McKernan, NACOA has provided a valuable sounding board for both administration and congressional policymaking with respect to atmospheric science policy issues and especially ocean and coastal resource management issues. There has generally been strong bipartisan support for NACOA and this continued support is generally a function of the quality of appointments to this body.

Mr. Speaker, NACOA is an important advisory body for the continued wise use, in management, and development of one of our Nation's last frontiers, the oceans. I would strongly recommend passage of S. 1133 which would reauthorize NACOA throughout fiscal year 1982.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina (Mr. JONES)?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1133

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the National Advisory Committee on Oceans and Atmosphere Act of 1977 (33 U.S.C. 857-13—857-18) is amended—

(1) in section 3(b)(2), by striking "office, or until ninety days after such date, whichever is earlier." and substituting "office.";

(2) in section 5, by striking "of $100 per day" and substituting "not to exceed the daily rate for a GS-18"; and

(3) in section 8, by striking "and " immediately after "1980," and by striking the period at the end of the section and substituting ", and $555,000 for the fiscal year ending September 30, 1982. Such sums as may be appropriated under this section shall remain available until expended.".

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. JONES of North Carolina. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on S. 1133.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 4995, DEPARTMENT OF DEFENSE APPROPRIATIONS ACT, 1982

Mr. DERRICK, from the Committee on Rules, submitted a privileged report (Rept. No. 97-335) on the resolution (H. Res. 275) waiving certain points of order against the bill (H.R. 4995) making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 2559, COAST GUARD AUTHORIZATION, FISCAL YEAR 1982

Mr. DERRICK, from the Committee on Rules, submitted a privileged report (Rept. No. 97-336) on the resolution (H. Res. 276) providing for the consideration of the bill (H.R. 2559) to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes, which was referred to the House Calendar and ordered to be printed.

REPORT PROVIDING FOR CONSIDERATION OF HOUSE CONCURRENT RESOLUTION 220, PROVIDING FOR COMMEMORATION OF 100TH ANNIVERSARY OF THE BIRTH OF FRANKLIN DELANO ROOSEVELT

Mr. DERRICK, from the Committee on Rules, submitted a privileged report (Rept. No. 97-337) on the resolution (H. Res. 277) providing for the consideration of concurrent resolution (H. Con. Res. 220) providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR UPGRADING OF THREE POSITIONS ON CAPITOL POLICE

Mr. MINISH, from the Committee on House Administration, submitted a privileged report (Rept. No. 97-338) on the resolution (H. Res. 244) providing for upgrading of three positions on the Capitol Police, and for other purposes, which was referred to the House Calendar and ordered to be printed.

WAIVING POINTS OF ORDER AGAINST CONFERENCE REPORT ON S. 815, DEPARTMENT OF DEFENSE APPROPRIATIONS, FISCAL YEAR 1982

Mr. DERRICK. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 270 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 270

Resolved, That upon the adoption of this resolution it shall be in order to consider the conference report on the bill (S. 815) to authorize appropriations for fiscal year 1982, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test, and evaluation for the Armed Forces, to authorize appropriations for fiscal year 1982 for operations and maintenance expenses of the Armed Forces, to

prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for fiscal year 1982 for civil defense, and for other purposes, and all points of order against said conference report for failure to comply with the provisions of clause 3, rule XXVIII are hereby waived.

The SPEAKER pro tempore. The gentleman from South Carolina (Mr. DERRICK) is recognized for 1 hour.

Mr. DERRICK. Mr. Speaker, for purposes of debate only, I yield the customary 30 minutes to the minority to the gentleman from Missouri (Mr. TAYLOR), pending which I yield myself such time as I may consume.

Mr. Speaker, the rule makes in order the consideration of the conference report to accompany S. 815, the Department of Defense Authorization Act of 1982, by waiving points of order against the conference report for failure to comply with the provisions of clause 3 of House rule 28.

Clause 3 of rule 28 limits the contents of the conference report to the scope of the differences between the two Houses. The waiver is necessary in order to consider the changes recommended by the administration in their revised Defense budget request sent to the Congress on October 2 and reported by the conference committee.

The Defense budget request submitted by the administration last March recommended a total authorization level for fiscal year 1982 of $136.5 billion for procurement, research, development, test, and evaluation operations and maintenance, and other purposes. The House adopted an authorization level of $136.1 billion in July; the Senate earlier approved $136.5 billion. Subsequent to the start of the conference, the administration submitted, in October, a revision to their March 10 Defense budget deemed necessary as a result of the administration's revised economic forecast and to include the President's recent decisions on strategic programs. The October 2 revision reduced by $6.2 to $130.2 billion the administration's Defense authorization request.

In an effort to incorporate these proposed changes, the conferees have reported a Defense authorization bill that in several categories reduces authorizations below those passed by both the House and the Senate, and in two cases, increases authorizations above the House and Senate levels. Fourteen authorization categories in titles 1, 2, 3, and 4 were reduced. Authorizations for two categories, Army aircraft and Navy missiles, were slightly increased, as recommended by the administration. The chairman and the ranking minority member of the Armed Services Committee will fully describe these changes when the House later considers the conference report.

Mr. Speaker, the conference report to S. 815 authorizes appropriations of $130.7 billion for fiscal year 1982, which is $419 million above the administration's October budget revision, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons; for research, development, test and evaluation for the Armed Forces; for operations and maintenance expenses of the Armed Forces; for civil defense; and for military training student loads. S. 815 also authorizes personnel strength for each active duty component, the Selected Reserve of each Reserve component of the Armed Forces, and for civilian personnel of the Department of Defense.

Mr. Speaker, a strong defense is vital to the safekeeping of our Nation. This legislation enhances our defense capabilities, I would urge my colleagues to adopt the rule so that we may proceed to consider this most important conference report.

□ 1630

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, House Resolution 270 is a rule waiving all points of order against consideration of the conference report to the bill, S. 815, the Department of Defense authorization for 1982.

The rule waives clause 3 of rule 28, which would otherwise prohibit our consideration of this conference report because the conferees have agreed on provisions that are outside the scope of what was committed to conference.

The chairman of the Committee on Armed Services, the gentleman from Illinois (Mr. PRICE), and the ranking Republican member of the committee, the gentleman from Alabama (Mr. DICKINSON), testified before the Committee on Rules that the scope violations consist primarily of revised authorization levels below those passed by both the House and Senate earlier this year.

Mr. Speaker, my colleagues will recall that the House passed H.R. 3519 in July and authorized $136.1 billion for the Department of Defense in 1982. The Senate had passed its bill, S. 815, containing $136.5 billion in authorizations. During the intervening months, the conferees were confronted with an administration request for lower authorization levels from its March budget request.

Both the chairman and the ranking Republican member of the Armed Services Committee made it plain that the conferees have reluctantly agreed in large part to President Reagan's decision to trim his defense budget request and this conference report is some $5.8 billion below the House-passed level and is about $6.2 billion below the Senate-passed level.

To their credit, the conferees have agreed to a conference report that does take into account the revisions submitted by the administration, although these reductions mean deferring things that our services truly need.

Mr. Speaker, there was no controversy about granting this waiver in the Committee on Rules, and this rule was ordered reported by a unanimous voice vote.

I urge the House to adopt this rule, so that we may take up the conference report.

Mr. DERRICK. Mr. Speaker, I move the previous question on the resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON S. 815, DEPARTMENT OF DEFENSE AUTHORIZATION ACT, 1982

Mr. PRICE. Mr. Speaker, I call up the conference report on the Senate bill (S. 815) to authorize appropriations for fiscal year 1982, for procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons and for research, development, test, and evaluation for the Armed Forces, to authorize appropriations for fiscal year 1982 for operations and maintenance expenses of the Armed Forces, to prescribe the authorized personnel strength for each active duty component and the Selected Reserve of each Reserve component of the Armed Forces and for civilian personnel of the Department of Defense, to authorize the military training student loads, to authorize appropriations for fiscal year 1982 for civil defense, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of November 3, 1981.)

The SPEAKER pro tempore. The gentleman from Illinois (Mr. PRICE) will be recognized for 30 minutes, and the gentleman from Alabama (Mr. DICKINSON) will be recognized for 30 minutes.

The Chair now recognizes the gentleman from Illinois (Mr. PRICE).

Mr. PRICE. Mr. Speaker, the conference report on S. 815 was agreed to after a long and difficult conference. The conferees met 18 times in a period of more than 3 months. The conference was delayed by the late receipt of the administration's proposals on stra-

tegic programs and by the second revision to the budget which was transmitted in October.

Because the October budget revisions call for a reduction in defense spending, the conference report provides for amounts which are lower than those contained, in many instances, in either the House or the Senate bill. For this reason it was necessary to request a rule waiving points of order against the conference report for exceeding the scope of the bill committed to conference.

The conference report provides total authorizations of $130.7 billion for procurement of major weapons systems, research, development, test and evaluation, and civil defense. The authorization total is $5.8 billion below the amount contained in the House amendment to S. 815 that was committed to conference and $6.2 billion below the Senate bill.

The total of authorizations is $419 million above the President's amended October request but $5.8 billion below the March budget request of the administration.

Mr. Speaker, when I presented the original House bill, H.R. 3519, on June 24, I noted at the time that we had reported the largest authorization bill ever recommended by our committee. I stated that the members of the committee were keenly aware that bringing a large defense bill to the floor of the House at a time when Congress was agonizing over budget cuts in all other areas of the Government, was not an easy thing to do. Nevertheless, the committee made such a recommendation after reviewing the frightening growth in Soviet military capability and the enormous advances in Soviet research and development on strategic and tactical weapons.

However, when the President himself, as a result of change in budgetary forecast, recommended a significant reduction in defense spending in October, a reduction totaling $8.7 billion in budget authority ($6.2 billion of which is subject to authorization) and $2 billion in outlays, the conferees on the part of both the House and the Senate concluded that the responsible thing to do was to report an authorization bill more nearly in line with current administration proposed limits. Accordingly, we made significant reductions.

Reductions in the procurement category, for example, totaled over $3 billion and included reductions in some 40 programs below the level initially approved by either the House or the Senate.

In the area of personnel strength, the level for active forces contained in the conference report is 12,400 below the level approved by the House and 6,800 below the level approved by the Senate.

What I said in presenting the bill to the House last summer concerning the growth in Soviet capability is no less true today. Making reductions of the amount proposed by the conference was painful. But the defense budget cannot be immunized from the overall budgetary process and in face of the changed economic forecast of the administration, the conference, I believe, did the only thing it could do.

As stated by the conferees in the statement of managers, the conferees on the part of both houses believe that the authorization amounts initially committed to conference more nearly reflect the long-term requirements for achieving the marked improvements in national defense posture that is necessary. The reductions made in the final conference report are really, for the most part, in the nature of deferrals and conferees emphasize that these reductions are made without prejudice and driven by budget realities rather than military requirements.

Mr. Speaker, the conference report was printed on November 3 and has been available for some time so I will not take extensive time in the House to review the conference action.

I would like to emphasize that the conference report is unusually delayed this year because of events beyond the control of the members of the conference. To begin with, although the bill was reported before May 15, it was not called before the Rules Committee until June 18 and was not scheduled for floor action until June 24. It passed the House on July 16 and the conference began on July 23. More prompt scheduling of such a large authorization bill once reported would be extremely helpful, not only for the authorization process, but to the Appropriations Committee.

When the House returned from the August recess, the conference that might ordinarily have been finished by the end of September was further delayed because of the delay and uncertainty concerning the administration's strategic program recommendations and because the administration, in an unusual move, proposed a second budget revision which was eventually submitted in October. These developments in the administration made delay of the conference inevitable.

Mr. Speaker, I move the adoption of the conference report.

Mr. DICKINSON. Mr. Speaker, I yield myself such time as I may consume.

I am privileged to appear with our distinguished chairman of the Armed Services Committee to support the conference report on S. 815, the Department of Defense Authorization Act.

The circumstances under which we considered this bill with the other body were unique. As you remember, we passed S. 815, as amended, last July after 7 days of extended debate. We subsequently were delayed in considering the bill in conference by the August recess and then by the administration's strategic decisions. Then, in early October, because of revised economic forecasts the administration submitted budget revisions that reduced the original defense authorization request by $6.2 billion.

After considering the latest revisions, the conferees decided against holding further hearings in that the items that were proposed for reduction had already been the subject of previous hearings.

The conferees agreed to authorizations totaling $130.69 billion, which is $419 million above the administration's October request but $5.8 billion below our authorization bill passed in July.

I want to make it perfectly clear to my colleagues that these cuts do not mean that we do not need the additional military capability represented by the $5.8 billion reduction. On the contrary, while we debate and cut, the Soviet Union continues a single-minded and relentless buildup of military power. She surpasses the United States in the production of almost all major elements of military power, including tanks, armored vehicles, aircraft and missiles. She continues to use this power as an instrument of national policy. For example, to date the U.S.S.R. has shipped 60,000 tons of military equipment to Cuba, a rate far exceeding previous years. We have grave concern that a portion of this equipment is being transshipped to aid the insurgents in Central and South America.

Because of the unrelenting buildup of Soviet power, the members of our committee see the reductions in the authorization bill as temporary setbacks in the Nation's attempt to maintain conventional and strategic parity with the U.S.S.R.

We supported the President's plan for construction of the MX and B–1 with restrictions against obligating and expending any fiscal year 1982 funds before November 18, 1981. Expenditure of funds for a basing mode for the MX were specifically precluded before that date but, because of continued concern over the survivability of MX, the bill provides for conduct of research and development for other MX deceptive basing modes.

If after November 18, 1981, both Houses have not passed resolutions of disapproval, the B–1 and MX program could proceed subject to appropriations being provided. Our committee is planning strategic force hearings later in the fiscal year, and we will be examining the cost and schedule particulars of both the B–1 and MX on a continuing basis.

Mr. Speaker, I support this conference report and urge its approval.

□ 1640

Mr. PRICE. Mr. Speaker, I yield 4½ minutes to the gentleman from Florida (Mr. BENNETT).

Mr. BENNETT. Mr. Speaker, I think the conferees did a good job on this. I think we all ought to enthusiastically support it.

Mr. Speaker, I take time to engage my distinguished colleague from Florida in a colloquy on this most important legislation. I want to particularly recognize my colleague for his leading role in the war on drugs that are infesting our country. Coming from a State where the infusion of drugs has turned what Floridians believe is a tropical paradise into a battleground, we know only too well what a serious problem we are facing.

Mr. SHAW. Mr. Speaker, I wish to thank my distinguished colleague from Florida, the senior ranking member of the Armed Services Committee, for the hard work and dedication he displayed during the conference over the exemption of the posse comitatus statute. We should pay attention to the tireless dedication he exhibited in pushing for the strongest antidrug legislation. Even when others said it could not be done, he persevered. Because of his commitment to finding an answer for our country's most pressing domestic problem, he did not give up. I feel that, as a result, we won a subtle victory, but this is only the beginning.

Mr. BENNETT. I also want to praise my colleague's perseverance and determination. I, too, agree that this must only be the beginning. While this legislation will shortly become the most powerful antidrug bill ever passed by Congress, it is still like dipping a bucket of water from the sea. If we are to win this desperate war against drugs, the entire Congress and the administration must display the same courage as the House. We passed legislation calling for direct participation by the military by a 60-vote margin. While we have achieved an important victory, the battle has just begun.

Mr. SHAW. I agree with the gentleman. This compromise is a step in the right direction, but it represents just that: A compromise. I have stated in the past, and I want to reiterate, there really should be no compromise when dealing with the illegal trafficking of narcotics. The House realized the importance of tough legislation and thus set a record. Now it is up to the administration. The monkey is on their back. We need to present a unified front against drugs.

Mr. BENNETT. It is important to point out that the administration already has the power to engage the Navy and Marine Corps in fighting drug smuggling. Only Navy regulations stand in the way of such active participation, and I hope existing regulations will be amended to permit full participation. Title 21 of the United States Code specifically allows full involvement. And I want to point out that when Congress enacts this measure, it will contain language agreed on in conference not to diminish any existing power under law to fight drug smuggling, and this clearly allows the Navy to cooperate fully if its own regulations are amended. I have recently met with the Secretary of the Navy, the Commandant of the Coast Guard, and the Deputy Secretary of Defense, along with the gentleman from Florida. I believe that they are beginning to realize how important it is to enact tough laws to fight this war on drugs.

Mr. SHAW. In addition, I have met with Mr. Meese at the White House and with top-level Justice Department officials to discuss this issue. They understand our position and see the need to get more deeply involved. The question is, To what extent? The first thing we must do is look at the self-imposed regulations of the Navy. We need some changes to free the Navy to work with us in this regard. We need active support from this administration. The obstructive attitude of the Department of Defense is not in line with this House or this administration's policy to crack down on crime and illegal drug trafficking. We heard strong words from the Attorney General when he released the administration's report of its campaign to deal with our ever-increasing problem of crime. We need the same get-tough language in the drug area. It is not the responsibility of the Department of Defense to dictate policy, but rather to enforce those policies enacted by the administration and Congress. I want to put DOD on notice that we expect them to do their share in the fight against drugs.

Mr. BENNETT. Again, I want to commend my colleague from Florida and remind the rest of this distinguished body that a battle has been won, but the war is by no means over.

I yield back the balance of my time.

Mr. PRICE. Mr. Speaker, I yield 1 minute to the gentlewoman from Colorado (Mrs. SCHROEDER).

Mrs. SCHROEDER. Mr. Speaker, I rise in opposition to this conference report on S. 815, the 1982 Department of Defense Authorization Act. The best thing that can be said is that it wastes nearly $6 billion less than the original House bill.

The bill reflects the discredited philosophy embraced by the Reagan administration that we can solve the problem of our national defense by throwing huge amounts of additional money at it. Let us look at the figures. In fiscal year 1981, we authorized $35.8 billion and appropriated $34.5 billion for procurement. In this conference report, we authorize $48 billion, or 40 percent more than last year. What a bonanza for the defense contractors.

For research, development, test, and evaluation, last year we authorized $16.9 billion and appropriated $16 billion. This conference report authorizes $20.4 billion, or 27.5 percent more. Last year, we appropriated $54.2 billion for operation and maintenance. This conference report contains $62.2 billion, or 15 percent more. Civil defense has gone up nearly 10 percent. All in all, this bill authorizes $25.86 billion more for defense than last year. Looked at another way, for every dollar we saved through the painful budget reconciliation process, we are spending 74 cents of it to increase the defense budget.

In line with this national money toss, the conferees approved $1.9 billion for the President's MX system, although they were so unsure of this proposal that they wrote in a congressional veto provision. Why are we wasting money on systems which nobody seems to support? Similarly, $1.6 billion is included for procurement and $227 million for advanced procurement of this year's variant of the B-1 bomber, called the long range combat aircraft. At times like these, the Department of Defense reminds me of children at a candy store. If you ask them whether they want a lollipop or a tootsie roll, they will invariably say both. If you ask DOD whether it wants a B-1 or a Stealth bomber, it will invariably say both.

Beyond the sheer dollar amounts, we need to look at what dangerous language the report contains. It contains an ever-growing U.S. financial crutch to NATO, while other countries decrease the proportion of their GNP to NATO. It contains an authorization for the military to participate in civilian law enforcement efforts. It contains provisions requiring Selective Service registrants to provide their social security number for easier identification and location, raising the specter of "Big Brother." It contains a provision allowing the Selective Service, Defense Department, Treasury Department, and the Department of Health and Human Services to share computer information about people eligible for the draft. And it still contains $750,000 to celebrate our victory at the Battle of Yorktown.

There were a few good provisions in the House bill, like section 602 limiting the contracting out of commercial and industrial functions; and section 916 on gender-based recruiting distinctions. Both disappeared in conference. Other good provisions did survive, barely. There is a unit-cost reporting requirement and a requirement to look for waste, fraud, and abuse in the Department of Defense. While both are

useful, they are not strong enough to salvage the rest of the bill. I will therefore vote against it.

Mr. VENTO. Mr. Speaker, will the gentlewoman yield?

Mrs. SCHROEDER. I yield to the gentleman from Minnesota.

Mr. VENTO. Mr. Speaker, I rise in opposition.

I commend the gentlewoman in the well. I would ask whether or not the Nunn amendment she fought for on the floor was retained in this particular conference.

Mrs. SCHROEDER. I thank the gentleman. Most of it is still there.

Mr. VENTO. I thank the gentlewoman.

Mr. Speaker, this is not a good bill. It is better than the original bill passed by the House when unbridled spending in the Pentagon was thought commendable. Since then, budgetary constraints, reality, have forced a shrinking of the administration's wholly unrealistic ambitions in defense spending. While this bill does slightly reduce spending, it is still persists as being unrealistic.

Unfortunately, the conference report does not reflect an understanding of how to maximize national security within a limited defense budget and that this requires the elimination of programs of marginal value. We then could concentrate our purchasing on larger, more efficient numbers of weapons systems deemed vital.

Instead of following this admittedly difficult path, the conference committee chose to shrink slightly almost every program, leading to waste through inefficient rates of procurement. The possible savings and the real addition to our national security were less than could have been realized simply because the committee surrendered to the various Pentagon pressure groups eager to keep spending at public expense.

I submit that a proper defense posture would establish a national security safety base. We should determine which systems are essential to our Nation's security and which are merely peripheral. Which systems work and which systems do not work. Above all, the national security safety base can only occur in a healthy economy. With this in mind we must seek an effective defense at the most economical means.

Unfortunately, the conference committee has chosen to sponsor as many systems as possible rather than choosing between competing programs. Rather than concentrating our limited defense funds, we are spreading these resources out over the spectrum with little regard for need or effectiveness. As a consequence, we are spreading ourselves out too thin when all is essential, in reality nothing receives the needed priority. The examples of this phenomena are numerous.

For the Air Force, the conference report recommends the purchase of 36 F-15's and 120 F-16's at a cost of $2.25 billion. Instead, we could have purchased 160 F-16's at a cost of about $1.6 billion. While the F-15 admittedly does have a greater capability, is it worth $650 million to equip one Air Force squadron with F-15's rather than F-16's? No case for this excess expenditure has been made. The F-15 is an expensive plane which the committee should have rejected.

In this bill, we find $550 million authorized for Army procurement of the AH-64/Hellfire system. The major advantage of this system over the less expensive AH-1S is claimed to be its night/bad weather capability. However, I have learned that many armored officers feel this would be of dubious value.

On the other hand, the committee commendably did see fit to cancel SOTAS, a system of doubtful worth but of undoubted cost which may well become irrelevant if the Army pushes its streamlining inherent in the proposed revision to "Manual 100-5."

When we turn to the Navy, there are some gleams of hope. The direction to the Navy to explore the feasibility of diesel-electric submarines may well save money by saving us from superfluous capability. I understand that this inclusion is due to the leadership and energy of the gentleman from Virginia. He must be commended for this important initiative.

However, the second largest procurement item, naval aircraft, has been left in a mess. Despite the rule, no thought has been given to the proper equipment of our naval aviation.

The original budget request in March supposed a 15-carrier Navy. This has since been abandoned. Even the Chief of Naval Operations admits that this goal is impossible. The problem we run into is block obsolescence of our carrier force and the inability of our industrial base to counter this. As a result, it is essential for Congress to prepare for this situation. Even before their scrapping, our aging carrier force cannot be expected to operate at full capability. Thus, we must determine what our Navy can do and what it needs to do.

The first point to be made is that the prime purpose of any navy is control of the sea, the ability to use the oceans for one's own purposes. In the current politico-military context, this means that me must be able to effectively challenge the Soviet Navy.

What kind of Navy can effectively do that? The first requisite is that we need our battle groups to survive. The main threats to our battle groups are the Backfire and cruise missiles. The only naval aircraft capable of intercepting Backfire is the F-14. This year's F-14 procurement was unaltered despite the 60-percent increase in total program size that it is supposed to support. The naval aircraft A-6 is the only capability we possess to strike a *Kirov* centered Soviet battle group. The first A-6/Harpoon squadron has recently been deployed on the *John F. Kennedy.* We will be short 60 A-6's by 1985 and yet this program was left unaltered in this conference report.

As General White testified to the Appropriation Defense Subcommittee on July 22, the Marine Corps looks to an all V/STOL force. Nevertheless, the conference committee ironically supports the stretchout of the AV-8B program.

Why have these discrepancies occurred? Because instead of these essential changes, the committee supports a purchase of F/A-18's for over $2 billion. This problem-plagued program was supposed to be the affordable plane we could buy in quantity. Instead, it is being allowed to suck the dollars out of other more essential naval aviation programs.

We still buy at the March 1981 level of F/A-18's predicated on a 1377 total program, a program total the Navy will privately admit only exists because Congress would make a fuss about a reduction and related cost increase for each F-18. The real program size is around 800 and the unit cost is over $30 million. This is waste, fraud, and mismanagement at its worst. And for what?

The F/A-18 certainly does not help national security. The Office of Naval Warfare questions the need for light attack squadrons. The chairman of the Senate Appropriations Committee questions the need and looks to the A-7E to fulfill the light attack function for some years.

As far as the Marine fighter role is concerned, Marine data shows that there are enough F-4's to equip Marine squadrons until the all-V/STOL force is possible.

The F/A-18 is the worst example of what is wrong with this conference committee report. The bill serves the Pentagon; it serves the manufacturer; it may even be said to create employment in some areas, but unfortunately it does not serve our national defense as it should.

I would urge the House to reject the report in the hope that fiscal prudence and national security may ultimately win out against parochial interests.

Evey Member should vote for a bill that is prodefense. No Member should vote for a fiscally imprudent bill that is merely pro-Pentagon. Given these criteria, I believe the choice is obvious, to vote "no" when the roll is called on this measure.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. MAVROULES).

Mr. MAVROULES. Mr. Speaker, I rise to urge my colleagues to support and adopt the conference report on S. 815, the Defense Authorization Conference Report for Fiscal Year 1982.

One noteworthy aspect of the conference report is the decision to proceed with the procurement of 63 F-18 aircraft in fiscal year 1982, with long lead provided for the procurement of 84 aircraft the following year. As many of you know, the House Armed Services Committee recommended procuring the F-18 aircraft at a more efficient production rate, and in our bill we authorized procurement of 84 F-18's in this fiscal year. However, because of the overall reduction applied to the defense budget by the President's October budget amendment, there simply was not sufficient budget authority to fund the F-18 program at 84 aircraft.

However, many share my concern that the F-18 aircraft is not being procured in sufficient quantities to take advantage of the economics of scale. Higher production rates must be realized in order to reduce unit costs. Because the F-18 is so essential to future naval aviation requirements, I want to join the conferees in urging higher procurement rates in future years for the F-18 program.

I would like to yield to my colleague from California.

□ 1650

Mr. DICKINSON. Mr. Speaker, I would like to yield 3 minutes to the gentleman from Illinois (Mr. McCLORY).

Mr. McCLORY. Mr. Speaker, I rise in strong support of the conference report on S. 815, the Defense Department authorization bill for fiscal year 1982. As a conferee with respect to the posse comitatus provisions of that bill, I can assure my colleagues that it is the product of hard work and great dedication on the part of many Members concerned about the drug problem in this country. In particular, the gentleman from Florida (Mr. BENNETT), the gentleman from Texas (Mr. WHITE), from the Armed Services Committee, the gentleman from New Jersey (Mr. HUGHES), and the gentleman from Michigan (Mr. SAWYER), from the Judiciary Committee, are to be highly commended for their contribution to facilitating cooperation between the military and civilian law enforcement authorities. I believe that we have fashioned workable and well-defined authority for the military to provide much-needed assistance, particularly in the war against drugs.

The posse comitatus law has created substantial confusion about what sorts of assistance the military may legally provide to Federal, State, and local law enforcement agencies. As such, it has erected a nonsensical barrier to cooperation between the Armed Forces and Civilian in enforcing the law. Our provisions will permit the military to share vital intelligence collected during military operations, share military equipment and facilities, and train and advice civilian law enforcement personnel. While these provisions clarify existing authority, the conferees, based on demonstrated need, included two additional types of assistance which are not now permitted. First, Defense Department personnel may assist in the operation and maintenance of radar and communications equipment where requested by the head of an agency enforcing Federal drug, immigration, or customs laws. Second, under circumstances determined by the Secretary of Defense and the Attorney General to be an emergency, equipment may be operated outside the land area of the United States by military personnel to serve as a base of operations or to transport law enforcement officials, provided that the equipment is not used to interdict vessels or aircraft. This avoids placing military personnel in a confrontational situation.

Because we were given strong assurances by the Federal military and law enforcement agencies involved that arrest and seizure authority was not needed, the very limited arrest provisions contained in the bill passed by this body last July were deleted. However, I understand that the chairman of the Subcommittee on Crime plans to conduct oversight hearings on the implementation of these provisions to insure that they fulfill our goal of authorizing the military to provide appropriate and effective assistance, particularly in the drug area. In addition, pursuant to the report requirements which this body included in its bill, we will be receiving periodic reports from the executive branch on its operations under these provisions. Thus, I believe that we will be in a position to reevaluate the assistance we have authorized, if this proves necessary.

Mr. Speaker, again I urge my colleagues to join me in strong support of S. 815.

Mr. DICKINSON. Mr. Speaker, I would like to yield an additional 3 minutes to the gentleman from Michigan (Mr. SAWYER) to speak on the same topic.

Mr. SAWYER. Mr. Speaker, we did have, as the gentleman from Illinois said, a very extended and difficult conference on what appeared to be a relatively simple and somewhat noncontroversial provision. Really, the leadership in it came from the gentleman from Florida (Mr. BENNETT) who persisted in holding our ground very strongly throughout the conference.

Basically, of course, for those who are not familiar with the term posse comitatus, it has come to mean, while it literally means the force of a county, or really sheriff's posse, it has come to mean the use of the military in assisting civilian law enforcement. Abuse was put into the statute, the criminal prohibition arising out of some atrocities or whatever, created by Union troops in the South following the Civil War, and of course now today we are confronted by what is perhaps the biggest threat to the Nation there is, some $65 billion a year drug traffic coming in from overseas, and it is preventing us from using the reasonable facilities and equipment and surveillance of the military in trying to interdict this and leaving it solely to the Coast Guard and Customs.

We did not get everything we wanted, but we got, I would say, a good 90 percent. We can perform the interdictions without the use of the military equipment so long as they will do the surveillance and oversight. To emphasize the importance of it, I would like to quote the gentleman from New Jersey, chairman of my subcommittee, BILL HUGHES, who likes to say that in his district they have yet to lose anyone to the Soviet Union, but they lose them to crime and drugs all the time. To not use the kind of investment our people have in this military equipment and expertise, I think is a waste of a tremendous resource in a vital battle.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. MOFFETT).

Mr. MOFFETT. Mr. Speaker, I wonder if I might engage in a very brief colloquy with the gentleman from New York (Mr. STRATTON)?

Mr. STRATTON. Yes, indeed.

Mr. MOFFETT. I ask my friend from New York, the conference agreement on the armed services authorization bill did not provide multiyear procurement funds for the Blackhawk helicopter program. The conferees were of the opinion that the Blackhawk program was not ready at this time for multiyear funds.

Is it correct to infer that the action of the conferees does not prejudice reconsideration of the Blackhawk program as a candidate for multiyear procurement in the future?

Mr. STRATTON. Mr. Speaker, if the gentleman will yield, speaking as the chairman of the Subcommittee on Procurement, I would say, the action of the conferees was taken without prejudice to the basic Blackhawk program. In the judgment of the conferees, it is a bit premature to consider Blackhawk as a candidate for multiyear procurement at this time because it does not yet appear to meet the criteria for such a program.

After the Blackhawk program has demonstrated that it meets the criteria, including cost stability, I think it would be appropriate to reconsider the program for multiyear procurement.

Mr. MOFFETT. I thank the gentleman.

Mr. DICKINSON. Mr. Speaker, will the gentleman yield?

Mr. MOFFETT. I yield to the gentleman.

Mr. DICKINSON. Mr. Speaker, in further amplification of the subject, let me say that this was a matter of discussion specifically whether or not it might be prejudiced if it were not funded for multiyear procurement. The Senator from Texas, Mr. TOWER, chairman of the Senate Armed Services Committee, made the statement in conference and it is part of our record that if indeed the Army wanted to come back for a reprograming of this early on and not wait for the next budget cycle, we would entertain it favorably. Certainly, we on this side of the Capitol would look at it favorably as soon as they let it go into production.

Mr. MOFFETT. I thank the gentleman.

Mr. DICKINSON. Mr. Speaker, I yield myself such time as I may consume, and I yield to the gentleman from Texas (Mr. KAZEN).

Mr. KAZEN. Mr. Speaker, I understand that the restrictions and the guidelines for contracting out that the House had put in our bill are entirely out of this conference report. Am I correct?

Mr. DICKINSON. Well, now, if this is the case I am unaware of it, and perhaps the chairman could help me. I do not think we did anything to it. I have no recollection of it. Of course, it is a large bill, but I do not think so.

Mr. KAZEN. I was just wondering what happened to the authorization.

Mr. DICKINSON. There were no changes in the House bill in the conference dealing with that subject.

Mr. KAZAN. Well then, I just wondered where we would be before the appropriations bill comes out because this House spoke pretty clearly on what we wanted as far as contracting out was concerned, and it seems that our conferees were not able to hold our position on that subject. If that is correct, I regret very much that that happened.

Mr. DICKINSON. Well, of course this has been a matter of rather intensive scrutiny by our committee for some time, and the gentleman and I have been in accord. There was no change in the House position that this Member can recall. I would be glad to hear from my colleague from Alabama (Mr. NICHOLS).

Mr. NICHOLS. Mr. Speaker, maybe I can shed a little light on it, and I know the gentleman from Texas has had an interest in it. The House had a provision—the gentleman is correct in that—in the bill. The Senate had a provision that we felt was extremely detrimental so it was sort of a standoff. Both provisions were dropped, I say to the gentleman. I regret that is the case but that is what we had to do in conference.

Mr. KAZEN. Will the gentleman yield further?

Mr. DICKINSON. If I could be of help, I would be glad to yield.

Mr. KAZEN. No, I just regret the fact that this action was taken by the conference. I am going to vote for the conference report, but very reluctantly because as we go through year after year, our defense posture is weakened by the fact that we do a lot of contracting out that should not be done.

□ 1700

If the chips ever fall, we have in our armed services some of our personnel and some of our civil servants who keep up our equipment and our spare parts and our inventories and do the work on the bases, but when we contract our these things, we lose control over them for all practical purposes in the long run. In many instances the Government does not save the money they think they are going to save; they might the first time around, but the second time around these private contractors have the field to themselves and they can charge what they want.

Mr. DICKINSON. Mr. Speaker, I agree with the gentleman.

Mr. Speaker, at this time I yield 5 minutes to the gentleman from Michigan (Mr. DAVIS).

Mr. DAVIS. Mr. Speaker, I find myself in the unfamiliar positon today of rising in opposition to the conference report on S. 815, the fiscal 1982 Defense authorization bill. As a strong supporter of our defense rebuilding effort in general, I am usually in agreement with the position of my committee in working to insure that our defense dollars will be spent in a way which will yield us the strongest possible national defense.

In the legislation before us today, I again find myself in agreement with almost all of the positions taken by the conferees and I offer my compliments to my colleagues from the committee who I know worked long and hard on reaching agreement with the Senate.

I was however, very disappointed with one particular action by the conferees, in receding to the Senate position on Project ELF and it is at this I direct my comments. The administration requested $34.9 million for this Navy research and development program for fiscal year 1982. In subcommittee, I offered an amendment which was adopted eliminating all but $5 million for the program plus language that was approved by the full committee and the House. The Senate, which has traditionally supported this program to a greater extent than the House, retained full funding for the program. During the conference, the administration announced its plans to go ahead with ELF; the absence of such a decision by the President had been noted in the House committee's report. Subsequently, the House receded to the Senate's position providing full funding for the program.

My colleagues on the committee are aware of the serious concerns that have been expressed regarding ELF, the continuing changes that have been made in all aspects of the system, and the fact that even the Navy recommended against funding the system earlier this year. Even with these considerations, and without the benefit of congressional review of the newest system, we are faced with an authorization bill providing funds badly needed in other defense areas for a marginally useful program for which no urgent need exists.

The cost of the system cannot be measured only in absolute dollar-value, however. Many of us have gone home to our constituents to explain why our defense problems are so severe and why it is absolutely necessary that we spend money to address these problems. To spend money on a system of such a questionable, discredited nature can only damage our efforts to obtain funding for those requirements which are truly critical in nature and so hinder our long-term efforts to rebuild our defenses.

Because I feel strongly about this matter, I cannot in good conscience support the conference report.

Mr. PRICE. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Speaker, I thank the distinguished chairman of the committee, the gentleman from Illinois (Mr. PRICE), for yielding these 2 minutes to me.

Mr. Speaker, I rise in support of those sections of the conference report relating to section 905 of H.R. 3519 which deal with the use of the military to assist civilian law enforcement. As the sponsor of the provisions that formed the primary structure of the House bill, I am pleased to support this reconciliation of differences with the other body.

I firmly believe that the provisions contained in this conference report represent a signficiant advance for law enforcement. These provisions permit enhanced cooperation by the military with civilian law enforcement. This law will encourage the military to share intelligence information, equipment, facilities, and training capabilities. In addition, to modifying current Federal law. These provisions also add new authority for the military to track and monitor air and sea traffic related to drug smuggling.

The provisions of section 905 of this conference report will dramatically improve the ability of law enforcement agencies to stem the tide of ille-

gal drugs into the United States. The single most important new weapon sought by Federal, State, and local law enforcement officials to fight the influx of illegal drugs is an improved ability to monitor air and sea traffic to detect smugglers. We have given these beleagured law enforcement officials one of the new tools they requested.

I should note that the provisions contained in this conference have the support of the Reagan administration. The Department of Justice, the Department of Defense, the Coast Guard and the Customs Service have all endorsed the concepts contained in the conference report. In addition, virtually all of the State and local law enforcement officials we have heard from are heartened by the advances made by this bill.

In closing, I would like to take this opportunity to thank some of my fellow conferees for their diligence and hard work on this issue. My distinguished colleagues CHARLIE BENNETT of Florida, DICK WHITE of Texas, and HAL SAWYER of Michigan are to be commended for their dedication to fashioning a measure that we can all be proud of. From the other body I would like to single out Senator SAM NUNN whose profound understanding of the importance of this measure lead him to offer these provisions initially as an amendment to the Senate version of the Department of Defense authorization bill. In conference, the accommodations reached between the two bodies were always guided by the commitment of all of the conferees to developing a comprehensive response to the articulated needs of civilian law enforcement with respect to interdicting drugs. At the same time we have preserved the appropriate role of the military. I am proud to have been a conferee on such an important anti-crime initiative.

Mr. DICKINSON. Mr. Speaker, I yield 6 minutes to the gentleman from California (Mr. BADHAM).

Mr. BADHAM. Mr. Speaker, I rise to strongly urge support and adoption of the conference report on S. 815. I think it is a good conference report, and it is one that the Members have worked long and hard on.

I would like, just as our friend, the gentleman from Massachusetts (Mr. MAVROULES), to call attention to one aspect and one phase of this conference report; namely, the one that deals with the procurement of 63 F-18 aircraft in fiscal year 1982 and the long-lead procurement of 84 aircraft in the following year. The Committee on Armed Services of the House recommended 84 this year and more in the following year, but with budget constraints such as they are, this is a lot better than nothing.

The thing I would like to bring to the attention of the House today is that the F-18 is probably the best aircraft that the Navy has ever considered purchasing. It is a splendid aircraft, and it has met with controversy—I think undue and unfortunate controversy—on the floor of this House.

Two basic issues have been the source of controversy, cost and performance. But when we knock out the inflation as we have known it over the past several years, it works out that they have a cost growth of 2.2 percent annually in this program, and that is hardly an uncontrollable increase in cost.

When the Navy made the specification book for what an F-18 ought to do, they made it with such high hopes and such high expectations and such high desires that no plane which has ever been invented or flown by any nation on this Earth has come close to what have been called the specifications for the F-18. But our F-18 does come close. It has better range, it has better speed, it has better acceleration, and it has better capabilities than any aircraft in any naval force of this day.

But that is not all that causes me to rise to support this conference report containing the F-18. I would interject at this point an article from the November 9 issue of the New York Times by Col. James Hart, who really, as we would say in the vernacular, "tells it like it is," because he is one of the souls who flies an F-18, and if we ever went to war or into combat, he would be at the front lines. That article to which I referred is as follows:

[From the New York Times, Nov. 9, 1981]

BUILD F-18's

(By James G. Hart)

WASHINGTON.—Since 1975, the Navy and Marine Corps have advocated, developed, tested, and started production of a new airplane, the F/A-18 Hornet. If the program is fully approved, 1,366 Hornets will be produced for the United States; already more than 200 have been purchased by Canada and Australia. This aircraft has generated lengthy debate in the news media and the Congress, a debate that still goes on. However, seldom do I see anything written by the one person who "pays" for the good or bad features of a new plane—the pilot, the guy who must fly it every day.

The F/A-18—the F-18, as it is popularly known—is essential to the future of Marine and Navy tactical aviation, and the case for it deserves a thorough hearing. The F stands for "fighter," A for "attack"—and this combination is crucial to aviators who must fly in both the air-to-air and the air-to-ground arenas. Heretofore, new planes could handle one mission or the other, but not both.

It is understandable that the pilot's opinion is seldom solicited and rarely heard. Armchair critics, so ready to comment theoretically on the military requirements and technical capabilities of modern aircraft, are normally reluctant to discuss the practical problems that pilots face in the cockpit. As one who has flown some of the best—and worst—aircraft this country has produced, I feel it is time to speak out.

Two very basic issues have been the sources of controversy: cost and performance. While both are indeed complex, a close look at a few facts is in order.

The cost of the F/A-18 program is currently estimated by the Navy at $35.3 billion—dollars escalated by inflation through 1990. This results in a price of $25.6 million per aircraft, in inflated dollars. It is noteworthy that fully 61 percent of the projected cost is nothing but the result of inflation. If you removed inflation from the calculations, the price would be $10.1 million per aircraft. This means that in the last six years, the F/A-18 has shown a cost increase of 2.2 percent—a figure that is not desirable, but reasonable, considering the significant challenges involved in developing a new airplane.

Price is most significant when measured against value. To a pilot, value instantly translates into two kinds of performance: that of the basic airplane, and that of its weapons system.

Consider these facts—facts that are significant in the cockpit, and are hard to appreciate in an armchair.

At speeds of 550 to 750 miles per hour—the critical speeds that we fight at—the F/A-18 will accelerate faster than the F-4 and F-14, but more important, it will also out-accelerate enemy aircraft.

The F/A-18, armed as a fighter, will go 30 percent farther than the F-4, which it replaces.

The F/A-18, when carrying bombs, is not only faster than the A-7, which it replaces, but when both the F/A-18 and the A-7 carry more than 6,000 pounds of bombs, the F/A-18's will travel farther.

The F/A-18 has, embodied in one aircraft, a radar system with significantly increased air-to-air capabilities over the F-4's, and a more accurate and reliable bombing capability than the A-7's. These statements can be made of no other airplane in the world.

The facts support the superior value of the F/A-18. The final question, then, is need: Is there a legitimate military requirement for the plane? Clearly, the answer is yes.

The F/A-18 was designed to be a reliable fighter and attack plane that could engage in combat, accomplish its mission, and survive in increasingly difficult areas—and so it is. The plane's performance speaks for itself.

In these days of spiraling mechanical, fuel, and personnel costs, airplane maintenance is equally important. Even though the F/A-18 is new, it is already demonstrating three times the reliability, and requires half the maintenance, of existing aircraft.

Whether viewed from the squadron's maintenance control office or through the pilot's canopy, it satisfies every crucial requirement—something no plane on any drawing board I know of can do.

The final decision should be based on a rational evaluation of accurate data. If it is, I have every confidence that I will be flying the F/A-18 for many years. Let me quote a pilot who is at the Marine Corps Air Station, at El Toro, Calif., and who flew the F/A-18 the other day for the first time: "Wrap it up, and send it to me today. With that airplane, I'll never lose another fight!"

Mr. Speaker, I would like to bring to the attention of the House the fact that on Friday, October 2, 1981, our distinguished colleague from Minnesota extended his remarks for the record with an unusually vicious attack on the Navy's F/A-18 strike fighter.

Some of his remarks were quoted in the wire service over the weekend.

We are all accustomed to and expect vigorous criticism and debate regarding new weapon systems acquisition. Indeed, it is our duty to determine and weigh the facts concerning the development, test, production, operation, and cost of our military systems. In so doing, it is also our duty to the American public to interpret reports of events in test programs in the light of all the facts without invention or distortion.

In this instance, my colleague from Minnesota has so twisted the facts and circumstances surrounding the event upon which he commented with such irony that he has reflected upon the skill and integrity of the devoted Navy and company personnel developing and testing the F/A-18, inferred faulty performance of the aircraft where none exists, and fabricated a totally erroneous conclusion of F/A-18 mechanical reliability. Therefore, I feel strongly obligated to refute his remarks in a recitation of the actual facts surrounding the incident.

On Wednesday, September 30, 1981, an F/A-18A test mission for stores certification was scheduled and flown out of NAS Patuxent River, Md., in accordance with the planned test program. A TA-4 aircraft flown by a Navy pilot and carrying a photographer was assigned as chase plane to observe and record on film the separation of a bomb rack from the F/A-18 when it was jettisoned in flight. This evolution requires very close and accurate positioning of the chase plane to produce a complete picturization of separation of the bomb rack from the F/A-18 when it is ejected. Unfortunately, the TA-4 chase plane was incorrectly positioned to provide for safe clearance of the ejected bomb rack, and the rack struck the wing of the TA-4 as it was purposefully separated from the F/A-18. The crew escaped by ejection seat from the damaged TA-4.

This accident occurred during a legitimate and scheduled test flight which was in no way intended as a "promotional" mission. There was no material failure of F/A-18 systems. Ejection of the bomb rack from the F/A-18 was intentional and planned. The unintentional loss of the TA-4 was an extremely regrettable event. We can be thankful that the two crewmen were saved by their training and reliable escape equipment.

Unfortunately, the demanding and rigorous operations connected with flight test work sometimes results in accidents. This event was one of those and no more. The F/A-18 was in no way to blame. I trust that my colleague from Minnesota will now amend his remarks in view of the facts.

Mr. Speaker, at this point in the RECORD I include a letter addressed by the Deputy Chief of Naval Operations (Air Warfare), U.S. Navy, to the gentleman from Minnesota (Mr. VENTO), dated October 7, 1981, as follows:

HON. BRUCE F. VENTO,
House of Representatives,
Washington, D.C.

DEAR MR. VENTO: I have just read your remarks on "The F/A-18—With Weapons Systems Like This, Who Needs Enemies" entered into the Congressional Record on 2 October 1981, and I feel compelled to respond to the inaccurate statements and misrepresentation of facts presented to your colleagues on the accident occurring on 30 September.

The basic information that you received on the aircraft involved in the accident was correct. A TA-4J aircraft was being used to monitor the F/A-18 in flight as it was performing part of the attack mission testing requirements. The occupant of the rear cockpit of the TA-4J was assigned duties as a cameraman to record the jettisoning of a vertical ejector rack and one MK 82 inert bomb from the F/A-18, a requirement which is necessary to ensure that not only weapons but their weapons racks can safely be jettisoned without damaging the parent aircraft. Filming has always been used to carefully examine, and reexamine, exactly what happens at the moment of release and subsequently how the weapon, or weapons rack plus bomb in this test, clear the aircraft.

The flight was being flown at an altitude of 5,000 feet and at a speed of .8 MN. Both pilots of the F/A-13 and TA-4J, as well as the cameraman in the TA-4J, had been carefully pre-briefed on how the test was to take place. For an as yet undetermined reason, and a formal investigation is in progress, the pilot of the TA-4J positioned his aircraft too close to the F/A-18 for the safe jettisoning of the bomb rack. When the rack with the inert MK 82 500 pound bomb was jettisoned, it struck the outer wing panel of the TA-4J, causing the aircraft to burst into flame and roll out of control, forcing the two occupants to eject immediately. As you noted, the crew members were recovered safely but the aircraft obviously was lost.

In your remarks you questioned what the aircraft was doing on this flight. I hope my previous explanation provides that answer. You also stated the bomb rack fell off—not so; it was deliberately jettisoned by the pilot of the F/A-18 by pressing the bomb release mechanism as had been carefully planned and properly briefed. Lastly, the trained cameraman in the rear cockpit was performing an assigned duty of filming the technical aspects of objects being jettisoned from an aircraft at different speeds and different altitudes. The film was being made to record in graphic detail this portion of the test, and in no manner was it a Navy propaganda piece or a MACDAC promotion.

I trust the above information fully corrects the erroneous assumptions which you were provided. I can assure you that I too am vitally interested in the F/A-18, though for perhaps completely different reasons than yours and I will provide you every bit of information we have available to us on the program at any time. I respectfully encourage you to request authoritative information in the future to prevent further inaccuracies in your statements relative to the aircraft.

Very respectfully,
W. L. MCDONALD,
Vice Admiral, U.S. Navy, Deputy Chief of Naval Operations (Air Warfare).

□ 1710

So, Mr. Speaker, I commend to the House the passage of this conference report so that the business of our defense might get underway.

Mr. VENTO. Mr. Speaker, will the gentleman yield?

Mr. BADHAM. I yield to the gentleman from Minnesota.

Mr. VENTO. If the gentleman will recall, did the gentleman see the release?

They made the point out that it was an accident. Is the gentleman aware of that?

Mr. BADHAM. I have a copy of the record.

Mr. VENTO. It refers, if the gentleman will yield, it refers to it as an accident, does it not? I would think if the gentleman would look he could find that out. One of the reasons we had that is that the Navy had, and, of course, we did not have the information that apparently the gentleman has at that time, but it was a photographic mission and it was manned by McDonnell Douglas personnel, for instance, in the plane. The bomb rack came off by accident, is what it reported in my release. Later on they told me no, it did not come off by accident, that they jettisoned the bomb rack and it got caught somehow in the airfoil and ripped the wing off the plane that was accompanying it.

I thought I said it was an accident, but I suppose that we ought to report back that it was not an accident, that it was done intentionally. Is that the impression of the gentleman?

Mr. BADHAM. I was responding, if the gentleman will allow me to reclaim the time, that the gentleman has been given quite an accolade as the leading critic of the F-18 fighter plane. The F-18 has made its first kill, and unfortunately it has downed one of our own planes. That really does not sound, and I think the gentleman would agree that that absolutely was not the case.

Mr. PRICE. Mr. Speaker, I yield 3 minutes to the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. I thank the chairman for yielding me this time.

Mr. Speaker, I rise in strong support of this conference report. I would like to point out that 45 percent of the combat missions are assigned to the Reserve Forces, those combat missions that would take place in a conventional war.

What I am worried about, Mr. Speaker, is does the National Guard or Reserve have the proper equipment. I would like to ask the chairman of the

Procurement Subcommittee, the gentleman from New York (Mr. STRATTON), if he would mind giving the House what equipment does come to the Reserve Forces?

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. MONTGOMERY. I yield to the gentleman from New York.

Mr. STRATTON. As the gentleman knows, we tried in the House to make sure that there would be adequate equipment in there for the Guard and for the Reserves.

Unfortunately, the September budget request directed a good deal of its thrust toward some of the Reserve and Guard items.

But the conference, I think, has done very well by the Guard and the Reserve. Nevertheless, we fought hard for it and included in the conference report is about $225 million for Guard and Reserve items.

We have $10 million for C-12's. We have 20 A-10's. The original request was 60.

We have $50 million in there for equipment to be supplied to the Army National Guard, including the AVLB conversion kits, 155 millimeter howitzer, M-125A2 mortar carriers and M577A2 command post vehicles.

We have F-16's earmarked for the Air Guard.

We have $113 million for C-130's for the Guard and $55 million for the AH-1S helicopter.

Mr. MONTGOMERY. I would like to thank the chairman. This is certainly fair.

I might say the House of Representatives was the first group to move out and start giving new equipment to the Reserves instead of hand-me-down equipment. I certainly commend the gentleman and his subcommittee for giving the Reserves this much-needed equipment.

Mr. STRATTON. If the gentleman would yield further, we would not have done it without the constant urging and prodding of the gentleman from Mississippi (Mr. MONTGOMERY), and he deserves a great deal of credit for the result of this conference report.

Mr. MONTGOMERY. I thank the gentleman.

Mr. PRICE. Mr. Speaker, I have no further requests for time and yield back the remainder of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. VENTO. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 335, nays 61, not voting 37, as follows:

[Roll No. 309]

Dornan	Martin (NC)	

□ 1730

The Clerk announced the following pairs:

On this vote:

Mr. Dingell for, with Mr. AuCoin against.

Mr. Rahall for, with Mrs. Chisholm against.

Mr. Ginn for, with Mr. Leland against.

Mr. Breaux for, with Mr. Ford of Tennessee against.

Until further notice:

Mr. Richmond with Mr. Brown of Ohio.

Mr. Wright with Mr. Vander Jagt.

Mr. Barnard with Mr. Coleman.

Mrs. Boggs with Mr. Dornan of California.

Mr. Watkins with Mr. Beard.

Mr. Volkmer with Mr. Madigan.

Mr. McDonald with Mr. Martin of North Carolina.

Mr. Early with Mr. McCloskey.

Mr. Mattox with Mr. Goldwater.

Mr. Brooks with Mr. Forsythe.

Mr. Bedell with Mr. Martin of New York.
Mr. Fithian with Mr. Hagedorn.
Mr. Johnston with Mr. Duncan.
Mr. Pritchard with Mr. LeBoutillier.

Messrs. HOLLENBECK, RANGEL, BLANCHARD, YATES, FORD of Michigan, and Mrs. SMITH of Nebraska changed their votes from "yea" to "nay"

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. PRICE. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on S. 815.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

PERMISSION TO HAVE UNTIL MIDNIGHT, WEDNESDAY, NOVEMBER 18, 1981, TO FILE CONFERENCE REPORT ON H.R. 4144, ENERGY AND WATER DEVELOPMENT APPROPRIATIONS, 1982

Mr. BEVILL. Mr. Speaker, I ask unanimous consent that the managers may have until midnight Wednesday, November 18, 1981, to file a conference report on the bill (H.R. 4144), making appropriations for energy and water development for the fiscal year ending September 30, 1982, and for the other purposes.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

NEW ROLLCALL RECORD SET

(Mr. DANIELSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIELSON. Mr. Speaker, today we set a record, and I know that all the Members are all going to be enthusiastic to hear about the record. Today, with the plethora of rollcalls we have set a brand new record. One of our Members now has achieved 11.363 percent of all the rollcalls of the year. The most the gentleman from Maryland, Mr. Bauman, ever achieved was 9.7 percent, approximately.

Today at 4:30 p.m. we had 308 rollcalls, which cost $3,225,345.20. And 11.363 percent thereof comes to $366,516.50.

I know all the Members will be glad to know that this new record has been achieved.

Mr. WALKER. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

The gentleman has some very good figures. I am wondering if the gentleman could tell us how much the road show up in Baltimore cost the taxpayers today? That is a rather expensive enterprise that has been engaged in, too.

Did the gentleman bother to take down some of those figures?

Mr. DANIELSON. I do not have those figures, but I will be glad to hear them.

Mr. WALKER. I am disappointed that the gentleman does not have those figures.

BANKING, FINANCE AND URBAN AFFAIRS COMMITTEE HEARS 259 WITNESSES; ADDITIONAL HEARINGS SCHEDULED FOR ATLANTA AND PROVIDENCE

(Mr. ST GERMAIN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ST GERMAIN. Mr. Speaker, the Banking, Finance and Urban Affairs Committee is continuing its series of grass roots hearings on the economy. The commitee will be in Atlanta on Friday, December 4, and Providence, R.I., on Monday, December 7.

During the committee's first four hearings in St. Paul, Minn., Seattle, Wash., Tucson, Ariz., and Chicago, Ill., we heard 259 witnesses—workers, builders, senior citizens, small business people—citizens from every walk of life.

Mr. Speaker, the concern over the economy is growing even in great growth areas of the Sun Belt. The pain and suffering of people without jobs and the tragedy of small businesses slipping into bankruptcy have been dramatically brought before the committee in these hearings.

As the Seattle Times described the witnesses:

> They came to the Federal Building from the woods, from closed-down mill towns, lumber yards, real-estate offices, sporting goods stores, neighborhood groceries, trade organizations and associations for retired persons, to tell the committee headed by Representative FERNAND J. ST GERMAIN, Rhode Island Democrat, just how badly the Pacific Northwest is being hurt by "Reaganomics."
>
> Situations related by the unemployed and others were grim—they touched on having to poach wild animals for food for their children; the humiliation of asking for food stamps and unemployment checks and other help, of family strife because there is not enough money to buy food, clothing and other necessities.

Then the next day the committee traveled to Tucson, Ariz., in the heart of the Sun Belt and the Arizona Republic, published in Phoenix, carried this lead on its story:

> For 7½ hours on Saturday, seven Congressmen were told about unemployed construction workers unable to feed their families, small businesses ready to collapse, builders unable to sell homes and the elderly unable to pay their medical bills.

Mr. Speaker, the committee will publish the hearing record following the completion of the Atlanta and Providence hearings. It is our intention to issue a report on the six hearings and these documents will help provide guidance to the committee, and hopefully to the Congress and the administration, as we consider economic legislation in the coming months.

Hopefully, Mr. Speaker, the direct face-to-face testimony gathered in this set of hearings will give official Washington a more concrete base for decisionmaking than the shaky premises, the numbers no one understood and the other economic shots in the dark we have heard so much about in recent days thanks to William Grieder and Atlantic Monthly.

THE BALTIMORE CONNECTION

(Mr. MICHEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MICHEL. Mr. Speaker, as you know, our Democratic colleagues on the House Ways and Means Committee decided to go to Baltimore today.

The stated purpose was to receive testimony on the impact of President Reagan's economic program.

I find it ironic that those who helped make the economic mess in Washington decided to flee up the parkway to Baltimore. Perhaps they thought the Democratic record of failure would not follow them there.

But the citizens of the great city of Baltimore—and of America—know that the Democratic Party has no program of its own.

The citizens of Baltimore—and of America—know that you are trying desperately to put a show on the road that has flopped in Washington for 25 years.

With the appearance of the Democratic economic team in Baltimore, that city today had two teams with losing records and dwindling support among the people.

Speaking for myself, Mr. Speaker, I would say the Baltimore Colts are doing a better job than your team. At least the Colts have a game plan and know where they want to go.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he

will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule 15.

Votes will be taken on Wednesday, November 18, 1981.

COURT OF APPEALS FOR THE FEDERAL CIRCUIT ACT OF 1981

Mr. KASTENMEIER. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4482) to establish a U.S. court of appeals for the Federal circuit, to establish a U.S. Claims Court, and for other purposes, as amended.

The Clerk read as follows:

H.R. 4482

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Court of Appeals for the Federal Circuit Act of 1981".

TITLE I—UNITED STATES COURT OF APPEALS FOR THE FEDERAL CIRCUIT AND UNITED STATES CLAIMS COURT

NUMBER AND COMPOSITION OF CIRCUITS

SEC. 101. Section 41 of title 28, United States Code, as amended by the Fifth Circuit Court of Appeals Reorganization Act of 1980 (Public Law 96-452; 94 Stat. 1994), is amended by striking out "twelve" and inserting in lieu thereof "thirteen" and by adding at the end of the table the following new item:

"Federal	*All Federal judicial districts.".*

NUMBER AND RESIDENCE OF CIRCUIT JUDGES

SEC. 102. (a) Section 44(a) of title 28, United States Code, as amended by the Fifth Circuit Court of Appeals Reorganization Act of 1980 (Public Law 96-452; 94 Stat. 1994), is amended by adding at the end of the table the following new item:

"Federal	*12".*

(b) Section 44(c) of title 28, United States Code, is amended by adding at the end thereof the following new sentence: "While in active service, each circuit judge of the Federal judicial circuit appointed after October 1, 1982, and the chief judge of the Federal judicial circuit, whenever appointed, shall reside within fifty miles of the District of Columbia.".

PANELS OF JUDGES; NUMBER OF JUDGES FOR HEARINGS

SEC. 103. (a) Section 46 of title 28, United States Code, is amended—

(1) by striking out "divisions" each place it appears and inserting in lieu thereof "panels"; and

(2) in subsection (d) by striking out "division" and inserting in lieu thereof "panel".

(b) Section 46(b) of title 28, United States Code, is amended by inserting immediately before the period at the end of the first sentence thereof the following: ", except that the United States Court of Appeals for the Federal Circuit shall determine by rule a procedure for the rotation of judges from panel to panel to ensure that all of the judges sit on a representative cross section of the cases heard, and may determine by rule the number of judges, not less than three, who constitute a panel".

(c) Section 46(c) of title 28, United States Code, is amended by inserting immediately after "three judges" in the first sentence thereof the following: "(except that the United States Court of Appeals for the Federal Circuit may sit in panels of more than three judges if its rules so provide)".

PLACES OF HOLDING COURT

SEC. 104. (a) Section 48 of title 28, United States Code, is amended by striking out the first two sentences and inserting in lieu thereof the following:

"(a) The courts of appeals shall hold regular sessions at the places listed below, and at such other places within the respective circuit as each court may designate by rule:".

(b) Section 48 of title 28, United States Code, as amended by the Fifth Circuit Court of Appeals Reorganization Act of 1980 (Public Law 96-452; 94 Stat. 1994), is further amended by inserting at the end of the table of circuits and places the following new item:

"Federal	*District of Columbia, and in any other place listed above as the court by rule directs.".*

(c) Section 48 of title 28, United States Code, is further amended by striking out the final paragraph and inserting in lieu thereof the following:

"(b) Each court of appeals may hold special sessions at any place within its circuit as the nature of the business may require, and upon such notice as the court orders. The court may transact any business at a special session which it might transact at a regular session.

"(c) Any court of appeals may pretermit, with the consent of the Judicial Conference of the United States, any regular session of court at any place for insufficient business or other good cause.

"(d) The times and places of the sessions of the Court of Appeals for the Federal Circuit shall be prescribed with a view to securing reasonable opportunity to citizens to appear before the court with as little inconvenience and expense to citizens as is practicable.".

ORGANIZATION OF UNITED STATES CLAIMS COURT

SEC. 105. (a) Chapter 7 of title 28, United States Code, is amended to read as follows:

"CHAPTER 7—UNITED STATES CLAIMS COURT

"Sec.

171. Appointment and number of judges; character of court; designation of chief judge.
172. Tenure and salaries of judges.
173. Times and places of holding court.
174. Assignment of judges; decisions.
175. Official duty station; residence.
176. Removal from office.
177. Disbarment of removed judges.

"§171. Appointment and number of judges; character of court; designation of chief judge

"(a) The President shall appoint, by and with the advice and consent of the Senate, sixteen judges who shall constitute a court of record known as the United States Claims Court. The court is declared to be a court established under article I of the Constitution of the United States.

"(b) The President shall designate one of the judges of the Claims Court who is less than seventy years of age to serve as chief judge. The chief judge shall continue to serve as chief judge until he reaches the age of seventy years and another judge is designated as chief judge by the President. After the designation of another judge to serve as chief judge, the former chief judge may continue to serve as a judge of the court.

"§172. Tenure and salaries of judges

"(a) Each judge of the United States Claims Court shall be appointed for a term of fifteen years.

"(b) Each judge shall receive a salary at an annual rate determined under section 225 of the Federal Salary Act of 1967 (2 U.S.C. 351-361), as adjusted by section 461 of this title.

"§173. Times and places of holding court

"The principal office of the United States Claims Court shall be in the District of Columbia, but the Claims Court may hold court at such times and in such places as it may fix by rule of court. The times and places of the sessions of the Claims Court shall be prescribed with a view to securing reasonable opportunity to citizens to appear before the Claims Court with as little inconvenience and expense to citizens as is practicable.

"§174. Assignment of judges; decisions

"(a) The judicial power of the United States Claims Court with respect to any action, suit, or proceeding, except congressional reference cases, shall be exercised by a single judge, who may preside alone and hold a regular or special session of court at the same time other sessions are held by other judges.

"(b) All decisions of the Claims Court shall be preserved and open to inspection.

"§175. Official duty station; residence

"(a) The official duty station of each judge of the United States Claims Court is the District of Columbia.

"(b) After appointment and while in active service, each judge shall reside within fifty miles of the District of Columbia.

"§176. Removal from office

"(a) Removal of a judge of the United States Claims Court during the term for which he is appointed shall be only for incompetency, misconduct, neglect of duty, engaging in the practice of law, or physical or mental disability. Removal shall be by the United States Court of Appeals for the Federal Circuit, but removal may not occur unless a majority of all the judges of such court of appeals concur in the order of removal.

"(b) Before any order of removal of a judge of the Claims Court may be entered, a full specification of the charges shall be furnished to the judge involved, and such judge shall be accorded an opportunity to be heard on the charges.

"(c) Any cause for removal of a judge of the Claims Court coming to the knowledge of the Director of the Administrative Office of the United States Courts shall be reported by him to the chief judge of the United States Court of Appeals for the Federal Circuit, and a copy of the report shall at the same time be transmitted to the judge.

"§177. Disbarment of removed judges

"A judge of the United States Claims Court removed from office in accordance with section 176 of this title shall not be permitted at any time to practice before the Claims Court.".

(b) The item relating to chapter 7 in the chapter analysis of part I of title 28, United States Code, is amended to read as follows:

"7. United States Claims Court	*171".*

REPEAL OF PROVISIONS RELATING TO THE COURT OF CUSTOMS AND PATENT APPEALS

SEC. 106. Chapter 9 of title 28, United States Code, and the item relating to chapter

9 in the chapter analysis of part I of such title, are repealed.

SEC. 116. (a) Section 520(a) of title 28, United States Code, is amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court or in the United States Court of Appeals for the Federal Circuit".

(b) The section heading of section 520 of title 28, United States Code, is amended and by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court or in United States Court of Appeals for the Federal Circuit".

(c) The item relating to section 520 in the section analysis of chapter 31 of title 28, United States Code, is amended to read as follows:

"520. Transmission of petitions in United States Claims Court or in United States Court of Appeals for the Federal Circuit; statement furnished by departments.".

BUDGET ESTIMATES

SEC. 117. Section 605 of title 28, United States Code, is amended—

(1) by inserting immediately before the period at the end of the second paragraph the following: "and the estimate with respect to the United States Court of Appeals for the Federal Circuit shall be approved by such court"; and

(2) by striking out "Bureau of the Budget" each place it appears and inserting in lieu thereof "Office of Management and Budget".

DEFINITION OF COURTS

SEC. 118. Section 610 of title 28, United States Code, is amended by striking out "the Court of Claims, the Court of Customs and Patent Appeals" and inserting in lieu thereof "the United States Claims Court".

TECHNICAL ASSISTANTS

SEC. 119. (a) Chapter 47 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§714. Technical assistants

"The chief judge of the Court of Appeals for the Federal Circuit, with the approval of the court, may appoint such technical assistants as may be necessary, each of whom shall be subject to removal by the chief judge with the approval of the court. Such technical assistants may include a senior technical assistant and such number of assistant technical assistants as may be necessary.".

(b) The section analysis of chapter 47 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"714. Technical assistants.".

OFFICERS AND EMPLOYEES OF THE UNITED STATES CLAIMS COURT

SEC. 120. (a) Section 791(a) of title 28, United States Code, is amended to read as follows:

"(a) The United States Claims Court may appoint a clerk, who shall be subject to removal by the court. The clerk, with the approval of the court, may appoint necessary deputies and employees in such numbers as may be approved by the Director of the Administrative Office of the United States Courts. Such deputies and employees shall be subject to removal by the clerk with the approval of the court.".

(b) Section 792 of title 28, United States Code, and the item relating to section 792 in the section analysis of chapter 51 of such title, are repealed.

(c)(1) Section 794 of title 28, United States Code, is amended to read as follows:

"§794. Law clerks and secretaries

"The judges of the United States Claims Court may appoint necessary law clerks and secretaries, in such numbers as the Judicial Conference of the United States may approve, subject to any limitation of the aggregate salaries of such employees which may be imposed by law.".

(2) The item relating to section 794 in the section analysis of chapter 51 of title 28, United States Code, is amended to read as follows:

"794. Law clerks and secretaries.".

(d)(1) Section 795 of title 28, United States Code, is amended to read as follows:

"§795. Bailiffs and messengers

"The chief judge of United States Claims Court, with the approval of the court, may appoint necessary bailiffs and messengers, in such numbers as the Director of the Administrative Office of the United States Courts may approve, each of whom shall be subject to removal by the chief judge with the approval of the court.".

(2) The item relating to section 795 in the section analysis of chapter 51 of title 28,

United States Code, is amended to read as follows:

"795. Bailiffs and messengers.".

(e) Section 796 of title 28, United States Code, is amended by striking out "The Court of Claims" and inserting in lieu thereof "Subject to the approval of the United States Claims Court, the Director of the Administrative Office of the United States Courts".

(f)(1) Section 797 of title 28, United States Code, is amended to read as follows:

"§797. Recall of retired judges

"(a) Any judge of the United States Claims Court who has retired from regular active service under the Civil Service Retirement Act shall be known and designated as a senior judge and may perform duties as a judge when recalled pursuant to subsection (b) of this section.

"(b) The chief judge of the Claims Court may, whenever he deems it advisable, recall any senior judge, with such judge's consent, to perform such duties as a judge and for such period of time as the chief judge may specify.

"(c) Any senior judge performing duties pursuant to this section shall not be counted as a judge for purposes of the number of judgeships authorized by section 171 of this title.

"(d) Any senior judge, while performing duties pursuant to this section, shall be paid the same allowances for travel and other expenses as a judge in active service. Such senior judge shall also receive from the Claims Court supplemental pay in an amount sufficient, when added to his civil service retirement annuity, to equal the salary of a judge in active service for the same period or periods of time. Such supplemental pay shall be paid in the same manner as the salary of a judge.".

(2) The item relating to section 797 in the section analysis of chapter 51 of title 28, United States Code, is amended by striking out "commissioners" and inserting in lieu thereof "judges".

(g)(1) The item relating to chapter 51 in the chapter analysis of part III of title 28, United States Code, is amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(2) The chapter heading of chapter 51 of title 28, United States Code, is amended by striking out "COURT OF CLAIMS" and inserting in lieu thereof "UNITED STATES CLAIMS COURT".

ABOLISHMENT OF UNITED STATES COURT OF CUSTOMS AND PATENT APPEALS

SEC. 121. (a) Chapter 53 of title 28, United States Code, and the item relating to chapter 53 in the chapter analysis of part III of such title, are repealed.

(b) Subsection (b) of section 957 of title 28, United States Code, is repealed, and subsection (a) of such section 957 is amended by striking out "(a)".

(c) Sections 1255 and 1256 of title 28, United States Code, and the items relating to sections 1255 and 1256 in the section analysis of chapter 81 of such title, are repealed.

COURTS OF APPEALS JURISDICTION

SEC. 122. Section 1291 of title 28, United States Code, is amended—

(1) by inserting "(other than the United States Court of Appeals for the Federal Circuit)" after "courts of appeals"; and

(2) by adding at the end thereof the following new sentence: "The jurisdiction of the United States Court of Appeals for the Federal Circuit shall be limited to the jurisdiction described in sections 1292 (c) and (d) and 1295 of this title.".

INTERLOCUTORY DECISIONS

SEC. 123. (a) Section 1292(a) of title 28, United States Code, is amended—

(1) by striking out "The courts" and inserting in lieu thereof "Except as provided in subsections (c) and (d) of this section, the courts";

(2) by striking out the semicolon at the end of paragraph (3) and inserting in lieu thereof a period; and

(3) by striking out paragraph (4).

(b) Section 1292 of title 28, United States Code, is amended by adding at the end thereof the following new subsections:

"(c) The United States Court of Appeals for the Federal Circuit shall have exclusive jurisdiction—

"(1) of an appeal from an interlocutory order or decree described in subsection (a) of this section in any case over which the court would have jurisdiction of an appeal under section 1295 of this title; and

"(2) of an appeal from a judgment in a civil action for patent infringement which would otherwise be appealable to the United States Court of Appeals for the Federal Circuit and is final except for an accounting.

"(d)(1) When the chief judge of the Court of International Trade issues an order under the provisions of section 256(b) of this title, or when any judge of the Court of International Trade, in issuing any other interlocutory order, includes in the order a statement that a controlling question of law is involved with respect to which there is a substantial ground for difference of opinion and that an immediate appeal from its order may materially advance the ultimate termination of the litigation, the United States Court of Appeals for the Federal Circuit may, in its discretion, permit an appeal to be taken from such order, if application is made to that Court within ten days after the entry of such order.

"(2) When any judge of the United States Claims Court, in issuing an interlocutory order, includes in the order a statement that a controlling question of law is involved with respect to which there is a substantial ground for difference of opinion and that an immediate appeal from its order may materially advance the ultimate termination of the litigation, the United States Court of Appeals for the Federal Circuit may, in its discretion, permit an appeal to be taken from such order, if application is made to that Court within ten days after the entry of such order.

"(3) Neither the application for nor the granting of an appeal under this subsection shall stay proceedings in the Court of International Trade or in the Claims Court, as the case may be, unless a stay is ordered by a judge of the Court of International Trade or the Claims Court or by the United States Court of Appeals for the Federal Circuit or a judge of that court.".

CIRCUITS IN WHICH DECISIONS ARE REVIEWABLE

SEC. 124. Section 1294 of title 28, United States Code (including that section as it will become effective on April 1, 1984), is amended by striking out "Appeals" and inserting in lieu thereof "Except as provided in section 1292(c), 1292(d), or 1295 of this title, appeals".

JURISDICTION OF THE UNITED STATES COURT OF APPEALS FOR THE FEDERAL CIRCUIT

SEC. 125. (a) Chapter 83 of title 28, United States Code, is amended by adding at the end thereof the following new sections:

"§1295. Jurisdiction of the United States Court of Appeals for the Federal Circuit

"(a) The United States Court of Appeals for the Federal Circuit shall have exclusive jurisdiction—

"(1) of an appeal from a final decision of a district court of the United States, the United States District Court for the District of the Canal Zone, the District Court of Guam, the District Court of the Virgin Islands, or the District Court for the Northern Mariana Islands, if the jurisdiction of that court was based, in whole or in part, on section 1338 of this title, except that jurisdiction of an appeal in a case involving a claim arising under any Act of Congress relating to copyrights or trademarks and no other claims under section 1338(a) shall be governed by sections 1291, 1292, and 1294 of this title;

"(2) of an appeal from a final decision of a district court of the United States, the United States District Court for the District of the Canal Zone, the District Court of Guam, the District Court of the Virgin Islands, or the District Court for the Northern Mariana Islands, if the jurisdiction of that court was based, in whole or in part, on section 1346 of this title, except that jurisdiction of an appeal in a case brought in a district court under section 1346(a)(1), 1346(b), 1346(e), or 1346(f) of this title or under section 1346(a)(2) of this title when the claim is founded upon an Act of Congress or a regulation of an executive department providing for internal revenue shall be governed by sections 1291, 1292, and 1294 of this title;

"(3) of an appeal from a final decision of the United States Claims Court;

"(4) of an appeal from a decision of—

"(A) the Board of Appeals or the Board of Patent Interferences of the Patent and Trademark Office with respect to patent applications and interferences, at the instance of an applicant for a patent or any party to a patent interference, and any such appeal shall waive the right of such applicant or party to proceed under section 145 or 146 of title 35;

"(B) the Commissioner of Patents and Trademarks or the Trademark Trial and Appeal Board with respect to applications for registration of marks and other proceedings as provided in section 21 of the Trademark Act of 1946 (15 U.S.C. 1071); or

"(C) a district court to which a case was directed pursuant to section 145 or 146 of title 35;

"(5) of an appeal from a final decision of the United States Court of International Trade;

"(6) to review the final determinations of the United States International Trade Commission, relating to unfair practices in import trade, made under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337);

"(7) to review, by appeal on questions of law only, findings of the Secretary of Commerce under headnote 6 to schedule 8, part 4, of the Tariff Schedules of the United States (relating to importation of instruments or apparatus);

"(8) of an appeal under section 71 of the Plant Variety Protection Act (7 U.S.C. 2461);

"(9) of an appeal from a final order or final decision of the Merit Systems Protection Board, pursuant to sections 7703(b)(1) and 7703(d) of title 5; and

"(10) of an appeal from a final decision of an agency board of contract appeals pursuant to section 8(g)(1) of the Contract Disputes Act of 1978 (41 U.S.C. 607(g)(1)).

"(b) The head of any executive department or agency may, with the approval of the Attorney General, refer to the Court of Appeals for the Federal Circuit for judicial review any final decision rendered by a board of contract appeals pursuant to the terms of any contract with the United States awarded by that department or agency which the head of such department or agency has concluded is not entitled to finality pursuant to the review standards specified in section 10(b) of the Contract Disputes Act of 1978 (41 U.S.C. 609(b)). The head of each executive department or agency shall make any referral under this section within one hundred and twenty days after the receipt of a copy of the final appeal decision.

"(c) The Court of Appeals for the Federal Circuit shall review the matter referred pursuant to subsection (b) in accordance with the standards specified in section 10(b) of the Contract Disputes Act of 1978. The court shall proceed with judicial review on the administrative record made before the board of contract appeals on matters so referred as in other cases pending in such court, shall determine the issue of finality of the appeal decision, and shall, if appropriate, render judgment thereon, or remand the matter to any administrative or executive body or official with such direction as it may deem proper and just.

"§1296. Precedence of cases in the United States Court of Appeals for the Federal Circuit

"Civil actions in the United States Court of Appeals for the Federal Circuit shall be given precedence, in accordance with the law applicable to such actions, in such order as the court may by rule establish.".

(b) The section analysis of chapter 83 of title 28, United States Code, is amended by adding at the end thereof the following new items:

"1295. Jurisdiction of the United States Court of Appeals for the Federal Circuit.
"1296. Precedence of cases in the United States Court of Appeals for the Federal Circuit.".

UNITED STATES CLAIMS COURT JURISDICTION AND VENUE

SEC. 126. (a) Sections 1336(b), 1346(a), and 1398(b) of title 28, United States Code, are each amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(b) Section 1402(a) of title 28, United States Code, is amended by inserting "in a district court" immediately after "civil action".

(c) Section 1406(c) of title 28, United States Code, is amended—

(1) by striking out "Court of Claims" the first place it appears and inserting in lieu thereof "United States Claims Court"; and

(2) by striking out "Court of Claims" the second and third places it appears and inserting in lieu thereof "Claims Court".

(d) Section 1491 of title 28, United States Code, is amended to read as follows:

"§1491. Claims against United States generally; actions involving Tennessee Valley Authority

"(a)(1) The United States Claims Court shall have jurisdiction to render judgment upon any claim against the United States founded either upon the Constitution, any Act of Congress, or any regulation of an executive department, or upon any express or implied contract with the United States, or for liquidated or unliquidated damages in cases not sounding in tort. For purposes of this paragraph, an express or implied contract with the Army and Air Force Exchange Service, Navy Exchanges, Marine Corps Exchanges, Coast Guard Exchanges, or Exchange Councils of the National Aeronautics and Space Administration shall be considered an express or implied contract with the United States.

"(2) To provide an entire remedy and to complete the relief afforded by the judgment, the court may, as an incident of and collateral to any such judgment, issue orders directing restoration to office or position, placement in appropriate duty or retirement status, and correction of applicable records, and such orders may be issued to an appropriate official of the United States. In any case within its jurisdiction, the court shall have the power to remand appropriate matters to any administrative or executive body or official with such direction as it may deem proper and just. The Claims Court shall have jurisdiction to render judgment upon any claim by or against a contractor arising under section 10(a)(1) of the Contract Disputes Act of 1978.

"(3) To afford complete relief on any contract claim brought before the contract is awarded, the court shall have exclusive jurisdiction to grant declaratory judgments and such equitable and extraordinary relief as it deems proper, including but not limited to injunctive relief. In exercising such jurisdiction, the court shall give due regard to the interests of national defense and national security.

"(b) Nothing herein shall be construed to give the United States Claims Court jurisdiction of any civil action within the exclusive jurisdiction of the Court of International Trade, or of any action against, or founded on conduct of, the Tennessee Valley Authority, or to amend or modify the provisions of the Tennessee Valley Authority Act of 1933 with respect to actions by or against the Authority.".

(e) Section 1492 of title 28, United States Code, is amended by striking out "chief commissioner of the Court of Claims" and inserting in lieu thereof "chief judge of the United States Claims Court".

(f)(1) Sections 1494, 1495, 1496, and 1497 of title 28, United States Code, are each amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(2) The section heading of section 1497 of title 28, United States Code, is amended by striking out "growers," and inserting in lieu thereof "growers' ".

(g) Section 1498 of title 28, United States Code, is amended—

(1) in subsection (a), by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court";

(2) in subsections (b) and (d), by striking out "Court of Claims" and inserting in lieu thereof "Claims Court".

(h) Sections 1499, 1500, 1501, 1502, and 1503 of title 28, United States Code, are each amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(i) Section 1504 of title 28, United States Code, and the item relating to section 1504 in the section analysis of chapter 91 of such title, are repealed.

(j) Section 1505 of title 28, United States Code, is amended by striking out "Court of Claims" the first place it appears and inserting in lieu thereof "United States Claims Court" and by striking out "Court of Claims" the second place it appears and inserting in lieu thereof "Claims Court".

(k) Section 1506 of title 28, United States Code, is amended by striking out "Court of Claims" the first place it appears and inserting in lieu thereof "United States Claims Court" and by striking out "Court of Claims" the second and third places it appears and inserting in lieu thereof "Claims Court".

(l) Section 1507 of title 28, United States Code, is amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(m)(1) The item relating to chapter 91 in the chapter analysis of part IV of title 28, United States Code, is amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(2) The chapter heading of chapter 91 of title 28, United States Code, is amended by striking out "COURT OF CLAIMS" and inserting in lieu thereof "UNITED STATES CLAIMS COURT".

(3) The item relating to section 1499 in the section analysis of chapter 91, United States Code, is amended to read as follows:

"1499. Liquidated damages withheld from contractors under Contract Work Hours Standards Act.".

REPEAL OF PROVISIONS RELATING TO THE COURT OF CUSTOMS AND PATENT APPEALS

SEC. 127. Chapter 93 of title 28, United States Code, and the item relating to chapter 93 in the chapter analysis of part IV of such title, are repealed.

FEES AND COSTS

SEC. 128. (a) Section 1926 of title 28, United States Code, is amended to read as follows:

"§1926. Claims Court

"(a) The Judicial Conference of the United States shall prescribe from time to time the fees and costs to be charged and collected in the United States Claims Court.

"(b) The court and its officers shall collect only such fees and costs as the Judicial Conference prescribes. The court may require advance payment of fees by rule.".

(b) The item relating to section 1926 in the section analysis of chapter 123 of title 28, United States Code, is amended to read as follows:

"1926. Claims Court.".

REPEAL; TIME FOR APPEAL

SEC. 129. Section 2110 of title 28, United States Code, and the item relating to section 2110 in the section analysis of chapter 133 of such title, are repealed.

COURT OF APPEALS JURISDICTION

SEC. 130. Section 2342 of title 28, United States Code, is amended—

(1) by inserting "(other than the United States Court of Appeals for the Federal Circuit)" immediately after "court of appeals";

(2) in paragraph (4), by inserting "and" immediately after the semicolon;

(3) in paragraph (5), by striking out "; and" and inserting in lieu thereof a period; and

(4) by striking out paragraph (6).

PLANT VARIETY PROTECTION OFFICE DECISIONS

SEC. 131. Section 2353 of title 28, United States Code, and the item relating to section 2353 in the section analysis of chapter 158 of such title, are repealed.

UNITED STATES CLAIMS COURT PROCEDURE

SEC. 132. (a) Sections 2501 and 2502(a) of title 28, United States Code, are amended by striking out "Court of Claims" and insert-

ing in lieu thereof "United States Claims Court".

(b)(1) Section 2503 of title 28, United States Code, is amended to read as follows:

"§2503. Proceedings generally

"(a) Parties to any suit in the United States Claims Court may appear before a judge of that court in person or by attorney, produce evidence, and examine witnesses.

"(b) The proceedings of the Claims Court shall be in accordance with such rules of practice and procedure as the Claims Court may prescribe and in accordance with the Federal Rules of Evidence.

"(c) The judges of the Claims Court shall fix times for trials, administer oaths or affirmations, examine witnesses, receive evidence, and enter dispositive judgments. Hearings shall, if convenient, be held in the counties where the witnesses reside.".

(2) The item relating to section 2503 in the section analysis of chapter 165 of title 28, United States Code, is amended by striking out "before commissioners".

(c) Section 2504 of title 28, United States Code, is amended—

(1) by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court"; and

(2) by striking out "commissioner" each place it appears and inserting in lieu thereof "judge".

(d) Section 2505 of title 28, United States Code, is amended—

(1) by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court"; and

(2) by striking out "report findings" and inserting in lieu thereof "enter judgment".

(e) Section 2506 of title 28, United States Code, is amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(f) Section 2507 of title 28, United States Code, is amended—

(1) in subsection (a), by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court"; and

(2) in subsection (c), by striking out "Court of Claims" and inserting in lieu thereof "Claims Court".

(g) Section 2508 of title 28, United States Code, is amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(h)(1) Section 2509(a) of title 28, United States Code, is amended to read as follows:

"(a) Whenever a bill, except a bill for a pension, is referred by either House of Congress to the chief judge of the United States Claims Court pursuant to section 1492 of this title, the chief judge shall designate a judge as hearing officer for the case and a panel of three judges of the court to serve as a reviewing body. One member of the review panel shall be designated as presiding officer of the panel.".

(2) Section 2509 of title 28, United States Code, is amended—

(A) in subsections (b), (c), (d), and (f), by striking out "trial commissioner" and inserting in lieu thereof "hearing officer";

(B) in subsections (b), (c), and (e), by striking out "chief commissioner" and inserting in lieu thereof "chief judge";

(C) in subsections (b), (f), and (g), by striking out "Court of Claims" and inserting in lieu thereof "Claims Court";

(D) in subsection (d), by striking out "of commissioners"; and

(E) in subsection (g), by striking out "commissioners serving as trial commissioners" and inserting in lieu thereof "judges serving as hearing officers".

(i)(1) Section 2510 of title 28, United States Code, is amended to read as follows:

"§2510. Referral of cases by Comptroller General

"(a) The Comptroller General may transmit to the United States Claims Court for trial and adjudication any claim or matter of which the Claims Court might take jurisdiction on the voluntary action of the claimant, together with all vouchers, papers, documents, and proofs pertaining thereto.

"(b) The Claims Court shall proceed with the claims or matters so referred as in other cases pending in such court and shall render judgment thereon.".

(2) The item relating to section 2510 in the section analysis of chapter 165 of title 28, United States Code, is amended to read as follows:

"2510. Referral of cases by Comptroller General.".

(j)(1) Section 2511 of title 28, United States Code, is amended by striking out ", or of the Supreme Court upon review,".

(2) Sections 2511, 2512, 2513(c), 2514, and 2515(a) of title 28, United States Code, are each amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(k)(1) Section 2516(a) of title 28, United States Code, is amended—

(A) by striking out "(a)"; and

(B) by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(2) Subsection (b) of section 2516 of title 28, United States Code, is repealed.

(l) Section 2517 of title 28, United States Code, is amended—

(1) in subsection (a), by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court"; and

(2) in subsection (b), by striking out the comma immediately after "discharged".

(m) Section 2518 of title 28, United States Code, and the item relating to section 2518 in the section analysis of chapter 165 of such title, are repealed.

(n) Section 2519 of title 28, United States Code, is amended by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court".

(o)(1) Section 2520(a) of title 28, United States Code, is amended—

(A) by striking out "(a)";

(B) by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court"; and

(C) by striking out "$10" and inserting in lieu thereof "$60".

(2) Subsections (b) and (c) of section 2520 of title 28, United States Code, are repealed.

(3) The section heading for section 2520 of title 28, United States Code, is amended by striking out "; cost of printing record".

(4) The item relating to section 2520 in the section analysis of chapter 165 of title 28, United States Code, is amended to read as follows:

"2520. Fees.".

(p)(1) The item relating to chapter 165 in the chapter analysis of part VI of title 28, United States Code, is amended to read as follows:

"165. United States Claims Court Procedure..... 2501".

(2) The chapter heading of chapter 165 of title 28, United States Code, is amended by striking out "COURT OF CLAIMS" and inserting in lieu thereof "UNITED STATES CLAIMS COURT".

(q)(1) Chapter 165 of title 28, United States Code, is amended by adding at the end thereof the following new section:

"§2521. Notice of appeal

"Review of a decision of the United States Claims Court shall be obtained by filing a notice of appeal with the clerk of the Claims Court within the time and in the manner prescribed for appeals to United States courts of appeals from the United States district courts.".

(2) The section analysis of chapter 165 of title 28, United States Code, is amended by adding at the end thereof the following new item:

"2521. Notice of appeal.".

REPEAL OF PROVISIONS RELATING TO THE COURT OF CUSTOMS AND PATENT APPEALS

SEC. 133. Chapter 167 of title 28, United States Code, and the item relating to chapter 167 in the chapter analysis of part VI of such title, are repealed.

APPEALS FROM COURT OF INTERNATIONAL TRADE

SEC. 134. Section 2645(c) of title 28, United States Code, is amended by striking out "Customs and Patent Appeals within the time and in the manner provided in section 2601 of this title" and inserting in lieu thereof "Appeals for the Federal Circuit by filing a notice of appeal with the clerk of the Court of International Trade within the time and in the manner prescribed for appeals to United States courts of appeals from the United States district courts".

FEDERAL RULES OF EVIDENCE

SEC. 135. Rule 1101(a) of the Federal Rules of Evidence is amended by striking out "Court of Claims" the first place it appears and inserting in lieu thereof "United States Claims Court" and by striking out "and commissioners of the Court of Claims".

TITLE II—CONFORMING AMENDMENTS OUTSIDE TITLE 28

SEC. 201. Section 225(f)(C) of the Federal Salary Act of 1967 (2 U.S.C. 356(C)), is amended by inserting immediately before the semicolon at the end thereof the following: "and the judges of the United States Claims Court".

SEC. 202. Section 7703 of title 5, United States Code, is amended—

(1) in subsection (b)(1), by striking out "Court of Claims or a United States court of appeals as provided in chapters 91 and 158, respectively, of title 28" and inserting in lieu thereof "United States Court of Appeals for the Federal Circuit";

(2) in subsection (c), by striking out "Court of Claims or a United States court of appeals" and inserting in lieu thereof "Court of Appeals for the Federal Circuit"; and

(3) in subsection (d), by striking out "District of Columbia" and inserting in lieu thereof "Federal Circuit".

SEC. 203. The second sentence of section 71 of the Plant Variety Protection Act (7 U.S.C. 2461) is amended to read as follows: "The United States Court of Appeals for the Federal Circuit shall have jurisdiction of any such appeal.".

SEC. 204. Section 11(d) of the Federal Fire Prevention and Control Act of 1974 (15 U.S.C. 2210(d)) is amended by striking out "Court of Claims of the United States" and inserting in lieu thereof "United States Claims Court".

SEC. 205. Section 204 of title 18, United States Code, and the section heading thereof are amended by striking out "Court of

Claims" and inserting in lieu thereof "United States Claims Court or the United States Court of Appeals for the Federal Circuit".

SEC. 206. Section 39 of the Trademark Act of 1946 (15 U.S.C. 1121) is amended by inserting "(other than the United States Court of Appeals for the Federal Circuit)" immediately after "circuit courts of appeal of the United States".

SEC. 207. (a) Section 29 of the Act entitled "An Act to create an Indian Claims Commission, to provide for the powers, duties, and functions thereof, and for other purposes", approved August 13, 1946 (25 U.S.C. 70v-3), is amended by striking out "Court of Claims" each place it appears and inserting in lieu thereof "Claims Court".

(b) Subsection (c) of section 29 of such Act is repealed.

(c) Subsection (d) of section 29 of such Act is amended by striking out "Supreme Court in accordance with the provisions of section 1255" and inserting in lieu thereof "United States Court of Appeals for the Federal Circuit in accordance with the provisions of section 1295".

SEC. 208. Section 2 of the Act of May 18, 1928 (25 U.S.C. 652) is amended—

(1) by striking out "Court of Claims" the first place it appears and inserting in lieu thereof "United States Claims Court";

(2) by striking out "Court of Claims of the United States" and inserting in lieu thereof "Claims Court"; and

(3) by striking out "Supreme Court of the United States" and inserting in lieu thereof "United States Court of Appeals for the Federal Circuit".

SEC. 209. Section 7422(e) of the Internal Revenue Code of 1954 is amended by striking out "Court of Claims" each place it appears and inserting in lieu thereof "United States Claims Court".

SEC. 210. Section 7428 of the Internal Revenue Code of 1954 is amended by striking out "Court of Claims" each place it appears and inserting in lieu thereof "Claims Court".

SEC. 211. (a) The second sentence of section 7456(c) of the Internal Revenue Code of 1954 is amended to read as follows: "Each commissioner shall receive pay at an annual rate determined under section 225 of the Federal Salary Act of 1967 (2 U.S.C. 351-361), as adjusted by section 461 of title 28, United States Code, and also necessary traveling expenses and per diem allowance, as provided in the Travel Expense Act of 1949, while traveling on official business and away from Washington, District of Columbia.".

(b) Notwithstanding the preceding paragraph, until such time as a change in the salary rate of a commissioner of the United States Tax Court occurs in accordance with section 7456(c) of the Internal Revenue Code of 1954, the salary of such commissioner shall be equal to the salary of a commissioner of the Court of Claims.

SEC. 212. Section 7482(a) of the Internal Revenue Code of 1954 is amended by inserting "(other than the United States Court of Appeals for the Federal Circuit)" immediately after "United States Court of Appeals".

SEC. 213. Section 1302 of the Act of July 27, 1956 (31 U.S.C. 724a), is amended—

(1) by striking out "Court of Claims" and inserting in lieu thereof "United States Claims Court"; and

(2) by striking out "in accordance with subsection 2516(b) of title 28,".

SEC. 214. Section 8(g)(1) of the Contract Disputes Act of 1978 (41 U.S.C. 607(g)(1)) is amended—

(1) in subparagraph (A), by striking out "Court of Claims" and inserting in lieu thereof "United States Court of Appeals for the Federal Circuit"; and

(2) in subparagraph (B), by striking out "United States Court of Claims for judicial review, under section 2510 of title 28, United States Code, as amended herein," and inserting in lieu thereof "Court of Appeals for the Federal Circuit for judicial review under section 1295 of title 28, United States Code,".

SEC. 215. Section 10(c) of the Contract Disputes Act of 1978 (41 U.S.C. 609(c)) is amended by striking out ", or, in its discretion" and all that follows through "of the case".

SEC. 216. Section 713 of title 44, United States Code, is amended—

(1) by striking out "eight hundred and twenty-two" and inserting in lieu thereof "eight hundred and twenty";

(2) by inserting "and" immediately after "Superintendent of Documents;"; and

(3) by striking out "to the Court of Claims, two copies; and".

SEC. 217. Section 1103 of title 44, United States Code, is amended by striking out "the Court of Claims," and by striking out "chief judge of the Court of Claims,".

SEC. 218. (a) The following provisions of law are amended by striking out "Court of Claims" each place it appears and inserting in lieu thereof "United States Claims Court":

(1) Sections 1 and 2 of the Act of October 19, 1973 (87 Stat. 466).

(2) Section 8715 of title 5, United States Code.

(3) Section 8912 of title 5, United States Code.

(4) Section 2273(b) of title 10, United States Code.

(5) Section 337(i) of the Tariff Act of 1930 (19 U.S.C. 1337(i)).

(6) Section 606(a) of the Foreign Assistance Act of 1961 (22 U.S.C. 2356(a)).

(7) Section 1 of the Act entitled "An Act providing for the allotment and distribution of Indian tribal funds", approved March 2, 1907 (25 U.S.C. 119).

(8) Section 2 of the Act of August 12, 1935 (25 U.S.C. 475a).

(9) Section 6110(i)(1) of the Internal Revenue Code of 1954.

(10) Section 2 of the Act of May 28, 1908 (30 U.S.C. 193a).

(11) Section 7 of the Act of July 31, 1894 (31 U.S.C. 72).

(12) Section 1302 of the Act of July 27, 1956 (31 U.S.C. 724a).

(13) Section 183 of title 35, United States Code.

(14) Section 104(c) of the Contract Work Hours and Safety Standards Act (40 U.S.C. 330(c)).

(15) Sections 13(b)(2) and 14 of the Contract Settlement Act of 1944 (41 U.S.C. 113(b) and 114).

(16) Sections 8(d) and 10(d) of the Contract Disputes Act of 1978 (41 U.S.C. 607(d) and 609(d)).

(17) Sections 171 and 173 of the Atomic Energy Act of 1954 (42 U.S.C. 2221 and 2223).

(18) Section 10(i) of the Trading With the Enemy Act (50 U.S.C. App. 10(i)).

(19) Sections 103(f), 103(i), 105, 106(a)(6), 108, 108A, and 114(5) of the Renegotiation Act of 1951 (50 U.S.C. App. 1213(f), 1213(i), 1215, 1216(a)(6), 1218, 1218a, and 1224(5)).

(20) Section 4 of the Act of July 2, 1948 (50 U.S.C. App. 1984).

(b) The section heading of section 108A of the Renegotiation Act of 1951 (50 U.S.C. App. 1218a) is amended by striking out "COURT OF CLAIMS" and inserting in lieu thereof "UNITED STATES CLAIMS COURT".

(c) Section 108A of the Renegotiation Act of 1951 (50 U.S.C. App. 1218a) is amended by striking out "Supreme Court upon certiorari in the manner provided in section 1255" and inserting in lieu thereof "United States Court of Appeals for the Federal Circuit in accordance with the provisions of section 1295".

SEC. 219. The following provisions of law are amended by striking out "Court of Claims" each place it appears and inserting in lieu thereof "Claims Court":

(1) Section 4(c) of the Commodity Credit Corporation Charter Act (15 U.S.C. 714b(c)).

(2) Section 20 of the Tennessee Valley Authority Act of 1933 (16 U.S.C. 831s).

(3) Section 403 of the International Claims Settlement Act of 1949 (22 U.S.C. 1642b).

(4) Section 2(a) of the Act of May 15, 1978 (92 Stat. 244).

(5) Section 311(i) of the Federal Water Pollution Control Act (33 U.S.C. 1321(i)).

(6) Section 10(b) of the Intervention on the High Seas Act (33 U.S.C. 1479(b)).

(7) Section 282 of title 35, United States Code.

(8) Section 10(a)(1) of the Contract Disputes Act of 1978 (41 U.S.C. 609(a)(1)).

(9) Section 5261 of the Revised Statutes (45 U.S.C. 87).

(10) Section 41(a) of the Trading With the Enemy Act (50 U.S.C. App. 42(a)).

SEC. 220. The following provisions of law are amended by striking out "United States Court of Customs and Patent Appeals" and "Court of Customs and Patent Appeals" each place they appear and inserting in lieu thereof "United States Court of Appeals for the Federal Circuit":

(1) Section 21 of the Trademark Act of 1946 (15 U.S.C. 1071).

(2) Section 152 of the Atomic Energy Act of 1954 (42 U.S.C. 2182).

(3) Section 305(d) of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2457(d)).

SEC. 221. (a) The following provisions of law are amended by striking out "Court of Customs and Patent Appeals" each place it appears and inserting in lieu thereof "Court of Appeals for the Federal Circuit":

(1) Subsections (d) and (f) of section 516 of the Tariff Act of 1930 (19 U.S.C. 1516 (d) and (f)).

(2) Section 516A (c) and (e) of the Tariff Act of 1930 (19 U.S.C. 1516a (c) and (e)).

(3) Section 528 of the Tariff Act of 1930 (19 U.S.C. 1528).

(4) Section 337(c) of the Tariff Act of 1930 (19 U.S.C. 1337(c)).

(5) Section 284(c) of the Trade Act of 1974 (19 U.S.C. 2395(c)).

(6) Section 308(9) of the Ethics in Government Act (28 U.S.C. App.).

(7) Sections 141 through 146 of title 35, United States Code.

(b)(1) The item relating to section 141 in the section analysis of chapter 13 of title 35, United States Code, is amended by striking out "Court of Customs and Patent Appeals" and inserting in lieu thereof "Court of Appeals for the Federal Circuit".

(2) The section heading for section 141 of title 35, United States Code, is amended by striking out "Court of Customs and Patent Appeals" and inserting in lieu thereof "Court of Appeals for the Federal Circuit".

SEC. 222. The following provisions of law are amended by striking out "the United States Court of Claims, the United States

Court of Customs and Patent Appeals" each place it appears and inserting in lieu thereof "the United States Claims Court":

(1) Section 6001(4) of title 18, United States Code.

(2) Section 906 of title 44, United States Code.

TITLE III—MISCELLANEOUS PROVISIONS

EFFECTIVE DATE

SEC. 301. The provisions of this Act shall take effect on October 1, 1982.

CONTINUED SERVICE OF CURRENT JUDGES

SEC. 302. The judges of the United States Court of Claims and of the United States Court of Customs and Patent Appeals in regular active service on the effective date of this Act shall continue in office as judges of the United States Court of Appeals for the Federal Circuit. Senior judges of the United States Court of Claims and of the United States Court of Customs and Patent Appeals on the effective date of this Act shall continue in office as senior judges of the United States Court of Appeals for the Federal Circuit.

APPOINTMENT OF CHIEF JUDGE OF COURT OF APPEALS FOR THE FEDERAL CIRCUIT

SEC. 303. Notwithstanding section 45(a) of title 28, United States Code, the first chief judge of the United States Court of Appeals for the Federal Circuit shall be the chief judge of the United States Court of Claims or the chief judge of the United States Court of Customs and Patent Appeals, whoever has served longer as chief judge of his court. Notwithstanding section 45 of title 28, United States Code, whichever of the two chief judges does not become the first chief judge of the United States Court of Appeals for the Federal Circuit under the preceding sentence shall, while in active service, have precedence and be deemed senior in commission over all the circuit judges of the United States Court of Appeals for the Federal Circuit (other than the first chief judge of that circuit). When the person who first serves as chief judge of the United States Court of Appeals for the Federal Circuit vacates that position, the position shall be filled in accordance with section 45(a) of title 28, United States Code, as modified by the preceding sentence of this section.

COURT OF CLAIMS COMMISSIONERS

SEC. 304. (a) Notwithstanding section 171(a) of title 28, United States Code, as amended by this Act, a commissioner of the United States Court of Claims serving immediately prior to the effective date of this Act shall become a judge of the United States Claims Court on the effective date of this Act.

(b) Notwithstanding section 172(a) of title 28, United States Code, as amended by this Act, the initial term of office of a person who becomes a judge of the United States Claims Court under subsection (a) of this section shall expire on September 30, 1986, except that no such individual shall serve as a judge after reaching the age of seventy years.

(c) Notwithstanding section 172(b) of title 28, United States Code, as amended by this Act, until such time as a change in the salary rate of a judge of the United States Claims Court occurs in accordance with such section 172(b), the salary of such judge shall be equal to the salary of a commissioner of the Court of Claims.

APPOINTMENT OF JUDGES BY THE PRESIDENT

SEC. 305. The Congress—

(1) takes notice of the fact that the quality of the Federal judiciary is determined by the competence and experience of its judges; and

(2) suggests that the President, in nominating individuals to judgeships on the United States Court of Appeals for the Federal Circuit and the United States Claims Court, select from a broad range of qualified individuals.

EFFECT ON PENDING CASES

SEC. 306. (a) Any case pending before the Court of Claims on the effective date of this Act in which a report on the merits has been filed by a commissioner, or in which there is pending a request for review, and upon which the court has not acted, shall be transferred to the United States Court of Appeals for the Federal Circuit.

(b) Any matter pending before the United States Court of Customs and Patent Appeals on the effective date of this Act shall be transferred to the United States Court of Appeals for the Federal Circuit.

(c) Any petition for rehearing, reconsideration, alteration, modification, or other change in any decision of the United States Court of Claims or the United States Court of Customs and Patent Appeals rendered prior to the effective date of this Act that has not been determined by either of those courts on that date, or that is filed after that date, shall be determined by the United States Court of Appeals for the Federal Circuit.

(d) Any matter pending before a commissioner of the United States Court of Claims on the effective date of this Act, or any pending dispositive motion that the United States Court of Claims has not determined on that date, shall be transferred to the United States Claims Court.

(e) Any case in which a notice of appeal has been filed in a district court of the United States prior to the effective date of this Act shall be decided by the court of appeals to which the appeal was taken.

TENNESSEE VALLEY AUTHORITY LEGAL REPRESENTATION

SEC. 307. Nothing in this Act affects the authority of the Tennessee Valley Authority under the Tennessee Valley Authority Act of 1933 to represent itself by attorneys of its choosing.

The SPEAKER pro tempore. Is a second demanded?

Mr. RAILSBACK. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Wisconsin (Mr. KASTENMEIER) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. RAILSBACK) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Wisconsin (Mr. KASTENMEIER).

Mr. KASTENMEIER. Mr. Speaker, I yield myself such time as I may consume.

It is a pleasure to bring H.R. 4482 before the House. This is a bill which passed the House last Congress, without a single vote cast against it. The list of supporters—which has grown during the last year—is longer and reflects more diversity of perspective than for any court reform proposal that I have ever worked on.

The proposed legislation establishes a new intermediate appellate court to be called the U.S. Court of Appeals for the Federal Circuit. Creation of this court is accomplished through a merger of the existing Court of Claims and the existing Court of Customs and Patent Appeals into a single appellate court with expanded jurisdiction. The creation of this new court substantially improves the administration of the law in the areas of patents, Government contracts, trademarks and international trade; provides a tribunal capable of exercising appellate jurisdiction nationwide; and results in improved functioning of the Federal appellate system.

H.R. 4482 also creates a new article I trial forum known as the U.S. Claims Court, which would inherit the trial jurisdiction of the Court of Claims. The creation of this court provides an upgraded and better organized trial forum for Government claims cases.

There are several very important reasons for this legislation. First, the caseload of the Federal appellate system has reached crisis proportions. Between 1962 and 1979 appellate court cases more than quadrupled—from approximately 5,000 to 20,000. During this same period, Federal circuit judges only increased from 78 to 97. In spite of the fact that the omnibus judgeship bill created an additional 35 circuit judgeships, it created many more at the base of the judicial pyramid: the district court level. These new lower court judges have kept their new circuit court brethren more than occupied with constantly increasing numbers of appeals. In addition, legislation passed by the 95th and 96th Congresses has drastically increased the burdens on the appellate courts. For example, both the bankruptcy and magistrate reform bills gave relief to the district courts while funneling larger numbers of appeals directly to the circuit courts of appeals. This bill is not a panacea for these festering caseload problems. It does, however, provide partial relief.

A second specific goal of the legislation is to provide increased uniformity in the patent law. The establishment of a single court to hear patent appeals has been identified as one of the most far-reaching reforms that could be made to strengthen the U.S. patent system in such a way as to foster technological growth and industrial innovation. The new Court of Appeals for the Federal Circuit will provide nationwide uniformity in patent law, will make litigation results more predictable and will eliminate the expensive and time-consuming forum shopping that characterizes litigation in the field.

The proposal contains additional positive features. From a practical standpoint, a merger of the Court of Claims and the CCPA could be accomplished with minimal disruption. Since the courts presently occupy but do not quite fill the courts building and already share the library and dining facilities, a new building does not have to be built. From a budgetary perspective, the merger would be extremely cost effective and would result in cost savings. Consolidation of the Court of Claims and the Court of Customs and Patent Appeals is constitutionally permissable and logistically and technically uncomplicated. It will reduce the incentive to forum shop and bring desirable uniformity to an important area of the law. The number of appeals resulting from attempts to obtain different rulings on disputed legal points can be expected to decrease. Business planning will be made easier as the law becomes more stable.

At the same time, the merger of the courts will relieve docket pressures both on the regional appellate courts and on the Supreme Court. Although the number of appeals to be redirected is not great in proportion to the total caseload of these courts, the cases that would be rerouted contain some of the most complex and time-consuming issues the courts consider. The impact of the new court on the dockets of these courts therefore will be far greater than the raw numbers might indicate. Thus, the proposed court will increase the capacity of the Federal judicial system for definitive adjudication of patent and other issues falling within its jurisdiction.

Mr. Speaker, I would like to call to the attention of Members that there is an amendment to the bill which specifies that the court shall establish the times and places of sitting "with a view to securing reasonable opportunity to citizens to appear before the court with as little inconvenience and expense to citizens as is practicable."

The bill as introduced and reported specifies that the court may sit anywhere in the Nation. The purpose of the amendment is to assure that the court will take into account, not merely its own preferences, but the needs of litigants in establishing its schedule of sittings.

The amendment responds to the concerns of our colleagues from the Post Office and Civil Service Committee, particularly the gentlelady from Colorado (Ms. SCHROEDER) that Federal employees who are appealing decisions of the Merit Systems Protection Board not be required to travel to Washington to present their appeal, but may be assured of a forum nearer to the place where they live or work.

In closing, I remind my colleagues that similar legislation passed both the House and the Senate during the 96th Congress. I urge your continued support for this legislation and would now defer to my colleague from Illinois, the ranking minority member, who with his colleagues, contributed so significantly to this legislation.

Mr. RAILSBACK. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. MCCLORY), the ranking minority member of the Judiciary Committee.

Mr. McCLORY. Mr. Speaker, first of all I want to commend the gentleman from Illinois (Mr. RAILSBACK), and the chairman of the subcommittee, the gentleman from Wisconsin (Mr. KASTENMEIER), for bringing this measure to the floor of the House.

Mr. Speaker, I rise in support of H.R. 4482, which establishes a new intermediate appellate court by merging two existing article III courts, the Court of Claims and the Court of Customs and Patent Appeals.

I would like to emphasize for the membership two important aspects of this legislation. First, H.R. 4482 is an important court reform measure in that it will expedite and unify the present jurisdiction of the two merged courts and further expand its jurisdiction to include all patent appeals from the district courts around the country.

The second aspect is the effect this legislation is going to have on industrial innovation, which I believe is a key to increase productivity in our country. As has been pointed out by other Members, the validity of a patent is dependent, to a certain degree, upon geography. It is particularly difficult for small businesses to make useful and knowledgeable investment decisions where patents are involved when they fear a patent may be attacked and tied up for years in expensive litigation. The standard of patentability should not vary from circuit to circuit.

A good friend of mine, the former Secretary of Commerce, Phil Klutznick, testified last year in support of this legislation and in his testimony before the subcommittee he said the following:

> Decisions to file patent applications and to invest in commercializing inventions would be improved meaningfully as a result of the greater uniformity and reliability made possible by a national court of appeals.

Mr. Speaker, this legislation was favorably reported, on voice vote, both in the subcommittee and the full Judiciary Committee. It will not result in any additional cost to the taxpayer. As a matter of fact, the Financial Management Division of the Administrative Office indicated to the subcommittee in a letter dated May 26, 1981, that these modifications in operational procedures may save an estimated $500,000 per year.

I urge the Members to vote favorably for its passage.

Mr. RAILSBACK. Mr. Speaker, I yield to myself such time as I may consume.

Mr. Speaker, I rise to add my support to H.R. 4482, the bill to help improve our patent system by merging the U.S. Court of Claims and the U.S. Court of Customs and Patent Appeals (CCPA), into a single appellate court with expanded jurisdication.

H.R. 4482 has strong support from both sides of the aisle. It has the support of the administration, the Departments of Justice and Commerce, the American Patent Law Association, the Judicial Conference and the judges and commissioners of the two courts involved. It is also supported my numerous corporate lawyers and the industrial research institute which is a private, nonprofit corporation with a membership of approximately 250 industrial companies that account for a major portion of the industrial research and development conducted in the United States. The Senate is also moving a bill very similar to H.R. 4482, S. 1700.

Our subcommittee held several days of hearings wherein we heard a great deal of testimony concerning the problem of forum-shopping which presently is practiced in many different district courts around the country. For example, if you wanted to bring a lawsuit which would have the effect of attacking the validity of an existing patent, you would most likely file such a lawsuit in the eighth circuit. On the other hand, if you were trying to have a patent held valid, you would try and have the suit filed in the fifth circuit. The problem is further complicated in that the Supreme Court in the last 35 years has taken one case to resolve a conflict between circuits. The validity of a patent should not dependent upon geography.

Only a small percentage of the patents granted are challenged in court, but of those patents challenged, over 50 percent are held to be invalid. In the eighth and ninth circuits, of all patent cases appealed from the district courts, 80 percent hold the patent to be invalid. A great deal of this instability is attributable to forum-shopping. Although we are not talking about a lot of cases, the chilling effect of this fact is substantial on everyone who holds a patent. It is especially discouraging for the single inventor and the small businessman who does not have the resources for prolonged litigation. The average cost of legal fees for routine patent litigation runs $250,000 per party. Removing the incentive to forum-shop will also reduce the costs to litigants.

As a practical matter, the merger of the court of claims and the court of customs and patent appeals can be accomplished with virtually no disruption to the people involved. This legis-

lation would not involve the building of any new courtroom facilities. The existing courts already jointly occupy almost all of the courts building at Lafayette Square in Washington, D.C. They presently share the same library and court personnel share the same dining facilities. By rule of court, it can sit at other designated places throughout the country. I urge my colleagues to vote favorably for the passage of this legislation.

Some of the persons, corporations and organizations supporting this legislation are the following:

SUPPORTERS AND OPPONENTS—SEPTEMBER 1, 1981

ORGANIZATIONS SUPPORTING H.R. 2405

1. American Patent Law Association.

□ 1750

Mr. KASTENMEIER. Mr. Speaker, I have no further requests for time.

Mr. RAILSBACK. Mr. Speaker, I yield 5 minutes to my friend, the gentleman from Wisconsin (Mr. SENSENBRENNER).

Mr. SENSENBRENNER. Mr. Speaker, I rise in strong opposition to H.R. 4482.

Mr. Speaker, this bill creates a new court. It is unnecessary. It is not going to do much to alleviate the caseload in our Federal appellate system, and attacks the problem of inconsistent Federal appellate decisions on a piecemeal basis rather than a national basis.

The legislation is opposed by the American Bar Association and by the bar association of the seventh Federal circuit.

Proponents of this bill assert that a national Patent Appeals Tribunal will help alleviate docket pressures in the regional courts of appeal. However, in 1979 the Federal appellate caseload was approximately 20,000 cases, with only 192 of these cases being appealed from patent decisions. While other reasons may be advanced for a new Patent Court of Appeals, this data clearly does not support the claim that a new national court will relieve docket congestion or caseloads in the several courts of appeals around the country.

Proponents also argue patent cases are so complex that a specialized court is necessary. While patent law may well be an area of specialty in which most appellate judges are not intimately familiar, most patent suits contain ancillary and antitrust claims. There is no reason to believe a new court of appeals would be any more competent to rule on those contract and antitrust claims than existing courts of appeals. Patent appeals cases constitute such a small percentage of the present workload that there is no reason to believe present appellate judges cannot master the issues in cases before them.

A third reason for opposing this legislation is the possibility that once in place, such a court of appeals could become a dumping ground for jurisdiction over other categories of law which Congress wished to assign. The realities of this legislative process are once a new court is created, it is difficult to keep it from expanding or having new authority thrust upon it. At a time when Americans are clamoring for streamlined government, Congress should be reluctant to pass any legislation which could evolve into a court of ever-expanding jurisdiction.

Finally, Mr. Speaker, proponents have argued that forum shopping and inconsistent opinions have resulted from our present judicial system as relates to patent law. However, this is a longstanding criticism which has been leveled against our appellate judicial system in all areas of law. If one accepts the criticism that the proponents of this bill have levied against the current patent system, then it should be corrected in a manner that applies to all the other areas of law, not just patent cases.

The subcommittee chairman, my colleague from Wisconsin, Mr. KASTENMEIER, and the full committee chairman, the gentleman from New Jersey, Mr. RODINO, have recently introduced legislation, H.R. 4762, which is supposed to bring more uniformity to appellate cases. It seems inconsistent on one hand to be supporting legislation which narrowly applies only to patent cases and ignoring the other areas of law while, on the other hand, supporting legislation which is national in application, applying to all the areas of law. If one assumes that our Federal appellate system is in disrepair, any corrective legislation should address all the areas of the law, not just patent cases.

For these reasons, Mr. Speaker, I urge my colleagues to vote against suspending the rules to pass H.R. 4482. The bill is unnecessary, it creates a Trojan horse, and should be defeated.

Mr. RAILSBACK. Mr. Speaker, I have no further requests for time.

Mr. KASTENMEIER. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Wisconsin (Mr. KASTENMEIER) that the House suspend the rules and pass the bill, H.R. 4482, as amended.

The question was taken.

Mr. SENSENBRENNER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

SECTION 8(a) PILOT PROGRAM EXTENSIONS

Mr. MITCHELL of Maryland. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4500) to extend through fiscal year 1983 SBA pilot programs under section 8 of the Small Business Act.

The Clerk read as follows:

H.R. 4500

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the provisions of section 8(a) of the Small Business Act, the programs authorized by subparagraph (B) of section 8(a)(1) of such Act and by paragraph (2) of section 8(a) of such Act shall be continued through fiscal year 1983.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Maryland (Mr. MITCHELL) will be recognized for 20 minutes, and the gentleman from Pennsylvania (Mr. MCDADE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Maryland (Mr. MITCHELL).

GENERAL LEAVE

Mr. MITCHELL of Maryland. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the bill under consideration.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. MITCHELL of Maryland. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in strong support of H.R. 4500 and urge the immediate passage of this legislation.

Mr. Speaker, this bill would do two things. First it would extend for 2 years, or until September 30, 1983, a pilot program under which SBA is given the final authority to determine which prospective procurements or contracts are capable of performance by socially and economically disadvan-

taged firms under SBA's 8(a) program. Second, it would extend for a similar 2-year period a pilot program which authorizes SBA to waive Federal bonding requirements for 8(a) contractors which are unable to obtain a surety bond from private sources providing that the company has not been in existence for over 1 year.

In 1978, Public Law 97-507 established the 8(a) procurement and bond waiver pilot program. These pilot programs were originally designed for a 2-year period. However, since 1979, SBA has been extremely slow in implementing these programs. In fact, as of this day, SBA has not waived a single 8(a) bond. Because of administrative delays. There is an insufficient data base to evaluate the effectiveness of these two programs. In view of past delays, the committee and the Government Accounting Office have recommended a 2-year extension. The administration has joined this recommendation and has assured the committee that the programs will be properly implemented.

I want to commend all of the members of the committee who worked to develop this legislation and provide proper guidance to the SBA in the operation of the programs. I am pleased with the bipartisan support from HAL DAUB and JOSEPH MCDADE, the ranking minority member of the committee.

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. MITCHELL of Maryland. I yield to the gentleman from New York.

Mr. ADDABBO. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 4500, which extends the SBA section 8(a) pilot and bond waiver programs through fiscal year 1983. Both provisions were created as part of Public Law 95-507, which I authored in late 1978.

It was my intention that both of these programs be made permanent. However, in conference with the Senate it was decided that they should be limited to a few years during which SBA, GAO, and Congress would have time to evaluate the programs' true worth. Unfortunately, to this day, neither of the programs has been implemented satisfactorily, as was found by both GAO and the Small Business Committee.

Incredibly, the Small Business Administration waited some 19 months into an initial 24-month program to publish proposed rules on the surety bond waiver program. Final regulations were not forthcoming until after expiration of the 24-month period. To this day, more than 36 months later, SBA has failed to issue the standard operating procedures necessary to implement this law. This program must be continued to carry out Congress intent that this program be given a chance to work and be properly evaluated.

The 8(a) pilot program was also delayed. A pilot agency for the program was not designated by the President until 75 days after the bill became law. To date, little more than a handful of contracts have been awarded, although the number, dollar amount, and quality of these procurements are growing at an encouraging rate. The more sophisticated contracts are just now being made available, so it would be a mistake to allow the program to expire before full evaluation of the program is completed.

I know that some question has arisen as to the most appropriate agency for this program. I personally believe that a defense agency should continue with this pilot program. As chairman of the Defense Appropriations Subcommittee, I find it imperative that the defense activities put more reliance on placing high quality, high dollar value contracts with qualified small and disadvantaged firms. Procurement officials must accept the fact that small disadvantaged firms are capable of more than just janitorial services or ditch digging. It is good for our defense industrial base, and it is good economic policy. Accordingly, I will support this bill whether or not the program is shifted to a nondefense agency, but I would be disappointed to see that happen. The Army has always resisted having this program in its agency. It should be asked to give this program a chance before it passes judgment one way or the other. As of today we do not have sufficient experience to make a satisfactory evaluation.

I urge my colleagues to vote to extend these programs. They are not giveaways; rather, they have the potential for increasing the number of qualified small disadvantaged firms doing business with the Federal Government.

Mr. MITCHELL of Maryland. I thank the gentleman.

Mr. McDADE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 4500 which will extend the Small Business Administration's 8(a) pilot program for 2 years. Chairman MITCHELL has adequately described the provisions of the bill. So I shall not repeat them as the House is late and the bill noncontroversial. It is one we support. However, it is clear that the program has performed below expectation in many instances in the past. Indeed, GAO concluded that the 8(a) pilot program has not been effective. However, the President has asked us to support this bill because of the great potential that it holds to help small and disadvantaged businesses compete for Government contracts. We have strong assurances from the Administrator of SBA that changes will be made to correct the problems of the past. Indeed, some steps already are being taken in this direction.

Based on these assurances, I am here to ask for your support for H.R. 4500.

Mr. Speaker, I reserve the balance of my time.

□ 1800

Mr. MITCHELL of Maryland. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas (Mr. GONZALEZ).

Mr. GONZALEZ. Mr. Speaker, I thank the distinguished chairman of the Small Business Committee, and I wish to join him and my colleagues in urging adoption of this bill. I want to compliment the chairman for his diligence and his success in addressing an area that I think under present circumstances shows that there is an acute need for, particularly in the smaller businesses in the lower echelons that have need of this bonding process.

So, I urge my colleagues in the House to affirmatively support this measure.

Mr. MITCHELL of Maryland. I thank the gentleman for his remarks.

Mr. Speaker, I yield such time as he may consume to the gentleman from Nebraska (Mr. DAUB).

Mr. DAUB. Mr. Speaker, I thank my good friend and chairman of the Small Business Committee. I want to note first of all that I want the record to show my appreciation for the hard work and leadership that the chairman has provided on this pilot 8 program. With the concerns I have, I ask to enter into a colloquy with my colleague for the purpose of establishing two points that I think are important to the membership. Let me also say that the ranking minority member on our side has certainly been an encourager to me in pursuit of this pilot 8 program.

Mr. MITCHELL of Maryland. I will be delighted to answer any questions my colleague would want to propound.

Mr. DAUB. First, could the gentleman indicate whether or not it is true that the bill as drafted preserves the discretion of the President to designate the agency that will operate the pilot program?

Mr. MITCHELL of Maryland. That is correct. Such discretion is preserved in the legislation.

Mr. DAUB. Is it true, if the gentleman will further yield, that the Small Business Administration has recommended that the pilot program be placed in a nondefense agency?

Mr. MITCHELL of Maryland. As the gentleman will recall, there was a discussion when the administrator of the program appeared before the committee. At the gentleman's urging, it was suggested that the administrator recommend other areas other than de-

fense areas to be examined for recommendation for use in the pilot program. That has been done.

Mr. DAUB. I thank the gentleman, and I certainly do rise in support of this legislation.

Mr. MITCHELL of Maryland. I thank the gentleman for his support.

Mr. Speaker, I yield 1 minute to the gentleman from Virginia (Mr. WOLF).

Mr. WOLF. Mr. Speaker, is it true that the chairman and the committee are prepared to support the SBA recommendation that the pilot program be placed in a nondefense agency?

Mr. MITCHELL of Maryland. That is correct. There was a consensus arrived at during the markup of this bill, members of the committee will recall, and we are prepared to support that recommendation that comes from the Administrator.

Mr. WOLF. I thank the chairman.

Mr. McDADE. Mr. Speaker, I yield 3 minutes to the gentleman from Indiana (Mr. HILER).

Mr. HILER. Mr. Speaker, during final consideration of the bill by the House Committee on Small Business, I offered amendments to correct several weaknesses that I perceived in the 8(a) pilot program and an amendment to eliminate the provision that extends the surety bond waiver program. I requested this time to highlight those defects so that my colleagues can better assess all of the implications of H.R. 4500.

The purpose of the bill under consideration is to extend for another 2 years a program that is intended to help socially and economically disadvantaged small businesses develop the capability to perform sophisticated, high-technology, large-dollar, multiyear contracts. The program is being tested to determine whether the program is achieving this goal and whether the authority to demand certain contracts is an effective means to this end. Thus, our consideration of H.R. 4500 must address the level of success achieved by the 8(a) program over the last 3 years.

Testimony presented during our hearings on the bill indicated that the program, as created by Congress, has failed to realize the fundamental purposes of its existence. Further, the mere request for an extension, the second thus far, stands as clear evidence that elements of failure to adequately assess the program exist. Yet, H.R. 4500 offers no substantive changes in the law.

Two of the weaknesses I perceive in the bill concern the use of the Department of Defense as the test agency and the use of construction contracts to carry out the purposes of the legislation. Because efforts are underway by the Small Business Administration and the OMB to recommend that the President designate a nondefense agency for the program, I will not elaborate on this concern. However, a brief statement on the use of construction contracts may be helpful.

Testimony presented to the committee indicated that construction contracts may be counterproductive to developing a business' ability to compete and to perform. One of the central arguments here concerns the fact that the competitive bid process is an essential element of the construction industry. To succeed, a business must develop the skills of surveying the market for available work, deciding which jobs are appropriate to the company's capabilities, estimating the job and its costs, obtaining bonding, soliciting subcontracting bids, and preparing the bid. Yet, the 8(a) pilot program does not require competitive bidding: It is a sole-source negotiation program, a process that, according to testimony, can increase construction costs by 40 to 120 percent.

My final concern addresses the surety bond waiver program. According to the GAO, surety bonding is often a prerequisite for obtaining some Government contracts, but the practice occurs particularly in construction work. Further, the SBA requests, as a matter of normal procedure, that agencies not require bonding for nonconstruction contracts except where it is absolutely essential to protect the interests of the Government.

As noted in the committee report, the SBA administers a surety bond program that allows the Administration to guarantee reimbursement of between 80 and 90 percent of the value of a contract which does not exceed $1 million. The purpose of the program is to help small businesses obtain the bonding required for Federal projects, especially construction contracts over $25,000, as mandated by the Miller Act.

In its report to the Congress on the surety bond program, the GAO revealed that of the 6,085 applications that were received for bonding under the guarantee program, only 2 percent, or 144, were refused. Further, of the 144 applicants who were denied bond guarantees, 87 percent were not qualified 8(a) firms, of the 57 remaining, 48 had participated in the 8(a) program longer than the 1-year limit and were not eligible. Six of the remaining nine firms had been in business longer than the 2-year maximum.

Thus, the GAO reports, had the bond waiver program been implemented, only three firms would have been eligible during the period of October 1978 through June 1981. Further, considering the very low rate of refusal under the bond guarantee program, the advisability of waiving the bond requirement for firms that have been rejected by the guarantee program is questionable.

The effort to help disadvantaged small businesses develop expertise is admirable, and providing the SBA with the power to reserve desirable contracts may be the appropriate avenue for achieving this goal. Yet, in 3 years, the 8(a) pilot program in its current form has not advanced the purposes of the program and has not provided an adequate base from which to assess the viability of the program.

As we consider this bill, we should all be aware of the weaknesses of H.R. 4500 and should question the need to extend the surety bond waiver program. The good intentions of the program deserve our full consideration.

Mr. MITCHELL of Maryland. Mr. Speaker, I yield such time as he may consume to the gentleman from Illinois (Mr. SAVAGE).

Mr. SAVAGE. Mr. Speaker, today the House will have the opportunity to vote on passage of legislation, H.R. 4500, to extend through September 30, 1983, two test or pilot programs administered by SBA. These programs are supposed to help SBA nurture the development and growth of small businesses owned by socially and disadvantaged minorities. I sincerely hope that the Members of this body will overwhelmingly pass this very important bill, because many minorities need these programs in order to get a footing to make it in the economic mainstream.

Under the pilot procurement program, SBA has the authority to enter into procurement contracts with designated agencies and to then subcontract the work to minority firms. I am pleased that this bill we soon will be voting on will give SBA more authority to determine which procurement needs of a designated agency are appropriate for inclusion in the 8(a) program. SBA needs this additional authority because, in the past, designated agencies invariably managed to frustrate congressional intent by simply stonewalling or by not cooperating to increase minority participation in Government contracts. This change in language should give more teeth to SBA in this area.

The other pilot program included in this legislation extends SBA's authority to waive bond requirements that otherwise would be in force on Government contracts. History of this particular program shows that SBA seldom, if ever, used this authority to help minorities in construction trades. I hope that the present Administrator of SBA will be more aggressive in this area so that more minorities can break into this line of work.

In summation, this bill deserves to be passed and I urge all my colleagues to support it today.

Mr. Speaker, I just want to say that after we have just passed overwhelmingly so much money for MX missiles,

neutron bombs, deployment of the Pershing missile in Europe, B-1 bombers—so much to kill, and we will be straining to give just a little bit to heal. All we are asking here is to extend a program that has proved itself for minority businesses in this country who are asking, not for welfare, not asking for a handout, just a hand, just an opportunity to help ourselves overcome disadvantages imposed upon us.

America must be concerned about the welfare and about the domestic problems that we face. I urge the Members to do what they did in voting for killing, and vote for healing and help to extend the contract set-aside program for minority businesses.

● Mr. CORRADA. Mr. Speaker, I rise in support of H.R. 4500, a bill to extend section 8 SBA pilot programs through fiscal year 1983.

This legislation is an extension of a pilot program that was established by Public Law 95-507 which established a 2-year pilot procurement program where the President would designate an agency with which the SBA would have increased authority to negotiate any contract requirements it selects for use in the 8(a) program. The Department of the Army was the agency selected as the 8(a) pilot agency. Under this bill, the President could continue with the Department of the Army or select another agency.

The SBA's regular 8(a) program is used to aid and encourage economically and socially disadvantaged firms. The procuring agency volunteers a given contract for inclusion in this program. The pilot program will allow the SBA to add other contracts for inclusion in the program. The additional contracts may be of two types: Those traditionally included and those traditionally excluded from the 8(a) program. In particular, this legislation encourages the expansion of the number of contracts in the area of historical exclusion such as high technology contracts, multiyear contracts with followup potentials, large amount contracts and those contracts with commercial application.

I am very pleased to see this pilot program extended for an additional 3 years. The SBA's 8(a) program is very important to minorities and socially and economically disadvantaged companies throughout the United States. I hope that these additional 2-years of experience with a pilot program will lead to increasing participation by all segments of our business communities. I urge my colleagues to approve H.R. 4500.●

Mr. McDADE. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MITCHELL of Maryland. Mr. Speaker, I have no further requests for time, and I urge passage of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Maryland (Mr. MITCHELL) that the House suspend the rules and pass the bill, H.R. 4500.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

EXTENSION OF FEDERAL PHYSICIANS COMPARABILITY ALLOWANCE ACT OF 1978

Ms. OAKAR. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4793), to amend title 5, United States Code, to extend the Federal Physicians Comparability Allowance Act of 1978, and for other purposes, as amended.

The Clerk read as follows:

H.R. 4793

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Physicians Comparability Allowance Amendments of 1981".

SEC. 2. Section 5948 of title 5, United States Code, is amended—

(1) in subsection (d)—

(A) by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1983"; and

(B) by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1985";

(2) in subsection (g), by amending so much of paragraph (1) as precedes subparagraph (A) to read as follows:

"(1) 'Government physician' means any individual employed as a physician or dentist who is paid under—"; and

(3) in subsection (g)(1)(F), by striking out "title 4 of the Foreign Service Act of 1946 (22 U.S.C. 861-890)" and inserting in lieu thereof "chapter 4 of title I of the Foreign Service Act of 1980 (22 U.S.C. 3961 and following)".

SEC. 3. Section 3 of the Federal Physicians Comparability Allowance Act of 1978 (Public Law 95-603; 92 Stat. 3018) is amended by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1985".

SEC. 4. (a) Any service agreement entered into on or after the date of the enactment of this Act pursuant to section 5948 of title 5, United States Code, as amended by section 2 of this Act, shall be effective only to such extent or in such amounts as are provided in advance in appropriation Acts.

(b) The amendments made by this Act shall not be construed to authorize additional or supplemental appropriations for the fiscal year ending September 30, 1982.

SEC. 5. (a) Section 8344(c) of title 5, United States Code, relating to termination of civil service annuities on reemployment, is amended by adding at the end thereof the following: "Upon separation from such position, an individual whose annuity is so terminated is entitled to have his rights redetermined under this subchapter, except that the amount of the annuity resulting from such redetermination shall be at least equal to the amount of the terminated annuity plus any increases under section 8340 of this title occurring after the termination and before the commencement of the redetermined annuity.".

(b)(1) Subject to paragraph (2), the amendment made by subsection (a) shall apply to individuals whose annuities terminate under section 8344(c) of title 5, United States Code, on or after October 1, 1976.

(2) In the case of an individual whose reemployment ended before the date of the enactment of this Act, the amendment shall apply only upon application by the individual to the Office of Personnel Management within one year after the date of enactment. Upon receipt of such application, the Office shall recompute the annuity, effective as of the day following the day reemployment ended.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentlewoman from Ohio (Ms. OAKAR) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. DERWINSKI) will be recognized for 20 minutes.

The Chair recognizes the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Speaker, I yield as much time as I may consume.

Mr. Speaker, the purpose of the physicians' comparability allowance program is to aid recruitment and retention of highly qualified Government physicians for a specified period of service in a particular agency. In return for this benefit to the Government, the physician receives an allowance for the duration of the agreement in an amount determined by the agency head and specified in the agreement.

The allowances are to be paid only to categories of physicians for which the agency is experiencing recruitment and retention problems. The amounts are to be fixed at the minimum necessary to alleviate these problems.

H.R. 4793 will extend that authority for 2 years. I would like to point out this bill does not provide new or additional benefits to Federal physicians—it only continues an existing program.

The Office of Personnel Management has evaluated the effectiveness of the program and recommended a further extension of the program. Dr. Devine, Director of OPM, has informed me:

We believe the comparability allowance program for General Schedule and certain other physicians has significantly benefited the government in its staffing of physicians. Federal agencies using the authority have all told us that the ability to pay the allowances has significantly helped them in their recruitment and retention efforts, and they urge continuation of the allowance in competing with non-federal employers for doctors * * * Accordingly, the Office of Personnel Management favors extension of this authority for two additional years.

Mr. Speaker, I would point out that the national average salary of physicians in private practice is reported to be $78,400. The average Federal gener-

al schedule salary, as reported by OPM, is only $45,608, and that includes the special allowance.

Clearly, if Congress does not extend this authority, our presently employed Federal physicians will flee the systen; and agencies, who are already finding it difficult to recruit new doctors, will find it impossible to fill vacancies.

H.R. 4793 also contains a committee amendment which amends section 8344(c) of title 5, United States Code, relating to termination of civil service annuities on reemployment. The amendment corrects an inequity in current law by insuring that an individual, upon termination of the period of reemployment, would receive a new annuity which is not less than the terminated annuity with the intervening cost-of-living adjustments. The amendment also authorizes lump sum payments to any individual who has been adversely affected.

I would, therefore, urge the House to favorably pass H.R. 4793.

□ 1810

Mr. DERWINSKI. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this legislation is the extension of a practical and workable program to assist the Federal Government in recruiting and retaining highly trained and experienced physicians. Specifically, the bill extends through September 30, 1983, the authority of Federal agency heads to make special bonus pay agreements with physicians employed under the General Schedule. Current authority for such payments expired on September 30.

The bill also provides that a civil service annuitant who receives a Presidential appointment or is elected to a Federal office will no longer suffer a loss of retirement benefits.

The Office of Personnel Management has advised the Post Office and Civil Service Committee that the physicians comparability allowance program has significantly helped Federal agencies in the recruitment and retention of physicians. Accordingly, OPM has urged continuation of the program for an additional 2 years.

While the bill would allow payment of special bonuses of up to $10,000, the Congressional Budget Office estimates that 1,337 physicians with bonuses averaging $7,125 would be affected. Additionally, the bill explicitly states that no additional or supplemental appropriations may be authorized for 1982, and new contracts awarded in 1983 would require no more than $1 million in budget authority.

According to the General Accounting Office, the average salary of a physician in the General Schedule, as of December 1980, was $45,608, while the average salary of a physician in the private sector was $78,400.

The other provision in the bill corrects an anomaly in the reemployed annuitant provisions of the civil service retirement law.

Under existing law, when an annuitant is reemployed as a Presidential appointee or is elected to Congress, his civil service retirement annuity is terminated. Upon termination of the period of reemployment, the individual is entitled to a new annuity computed on the basis of the additional service and salary.

When this provision was enacted in 1976, it was designed to work to the individual's advantage since the new higher average salary and additional service would result in an annuity larger than the one terminated. However, the combined effect of executive pay caps and large cost-of-living increases in annuities have resulted in situations where the new computed annuity is less that the original annuity would have been had it continued in effect.

As for the physicians comparability allowance program, I think it provides a big assist to the Federal Government in recruiting and keeping physicians. Without such a program, I am afraid the Federal Government would be completely disadvantaged in the competition for top medical personnel.

I urge prompt enactment of this legislation.

Ms. OAKAR. Mr. Speaker, I yield back the balance of my time.

● Mr. WOLF. Mr. Speaker, I rise in strong support of H.R. 4793, an extension of the Physicians' Comparability Act of 1978 for 2 additional years.

This is a vital program which has significantly benefited the Government in its staffing of physicians. According to the OPM, Federal agencies using the comparability allowance authority have attested that it has greatly helped them in their recruitment and retention efforts and they unanimously urge continuation of the allowance authority in view of the continuing difficulty they are having in competing with non-Federal employers for doctors.

This is just another painful example of the problem created and being exacerbated each day by the pay cap. The committee has figures from the GAO which vividly depict Federal physicians average salaries lagging behind salaries of physicians in the private sector by over $32,000. As of December 1980, the average salary of a physician in the Government was $45,608 compared to $78,400 for a physician in the private sector.

Mr. Speaker, while this bill is certainly not the panacea for the serious compensation problems plaguing our physicians in Government, it is a positive first step. Continuation of the Physicians' Comparability Act of 1978 is necessary. It deserves our strong support.

However, we should not fool ourselves into thinking this measure alone will solve serious pay problems of Federal physicians. It will not. The Congress soon must address this particular critical problem, as well as the overall pay cap crisis which is encouraging an extraordinary exodus of our most senior and talented top officials. We can no longer afford to sit back and do nothing while this brain drain continues. It is false economy.●

The SPEAKER pro tempore. The question is on the motion offered by the gentlewoman from Ohio (Ms. OAKAR) that the House suspend the rules and pass the bill, H.R. 4793, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

Ms. OAKAR. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate bill (S. 1551) to amend title 5, United States Code, to extend the period within which physicians comparability contracts may be entered into, and for other purposes, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1551

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5948(d) of title 5, United States Code, is amended—

(1) by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982"; and

(2) by striking out "September 30, 1983" and inserting in lieu thereof "September 30, 1984".

MOTION OFFERED BY MS. OAKAR

Ms. OAKAR. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Ms. OAKAR moves to strike out all after the enacting clause of the Senate bill, S. 1551, and to insert in lieu thereof the provisions of the bill, H.R. 4793, as passed by the House.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title of the Senate bill was amended so as to read: "A bill to amend title 5, United States Code, to extend the Federal Physicians Comparability Allowance Act of 1978, and for other purposes."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 4793) was laid on the table.

GENERAL LEAVE

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the bill, H.R. 4793, just passed.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

INTERNATIONAL BANKING FACILITY DEPOSIT INSURANCE ACT

Mr. ST GERMAIN. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4879) to amend the Federal Deposit Insurance Act to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments, as amended.

The Clerk read as follows:

H.R. 4879

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—INTERNATIONAL BANKING FACILITY DEPOSIT INSURANCE ACT

SHORT TITLE

SEC. 101. This title may be cited as the "International Banking Facility Deposit Insurance Act".

INTERNATIONAL BANKING FACILITY DEPOSITS

SEC. 102. Section 3(1)(5) of the Federal Deposit Insurance Act (12 U.S.C. 1813(l)(5)) is amended to read as follows:

"(5) such other obligations of a bank as the Board of Directors, after consultation with the Comptroller of the Currency and the Board of Governors of the Federal Reserve System, shall find and prescribe by regulation to be deposit liabilities by general usage, except that the following shall not be a deposit for any of the purposes of this Act or be included as part of the total deposits or of an insured deposit:

"(A) any obligation of a bank which is payable only at an office of such bank located outside of the States of the United States, the District of Columbia, Puerto Rico, Guam, American Samoa, the Trust Territory of the Pacific Islands, and the Virgin Islands; and

"(B) any international banking facility deposit, including an international banking facility time deposit, as such term is from time to time defined by the Board of Governors of the Federal Reserve System in regulation D or any successor regulation issued by the Board of Governors of the Federal Reserve System.".

BRANCHES OF INSURED BANKS IN THE TRUST TERRITORY OF THE PACIFIC ISLANDS

SEC. 103. (a) Section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813) is amended—

(1) in subsection (a), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa," each place it appears therein;

(2) in subsection (m)(1), by inserting "of the Trust Territory of the Pacific Islands," after "American Samoa,"; and

(3) in subsection (o), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa," each place it appears therein;

(b) Section 7 of such Act (12 U.S.C. 1817) is amended—

(1) in subsection (a)(4), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,"; and

(2) in subsection (b)(5)(B), by inserting "the Trust Territory of the Pacific Islands," after "American Samoa,".

(c) Section 11(a)(2)(A)(iv) of such Act (12 U.S.C. 1821(a)(2)(A)(iv)) is amended—

(1) by inserting "of the Trust Territory of the Pacific Islands," after "of American Samoa,"; and

(2) by inserting "the Trust Territory of the Pacific Islands," after "Virgin Islands, American Samoa,".

TITLE II—MORTGAGE PURCHASE AMENDMENTS OF 1981

SHORT TITLE

SEC. 201. This title may be cited as the "Mortgage Purchase Amendments of 1981".

PURCHASES OF MORTGAGES MORE THAN ONE YEAR OLD

SEC. 202. (a) The third sentence of section 305(a)(2) of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454(a)(2)) is amended to read as follows: "The corporation may purchase a conventional mortgage which was originated more than one year prior to the purchase date only if the seller is the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the National Credit Union Administration, or any other seller currently engaged in mortgage lending or investing activities.".

(b) The fourth sentence of section 302(b)(2) of the Federal National Mortgage Association Charter Act (12 U.S.C. 1717(b)(2)) is amended to read as follows: "The corporation may purchase a conventional mortgage which was originated more than one year prior to the purchase date only if the seller is the Federal Deposit Insurance Corporation, the Federal Savings and Loan Insurance Corporation, the National Credit Union Administration, or any other seller currently engaged in mortgage lending or investing activities.".

MORTGAGE LOAN PURCHASES FROM THE FEDERAL DEPOSIT INSURANCE CORPORATION AND THE NATIONAL CREDIT UNION ADMINISTRATION

SEC. 203. Subsections (a)(1) and (b) of section 305 of the Federal Home Loan Mortgage Corporation Act (12 U.S.C. 1454) are amended by inserting "the Federal Deposit Insurance Corporation, the National Credit Union Administration," after "Federal Savings and Loan Insurance Corporation," each place it appears.

The SPEAKER pro tempore (Mr. PATTERSON). Is a second demanded?

Mr. WYLIE. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Rhode Island (Mr. ST GERMAIN) will be recognized for 20 minutes, and the gentleman from Ohio (Mr. WYLIE) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Rhode Island (Mr. ST GERMAIN).

Mr. ST GERMAIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 4879, now before the House with a committee amendment in the nature of a substitute, is a bill that deals with two very significant banking matters on which prompt action is vital. In effect, the committee amendment for convenience incorporates two separate bills ordered reported by the Banking Committee on November 5 into a single bill containing two titles.

Title I of the bill contains the text of a bill introduced on November 2 as H.R. 4879 by my colleague from New York, Mr. SCHUMER, dealing with international banking facilities. On December 3, 1981, pursuant to regulations of the Federal Reserve Board, international banking facilities will be permitted in the United States. IBF's may be established by U.S. depository institutions, by Edge and Agreement Corporations, and by U.S. branches and agencies of foreign banks. The Board issued proposed rules last December and adopted the final rule June 18, 1981, with an effective date of December 3, 1981.

In brief, an IBF may accept deposits from and extend credit to foreign residents or other IBF's. All such funds will be exempt from reserve requirements and from interest rate limitations of regulation Q. The purpose of IBF's at U.S. banking offices is to enhance the international competitive position of banking institutions in the United States.

Consistent with this basic purpose, it now becomes necessary to review the February 18, 1981, interpretation of FDIC to the effect that IBF deposits are subject to FDIC insurance assessments under the Federal Deposit Insurance Act. The Subcommittee on Financial Institutions Supervision, Regulation and Insurance of the House Banking Committee heard testimony that if U.S. IBF's are required to pay the FDIC premium amounting to one-twelfth of 1 percent of their deposits, then they will be competitively disadvantaged. This premium is considered especially important because, as the testimony indicated, many IBF's may operate on very narrow margins. Title I of H.R. 4879 would eliminate the insurance requirement for what, in essence, are deposits of extremely sophisticated international investors seeking the highest possible yields. With the December 3 effective date nearing, Congress has an opportunity to prevent burdensome regulation and at the same time insure competitive equality between U.S. and foreign banks by acting in a manner fully consistent with the letter and spirit of the Federal Reserve Board's action in permitting the establishment of IBF's.

Title I of the bill also includes an amendment adopted at full committee markup extending FDIC deposit insurance coverage to branches of insured banks operating in the Trust Territory of the Pacific Islands. Currently FDIC's authority to insure deposits includes areas in the Pacific such as Guam and American Samoa. But, under current law, FDIC cannot offer insurance in the trust territory. FSLIC's authority to insure thrift deposits does include the trust territory. Therefore, title I of the bill would expand FDIC's authority to cover the trust territory.

Title II of the bill was introduced by myself, Mr. STANTON, and Mr. GONZALEZ, and was considered by the committee as H.R. 4515. This title deals with existing statutory limitations affecting mortgage purchases both by the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association. Present charter requirements limit the dollar value of loans which are more than 1 year old when sold to 20 percent of the total value of conventional mortgages in FHLMC's or FNMA's portfolios.

This limitation will soon raise serious problems in connection with new programs under which FHLMC and FNMA will use their currently unused capacity to purchase or place older mortgages and, it is expected, as a result provide improved liquidity to mortgage lending institutions. This is the highly successful SWAP program of the Federal Home Loan Mortgage Corporation. This program, in the short period it has been in effect, has been popular indeed, inasmuch as it permits the swapping of older, low-yielding mortgage loans for mortgage corporation participation certificates (PC's). These illiquid mortgages, responsible in large part for difficulties being encountered by the thrift industry, are converted into highly liquid securities. Ultimately, additional funds are freed up for new mortgage funding.

I have been advised by FHLMC that with its most recent auction, FHLMC has virtually reached its 20 percent ceiling for all practical purposes and that absent this legislation now, the program must be shut down until such time as purchases of new mortgages in the Corporation's other programs made it possible to hold another SWAP auction. It is now clear that the value of new loans will be depressed for 1982 and as a consequence, it seems unlikely that the SWAP program can be offered at anywhere near a level commensurate with the need and demand unless Congress approves this legislation.

Another provision of title II would give the same seller/service status to FDIC and NCUA as that FSLIC with respect to using FHLMC and FNMA programs to aid troubled financial institutions and to dispose of loan portfolios acquired in takeovers. This flexibility is fully consistent with action taken by the House on October 28 in passing overwhelmingly H.R. 4603, the so-called regulators' bill.

The provisions now included in this title were the subject of hearings by the Subcommittee on Financial Institutions on September 22 at which time testimony was received from the Home Loan Bank Board, the Comptroller of the Currency, DHUD, FHLMC, FHMA, as well as from every major trade association by appearance before the subcommittee or by written statement. All testified in favor of providing increased flexibility for each Corporation's mortgage purchase operations.

Title II is a limited piece of legislation which does not address the more fundamental issues affecting both FHLMC and FNMA. There are more comprehensive proposals circulating involving both FHLMC and FNMA which are part of the committee's comprehensive discussion principles issued by Mr. STANTON and myself on Monday, November 9, on which the committee will begin hearings in the near future.

Mr. Speaker, at this point I am inserting in the RECORD the text of two letters from the Congressional Budget Office relating to that Office's cost analyses of H.R. 4879 and H.R. 4515:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., November 12, 1981.

Hon. FERNAND J. ST GERMAIN,
Chairman, Committee on Banking, Finance and Urban Affairs, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed H.R. 4879, the International Banking Facility Deposit Insurance Act, as ordered reported by the House Committee on Banking, Finance and Urban Affairs, November 5, 1981.

H.R. 4879 would amend the Federal Deposit Insurance Act by removing international banking facility (IBF) deposits from the deposit insurance assessment requirements. The Board of Governors of the Federal Reserve System authorized the establishment of IBFs within U.S boundaries in June 1981, and it is expected that the IBFs will begin conducting international deposit and loan activities in December 1981. To date IBFs have been exempted from a variety of federal reserve regulations, including reserve and rate ceiling requirements. While subject to federal taxes, IBFs are exempt from state and local taxes. Under current law, however, deposits in IBFs would be subject to the Federal Deposit Insurance Corporation (FDIC) annual assessment of one-twelfth of 1 percent of deposits. As such, any bank defaults would be covered by FDIC insurance, although such assistance is not considered likely.

H.R. 4879 would eliminate the requirement for IBF insurance coverage as well as the assessment payment. The primary budget impact of this provision would be a reduction in the FDIC assessment base, resulting in lower collections by the FDIC.

It is difficult to precisely estimate the loss in FDIC receipts as a result of H.R. 4879, because of uncertainty as to the magnitude of IBF activity. The growth in IBFs, even without this bill, is expected to be considerable. A recent analysis published in London suggests that gross off-shore banking has tripled within the last five years and now is at a level of approximately $1.3 trillion in deposits. This study estimates that by 1985 IBFs would likely capture at least 10 percent of that market. Based on information from the Federal Reserve, under current financial conditions IBF deposits in the $100 billion range would not be unreasonable to expect within one year. Under current law, for each $10 billion in IBF deposits, the FDIC would receive approximately $8 million in assessments annually, and net approximately $4 million annually after adjustments for administrative expenses and rebates of 60 percent to the IBFs. Also, additional receipts would accrue from the investment income generated from these assessments, and revenues to the Treasury would increase as a result of the tax on the income from the rebates to the banks, the combination resulting in additional receipts and revenues of approximately $600,000 annually, for each $10 billion in deposits.

If assessments were no longer required as provided in H.R. 4879, the FDIC would lose this source of receipts. It is expected that this reduction in receipts to the FDIC would be at least partially offset by the additional taxes paid to the Treasury by the IBFs. The higher tax payments would result from two factors: earnings on the additional deposits in IBFs resulting from this bill, which would make the return on investment more attractive; and the fact that assessments could no longer serve as a tax deduction. Assuming an effective tax rate of 13 percent, it is estimated that for each $10 billion in IBF deposits, approximately $1 million would be paid in additional federal taxes by the IBFs as a result of removing the assessment potential. Thus, the net budget impact for each $10 billion in IBF deposits would be a net loss of approximately $3.6 million in receipts annually. If total deposits are assumed to be $100 billion, total government receipts would decline by $36 million per year. To the extent that additional deposits in IBFs are generated because of this bill, additional taxes would be paid, and the net cost could decline. However, there is no basis at this time for projecting the magnitude of any increase in deposits resulting from this bill.

Finally, H.R. 4879 would make FDIC insurance coverage available to a small number of banks located in U.S. territories, which would increase FDIC assessment slightly. At the same time, a potential liability as a result of this insurance coverage would also be incurred by the FDIC. It is assumed that, over time, assessment income would cover defaults, and no net cost to the government would be incurred.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., November 13, 1981.

Hon. FERNAND J. ST GERMAIN,
Chairman, Committee on Banking, Finance, and Urban Affairs, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Pursuant to Section 403 of the Congressional Budget Act of 1974, the Congressional Budget Office has reviewed H.R. 4515, a bill to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association, as ordered reported by the House Committee on Banking, Finance, and Urban Affairs, November 5, 1981.

This bill would abolish the 20 percent limit on the proportion of conventional mortgages held by the Federal Home Loan Mortgage Corporation (FHLMC) and the Federal National Mortgage Association (FNMA) that may consist of mortgages older than one year when acquired. It is expected that enactment of H.R. 4515 would result in no additional costs to the federal government and may possibly achieve some savings, although the amount of such savings cannot be estimated with precision.

Under current market conditions, FHLMC purchases of conventional mortgages have dropped from $6.5 billion in 1978 to an annual rate of approximately $2.4 billion in the first half of 1981. This shortage of new mortgages, combined with the successful introduction of the FHLMC "SWAP" program (seasoned mortgages held by thrifts are exchanged for the corporation's more liquid participation certificates), has pushed the mortgage corporation's holdings of seasoned mortgages to 20 percent.

Likewise, FNMA's $3 billion in unused authority to purchase seasoned mortgages will probably be exhausted early next year. Thus, the 20 percent limit on seasoned mortgaged holdings, combined with a diminished supply of new mortgages, could restrict the total volume of mortgage purchases by FHLMC and FNMA.

Abolishing the 20 percent limitation on mortgage purchase authority would allow the FHLMC and FNMA to continue as buyers in the secondary market, thus helping to relieve some of the financial pressure on the thrift industry. Without such activity by FHLMC and FNMA, it is possible that additional assistance from the Federal Deposit Insurance Corporation (FDIC), as well as the Federal Savings and Loan Insurance Corporation (FSLIC), would be required, although it is difficult to precisely estimate the extent of such assistance.

No additional federal revenue losses are anticipated as a result of the capital loss on mortgage sales to FNMA or swaps with FHLMC. Capital losses tend to be lower (prices are higher) on mortgages sold to FNMA and FHLMC than on those sold to other secondary market buyers. To the contrary, if FHLMC and FNMA significantly reduce their purchases, it will increase capital losses arising from mortgage sales, which would serve to reduce taxable income and federal revenues.

In addition, H.R. 4515 would allow FHLMC to purchase mortgages from the FDIC and the National Credit Union Administration (NCUA), thus increasing the flexibility of the FDIC and NCUA. It is expected that no net budget impact would result from enactment of this provision.

Should the Committee so desire, we would be pleased to provide further details on this estimate.

Sincerely,

ALICE M. RIVLIN,
Director.

Mr. GONZALEZ. Mr. Speaker, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from Texas.

Mr. GONZALEZ. Mr. Speaker, I thank the very distinguished committee chairman for yielding, and I only rise to say that as a member of this committee I think I speak for every other member when I say we are very grateful and indebted to the chairman for having moved expeditiously on these matters. This action will expedite in the secondary mortgage market a very much needed procedure that I think the Subcommittee on Housing had done well to bring out earlier this year in prior hearings.

Mr. Speaker, I rise in support of H.R. 4515 offered by the distinguished chairman from Rhode Island.

This bill would remove the existing limitation on the number of mortgages over 1 year old which Freddie Mac and Fannie Mae can purchase. It would also permit Freddie Mac to purchase mortgage loans from the FDIC and the National Credit Union Administration.

The Housing Subcommittee considered this legislation last April during its hearings on the fiscal year 1982 HUD authorizations bill. The subcommittee did not pursue the legislation at that time because we were caught up in the morass of reconciliation.

However, the need for this legislation which existed last April is even greater now. It would permit thrift institutions and credit unions to deal in 2 days with the financial squeeze being caused by large portfolios of older low-yielding mortgages.

First, institutions could "swap" the mortgages for Freddie Mac participation certificates. The certificates could then be used as collateral to lower the institution's borrowing costs.

As an alternative, the institution could decide to sell the mortgages to Fannie Mae. The Bank Board has recently proposed a regulation that would make this second option more attractive than it presently is, by allowing Federal S. & L.'s to write off losses on the sales of old mortgage loans over the remaining life of the loans. Presently, the loss must be taken in the year in which the sales occur.

Finally, title II of the amendment will also assist the FDIC in aiding troubled financial institutions by facilitating the disposal of mortgage loans acquired in takeovers.

I think that this is a very worthwhile amendment and I commend the chairman of the full committee for his efforts in helping to bring it to fruition. I urge my colleagues to support it.

Mr. SCHUMER. Mr. Speaker, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from New York.

Mr. SCHUMER. Mr. Speaker, I thank the distinguished chairman of the Banking Committee for yielding, thank him for his support, and commend him for securing prompt action on it.

Rather than reiterate the reasons why this legislation is important for restoring the competitiveness of U.S.-based banks in the international market—which Chairman ST GERMAIN has so clearly done—I would like to focus briefly on one particularly important aspect of this legislation.

Unlike the budget and spending bills that we have spent most of our time on this year, this bill is not a tug of war between budget functions, between regions of the country, or between Democrats and Republicans. There will be winners but no losers. Since so little of the business that IBF's will engage in is currently conducted in the United States, not even the banks will be fighting a zero-sum game. Simply stated, a very large market that has been pushed overseas by a series of regulations will be brought back home. The exact size of this market is unknown, but estimates range in the tens of billions of dollars.

The successful operation on IBF's in the United States will not only enhance the prestige and desirability of the United States as an international banking center, but will also have important concrete benefits. First and foremost, there will be a net increase of jobs in the banking industry and in ancillary service industries. Second, IBF's will generate new tax revenues, since the Treasury will be collecting tax payments rather than issuing credits for taxes paid to foreign governments. Finally, oversight of the international operations of U.S. banks will be made easier by having these operations conducted at home rather than abroad.

Mr. Speaker, H.R. 4879 represents the logical and necessary conclusion to the process of creating an improved framework under which U.S.-based banks can compete for international deposits and loans in international markets. By exempting international banking facilities' deposits from the FDIC insurance assessment, we will remove the final legal and regulatory obstacle to the successful operation of international banking facilities in the United States.

While I would like to stress the importance of the bill, it should be made clear at the outset that the bill does not alter fundamental domestic banking structure, which the committee will conduct hearings on in the future.

Rather, the major effect of this legislation will be to allow banking business that is currently being conducted overseas to be conducted at home.

As some of the Members may know, an international banking facility, or IBF, is not a physical entity, but is a strictly international account that is used for purely international transactions. An IBF would not compete for retail deposits with domestic banks; it may transact business only with foreign residents, foreign banks and central banks, foreign branches of U.S. banks, other IBF's, and its parent institution. The minimum account would be $100,000.

The foundation for the establishment of IBF's was laid in the International Banking Act of 1978, which was largely a result of Chairman ST GERMAIN's interest and effort.

In June of this year the Federal Reserve Board took another step toward the establishment of IBF's when it published regulations exempting IBF deposits from interest rate limitations and reserve requirements. These regulations will take effect on December 3, 1981. In anticipation of this date, nine States have changed their tax laws in order to foster the growth of IBF's in their State banking centers. Those States are New York, California, Connecticut, Georgia, Illinois, Florida, North Carolina, Mississippi, and Maryland.

The exemption of IBF deposits from the FDIC insurance assessment can be seen as a vital step in making domestic IBF's competitive when one factors this assessment into a typical international monetary decision. Nearly half of the interbank placements carry margins of one-sixteenth of 1 percent, which is less than the one-twelfth of 1 percent assessment. The spread on loans generally ranges between three-eighths of 1 percent and five-eighths of 1 percent. Therefore, adding the burden of FDIC insurance will cut into profitability and cut into competiveness.

The formation of competitive IBF's in the United States opens up a huge market for American banks. Precise estimates of the size of the market are difficult to find, but there is no doubt that it reaches into the tens of billions of dollars.

Since so little of the business IBF's will engage in is currently conducted in the United States, U.S. IBF's will not be fighting a zero-sum game with each other. First and foremost, there will be a net increase of jobs in the banking industry and in ancillary service industries. Second, IBF's will generate new revenue for the Treasury, since tax credits formerly granted to U.S. banks for taxes paid to foreign governments will be replaced by taxes actually paid to the Treasury. IBF payrolls will ripple through the economy, generating additional State and local tax revenues. Finally, oversight of the international operations of U.S. banks will be made easier by having these operations conducted at home rather than abroad.

I believe that the benefits from the growth of domestic IBF's provide compelling reasons for taking the final step as provided for by H.R. 4879.

Mr. LAFALCE. Mr. Speaker, will the gentleman yield?

Mr. ST GERMAIN. I yield to the gentleman from New York.

Mr. LAFALCE. Mr. Speaker, I rise in support of both these bills, H.R. 4879 and H.R. 4515.

Mr. Speaker, today I am pleased to join my colleagues in support of H.R. 4879, amending the Federal Deposit Insurance Act to exempt deposits in international banking facilities from FDIC assessment and insurance coverage. Passage of this bill is the final step in the process of establishing these facilities in the United States. With them, domestic banks will once again be able to compete in the full range of international financial services.

For years, the U.S. banking industry has watched the explosive growth of international banking centers in London, Zurich, and more recently in the Bahamas, Bahrain, Hong Kong, Singapore, and the Cayman Islands. Operating with virtually no government regulation, these centers have attracted most of the growing volume of "stateless" dollars generated by increased international trade. The necessity of moving this enormous amount of money, much of it petrodollars, back into productive investment, and the development of a 24-hour-a-day world foreign exchange market have made international financial activity a far more important—and profitable—component of banking. Many U.S. banks responded to this by establishing subsidiaries in the same locations, thus effectively maintaining a share of the market, but at a cost of tax income to the Treasury and of jobs for U.S. workers.

The transactions taken over by these overseas branches, amounting to hundreds of billions of dollars, involve international movements of currency through deposit and lending activities by governments, banks, and multinational corporations. This international financial market is commonly referred to as the Eurodollar market, because the dollar is the preeminent currency traded, and because these dollars exist outside of the American domestic financial system.

The motivation for shifting the funds from New York City and other U.S. banking centers to overseas operations was twofold. First, the combination of State and local taxes far exceeded the level of taxation in foreign locations. Second, two Federal Reserve Board regulations prevented U.S. banks from providing to holders of Eurodollars services which were readily available at overseas institutions and which gave overseas institutions an overwhelming competitive advantage.

Regulation D requires member banks to maintain non-interest-paying reserves at Federal Reserve district banks against all deposits, and regulation Q prohibits member banks from paying interest on deposits with maturities of less than 30 days. Together, they limited U.S. banks from offering interest rates competitive with foreign institutions operating without any such restrictions.

Several years ago, a proposal for rectifying this inequitable and anticompetitive situation surfaced. Domestic banks would be authorized to operate international banking branches, or "windows" in U.S. locations. Funds handled by these branches would not be allowed to enter the American monetary system, and could only be traded on the international markets. Access to the branches would be restricted to foreign nationals, and deposits would be limited to those generated by operations outside the United States. In order to make these new international facilities competitive, they would be exempt from State and local tax and from Federal Reserve regulations.

I was an early and active participant in the effort to develop this proposal into an operating program. Originally, we hoped to accomplish our goal without Federal legislation, by amending Federal Reserve regulations, and with the necessary State legislation. New York State moved promptly to do its part, motivated largely by the prospect of additional jobs in New York City. Other States, including Georgia and California, followed suit. In 1978, I sought and obtained approval from the New York State congressional delegation to encourage the Federal Reserve Board to act swiftly in making the necessary regulatory changes, and in June of this year, the Fed announced final rules for operation of international banking facilities with an effective date of December 3, 1981.

One final obstacle to IBF's was still to emerge. Despite previous reviews to the contrary, counsel for the Federal Deposit Insurance Corporation determined that deposits in international banking facilities would, after all, be subject to assessments under the Federal Deposit Insurance Act. Exemption from the act could not be made administratively and would, instead, require that Congress act to amend it. Without such an exemption, IBF's could not meet the interest rates of the international market, and initiation of operations would not be likely on the December 3 target date. The pressure for immediate congressional action was on.

It is a credit to the Banking Committee that action on H.R. 4879 was prompt and efficient, and that we have the opportunity to act today to meet that deadline.

The benefits of international banking facilities are likely to be considerable. The new business will generate additional tax revenue for the U.S. Treasury, instead of having domestic banks claim tax credits for taxes paid to foreign governments. An even more significant benefit will be the creation of thousands of new jobs in New York City and other IBF locations. The New York Bankers' Clearinghouse has estimated that approximately 5,000 to 6,000 jobs with a total payroll of some $90 million will eventually result from these operations. Certainly the economic benefits of international banking in London have been considerable.

Once the ability of American banks to pay competitive interest rates is restored, I would expect a large share of this Eurodollar market to return to the United States, much of it to New York City. Our Stability has always been a substantial incentive for foreign investors, and our financial institutions are equipped to offer the most advanced transaction assistance available. International banking facilities are the key to restoring New York as the world's international financial center.

Mr. Speaker, today we have an opportunity to provide a degree of relief to mortgage lending institutions and, indirectly, to homebuilders and home buyers. H.R. 4515 removes certain existing limitations of the mortgage loan purchasing authority of the Federal Home Loan Mortgage Corporation (FHLMC) and the Federal National Mortgage Association (FNMA). These actions could assist mortgage lending institutions by improving their liquidity and freeing up much needed mortgage money.

There can be no doubt that the housing market is in a state of disarray. Each month we are greeted with the news that housing starts have reached an all time low. According to the National Association of Home Builders, 1981 may prove to be the worst year for new housing construction since World War II. Unless the last quarter of the year shows a radical turnaround, starts may be fewer than 1 million housing units. In 1946, hardly a stellar year even for those days, 1,023,000 units were begun. Even if we reach this level in 1981, we could still be far behind the 2 million annual starts that are needed to meet the Nation's housing needs over the long haul.

I doubt that any of our colleagues has not heard from builders and prospective home buyers in his or her district asking for relief from the pressures of high interest rates and tight mortgage money. And very few of us have escaped the pleas of carpenters, plumbers, electricians, and construction workers who have found work too infrequently in the past few years.

Our task is clear, Mr. Speaker. We must act now to provide some immediate relief to the recession, indeed the depression, that now grips the housing economy.

Both FHLMC and FNMA were chartered to provide a secondary market for residential mortgages that lenders are originating in the primary mortgage market. Both have been a continual source of money for the housing market by freeing lenders of long-term obligations and increasing their mortgage liquidity.

Since August 1968, FNMA has purchased approximately 2.5 million residential mortgages, including FHA-insured, VA-guaranteed, and conventional mortgages. FNMA's mortgage portfolio is approaching $60 billion. Behind these numbers, Mr. Speaker, are almost 3 million American families who were able to secure financing for their homes, thanks to FNMA purchases.

The FHLMC has purchased or participated in the purchase of over $25 billion in mortgages originated in the primary mortgage market over the past decade; 75 percent of these dollars have flowed directly to thrift institutions, while the remaining 25 percent has gone to commercial banks and mortgage bankers. Like FNMA, FHLMC secondary mortgage purchases have included FHA-insured, VA-guaranteed, and conventional mortgages, with the greatest volume being conventional single-family mortgages.

Mr. Speaker, the Federal Home Loan Mortgage Corporation Act and the National Mortgage Association Charter Act limit to 20 percent the aggregate balance of all conventional mortgages in instruments that are older than 1 year when purchased for FNMA and FHLMC respectively. This limitation was imposed at a time when housing starts had dropped to low levels and very little mortgage lending was taking place, conditions not very different than we find today. At that time, Congress responded by limiting FHLMC and FNMA's purchase of older loans so that their buys financed new mortgage originations.

It is indeed ironic that although on the surface conditions in the housing market are not unlike those in the early 1970's, the 20-percent limitation is actually a constraint in today's mortgage market. Today, financial institutions are experiencing severe earnings and liquidity problems due largely to excessive interest rates. Most hold sizable portfolios of loans that are well below current market interest rates. It is a ominous sign of the times, Mr. Speaker, that we greet the recent announcement that the FHA has dropped its ceiling on graduated payment mortgages from 17 to 16.5 percent, eliminating the differential between gradual and level payment rates, with some degree of optimism. Ten years ago, the FHA's level payment mortgage rate was 7.5 percent.

In order to cope with this new market reality, both FHLMC and FNMA have initiated new programs designed to meet the current extreme situation that most mortgage lenders find themselves in. FHLMC has underway currently a special placement program—SWAP's—that allows residential mortgage lenders to sell older, low-yielding mortgages to the Corporation, and, in exchange, receive mortgage corporation participation certificates—PC's. The originator does not obtain liquidity directly, because he does not receive a direct cash payment for the low-yield mortgage. However, the PC's acquired in the transaction are a more liquid security than a portfolio of illiquid mortgages. PC's can then be used as collateral to borrow funds for mortgage originations. Because the PC is used as collateral, the lender's borrowing costs are lower, allowing him to pass on these savings to prospective home buyers. The 20-percent limitation is currently constraining the FHLMC from achieving its estimated maximum total volume of SWAP's of more than $5.7 billion for 1981. In effect, a mechanism designed originally to increase mortgage originations is actually working, in today's high interest environment, to constrain the ability of the FHLMC to provide collateral generation mechanisms for mortgage originators.

Similarly, FNMA is prepared to purchase old mortgage loans currently held by savings and loan institutions. The Federal Home Loan Bank Board has proposed a rule change that would allow S. & L.'s to write off losses on the sales of old mortgages over the remaining life of the loans rather than in the year in which the sales occurred. This action will allow S. & L.'s to convert low-yielding mortgages to cash or FNMA securities and increase the supply of funds available to new home borrowers. However, FNMA expects that the demand for FNMA securities will far exceed the 20-percent limitation on the purchase of mortgage instruments that are older than 1 year.

Earlier this year, James E. Murray, president of FNMA, testified before the Banking Committee in support of H.R. 4515. Mr. Murray let us know that this bill is both necessary and, as important, the FNMA was satisfied that it will be able to provide a market for these low-interest mortgages now being held by the S. & L. associations without impairing its ability to buy new mortgages.

Mr. Speaker, I urge my colleagues to take heed of the changing environment that mortgage lenders, homebuilders, and home buyers face today. The 20-percent limitation enacted to address problems that were real in 1970 is totally inappropriate in today's housing market. FNMA and FHLMC were chartered to free up mortgage money so that the long-term obligations entered into by mortgage generators did not preclude the purchase of homes by our children and our grandchildren. We must allow these Federal instrumentalities to accomplish their task. To do so we must be sensitive to changing market realities—changes that require the Congress to remove old restrictions on the secondary mortgage market.

We have an opportunity to provide some real relief from the consequences of high interest rates that afflict our economy. Let us not miss that opportunity.

Mr. WYLIE. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 4879, and I want to commend the distinguished gentleman from Rhode Island (Mr. ST GERMAIN), the chairman of the full Committee on Banking, Finance and Urban Affairs, for acting so expeditiously to bring this legislation to the House floor today, for, as the chairman has said, there is a need for prompt action on both titles of this bill.

Several years ago the committee chairman and I participated in proceedings which led to the enactment of the so-called International Banking Act. The philosophy of that act was that foreign and domestic banks should be placed on as near an equal a competitive footing as possible with respect to domestic banking business, and we have been working ever since to implement that policy.

Today we have an opportunity to enhance the competitiveness of U.S. banks by permitting them to compete on equal terms with foreign banks for international business without having to leave the United States to do it. Deposits which now must be booked in offshore international banking facilities, such as the Cayman Islands, could be accepted in the United States without the burden of deposit insurance, which would not be appropriate in any event.

With respect to title II, I concur with what the chairman said and what the chairman of the subcommittee, the gentleman from Texas (Mr. GONZALEZ), said, that it is necessary to act promptly to authorize the Federal National Mortgage Association and the Federal Home Loan Mortgage Corporation to purchase mortgages older than 1 year in excess of 20 percent of their respective portfolios. Only last month this House passed H.R. 4603 to provide expanded authority for the agencies which regulate depository institutions to cope with the problems some of these institutions are facing due to their difficulties in matching old, low-yielding, long-term assets with expensive short-term deposits.

□ 1820

Title II will enable Fannie Mae and FHLMC to purchase more of these low yielding rate mortgages, and the participation certificates which thrift institutions receive in exchange will provide vital improvement in their liquidity.

There is one point of clarification, however, that I believe we can take care of by a colloquy at this time. Mr. Chairman, would you not agree that financial institutions, such as savings and loans, banks and credit unions, which have made mortgage loans in the past but may presently be out of the market, are covered by the phrase "or any other seller currently engaged in mortgage lending * * *"? I believe we are all in agreement that this phrase is designed to generally define the type of sellers and not to pinpoint the precise time of the mortgage lending activity. Would the chairman agree with that assessment?

Mr. ST GERMAIN. Mr. Speaker, will the gentleman yield?

Mr. WYLIE. I yield to the gentleman from Rhode Island.

Mr. ST GERMAIN. I want to thank our colleague from Ohio (Mr. WYLIE), for raising this matter on the floor today. His assessment of the meaning of the phrase "or any other seller currently engaged in mortgage lending" is the correct one. The intent is to define the class of sellers eligible for the program in general terms, to assure that sellers are over time engaged in mortgage lending activities. A mortgage lender is not excluded under this definition if its mortgage window is temporarily closed as a result of economic conditions, the lack of lendable funds, or the lack of a demand for mortgage loans. The mortgage market is subject to cyclical movements which create periods when mortgage lending activity slows or in some cases stops. The thrust of the bill before the House, in fact, is a recognition of this fact and seeks to allow the secondary market institutions to utilize their processing and purchasing capacity throughout economic cycles.

Mr. WYLIE. I thank the gentleman for that response and for the agreement with my assessment of what the bill is intended to do.

With that response, I urge adoption of the legislation.

● Mr. STANTON of Ohio. Mr. Speaker, I rise in support of H.R. 4879, as amended by the committee's amendment in the nature of a substitute. As amended, the bill now includes language originally appearing in H.R. 4879 and H.R. 4515, two unrelated bills passed by the Banking Committee on November 5. The committee approved H.R. 4879 by voice vote and approved H.R. 4515 by a record vote of 35 to 1.

H.R. 4879, as passed by the committee, would exempt international banking facilities (IBF's) from deposit insurance requirements. The IBF's are limited domestic offices of U.S. banks which are designed for the exclusive conduct of international banking business. They are intended as a substitute for foreign branches and, therefore, they may accept deposits only from non-U.S. residents and each deposit or withdrawal must exceed $100,000. By regulation, the Federal Reserve has exempted IBF's from interest rate restrictions and reserve requirements.

Deposit insurance is the one remaining major regulatory cost that must be eliminated in order to give IBF's full parity with a foreign branch of a U.S. bank. This bill is designed to accomplish that purpose.

According to proponents of the bill, the business of international banking is so highly competitive that the cost of FDIC insurance may determine whether a bank operates its international business domestically through an IBF or offshore through an uninsured foreign branch. Bank officials note that no international banking center levies deposit insurance assessments on international deposits. They also assert that the size of the deposits—and the size of the corporate depositors—obviates the need for insurance.

H.R. 4879 also includes an amendment agreed to by the committee which extends FDIC insurance coverage to banks operating in the Trust Territory of the Pacific Islands. This amendment would make FDIC insurance parallel FSLIC insurance.

In my opinion these amendments to the Federal Deposit Insurance Act are truly noncontroversial. They are needed amendments likely to have considerable benefit at no or minimal cost.

Title II of the bill is language originally appearing as H.R. 4515. This title would allow FNMA and FHLMC to assist the various financial institutions which are holding low yielding mortgages to liquify their portfolios.

In some cases this will be accomplished by means of a swap program where mortgages will be exchanged for participation certificates guaranteed by FHLMC. Those certificates can be used to collateralize loans at better terms than if the mortgages were used directly.

In other cases the mortgages will be purchased directly from an institution. Although the institution will show a loss on the sale, it will have additional cash to meet its needs. This purchase authority will also be expanded in order to permit sales from the FSLIC

and FDIC to FNMA and FHLMC. The assets sold by the insuring agencies would come to them through their authority to assist the purchases and mergers of troubled financial institutions.

Mr. Speaker, while FNMA is not yet at the limit of its capacity to purchase older mortgages, FHLMC has virtually exhausted the 20-percent basket in current law which limits its authority. Without rapid enactment of this bill, a useful tool in managing the portfolios of troubled institutions will cease to be effective.

I urge my colleagues to support passage of H.R. 4879.●

Mr. WYLIE. Mr. Speaker, I yield 5 minutes to the gentleman from Texas (Mr. PAUL).

Mr. PAUL. Mr. Speaker, when these bills were in the Committee on Banking, Housing, and Urban Affairs there were two separate bills, H.R. 4879, the International Banking Facility Deposit Insurance Act, and H.R. 4515, the removal of certain limitations on Fannie Mae and FHLMC purchase authority. I have no objection to the first portion, the International Banking Facility Deposit Insurance Act. However, the second portion of the bill, which is now title II, removing of certain limitations on the purchase of mortgages, I do have objection and I would like to express that.

Mr. Speaker, as a general rule, I like short bills. Even though H.R. 4515 is short, however, I must oppose it, for the American people will be regretting we passed it for a long time to come.

It seems harmless enough: It allows the Federal National Mortgage Corporation and the Federal Home Loan Mortgage Corporation to purchase unlimited quantities of old residential mortgages. At the present time, I understand, these agencies are permitted to have no more than 20 percent of their portfolios by volume invested in mortgages more than 1 year old.

This change is very significant. Originally, these agencies were intended to provide secondary mortgage markets for new mortgages. As secondary marketeers, Fannie Mae and Freddie Mac stand virtually alone. The idea, for whatever merits it had, was to provide a secondary market for mortgages so that the housing industry would not stagnate.

With this bill, we are seeing the purpose of these agencies change. Originally they could hold only 10 percent in old mortgages, then the ceiling was placed at 20 percent. Now it will be removed entirely. By passing this legislation, we are changing the primary purpose of Fannie Mae and Freddie Mac from providing a secondary market to bailing out the mortgage lenders that are stuck with virtually worthless mortgages—the mortgages the Government encouraged them to make in the first place.

In exchange for these old mortgages, the mortgage lenders will receive certificates that they can take to the discount window of the Federal Reserve and get a temporary bailout. In a letter to Senator JAKE GARN, the President of Freddie Mac writes:

> The SWAP program provides lenders a number of advantages in dealing with a portfolio of low yielding mortgages. In a SWAP transaction, the lender receives participation certificates in exchange for low coupon mortgages. The lender is not required to show a regulatory or accounting loss * * *.

This means, of course, that when the lender sells the mortgage to the Corporation, the sale is at par value, not market value. But let me continue reading the letter:

> The participation certificates which the lender obtains in exchange for the mortgages are instruments which may be used as collateral for loans to meet both short-term and long-term needs of the institution * * *. For example, participation certificates may be used as collateral for borrowings at the Federal Reserve Board discount window recently opened to savings and loan associations. Mortgages would be far less attractive for this purpose.

Significantly, this is the first example of how a savings and loan will be able to use these participation certificates that Mr. Brinkerhoff cites. Is this the principal use for the certificates? That would seem to be the case.

Last year, Congress passed the Monetary Control Act which opened the discount window to savings and loans for the first time. During the past year, the savings and loans have had some difficulty borrowing from the Fed, and this bill is designed to remove that difficulty.

I further understand that there is no limit on the aggregate amount of mortgages that the two corporations, we are discussing here today, can buy. I realize that there is a limit on the size of any specific mortgage, but there is no overall limitation. One of the questions that bothers me when I look at how this bill and the Monetary Control Act fit together, as a hand fits a glove, is: Will the Fed throw open its discount window to every mortage lender in the country? Have we any assurances that the below market, that is, inflationary, loans from the Fed will be held to a minimum? I have heard none. Rather, in recent days the Fed seems to be moving to accommodate a reflation, and using the discount window could be one way to do it.

So, Mr. Speaker, I conclude with a question: Is not this bill a virtual guarantee of further inflation and higher interest rates? Are we not pursuing a policy of patching up a jerry-built system that cannot endure? Are we not, in fact, taking an extremely shortsighted view of things, hoping that we can avoid a calamity on the short run? I think that we must answer all these questions "Yes." And that is why I am opposed to this bill and urge my colleagues to vote against it.

No country has ever solved the problems brought on by inflation with more inflation. And neither will we. Inflation will only stop when we quit monetizing debt and adopt a sound monetary standard based on gold.

Mr. WYLIE. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. WORTLEY).

Mr. WORTLEY. Mr. Speaker, I rise in strong support of H.R. 4879, legislation to exempt international banking facilities from Federal Deposit Insurance assessments.

Enactment of this legislation will have residual effects upon our economy. More jobs and new businesses are compelling arguments for enactment of this legislation, not to mention increased tax revenues for the Federal Treasury.

I urge the favorable adoption of this legislation and yield back the balance of my time.

Mr. WYLIE. Mr. Speaker, I have no further requests for time and yield back the balance of my time.

Mr. ST GERMAIN. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Rhode Island (Mr. ST GERMAIN) that the House suspend the rules and pass the bill, H.R. 4879, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to clarify the treatment of international banking facility deposits for purposes of deposit insurance assessments and to remove certain limitations on the mortgage loan purchase authority of the Federal Home Loan Mortgage Corporation and the Federal National Mortgage Association."

A motion to reconsider was laid on the table.

□ 1830

GENERAL LEAVE

Mr. ST GERMAIN. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous material on the legislation just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Rhode Island?

There was no objection.

COMPENSATION OF CERTAIN TENNESSEE VALLEY AUTHORITY EMPLOYEES

Mr. FLIPPO. Mr. Speaker, I move to suspend the rules and agree to the concurrent resolution (H. Con. Res. 203) requesting certain reports relating to the Tennessee Valley Authority Act of 1933, and prohibiting certain transactions by the Board of Directors of that Authority.

The Clerk read as follows:

H. CON. RES. 203

Whereas the Tennessee Valley Authority is an agency of the Federal Government;

Whereas the rate of compensation for all employees of the Federal Government is capped by the joint resolution entitled "Joint resolution making continuing appropriations for the fiscal year 1982, and for other purposes", approved October 1, 1981 (Public Law 97-051); and

Whereas is is the intent of Congress that no employee of the Tennessee Valley Authority shall be paid at a rate of compensation that exceeds the Federal pay cap: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That the Board of Directors of the Tennessee Valley Authority shall hereafter present a detailed report to Congress and the Office of Management and Budget formally requesting any amendments to law relating to compensation of employees which the management of that Authority deems necessary; and such Board of Directors shall not implement any program the effect of which would be to provide compensation for any employee of such Authority in excess of the statutory Federal pay cap.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Alabama (Mr. FLIPPO) will be recognized for 20 minutes, and the gentleman from Arkansas (Mr. HAMMERSCHMIDT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Alabama (Mr. FLIPPO).

Mr. FLIPPO. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Concurrent Resolution 203 expresses the intent of Congress that no employee of the Tennessee Valley Authority shall be paid at a rate of compensation that exceeds the Federal pay cap. The resolution is a bipartisan measure sponsored by all the Members of this body whose districts are served exclusively by TVA. It was reported from the House Public Works and Transportation Committee without dissent. The resolution directs the Board of Directors of the TVA to present a detailed report to Congress and the Office of Management and Budget formally requesting any amendments to law relating to compensation of employees which the management of that Authority deems necessary. Finally, it provides that the Board shall not implement any program, the effect of which would be to provide compensation for any employee of the Authority in excess of the statutory Federal pay cap.

Section 3 of the Tennessee Valley Act (49 Stat. 58) provides that no regular officer or employee of the Authority shall receive a salary in excess of that received by the members of its Board of Directors. The members of the Board of Directors are currently paid a salary at executive level IV which is $52,750 per year. This salary, as well as that of other Federal employees, is subject to the pay cap contained in the joint resolution making continuing appropriations for the fiscal year 1982 (Public Law 97-51).

On October 7, 1981, without notice, hearings or an opportunity for public comment, the Board of Directors approved a plan for offering retention contracts to some 75 management personnel. Board members said the retention contracts would encourage qualified personnel to remain with the Authority. Under these contracts selected managers would agree to work for TVA for a period of 3 years. In consideration of this, TVA would pay a retention amount of up to $36,000 per year over and above current salary levels. This would place the compensation paid these personnel above the level received by members of the Board and above the statutory pay cap for Federal employees. The maximum for base salary and retention contract would be $88,700 per year. The total annual first-year costs associated with this plan are some $1,000,000. The costs would be recovered through power system revenues, which are derived from sale of electricity to cooperatives and municipalities, 65 percent; industries, 21 percent; and the Federal Government, 14 percent.

In an effort to find a loophole to circumvent the Federal pay cap and the provisions of the TVA's own charter, the TVA Board has attempted to expand the distinction between the terms "salary" and "compensation" as used in the TVA Act.

The House Public Works and Transportation Committee finds that the difficulty associated with the TVA's position is that there is no legislative history indicating that Congress intended such a distinction in terms when it passed the TVA Act in 1933.

The language of the TVA Act indicates the congressional authors of the act were concerned with compensation of employees, both salaried and hourly. While the TVA Act gives great flexibility to the Authority in many areas, the establishing of salaries is specifically limited in section 3. Beyond that, the Congress expressed an interest in almost all of the salaries and wages paid to those engaged in the electric power program. In section 9(a), the Authority is required to report to the Congress annually the payments to power system employees earning more than $1,500 a year. This reporting level accounted for about 80 percent of the employees in the early days of the Authority.

Pay differences between TVA managers and those in private industry is nothing new. Significant differences existed when the TVA was created in 1933. Again, in 1938 when a joint committee examined a broad range of TVA activities, spokesmen for the Authority cited vast differences in pay of management employees compared to rates in private industry. Pay differences existed in 1959 when the Authority was put on a self-financing basis for the electric power program. It is obvious the differences continue to exist today but this is insufficient reason for the TVA Board to act with such haste to put in place the retention bonus program.

In view of the absence of clean authority, the committee feels that the TVA should be very conservative in its interpretation of its authority to approve plans such as retention contracts. The action of the Board in approving these contracts raises serious questions as to whether section 3 of the TVA Act and the statutory cap on Federal salaries have been violated. It also raises serious questions of equity concerning the pay of TVA employees in relation to that of other Federal employees. In this connection, the committee notes that if the retention contracts are considered proper, then there is, in fact, no limit on the amount of pay which can be received by the management employees and, for that matter, all other TVA employees.

Action by this body on this resolution is essential at this time because in the past when TVA or other agencies of Government have exceeded the authority of their charter, the failure of the Congress to protest the action has been cited in the courts as reason enough to sustain the action the action and allow it to stand.

In view of the above issues, the committee intends to conduct a thorough investigation into this matter. It is my hope that the statements by the Authority will be examined in detail.

The committee intends that the retention contract plan not be implemented until clear statutory authority has either been established or enacted into law.

Mr. Speaker, I yield such time as he may consume to the distinguished chairman of the full committee, the gentleman from New Jersey (Mr. HOWARD).

Mr. HOWARD. Mr. Speaker, I rise in support of the resolution.

The Tennessee Valley Authority, in approving a plan to pay some of its managers up to $36,000 per year above their current salary if they agree to stay with TVA for 3 years, has raised some very serious questions. As my colleagues have pointed out, TVA em-

ployees are Federal employees, and are subject to the statutory pay cap. The extra payments for agreeing to remain with TVA would place the compensation of these employees above the pay cap. It would also be above the salary received by the Authority's Board of Directors. Yet section 3 of the TVA Act provides that employees shall not receive a salary in excess of that paid members of the Board.

The resolution directs TVA to formally request from OMB and Congress any amendments to law relating to compensation of employees it considers necessary. It also directs TVA not to implement any program which would have the effect of providing compensation to any employee in excess of the Federal pay cap.

This will insure that our committee and the Congress will have an adequate opportunity to examine this important matter and to take appropriate action. I urge passage of the resolution.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of House Concurrent Resolution 203. I believe it is most important that we receive more information about the situation regarding TVA employees before additional compensation or other actions are approved.

On the one hand I agree that there does not seem to have been a congressional intent to allow the additional compensation for TVA as proposed. On the other hand I am most concerned that the key technical and managerial employees within TVA may be leaving and there may be some difficulty in replacing them. It is because of this that I support the committee conducting a thorough investigation into what extent compensation and other conditions may be contributing to any loss of TVA's valuable and skilled employees. Until this investigation has been completed, I think it is appropriate that the statutory pay cap remain in place as it does for other Federal employees.

Again, Mr. Speaker, I support House Concurrent Resolution 203 and ask my colleagues to do likewise.

Mr. FLIPPO. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Tennessee (Mrs. BOUQUARD).

Mrs. BOUQUARD. Mr. Speaker, I rise in support of House Concurrent Resolution 203, and I urge my colleagues to support the passage of this legislation. Those of us who represent districts served by the Tennessee Valley Authority have unanimously introduced this measure in a bipartisan approach to solve a most troubling situation, that has developed as a result of the TVA's obvious effort to circumvent the pay cap for Federal employees. A GAO opinion states the bonus plan violates the TVA Act as well as the intent of the Federal pay limitations. The very nature of this convoluted pay raise is ample testimony to the intent of the TVA in this regard.

The Tennessee Valley Authority has long enjoyed unparalleled independence for a Federal agency. In many respects, this autonomy was necessary since production and sale of electricity is, by law, financed solely by TVA and not by the use of appropriated funds. But, the action of the TVA in approving a questionable pay raise, one which was consciously denied by this Congress to other Federal agencies, has raised fundamental questions about the independent status of this agency. Most utility customers in this Nation, whether served by private or public utilities, enjoy the protection of public utility commissions, or similar agencies, which can examine the necessity for rate increases and other operating policies. The ratepayers of the TVA have no such protection, they are quite simply at the mercy of the TVA board when it comes to decisions such as the implementation of this dubious bonus system. It is precisely this lack of protection which we are attempting to correct in this legislation.

While those of us in the Congress who represent districts served by the TVA do not have any official role to play in the development of policies such as this bonus plan, we have serious reservations about the justification for this increase. I am told by individuals familiar with the operations of the Tennessee Valley Authority that the argument that this increase is necessary to retain qualified personnel is highly suspect. In fact, according to these individuals, the loss of such employees may be far more a result of recent TVA policy decisions than the result of dissatisfaction over compensation. I raise this issue simply to make clear to those of my colleagues from other parts of the country that there is question over the assumptions used by TVA to justify the increases.

Finally, Mr. Speaker, as is clear by the language of this resolution, it is not legally binding on the TVA. It is, as it is intended to be, a clear and unequivocal expression of the disapproval of the Congress of this bonus system. If, however, TVA chooses to ignore this action—and I say to my colleagues that there are some TVA officials recommending just that—then we will come back to you with mandatory legislation to roll back this exorbitant pay raise.

I sincerely hope that TVA will now act responsibly and withdraw this plan.

I urge the overwhelming approval of this resolution.

□ 1840

Mr. FLIPPO. Mr. Speaker, I yield such time as he may consume to the gentleman from Tennessee (Mr. JONES).

Mr. JONES of Tennessee. Mr. Speaker, I rise in support of House Concurrent Resolution 203. As a cosponsor of the resolution, I want to express my thanks to the committee for its expeditious handling of this measure.

At a time when the taxpayer at large and electric rate payers in the TVA service area are facing reductions in Federal spending but higher and higher electric rates, I think the approval of the TVA salary schedule was totally uncalled for.

I have expressed my opposition to this situation from the outset and will continue to do so. I recognize the problems that face the TVA Board of Directors in retaining experienced and capable executives. However, I think the approval of the salary raises was in violation of the TVA Act and the intent of Congress with respect to TVA pay schedules.

I might add that I just received a copy of the General Accounting Office report that was requested on this matter. It likewise agrees that the TVA Board's action was a violation of its charter. That only confirms what those of us from the Tennessee River Valley have contended since being informed of this action.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield 3 minutes to the distinguished ranking member of the Rules Committee, the gentleman from Tennessee (Mr. QUILLEN).

Mr. QUILLEN. Mr. Speaker, this is a very good resolution. I am happy that the committee acted in an expeditious way to bring it to the floor of the House. I think we should take a look at what the Board of Directors of TVA are now doing.

I remember when I first ran for Congress, some 19 years ago, if you said anything bad about TVA you could not be elected. Now if you say anything good about TVA, it is questionable.

I think what is happening within the Board of Directors is that they are taking action behind closed doors and saying to heck with the ratepayers, and even to heck with what the Congress of the United States does.

They have openly said, as reported in the newspapers, that it does not matter what the Congress does in regard to the rate raise or the increase in pay, that they are going to go ahead with it anyway.

Now to me that is thumbing their nose at the Congress of the United States.

I commend the committee for its action in bringing this concurrent resolution to the floor today and also for

the proposed hearings that may be held in regard not only to this pay raise, but other activities as well.

I think that the TVA Board of Directors should consider the ratepayers of the valley. They cannot keep adding burden after burden, burden after burden on their shoulders, and expect them to pay without any complaints.

The complaints have been many. The rates are very high. Yet behind those closed doors the Board of Directors are choosing to operate on their own initiative. They continue to do things that the American people question, that the American people do not approve, and that especially the ratepayers do not approve.

For instance, behind closed doors without any notification, until it was leaked to the press, they decided to close certain nuclear facilities without rhyme or reason, and they did so because the TVA Act itself is broad and they have great power.

I would like to see the TVA Act reopened. I was glad to hear the gentlewoman from Tennessee say that if this concurrent resolution is not put into effect then she will offer a measure to open it up, and I commend her for that and I will join her in that endeavor.

So, Mr. Speaker, I urge the adoption of this resolution. I urge the committee to hold hearings and I think it is time that we let them know that this Congress is not going to be ignored.

Mr. FLIPPO. Mr. Speaker, I yield such time as he may consume to the gentleman from Tennessee (Mr. BONER).

Mr. BONER of Tennessee. Mr. Speaker, what we have here is a classic case of the straw that broke the camel's back. House Concurrent Resolution 203, of which I am a cosponsor, is in response to a pay plan which was adopted on October 7, 1981, by the Board of Directors of the Tennessee Valley Authority. The House concurrent resolution sponsored by my colleague from Alabama expresses the sense of the Congress that the Board shall not institute these pay raises. Under this plan, 75 TVA executive officers could receive up to $36,000 per year in addition to their regular salaries as a "retention contract." This action by the Board constitutes an action which means no more than an additional $1 million per year in the budget of a $4 billion Federal utility.

While this might appear to be comparatively insignificant amount, it is the final straw. The real issue is not the Board's incurring of a debt of .0004 percent of their operating budget; but rather the manner and the method which they endeavored to take this action. In effect, the TVA Board has declared that they are not responsible to the Congress of the United States. Such an insubordinate attitude cannot and shall not be allowed to stand.

Yesterday, the General Accounting Office issued an advisory opinion which stated that the action by the Tennessee Valley Authority Board was made "without the authority of law." After discussing the potential necessity of amending the organic charter with my colleagues from the TVA service area, I must report that there is a great deal of interest to amending the TVA charter if the Board refused the recommendations contained within the GAO advisory opinion.

Mr. Speaker, I respectfully urge my colleagues to support the Tennessee Valley Authority delegation in passing this concurrent resolution unanimously and by so doing, send a clear and direct message to the Board of the TVA that they must return, first and foremost, to the basic charge contained in the TVA charter, to produce electrical power "at the lowest possible rates."

● Mr. ROE. Mr. Speaker, House Concurrent Resolution 203 expresses the intent of Congress that no employee of the Tennessee Valley Authority shall be paid at a rate of compensation that exceeds the Federal pay cap. It directs the Board of Directors of the TVA to present a detailed report to Congress and the Office of Management and Budget formally requesting any amendments to law relating to compensation of employees which the management of that Authority deems necessary. Finally, it provides that the Board shall not implement any program, the effect of which would be to provide compensation for any employee of the Authority in excess of the statutory Federal pay cap.

Section 3 of the Tennessee Valley Act (48 Stat. 58) provides that no regular officer or employee of the Authority shall receive a salary in excess of that received by the members of its Board of Directors. The members of the Board of Directors are currently paid a salary at executive level IV which is $52,750 per year. This salary, as well as that of other Federal employees, is subject to the pay cap contained in the joint resolution making continuing appropriations for the fiscal year 1982 (Public Law 97-51).

On October 7, 1981, the Board of Directors approved a plan for offering retention contracts to some 75 management personnel. The stated reason was an attempt to stem further losses of qualified personnel to private industry. Under these contracts the manager would agree to work for TVA for a period of 3 years. In consideration of this, TVA would pay a retention amount of up to $36,000 per year over and above current salary levels. This would place the compensation paid these personnel above the level received by members of the Board and above the statutory pay cap for Federal employees.

The action of the Board in approving these contracts raises serious questions as to whether section 3 of the TVA Act and the statutory cap on Federal salaries have been violated. It also raises serious questions of equity concerning the pay of TVA employees in relation to that of other Federal employees. The committee intends to conduct a thorough investigation into this matter, and will then consider what actions are appropriate to correct this situation. The committee intends that the retention contract plan not be implemented until clear statutory authority has either been established or enacted into law.●

● Mr. BEARD. Mr. Speaker, while I rise in support of this resolution, I must point out that I think it absurd that this body must take valuable time to discuss an action that will have no binding effect whatsoever. The Tennessee Valley Authority is a creation of this body, yet we seem to have very limited oversight capabilities.

At my request, the General Accounting Office has issued an opinion regarding this outrageous bonus plan, and as I had reported 3 weeks ago, their finding is that TVA has violated its own charter. In fact, the language of the GAO report is remarkably similar to that of a lawsuit I have filed in U.S. district court in middle Tennessee. In my lawsuit, I content that TVA has not only violated the 1933 TVA Act, but they have also violated Congress own law passed in October of last year setting a cap on the salaries of Federal employees.

Mr. Speaker, this bonus plan represents the most arrogant action taken by a Federal agency in my 9 years in Congress. It comes in the wake of the most recent of TVA's ever-spiraling rate increases, and has served only as an insult to ratepayers in eight States who are finding it increasingly difficult to pay their electric bills. In rather extensive travels in my own State, I have found people angrier than at any time in memory.

And yet, TVA told those of us in the valley delegation that the scheme was not only necessary, but that it was also legal. In the first place, they have yet to present the supporting material I requested that would supposedly justify paying 75 employees up to $36,000 a year in so-called retention bonuses. But the most amazing thing is that their chief counsel offered a document purporting to show that the scheme was legal—all because TVA has the authority to set compensation for its employees. And to back up his legal scholarship, he sought expert, outside advice from a Washington law firm. I wonder how outside that advice is, as it came from a retired TVA chief counsel who has been paid up to $100 an

hour for the chance to back up his former employers.

Mr. Speaker, this problem of retention on the part of Government of top management personnel is a serious one. I personally feel that we in the Congress will have to find the guts to face it someday soon. But I think we would all agree that the approach not to take is to allow one Government agency stage an obvious end-run around the law. I do not think any of us would want to allow that at any time, but for TVA to attempt such a presumptuous act at this particular time should serve as only a slap in the face of every taxpayer in the United States. In an attempt to bring Government spending under control, all sectors of our society have been asked to make sacrifices. And now—if the TVA Board is allowed to have it their way—people like TVA's Director of Occupational Health and Safety, its Director of Information, its learned General Counsel and eight of his assistants, would all be allowed to make more money in 1 year than the Vice President of the United States. I think that the Members of this House would agree that such a notion is too ridiculous to warrant serious consideration.

But the problem here, Mr. Speaker, is far more serious than it might appear. Are we facing an intergovernment dispute of crisis proportions? It would seen to me that we are. Here we have a huge quasi-governmental agency producing power in three States for 2.7 million ratepayers. It employs 48,000 men and women. It actually operates its own construction force of such enormous size as to qualify it as the third largest in the world. In short, its impact on an entire region of the country is staggering, and yet we in the U.S. House of Representatives find ourselves debating a resolution that would only slap the hand of its own creation. Today's action—and I hope it will be unanimous—will nonetheless be useful. I would hope that it will give the members of the TVA Board one last opportunity to realize the error of their ways and immediately rescind their bonus plan.

But in the long run Mr. Speaker, we are going to have to find a better method of Congress providing oversight—not only for the Tennessee Valley Authority—but also for the growing number of other agencies whose charters have been drafted in such a fashion as to terribly confuse the lines of authority. The problem we are addressing today may be repeated throughout Government if we do not find a remedy. If this resolution fails to accomplish that, I am still hopeful that my lawsuit will be able to enforce the laws we have made here in this Chamber. Thank you.●

● Mr. DUNCAN. Mr. Speaker, the Tennessee Valley Authority was created by Congress in 1933 to provide electricity at the lowest possible rates to the people of the valley. Congress has retained the right to set the salaries of the Directors of the Authority, which in turn places a cap on the salaries of the employees of the agency. The present Board of Directors, however, has taken an action which circumvents this cap by creating a retention contract for up to 75 top managers. House Concurrent Resolution 203 makes clear the intent of Congress and prevents the implementation of this retention contract plan, which the General Accounting Office has ruled is illegal. It is the responsibility of Congress, not the Board of Directors, to set the cap for these salaries.

Even if this plan were legal, there is no justification for the Board's action. To this day the Board does not know who will receive the retention contracts. There is no documentation to support the Board's contention that executives are leaving the agency for higher salaries. The Authority only recently set up a program for exit interviews. The fact is only 12 executives have left the power operations in the last 2 years. Half of these retired. It does not seem to me that these figures justify a $1 million program, whatever its purpose, which will be paid for by the ratepayers in the valley. The employees who have left the agency have spent an average of 25.3 years in the Authority. If TVA's argument is that it is becoming a training school for the private sector, then these employees are certainly spending a lot of time in school.

TVA has overstated its need for this plan to the public. According to a General Accounting Office report, which I requested, TVA has had little difficulty in filling 10 positions in the agency. The promise that these contracts will enhance the safety of TVA's nuclear powerplants fails to point out that only four of the positions apparently eligible for such contracts deal with the day-to-day operations of these plants.

I would also like to point out the comparison to the private sector which TVA feels justifies its need for higher salaries. A story in the October 28 Knoxville Journal compares the agency to the Southern Co., which is basically similar in power operations to TVA. The story states:

> Among Southern's four subsidiaries, 29 executives make more than $50,000 a year. At TVA, 75 people who work in part or in whole in power operation * * * make more than $50,000 a year.

What will be the consequences of this action? If TVA can take from its power revenues to enrich its management, might not other agencies follow suit? This is a factor which must be considered.

There is also the matter of the morale of the agency's employees, in particular those who recently lost a hard-fought campaign for a higher cost-of-living increase. How must these employees feel now as they watch their managers take a hefty pay raise? James W. Eickman, acting secretary of the Salary Policy Employee Panel, wrote to me and expressed the betrayal these workers feel. "Employee morale has suffered to the extent that energy production, productivity, and safety may be in jeopardy, although employees have been counseled repeatedly that any kind of work action is illegal," Eickman said. The Board had ample time to consider the impact on morale of these retention contracts. According to a story in the Knoxville News-Sentinel a TVA manager warned other managers of the situation in a memorandum issued a week before the Board voted on the retention contract plan. "Several main (and unfortunately concurrent) factors in recent weeks have combined to cause a major impact on employee attitudes and probably morale," the memorandum stated. The story goes on to note that despite these warnings "over 'only modest' pay increases and other events, the Board approved the pay bonuses which amount to 70-percent raises for some top managers."

Finally, let me ask this question. Do these managers deserve a 70-percent-pay raise at a time when we are trying to control the rapid escalation of salaries? If you ask the people of the valley I believe you would receive a resounding no. This sentiment was expressed most clearly in the letters to the editor of the News-Sentinel the Sunday after the bonus pay plan was adopted by the Board.

It is Congress role and responsibility to determine the pay cap for Federal agencies. It is a responsibility we do not take lightly. Yet the TVA Board has overridden this role. We must act to encourage the Directors to work within the system to achieve their goal. I urge my colleagues to support this resolution so that we may find an orderly and intelligent solution to this problem. At this point I include the following letter:

COMPTROLLER GENERAL OF THE UNITED STATES,
WASHINGTON, D.C., *November 16, 1981.*

Hon. JOHN J. DUNCAN,
House of Representatives.

DEAR MR. DUNCAN: We refer to your letter dated October 9, 1981, concerning the plan adopted by the Tennessee Valley Authority (TVA) on October 7, 1981, to provide certain cash payments to its top management officials in addition to their regular salaries. You say that this plan appears to be in conflict with the TVA Act, and you have therefore asked that we conduct a study on the legality of the plan.

Enclosed is a copy of our advisory opinion in which we concluded that the plan improperly contravenes the TVA Act.

Essentially, section 3 of the TVA Act, 16 U.S.C. 831b, prohibits TVA employees from receiving a "salary" in excess of that received by members of the TVA Board of Di-

rectors, but it also authorizes the Board to otherwise fix the employees' "compensation." Members of the TVA Board of Directors under the terms of 5 U.S.C. 5315 hold positions at level IV of the Executive Schedule, and their salary or "basic pay" is therefore limited to $52,750 per annum. Thus, the salaries of TVA's top executives, managers, and engineers are also limited to $52,750 per annum.

The TVA Board of Directors adopted a resolution at their October 7 meeting approving a plan to pay up to 75 TVA executives a yearly amount of up to $36,000 in addition to their regular salaries. Those executives would thus receive more yearly pay under the plan than the annual salary or "basic pay" prescribed by law for members of the TVA Board of Directors.

TVA officials have suggested that the additional pay would constitute "compensation" but not "salary" under the terms of section 3 of the TVA Act, and that the new pay plan is therefore legally permissible. Since 1955 the TVA has construed the word "salary" as used in section 3 of the TVA Act as meaning an employee's "basic compensation," or "annual rate of compensation," not including overtime compensation, occasional bonuses, retirement fund contributions, and miscellaneous fringe benefits. We agree with that construction of the statute. However, the new pay plan was clearly designed to circumvent the statutory limitation on salary, and in our view the additional pay would constitute a part of an executive's basic "annual rate of compensation," i.e., his "salary." It is therefore our opinion that the new pay plan improperly contravenes the salary limitations imposed by section 3 of the TVA Act.

While it is our opinion that the new pay plan adopted by the TVA is not authorized by law, TVA contends it is experiencing difficulties in recruiting and retaining top executive talent due to the existing salary limitations imposed by statute. Due to what has commonly come to be known as Federal executive "pay compression," the purchasing power of level IV executive pay had decreased by about 40 percent since 1969 as the result of high levels of inflation during the intervening years. This has caused personnel recruitment and retention problems throughout the Federal Government. Our July 31, 1980 report, "Federal Executive Pay Compression Worsens" (FPCD-80-72), discusses this problem more fully. In that report we recommended the Congress take action to correct the "pay compression" problem that exists generally throughout the Federal establishment. We suggest this general problem be taken into account in any specific remedial legislative action taken with respect to the TVA's new pay plan.

In your letter of October 9 and a subsequent letter dated October 16 you also posed a number of specific factual questions about some of the details of the pay plan and the effects it would have on TVA's ratepayers. Members of our Energy and Minerals Division have provided your staff with the answers to those questions.

We trust this will serve the purpose of your inquiry.

Sincerely yours,

CHARLES A. BOWSHER,
Comptroller General of the United States.●

● Mr. CLAUSEN. Mr. Speaker, I rise in support of House Concurrent Resolution 203 and urge my colleagues here this afternoon to do likewise.

As I understand the situation, the Tennessee Valley Authority must compete with the industrial sector for the kind of specialized talent that is necessary to plan, manage, and operate the major energy facilities that are part of TVA. The salary in industries for people occupying positions similar in responsibility to those of much of TVA's top management sometimes exceeds four times that which can be paid to TVA employees because of the restrictions contained in section 3 of the enabling statute. This is a situation that is not well designed to lead to the recruitment and retention of the kind of high quality talent needed to operate TVA's nuclear and coal fired powerplants safely and efficiently. I believe this is a very important matter and one which deserves increased attention by the committee in the very near future. In this context I am most pleased that the committee has committed itself to conduct a thorough investigation into this matter to examine, among other things, whether TVA may be losing valuable and skilled employees at a greater rate than similar agencies and industries and to what extent compensation or other conditions may be contributing to any such losses.

Mr. Speaker, while I do have these very serious concerns regarding the need to assure TVA's ability to operate safely and efficiently, I believe the restriction on salary contained in section 3 of the TVA Act is clear. Until we raise that ceiling legislatively or somehow soften its restrictive nature, I believe it is appropriate that no action be taken by TVA which could have the effect of circumventing the act's requirements. Therefore, Mr. Speaker, I support House Concurrent Resolution 203, urge its adoption here this afternoon, and also assure my support and cooperation during the committee's effort as a matter of high priority next session to examine TVA's salary structure needs.●

Mr. FLIPPO. Mr. Speaker, I have no further requests for time.

Mr. HAMMERSCHMIDT. Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Alabama (Mr. FLIPPO) that the House suspend the rules and agree to the concurrent resolution, House Concurrent Resolution 203.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

□ 1850

GENERAL LEAVE

Mr. FLIPPO. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the concurrent resolution just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Alabama?

There was no objection.

DENYING TAX DEDUCTION FOR EXPENSES OF ADVERTISEMENTS IN FOREIGN BROADCAST UNDERTAKING AND DIRECTED PRIMARILY TO A U.S. MARKET—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read, and without objection, referred to the Committee on Ways and Means.

(For message, see proceedings of the Senate of today, November 17, 1981.)

TAX CUT ACCELERATION NEEDED

(Mr. SMITH of Alabama asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SMITH of Alabama. Mr. Speaker, I rise to express my support for legislation to accelerate the tax rate reductions that will be introduced today by my colleague from the State of Pennsylvania, the Honorable ROBERT WALKER. This measure would move the effective dates of the tax reductions included in the Economic Recovery Tax Act forward from July 1982 and 1983 to January 1982 and 1983. This bill will stimulate and speed economic recovery.

I am reminded of the words of Albert Einstein who recognized that "all that is valuable in society depends upon the opportunity for development afforded an individual." The American people historically have shown that when given the incentive and opportunity, they are the most productive people on Earth. I firmly believe the American people do not want to return to the age-old past of tax-and-spend. They want to see this country return to a can-do spirit that made America the industrial giant she is today. I have confidence that when the American people realize that we in Congress still subscribe to earning what you get and keeping what you earn, productivity will increase and will put our economy back on track and our people back to work.

The economic recovery has not failed. It has not had a chance to work. It has taken the country more

than 30 years to recognize that tax and spend do not solve, but add to our problems and yet some would question why in 6 weeks the administration's economic recovery plan will not control spending that has gone unchecked for more than 1,560 weeks.

We know that stimulating the economy with Federal spending has not worked. For more than 30 years, the American people have been asked to put their faith in a system that has given them 8-percent unemployment and more than 14-percent inflation, eroding their paychecks and robbing them of their savings and security. It is time we put aside the age-old theory that tax-and-spend is good for the economy. We know from experience that tax and spend policies are hazardous to our economic health. It is this school of thought that is responsible for the economic mess we find ourselves in today.

This legislation would give the American worker tax relief now, not 9 months from now and just as importantly it would mean stimulating the economy now rather than later. Unless the Government gives the working people in this country some real relief, high taxes, inflation and over-regulation are going to ruin this Nation's middle class—the people who keep this country running.

LEGISLATION PERMITTING FBI TO CHARGE FEE FOR FBI'S IDENTIFICATION DIVISION SERVICES

(Mr. HUGHES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUGHES. Mr. Speaker, today I am introducing a bill that would permit the Director of the Federal Bureau of Investigation to charge a fee to certain users of the FBI's Identification Division services. Currently, the Director of the FBI is required to collect identification, criminal identification, crime, and other records, and to make these records available for the official use of law enforcement officials of the Federal Government, the States, cities, and penal and other institutions. Although it is not required to do so, the FBI may also exchange these identification records with officials of banks and to State and local governments. The FBI records enable these entities to conduct thorough investigations of applicants for jobs and licenses in areas where security and trustworthiness of the applicant are essential. Without access to these records, these organizations may unknowingly employ individuals who do not meet these qualifications.

Unfortunately, the service provided by the FBI has gotten so popular that the FBI has been unable to keep up with the demand. Response time is often too slow to be of any use to the requesting agency. Especially where the agency making the request for records is a criminal justice or law enforcement agency, the failure to receive the records promptly may be disastrous. We cannot permit this situation to continue. The FBI, in an attempt to rectify the situation, has suspended service for 1 year to all but law enforcement agencies. This would allow them the time to catch up on the backlog in demands, and to update their records. By the time they resume service to banks and State and local agencies for employment and licensing purposes, the FBI believes it will be able to provide prompt and complete information to them.

This suspension of service, while well motivated, creates an enormous problem and places an enormous burden on the agencies that can no longer obtain these essential records. It is difficult, if not impossible, for them to obtain this information elsewhere. Without the information, they will not be able to thoroughly check out the background of potential employees.

There is one other alternative to suspension of service. The FBI can be authorized to charge fees to certain users of the system, to cover its costs of providing the records. The fee would be minimal—just enough to cover the costs of providing the records. It would allow the FBI the necessary funds to run an adequate Identification Division, and would more fairly distribute the burden of the FBI's service. The dissemination of these records to all who rely on them is essential to an effective fight against crime. My bill would permit the FBI to continue this service. But the FBI should not be required to shoulder the entire burden. The Federal Government must be a partner with the users of the system.

WEAK CLIENTS

(Mr. MILLER of California asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MILLER of California. Mr. Speaker, yesterday the administration tried again to continue a theory that we now know has been repudiated by their own Budget Director, David Stockman. By seeking to cut 5 percent across the board from the continuing resolution, the Republicans proceeded to deny the truth that has recently been revealed.

Even Stockman admits that when he put together his list of "really fierce, blood-and-guts stuff—widows' benefits and orphans' benefits, things like that. Still it did not add up to $40 billion." And, my friends, we have already made some of those cuts and we have begun to see results:

Hundreds of thousands of schoolchildren have already dropped out of the school lunch program. Not just those Mr. Stockman considers weak claimants—upper income children who enjoy a marginal subsidy—but rather "weak clients," low-income children for whom we know the school lunch program provides nearly half of their daily nutritional needs.

Had the Michel amendment succeeded, that mere 5 percent across-the-board cut would have removed 100,000 low-income women, infants, and children, all certified to be at nutritional risk, from the supplemental feeding program for women, infants and children—a program which repeatedly has been proven effective on medical, nutritional, and cost measures. The administration, though, never even heeded its own equity principle. As early as March, the Reagan budget would have drastically slashed the WIC program—removing 700,000 pregnant and lactating women, infants, and children from participation. Despite Congress unanimous rejection of this approach, by September, the administration proposed cuts eliminating 800,000 participants.

These are hardly weak claims, but unfortunately they are weak clients, clients who cannot afford to pay hundreds of Washington lobbyists to press their case. And, as we have now been told, weak clients suffer and have already suffered for their weakness.

The Michel amendment would also have slashed another 5 percent from the already weakened elementary and secondary education program for disadvantaged youngsters (title I). Secretary of Education Bell has repeatedly testified to title I's successes in meeting the undisputed needs of this group of children. "But," he said, "that's where the big money is." Again, the claims of effectiveness are strong, the clients, unfortunately, weak.

These are a few of the most egregious examples.

The fact is that this administration has set in motion an open-door policy for special interests to plunder every social program they could. Whatever they could steal from the social side of the ledger to plough back into defense and tax loopholes they did. But the greed level rose out of control. This administration has been "as intimidated by the squeaking wheel" as any in the history of our country.

For not only have Republicans been unwilling to acknowledge the "swamp of $10 to $20 to $30 billion of waste in the defense budget," but they gave away billions to powerful clients with weak claims in the tax bill.

"One could go on at great length searching for balance and equity in the outcome of the Reagan program

without satisfying the question." Unless this administration and this Congress reconsider the billions given away through the tax cut and the billions thrown at the Pentagon, even the slightest hint of equity will be lost.

□ 1900

DR. RUBEN METTLER, CHAIRMAN OF THE BOARD AND CHIEF EXECUTIVE OFFICER OF TRW, INC.

(Mr. DYMALLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYMALLY. Mr. Speaker, I am indeed honored to take this opportunity to introduce to the Members of Congress, by way of the CONGRESSIONAL RECORD, Dr. Ruben Mettler, chairman of the board and chief executive officer of TRW, Inc.:

Dr. Mettler was elected to his present position in December 1977, after serving as president and chief operating officer since 1969. He has been a director of the company since 1965.

Dr. Mettler serves on the boards of Bank America Corp., Goodyear Tire & Rubber Co., and Merck & Co., Inc. He is a member of the board of trustees of the California Institute of Technology, the Cleveland Clinic Foundation, and the Committee for Economic Development, for which he served as chairman of the Subcommittee on Inflation.

He is also active in a number of business and public service organizations. In 1978–79 he was chairman of the National Alliance of Business (NAB), an organization which helps train and find jobs in industry for the disadvantaged. He and the Secretary of State were cochairmen of the 1980 United Nations Day activities in Washington, D.C. In addition, he is chairman of the national campaign for the United Negro College Fund in 1980 and 1981 and a director of the National Action Council for Minorities in Engineering, Inc. He is a member of the business council, serving as vice chairman in 1961, and the Business Roundtable's Policy Committee, serving as a chairman of its ad hoc task force on economic strategy and its task force on employment policy.

Dr. Mettler has served the Government in advisory capacities, including vice chairman of the Defense Industry Advisory Council (1964–70), chairman of the President's Task Force on Science Policy (1969–70), and a member of the President's Blue Ribbon Defense Panel (1969–70).

Born in Shafter, Calif., in 1924, Dr. Mettler entered Stanford University in 1941. He enlisted in the Navy a year later. While in the Navy, he attended the California Institute of Technology, where he received a bachelor of science degree in electrical engineering in 1944. In 1946, after completing Navy service, he entered graduate school at Caltech and received a master of science degree in 1947 and a doctorate in electrical and aeronautical engineering 2 years later.

Dr. Mettler then became a member of the technical staff of Hughes Aircraft Co. for 5 years, working on advanced aircraft electronic and radar systems. In 1954 he was appointed a full-time consultant to the Department of Defense.

In 1955 Dr. Mettler joined the newly organized Ramo-Wooldridge Corp., where he was a leading participant in the Nation's ballistic missile and early space programs. In 1957 he was assigned responsibility for technical supervision of the Atlas, Titan, Thor, and Minuteman programs. During this time he also was responsible for developing several of the Nation's early scientific satellites, including Pioneer 1, the first satellite to be launched by a private firm.

When Ramo Wooldridge merged with Thompson Products in 1958, Dr. Mettler became executive vice president and then president of TRW Space Technology Laboratories. When the unit became part of the TRW System Group in 1965, he was named president of the group. In 1968 he became assistant president of TRW. He was promoted to president of the company in 1969.

Dr. Mettler received the Eta Kappa Nu award for the Nation's most outstanding young electrical engineer in 1954, and the U.S. Junior Chamber of Commerce named him one of the 10 outstanding young men in America in 1955. In 1964 the Engineering Societies of Southern California elected him engineer of the year. In 1965 the founding members of the National Academy of Engineering elected Dr. Mettler to the organization in recognition of his contribution to engineering theory and practice. In 1966 Dr. Mettler was selected one of 23 alumni to receive the first Alumni Distinguished Service Award given by the California Institute of Technology. In 1979 the National Conference of Christians and Jews honored Dr. Mettler with the organization's National Human Relations Award, and in 1980 Baldwin-Wallace College awarded him an honorary degree, doctor of humane letters. At this point in the RECORD I include the following resolution:

RESOLUTION

Whereas Ruben F. Mettler has been selected to receive the First Annual Roy Wilkins Memorial Award from the Los Angeles Chapter of the National Association for the Advancement of Colored People on November 23, and

Whereas Ruben F. Mettler is a native son whose successful business career has been dedicated to progress in human relations as well as to industrial achievements in science and engineering that have included a part in building Ramo-Wooldridge Corp. in California and its successful merger with Thompson Products to form TRW Inc., and

Whereas he has given unstintingly of his time and resources to help solve the problems of the disadvantaged and the unemployed, chairing the National Alliance of Business for two terms, heading the national campaign of the United Negro College Fund during a record-setting drive in 1980–81, and joining with others in industry to form the newly organized National Action Council for Minorities in Engineering, and

Whereas he has seeked to link business success with corporate responsibility throughout his career, helping the Nation to more nearly realize Roy Wilkins' Dream: Be it therefore

Resolved, That the California State Senate and Assembly salute Ruben F. Mettler as the recipient of the First Annual Roy Wilkins Award to be bestowed by the NAACP in Los Angeles.

THE FIFTH ANNIVERSARY OF THE UKRAINIAN HELSINKI GROUP

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania (Mr. DOUGHERTY) is recognized for 60 minutes.

Mr. DOUGHERTY. Mr. Speaker, today we are commemorating the fifth anniversary of the Ukrainian Public Group to Promote the Implementation of the Helsinki accords. On November 9, 1976, 10 brave people composed a declaration which outlined the aims of the Ukrainian Helsinki Group. Chief among these aims was to report on the Ukrainian situation to the cosigners of the Helsinki accords.

Within 3 months, the leader of this group, Mykola Rudenko, was arrested in Kiev and sentenced to 7 years of strict-regimen labor camp and 5 years in exile. He was found guilty of "anti-Soviet agitation and propaganda", the so-called crime which occurs with such regularity in the Soviet Union. The swiftness of Rudenko's arrest by the Soviet Government symbolizes all too clearly their decision to blatantly ignore the international document they signed in Helsinki.

Adding salt to the wound, Rudenko's wife was also arrested this year, for "disseminating anti-Soviet materials and illegally receiving letters from her imprisoned husband." Many of you may remember the special order the Ad Hoc Committee on the Baltic States and Ukraine conducted in July for Raisa Rudenko, which took place just as we were informed of her arrest. Mr. Speaker, how many years do you think Raisa Rudenko was sentenced to prison for illegally receiving letters from her husband? Was she sentenced to 1 year or 2 years for this terrible crime of receiving a letter from her husband? No, the Helsinki Commission in Washington has learned that Mrs. Rudenko was been sentenced to 10 years of imprisonment. This treat-

ment is unbelievable, and again, I find it indicative of the Soviet attitude toward the Helsinki accords.

The Rudenkos are but two of the millions who have suffered in Ukraine. But their sense of honor in bringing to light human rights violations separate them from many of their countrymen. Many Americans find it difficult to comprehend the life-threatening danger of being a member of the Ukrainian Helsinki Group. Every single member of the group has been imprisoned or sent out of their own country. One has even committed suicide.

We are here today to ask the Soviet Government some tough questions. Why do you persecute men and women who are simply monitoring an international agreement signed by the Soviet Union? How much longer will these violations of human rights continue? Does the Soviet Government think the entire world is blind to the inhumane treatment of Ukrainian citizens?

More importantly, we salute today the members of the Ukrainian Helsinki Group. For 5 long years they have suffered for their countrymen. The free nations of the world appreciate all that they have done, and hope beyond measure that they will not be marking any future anniversaries behind prison bars. At this point in the RECORD I include the following:

THE UKRAINIAN PUBLIC GROUP TO PROMOTE THE IMPLEMENTATION OF THE HELSINKI ACCORDS—FOUNDED NOVEMBER 9, 1976, IN KIEV, UKRAINE

A LIST OF MEMBERS (STATUS AS OF OCTOBER 1981)

1. Imprisoned

1. Berdnyk, Oles. Writer; born November 25, 1927; founding member of Group; also political prisoner 1949–55; sentenced December 21, 1979, in Kiev to 6 years' imprisonment and 3 years' exile.

2. Chornovil, Vyacheslav. Journalist; born December 24, 1937; joined Group in October 1979; also political prisoner 1967–68, 1972–80; sentenced June 6, 1980, in Yakutsk to 5 years' imprisonment.

3. Heyko-Matusevych, Olha. Philologist; born September 9, 1953; joined Group in April 1977; sentenced March 12, 1980, in Kiev to 3 years' imprisonment.

4. Horbal, Mykola. Musician, teacher; born May 6, 1941; joined Group in September 1979; also political prisoner 1971–78; sentenced January 21, 1981, in Kiev to 5 years' imprisonment.

5. Kalynychenko, Vitaliy. Engineer; born 1937; joined Group in November 1977; also political prisoner 1966–76; sentenced May 18, 1980, in Dnipropetrovsk to 10 years' imprisonment and 5 years' exile.

6. Kandyba, Ivan. Lawyer; born July 7, 1930 founding member of Group; also political prisoner 1961–76; sentenced July 24, 1981, in Lviv to 10 years' imprisonment and 5 years' exile.

7. Lesiv, Yaroslav. Teacher; born 1945; joined Group in September 1979; also political prisoner 1967–78; sentenced in Spring 1980 in Ivano-Frankivsk to 2 years' imprisonment.

8. Lukyanenko, Lev. Lawyer; born August 24, 1927; founding member of Group; also political prisioner 1961–76; sentenced July 20, 1978, in Chernihiv to 10 years' imprisonment and 5 years' exile.

9. Lytvyn, Yuriy. Journalist, poet; born 1934; joined Group in December 1977; also political prisoner 1955–68, 1974–77 sentenced December 19, 1979, in Kiev to 3 years' imprisonment.

10. Marynovych, Myroslav. Engineer; born January 4, 1949; founding member of Group; sentenced March 27, 1978, in Vasylkiv to 7 years' imprisonment and 5 years' exile.

11. Matusevych, Mykola. Historian; born July 19, 1946; founding member of Group; sentenced March 27, 1978, in Vasylkiv to 7 years' imprisonment and 5 years' exile.

12. Ovsiyenko, Vasyl. Teacher; born 1949; joined Group in March 1977; also political prisoner 1973–77; sentenced February 8, 1979, in Radomyshl to 3 years' imprisonment.

13. Popovych, Oksana. Born January 30, 1928; joined Group in February 1979 while in labor camp; also political prisoner 1944–54; sentenced in February 1975 in Ivano-Frankivsk to 8 years' imprisonment and 5 years' exile.

14. Rudenko, Mykola. Writer; born December 19, 1920; founding member and head of Group; sentenced July, 1977, in Druzhkivka to 7 years' imprisonment and 5 years' exile.

15. Shukhevych, Yuriy. Electrician; born March 28, 1934; joined Group in January 1979 while in labor camp; also political prisoner 1948–58, 1958–68; sentenced September 9, 1972, in Nalchik to 10 years' imprisonment and 5 years' exile.

16. Shumuk, Danylo. Born December 30, 1914; joined Group in February 1979 while in labor camp; also political prisoner 1935–39, 1945–55, 1957–67; sentenced July 7, 1972, in Kiev to 10 years' imprisonment and 5 years' exile.

17. Sichko, Petro. Economist; born August 18, 1926; joined Group in April 1978; also political prisoner 1947–57; sentenced December 4, 1979, in Lviv to 3 years' imprisonment.

18. Sichko, Vasyl. Student; born December 22, 1956; joined Group in April 1978; sentenced December 4, 1979, in Lviv to 3 years' imprisonment.

19. Sokulsky, Ivan. Poet; born 1942; joined Group in October 1979; also political prisoner 1969–74; sentenced in Summer 1980 in Dnipropetrovsk to 10 years' imprisonment and 5 years' exile.

20. Striltsiv, Vasyl. Teacher; born January 13, 1929; joined Group on April 1977; also political prisoner 1944–54; sentenced November 12, 1979, in Dolyna to 2 years' imprisonment.

21. Stus, Vasyl. Poet; born January 8, 1938; joined Group in October 1979; also political prisoner 1972–80; sentenced October 2, 1980, in Kiev to 10 years' imprisonment and 5 years' exile.

22. Tykhy, Oleksiy. Teacher; born January 31, 1926; founding member of Group; also political prisoner 1957–64; sentenced July 1, 1977, in Druzhkivka to 10 years' imprisonment and 5 years' exile.

23. Zisels, Yosyf. Engineer; born December 2, 1946; joined Group in October 1978 while in labor camp; sentenced April 1979 in Chernivtsi to 3 years' imprisonment.

2. Died

24. Melnyk, Mykhaylo. Teacher; born 1944; joined Group in November 1978; committed suicide March 9, 1979, as a result of continuous KGB persecution.

3. In internal exile

25. Krasivsky, Zinoviy. Poet; born November 12, 1929; joined Group in October 1979; also political prisoner 1967–78; sentenced March 12, 1980, in Lviv to serve out remaining 8 months' imprisonment and 5 years' exile of previous sentence.

26. Meshko, Oksana. Pensioner; born January 30, 1905; founding member of Group; also political prisoner 1947–55; sentenced January 7, 1981, in Kiev to 6 months' psychiatric imprisonment and 5 years' exile.

27. Rebryk, Bohdan. Teacher; born June 30, 1938; joined Group in February 1979 while in labor camp; also political prisoner 1967–70, 1974–81; sentenced in summer 1974 in Ivano-Frankivsk to 7 years' imprisonment and 3 years' exile.

28. Senyk, Iryna. Nurse, poetess; born June 8, 1926; joined Group in May 1979 while in exile; also political prisoner 1944–54, 1972–78; sentenced in 1972 to 6 years' imprisonment and 3 years' exile.

4. Released

29. Romanyuk, Vasyl. Orthodox priest; born December 9, 1925; joined Group in February 1979 while in exile; also political prisoner 1944–54, 1972–79.

30. Rozumny, Petro. Teacher; born March 7, 1926; joined Group in October 1979; sentenced December 21, 1979, in village of Solone near Dnipropetrovsk to 3 years' imprisonment; released in Summer 1981.

31. Shabatura, Stefaniya. Artist; born November 5, 1938; joined Group in October 1979 while in exile; also political prisoner 1972–77.

5. Forced to emigrate

32. Grigorenko, Petro. Soviet army general; born October 16, 1907; founding member of Group; also political prisoner 1964–65, 1969–74; stripped of Soviet citizenship on March 10, 1978, and exiled.

33. Karavansky, Svyatoslav. Poet, journalist; born December 24, 1920; joined Group in September 1979; also political prisoner 1944–60, 1965–79; emigrated to the West in November 1979.

34. Malynkovych, Volodymyr. Physician; born 1940; joined Group in October 1978; emigrated to the West in December 1979.

35. Strokata, Nina. Physician, microbiologist; born January 31, 1926; founding member of Group; also political prisoner 1971–75; emigrated to the West in November 1979.

36. Svitlychna, Nadia. Philologist; born November 8, 1936; undeclared member of Group while in Ukraine; joined Group in fall 1978; also political prisoner 1972–76; emigrated to the West in October 1978.

37. Vins, Petro. Student; born 1956; joined Group in February 1977; also political prisoner 1978–79; emigrated to the West in June 1979.

38. Plyushch, Leonid. Cyberneticist; born in 1939; member of Group's External Representation; also political prisoner 1972–76; emigrated to the West in January 1976.

Mr. Speaker, it is my pleasure at this time to yield to my colleague, the gentleman from Massachusetts (Mr. DONNELLY), the cochairman of the ad hoc committee.

Mr. DONNELLY. Mr. Speaker, I am pleased to join with my friend from Philadelphia in commemorating the founding of the Ukrainian Public Group to promote the implementation of the Helsinki accords. We have reserved this time in the House today to

call attention to the fact that the Ukrainian men and women who have taken responsibility for monitoring Soviet compliance with the Helsinki accords are in prison or exile. These people have been subjected to many attacks on their privacy, and, in fact, one of these brave people committed suicide due in no small part to the continued harassments of the Soviet authorities and the KGB.

We are here to state to all Americans and to all the free world that we have not forgotten their efforts, nor will we forget their efforts that they have taken over the past 5 years.

The Ad Hoc Committee on the Baltic States and the Ukraine, which was recently formed in the House, will work for the release of the imprisoned members of the Ukranian Helsinki group.

The Soviet Government has repeatedly violated the terms of the Final Act. That is why members of the monitoring group have been attacked so viciously. The Soviets simply do not want news to reach us or our neighbors in the free world of the many violations of human rights that occur within the Iron Curtain. Today's special order is one sign that the Soviet effort to keep the voices of dissent quiet is a failure. The Soviet should realize that they will never be able to silence the voices of freedom no matter how hard they try, and in that effort they are condemned to defeat.

In conclusion, let me thank my colleagues from Pennsylvania and applaud him for taking this time at the end of the session today to commemorate and to recommit our efforts to those brave people in the Ukraine who are simply monitoring a signed agreement that is being violated on a day-to-day basis by Soviet authorities and members of the KGB, and recommit ourselves and members of the ad hoc committee on the Baltic States and the Ukraine that we also, here in the Congress, shall monitor the events that take place in the Ukraine and in all the Baltic States, and that those voices of freedom are being heard, will be heard and shall be heard, and that they have many supporters here in the Congress and many people who will be participating in the special order tonight.

Mr. DOUGHERTY. I thank my colleague from Massachusetts for his comments on this most significant day.

I would like to recognize my colleague from Pennsylvania, a very distinguished Member of this body and a champion in the cause of the Ukraine, Mr. BAILEY.

Mr. BAILEY of Pennsylvania. I thank my colleague very much, very sincerely.

Mr. Speaker, let me first of all compliment Mr. DOUGHERTY and Mr. DONNELLY for their leadership of the Ad Hoc Congressional Committee on the Baltic State and the Ukraine. I am pleased to join my colleagues this afternoon in commemorating the fifth anniversary of the founding of the Ukrainian Public Group to Promote the Implementation of the Helsinki accords. Today's anniversary is not only an occasion for celebration, but also an opportunity to commend the men and women who have been persecuted for the their belief in and support of the principles of human rights that underly the Helsinki accords.

The emergence and success of the Ukrainian Helsinki Group has reaffirmed to the Soviets and to our Western Nations that the Ukrainian people's movement for national and human rights is very much alive. The efforts by Soviet officials to suppress and silence these men and women have been brutal. But despite the persecution of 23 of its 37 members, the group has been successful in monitoring the human rights provisions of the Helsinki accords. The evidence they have collected is clear—the Soviets have completely disregarded the rights of the Ukrainian people.

The group declared its intent to raise the level of legal consciousness in the Ukraine. It has done so by unhesitatingly accepting and working on the proposition that laws, whether they be the constitutions of the Ukrainian people or the Universal Declaration of Human Rights and the Helsinki Final Act, are real and binding, and that each individual has a right to their protection, from all, including naturally, his own government. It has succeeded in raising this consciousness and, by its own adherence to the letter and spirit of the law, has demonstrated imperialist Russia's wanton disregard for its own laws and for the international agreements it has signed.

The Helsinki accords have given rise to a genuine hope that individuals and nations in the Eastern bloc will have their rights respected. Certainly the efforts of the Ukranian Helsinki Group are invaluable to attaining this goal. We do well to commend and encourage these men and women in their work, knowing full well ourselves that often times a very high price has to be paid to attain dignity, justice, and freedom from repression. Let us do more than commend and recognize in the future. Let us find a way to give more direct assistance. If we cannot do so as a Government then let us do so as individuals.

Mr. DOUGHERTY. Mr. Speaker, I would like to thank my colleague from Pennsylvania for those very inspiring remarks.

At this time I would like to yield to another colleague, the gentleman from Pennsylvania (Mr. NELLIGAN).

Mr. NELLIGAN. I thank the gentleman for yielding.

Mr. Speaker, I wish to compliment the cochairman of the ad hoc committee that they so ably head. As a matter of fact, I want to compliment both of them for their untiring efforts on behalf of human rights for all peoples of the world. I, too, am pleased to be a member of that committee.

Mr. Speaker, we are here today to commemorate the fifth anniversary of the founding of the Ukrainian Helsinki Group.

On November 9, 1976, nine men and one woman courageously confronted the Government of the Soviet Union by forming an organization to monitor that country's compliance with the 1975 Helsinki accords.

Given the long history of repression in the Soviet Union, particularly against the people of the Ukraine, the establishment of such a monitoring group was an exceedingly brave act. In an atmosphere of intimidation, threats, and ruthless retaliation, these individuals publicly declared their intent to see that fundamental human rights were observed by the Government of the Soviet Union.

Regrettably, but predictably, the members of the Ukrainian Helsinki Group have suffered dearly for their defiance of the Kremlin. At the present time, all 37 of the Ukrainian monitors have been imprisoned, incarcerated in "hard regime" labor camps or exiled from their homeland.

Yet, the very fact that we can commemorate the fifth anniversary of this group on the floor of the House of Representatives is a tribute to their success. Despite the persecution of its individual members, the Ukrainian Helsinki Group continues to exist as a major force for human rights in the Soviet Union.

The members of this group have endured extreme hardship, but their voice has been heard. The Government of the Soviet Union has attempted to break the will and drive of the Helsinki Group's leaders, but they have not succeeded.

I believe a major factor in the ongoing battle for human rights in the Ukraine is the spirit of the Ukrainian people themselves. Ukrainians, who number 50 million, or 20 percent of the Soviet Union's population, have survived long years of Russian oppression. They have been denied their national churches, political representation, and culture. Yet they have continued to resist the forces of Russification.

I also believe the spirit of the Ukrainian people and the establishment of the Helsinki Group belie the myth that the Soviet Union is a homogenous state. It reveals the underlying truth that the Soviet Union is an authoritarian regime seeking to impose its will on an amalgam of sepa-

rate nations, ethnic groups, and racial entities.

In attempting to bring the Soviet Union into compliance with its international agreements, in attempting to guarantee the citizens of the Ukraine certain rights in national, cultural, civil, political, and religious affairs, and in attempting to have the Ukraine—as a European state and founding member of the U.N.—included in the Helsinki process, the Ukrainian Helsinki Monitoring Group is striving to maintain and develop the identity of the Ukrainian people.

This is a process which the United States must support. The defense of human and national rights of the Ukraine must remain a consistent element of American foreign policy.

□ 1910

Mr. DOUGHERTY. I want to thank my colleague from Pennsylvania for those very moving remarks. It addresses it right to the point that we are talking about.

I thought it very interesting today, Mr. Speaker—I sent a letter to Ambassador Dobrynin advising him that we would take this special order today. The Soviet Embassy in Washington refused to accept the letter and therefore, since Mr. Dobrynin would not take my letter, I will read it publicly and perhaps he can get it out of the CONGRESSIONAL RECORD.

HOUSE OF REPRESENTATIVES,
Washington, D.C., November 17, 1981.

His Excellency ANATOLY DOBRYNIN,
Ambassador to the United States,
Washington, D.C.

DEAR AMBASSADOR DOBRYNIN: Last week marked the Fifth Anniversary of the founding of the Ukrainian Public Group to Promote the Implementation of the Helsinki Accords. As you may know, all 37 members of the Ukrainian Helsinki Group have been sentenced to prison or exiled from their country. At the same time, the Soviet Union continues to violate the human rights of these and many other Ukrainian citizens.

The United States Congress is very concerned for the welfare of the men and women of the Ukrainian Helsinki Group. They are simply monitoring the Soviet government's adherence to the accords of the Helsinki Act, signed in 1975. For this reason, the House of Representatives will conduct a Special Order to address this serious issue this evening. It is my hope that your government will carefully consider the statements of the many Congressmen who will speak out tonight in support of the Ukrainian Helsinki Group.

With best regards.

Sincerely,

CHARLES F. DOUGHERTY,
Member of Congress.

As I said, Mr. Speaker, since Mr. Dobrynin did not care to accept my letter, maybe he will get a copy of the CONGRESSIONAL RECORD and he can read it there.

It is rather interesting, though, Mr. Speaker, if the Soviet Union has reached the point in time where they are so afraid to even accept a letter from a Congressman, I guess they are really beginning to recognize the fact that their phoniness, their charades, their make-believe, is not having any impact on this country. I find it interesting that a country that signs an agreement in the area of human rights and then blatantly violates that agreement is trying to convince those of us in the U.S. Congress that we should enter into some type of disarmament agreement, I would pose that thought that if the Soviets are so embarrassed and so willing to blatantly violate an international agreement in the area of human rights, how can we ever expect to trust anything they would say in any type of agreement of disarmament?

Mr. CONYERS. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. Mr. Speaker, at this time I would like to yield to my colleague from Michigan (Mr. CONYERS) and I am pleased to have him participate.

Mr. CONYERS. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding to me. I would like to come to the floor to indicate to him and to my colleagues in the Congress the mutual concern that we all have for human rights and their violations wherever they may occur in the world.

I would tell him that I have been visited by members of this organization who constitute Ukrainian Public Group, for promoting the Helsinki accords, and I must say that I was quite frankly taken aback by what they told me of the suffering, of the treatment that their relatives and families and friends have been afforded, and the years of struggle that this special order signifies. And so, out of that concern I want to say to my colleague that I come to the well to join those in the Congress and those in this country who feel deeply about the concern of justice and equality and human dignity throughout the world.

I would like to work with him, with the Foreign Relations Subcommittee that is now holding hearings in this matter, and I would like to learn more about it and find out what we as a Congress can do to bring all of the assistance that we can to these very courageous people.

Now, if I might say to my colleague, I hope that we will be able to separate many of the complex issues on foreign policy and foreign relations from this particular incident. I think that it would be a grievous error if we were to link the consideration of disarmament with this particular issue and suggest that because one is insoluble, the other is insoluble. As the gentleman knows, I have tried to promote a peaceful context in which the nations on this planet could resolve their differences, because I am persuaded that violence and the nuclear arms race will never solve the problems of my people or his people. And so, it is with that still-strong hope that I approach this subject and I join the ranks of those that the gentleman has persuaded to march with him, and hope that perhaps there can be some dialog started.

I was talking with another Member who feels as strongly as we do about this subject, and perhaps this will go down as a naivete, but perhaps there can be some dialog that has not been initiated take place. One of the members of the subcommittee to which I refer that hearings were held yesterday told me that some part of the Russian Government was there recording the proceedings. It is my fervent hope that anything from those proceedings will not be further used to harass or suppress the people for whom we work so diligently to gain their freedom and to make justice work all over the world, and particularly in the Soviet Union.

So, it is out of these deeply held views that the gentleman has been able to bring me to his side and enlist in what I consider to be a very noble and a very praiseworthy cause. I thank the gentleman for yielding.

Mr. DOUGHERTY. Mr. Speaker, I would like to thank my colleague for those very thoughtful comments, and they were very important to us all.

Mr. DYMALLY. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I will be glad to yield to my colleague.

Mr. DYMALLY. Mr. Speaker, I thank the gentleman.

I think it was 2 months ago that I had the privilege to visit with some Ukrainians from the State of Pennsylvania and I placed in the CONGRESSIONAL RECORD a statement about their concerns, about the state of affairs in the Ukraine. I would like to make reference to that statement and to congratulate the Member from Pennsylvania for bringing this subject to the attention not only of the Congress but of the people of the United States.

Mr. DOUGHERTY. Mr. Speaker, I thank the gentleman very much for those comments.

Mr. Speaker, at this time I would like to include as an addition to my original comments the names of all of the 37 members of the Ukrainian Public Group to promote the implementation of the Helsinki accords. I think it would be appropriate that the CONGRESSIONAL RECORD of the United States include the names of these outstanding men and women.

Mr. GONZALEZ. Mr. Speaker, will the gentleman yield?

Mr. DOUGHERTY. I yield to the gentleman from Texas.

Mr. GONZALEZ. Mr. Speaker, I rise merely to offer my name on the list of the gentlemen who have associated themselves with the gentleman's special order today, and to thank him for

his interest and his great concern in this very, very troubling problem. I just felt that the least I could do would be to offer my name to add to the roster.

Mr. DOUGHERTY. I thank my colleague from Texas for those comments.

● Mr. BONKER. Mr. Speaker, I welcome this opportunity to commemorate the fifth anniversary of the founding of the Ukrainian Helsinki Monitoring Group, and appreciate the efforts of my distinguished colleagues, Congressmen DOUGHERTY and DONNELLY for calling this special order today. I also wish to recognize the good work of the Ad Hoc Committee on Baltic States and Ukraine, chaired by Congressmen CHARLES DOUGHERTY and BRIAN DONNELLY.

Last July, the Subcommittee on Human Rights and International Organizations held a hearing on human rights in the Soviet Union, and focused specifically on the persecution of dissidents and human rights groups in the Ukraine. At that hearing, we were honored to have with us, Dr. Nina Strakota-Karavansky, a member of the Ukrainian Helsinki Group and a former political prisoner. Her husband, Sviatoslav Karavansky, served over 30 years in prison for his human rights activities. In her testimony, Dr. Nina Strakota discussed the long prison sentences received in the Ukraine for religious, ideological, or political activities, and police intervention into family matters. She named dozens of friends and colleagues who have been harassed, imprisoned, or incarcerated in psychiatric hospitals. Many of these people were the original monitors of the Helsinki agreements. The fact that the Soviet Union imprisons those who take seriously the international human rights agreements that their country has signed is chilling proof of Russia's refusal to comply with the Helsinki accords.

Dr. Nina Strakota-Karavansky told the Subcommittee on Human Rights and International Organizations that:

> The unsanitary conditions of a prisoner's daily existence, directed against the prisoner's mind, body, and spirit, are an indisputable proof of the use of torture in the USSR.

At the completion of her testimony, Dr. Strakota said: "May the Lord bless those who do not remain indifferent to the suffering of my nation."

I think that her words are the key to human rights advocacy: We must not remain indifferent to the suffering of others. We in the United States have a unique opportunity—and obligation—to speak for those who cannot speak. It is my hope that the Congress will use this opportunity in every possible way to bring attention to the tortured, the disappeared, and the silenced in the Ukraine, and around the world. It is also my hope that as the Reagan administration continues to send the Soviet Union huge amounts of our agricultural products they will remember the captured people of the Ukraine.●

● Mr. DENARDIS. Mr. Speaker, on November 9, 1976, 10 Ukrainian men and women organized to serve a noble and lawful mission. The Ukrainian Helsinki Group was formed to monitor the compliance by the Soviet Government with the 1975 Helsinki accords. In its founding declaration, the group demanded that the International Declaration of Human Rights, which guarantees the free exchange of "information and ideas through any media regardless of frontiers, become the basis of relations between the individual and the state" in the U.S.S.R. The history of the group is a chronicle of the Soviet Government's thorough contempt for the humanitarian principles expressed in these two documents, which they themselves signed, as well as in their own Constitution. Of the group's eventual 37 members, not one remains alive and at liberty in the Ukraine today. They have all been imprisoned, sentenced to labor camp, or exiled. But under the physical and psychological burden of persecution, not a single member broke down. Not one man or woman retracted his or her position enunciated in the name of 50 million fellow countrymen.

I therefore join my colleagues in the denunciation of the oppression of human rights in the Ukraine and wherever the Soviet reach of power extends. And I join my colleagues also in the celebration of the spirit of human liberty which lives still in the members of the Ukrainian Helsinki Group and which is the duty of the free world to protect and promote.●

● Mr. DERWINSKI. Mr. Speaker, I wish to join with my colleagues in noting the fifth anniversary of the founding of the Ukrainian Public Group To Promote the Implementation of the Helsinki accords. This group was established on November 9, 1976, in Kiev by 10 human rights activists with the objectives of monitoring the Soviet Government's compliance with the human rights provisions of the 1975 Helsinki accords and to inform the citizens of Ukraine and the world community of any violations.

Of the 37 members that joined the group during the past 5 years, the majority have been imprisoned for this activity, while the others are either exiled, expatriated, or under police surveillance. One member was driven to suicide.

The group's leader, Mykola Rudenko, was sentenced to 7 years imprisonment and 5 years exile. Vasyl Stus, a poet and a member of the Ukrainian Helsinki Group, was tried solely on the basis of the thoughts he expressed in personal correspondence to friends, which was presented as evidence in the courtroom. Stus was sentenced to 15 years. Another example of the ruthlessness with which the Soviet authorities combat Ukrainian nationalism can be found in the case of Yuriy Shukhevych, who joined the Helsinki Group while still serving his latest prison term. Shukhevych was first arrested and imprisoned for 10 years in 1947, when he was 14. He was the son of the commander of the Ukrainian Insurgent Army. Since then, he has spent all of 4 years in prison, and if he is released after his current term in 1987, at the age of 53, he will have spent 35 years behind bars or barbed wire.

With the continued suppression of human rights in Communist countries, it is imperative that the democratic countries of the world assert their opposition to this form of political tyranny and reinforce the work of the Ukrainian Public Group in monitoring the violations of the provisions of the Final Act of the Conference on Security and Cooperation in Europe. Unfortunately, the Soviet Government has repeatedly violated the terms of the act, and further, has obstructed the Ukrainian Group's efforts to monitor violations. It is necessary to remember that the Soviet Union continues to suppress the nationalistic spirit of the non-Russian Republics within the U.S.S.R.

As a cosponsor of House Concurrent Resolution 205, which requests the President to act through diplomatic channels for the release of the members of the Ukrainian Public Group from incarceration and to prevail upon the Soviet Government to cease harassing and persecuting them, I believe that it is especially important for the United States to continue its full and uncompromising support, for the basic concept of the sovereign rights of a people, to the free and independent choice of the form of government under which they wish to live. I join in expressing my hope that the aspirations of the captive peoples for national independence will once more be restored. We must not let the determined spirit of the captive peoples as represented by the Ukrainian Helsinki Group, be broken.●

● Mr. YATRON. Mr. Speaker, I rise today to join the distinguished gentleman from Pennsylvania, Mr. DOUGHERTY to pay tribute to the Ukrainian Public Group To Promote the Implementation of the Helsinki accords on the fifth anniversary of its founding.

Mr. Speaker, the brave men and women of the Ukraine who founded the group have risked their lives and have been subjected to insufferable torture at the hands of their Soviet oppressors because they have attempted to peacefully exercise the rights guaranteed to them under the Helsinki accords.

Clearly, the Soviet Government has displayed its total disregard with respect to the basic principles of human rights by neglecting to comply with the stipulations set forth by the Helsinki accords which they willingly signed in an international forum. But more importantly, this historic occasion exemplifies the strength and patriotism of the Ukrainian people who in the face of adversity and danger, have relentlessly continued their peaceful quest to realize their fundamental human rights objectives under these accords.

The plight of the members of the Ukrainian Helsinki Group characterizes the desires of the Ukrainian people to exercise their human rights and to determine their own national destiny.

Mr. Speaker, the United States as a signer of the accords has a responsibility with respect to pressing the Soviet Union to adhere to this agreement so that the people of the Ukraine and throughout the Baltic States can exercise their basic human rights and self-determination.●

● Mr. JAMES K. COYNE. Mr. Speaker, as Americans who are free of governmental oppression, we tend to take for granted the freedom guaranteed to us by the Constitution and the Bill of Rights. In our relative comfort and sense of freedom, we often fail to acknowledge the constant struggle being waged by people throughout the world for recognition of their fundamental human and civil rights.

On the fifth anniversary of the founding of the Ukrainian Helsinki Group, we must bring to mind the pain and suffering of those courageous Ukrainian men and women who have believed in the principles and implementation of the Helsinki accords. The attempts of the Ukrainian Group to monitor human rights abuses in the Soviet Union, have been met with severe persecution by the Soviet Government. The members of the group have been subjected to imprisonment, long sentences in forced labor camps, and harassment by the KGB. Disregarding the group's efforts, the Soviet Government has repeatedly violated the terms of the Helsinki Final Act and continues to flout the basic intentions of the Helsinki accords.

Talks on the Helsinki accords resumed in Madrid in late October. To clearly demonstrate our support for the courage and dignity of the Ukrainian Group, it is incumbent upon the United States to bring to the attention of the Soviet representatives their Government's gross violations of compliance with the human rights provisions of the Helsinki Final Act. We must call for a halt to such violations and a halt to the persecution and harassment which Ukrainian Helsinki Group members, and all those around them, must endure.

We treasure the rights and freedoms which we have struggled to obtain. Let us never become so complacent that we are blind to the struggles of others.●

● Mr. HUGHES. Mr. Speaker, 5 years ago, on November 9, 1976, the Ukrainian Public Group To Promote the Implementation of the Helsinki Accords was founded to promote compliance with the then nascent Helsinki accords. The accords were intended as a landmark international agreement, guaranteeing the rights and dignity of every country which became a signatory.

Unfortunately, the past 5 years have proven the utter insincerity and hypocrisy of the Soviet Union in signing the accords. The fate of the members of the Ukrainian Helsinki Group bears tragic witness to the Soviet Union's continued abysmal human record.

Thirty-seven courageous Ukrainians joined together to attempt to insure that the civil, cultural, political, and religious freedoms guaranteed at Helsinki would indeed be allowed. All of them have undergone persecution, whether through imprisonment, persecution, exile, or expulsion. Each was punished for the crime of thinking freely and acting as individuals in a society dependent on compliance with a totalitarian regime.

We, as leaders of a nation whose citizens champion liberty, must not allow the spirit and intent of Helsinki to die. We must continue to work for greater freedom of citizens of all nations, taking our inspiration from the courage of the Ukrainian Helsinki Group, who acted with far less hope of success, and far greater loss from failure.●

● Mr. DWYER. Mr. Speaker, we have a dual purpose here today as we commemorate the fifth anniversary of the Ukrainian Helsinki Group.

Not only do we rise in humble tribute to its 37 brave members and the terrible suffering they have so selflessly endured, but also, we act as comrades in spirit to help them advance their noble cause.

We are, quite simply, among those "People of good will" on whom the Ukrainian's steadfast quest for freedom depends. This theme, so eloquently expressed in 1976 by founder Mykola Rudenko, is truer still 5 years hence.

Soviet persecution of the group's members, their families, friends, and sympathizers, continues unabated, Yet equally relentless is the message of the imprisoned and exiled members who refuse to give in.

Five years have passed since those first 10 Ukrainians risked everything to make sure the Soviets lived up to their Helsinki promises.

It is painfully obvious that they have not done so; rather, the Soviet Government has stepped up its repressive tactics in the face of the Ukrainian challenge.

That challenge, as all of us here know, is a potent one. The truth is a most powerful adversary, and the Soviets are duly fearful, fighting it at every turn the only way they know how—with force.

The Helsinki monitors have documented such violations time and time again; in fact, they are enduring them now, with a sense of courage and dedication that inspires fellow Ukrainians to continue their struggle for basic human rights.

Of the 37 original Helsinki monitors, there are no active members left in the Ukraine. Yet their effectiveness is not diminished by this grim fact. Instead, their efforts stand as testament to the enduring strength and belief of their fellow countrymen that ultimately, the Ukrainian patriotic struggle will be won.●

● Mr. HOLLENBECK. Mr. Speaker, I would like to take this opportunity to rise and join Members of this distinguished body in protesting the ongoing persecution of the Ukrainian Helsinki Group by Soviet authorities on this the fifth anniversary of the group's formation. I know that a majority of my colleagues share my sentiments when I say that this is a travesty of justice which must not be allowed to continue.

Earlier this month, I cosigned a letter to the Soviet Ambassador requesting the release of those Soviet citizens who are members of the Ukranian Public Group To Promote Implementation of the Helenski Accords. According to reports I have reviewed, it is my understanding that all members of this group have been either imprisoned, sent to labor camps, or forced into exile. I would hardly consider their efforts to monitor compliance with the Helsinki agreements a crime. However, I believe that this is precisely the attitude the Soviets have adopted toward these individuals and is just one more example of the disregard with which Kremlin officials view their commitments to the free world.

In marking the fifth anniversary of the Ukrainian Helsinki Group's formation, we can only hope that the sixth anniversary will be brighter for all of those who believe in basic human rights and have had the misfortune of being born in the Soviet Union.●

● Mr. MICHEL. Mr. Speaker, in recent weeks I have received letters from various groups favoring implementation of the Helsinki accords, particularly as those accords apply to the situation in Ukraine. I understand a special order was held on this subject last week. I was unable to join in that order so I would like to take this opportunity to associate myself with all those who seek full implementation of the Helsinki accords.

As reported by our distinguished colleague, the gentlelady from New Jersey (Mrs. FENWICK) members of the Ukrainian Public Group To Promote Implementation of the Helsinki Accords have reportedly been imprisoned, sent to labor camps or forced into exile.

Such action on the part of the Soviet Union is in direct contravention to the letter and spirit of the Helsinki accords—the Final Act of the Conference on Security and Cooperation in Europe.

As you will recall, the United States, the Soviet Union, and all other nations agreeing to those accords vowed to respect elemental human rights. It is clear that the Soviet Union, through intimidation, beatings, surveillance, imprisonment, and the abuse of psychiatric therapeutic drugs and devices has made a mockery of the Helsinki accords.

I join with all our colleagues in calling upon the Ambassador of the Soviet Union to the United States to relay to his government the concern of the American people over abuses of human rights in Ukraine and throughout the Soviet Union.●

● Mr. BARNES. Mr. Speaker, I am pleased to join my colleagues in recognizing the work and struggle of the Ukrainian Public Group To Promote the Implementation of the Helsinki Accords.

This month marks the fifth anniversary of the founding of an alliance of committed individuals who have demanded that the Soviet Government honor the Ukrainian people's claim to the full range of human rights. These men and women have endured the risks and dangers that accompany their vigilant information-gathering activities—their lives have been restricted, they have been harassed, arrested, imprisoned, and one has died in the battle. We honor today a small group of people who believe so deeply in the quest for human rights of their fellow Ukrainians that they have sacrificed their personal security and well-being and have lived with the agonies of forced separation from their families. These ordinary people—an economist, artist, priest, historian, former general, lawyers, physicians, teachers, engineers, journalists, students, and writers—have waged an uncompromising battle to publicize human rights violations in the Ukraine.

However, all 37 of the group's members have been prevented from doing the work they set out to do—23 are now in Soviet prisons, 6 have been forced into exile abroad, and 4 are in internal exile.

In their memorandum No. 5, the members of the group write:

* * * we have a constitution that is not altogether bad, our country signed the Universal Declaration of Human Rights and the Helsinki Accords, and in all these documents there are endless repetitions about Human Rights, about all that Man can do and has a right to and this and that, etc. But when it comes to a reality, then all of these rights and opportunities turn not only into mirages but into cruel blows. By demanding that which is declared in official documents, a human being dooms himself to endless tortures. Himself and those closest to him * * *.

We recognize today a spirit of determination and conviction which lives in the hearts of these individuals. The American people should know that the dream of freedom we hold so dear is so loved by those in the world for whom the reality has not yet come.

Mr. Speaker, I am glad to have this opportunity to express my admiration for these brave individuals.●

● Mr. MITCHELL of New York. Mr. Speaker, I am honored to have the opportunity to note the fifth anniversary of the Ukrainian Public Group To Promote the Implementation of the Helsinki Accords. I thank my colleague from Pennsylvania, Mr. DOUGHERTY, for sponsoring this special order and allowing us to bring greater public attention to the important struggle for human rights that is occurring in the Soviet Union as a result of the activities of the Ukrainian Helsinki Group.

On November 9, 1981, 10 brave Ukrainian men and women formed the Helsinki Group to promote Soviet compliance with the Helsinki accords, signed by the Soviet Union and 34 other nations of Europe and North America. The accords included a number of human rights principles which the signatory states promised to respect.

In founding the Ukrainian Helsinki Group, these individuals sought to foster free exchange of information and ideas among nations. Of the 10 founders, 7 are now in Soviet prisons, 1 is in internal exile and 2 were forcibly exiled from the Soviet Union. Twenty-seven other individuals who joined the group suffered similar fates. These individuals—writers, poets, teachers, journalists, lawyers, priests, and artists—were punished by the Soviet Union for trying to insure that the U.S.S.R. simply abided by the agreement it had signed in Helsinki to observe basic tenets of human rights.

In spite of such oppression, their struggle for human rights continues. In the words of the Ukrainian Helsinki Group:

Peace in Europe cannot be built on lies and the secret designs of the rulers of individuals states. Peace cannot be built on the oppression of peoples, for such a peace does not mean happiness for the oppressed and disfranchised, and they will strive to destroy it.

Few situations so dramatically demonstrate the differences between the Soviet Union and free nations. It is the responsibility of all free nations to continue to point out those differences and endeavor to correct Soviet indifference to human rights. I am pleased that the House has set aside this time to bring public attention to the struggle of the Ukrainian Helsinki Group.●

● Mr. McGRATH. Mr. Speaker, I appreciate this opportunity to take part in the commemoration of the fifth anniversary of the founding of Ukrainian Helsinki Monitoring Group. Five years ago last week a small group of Ukrainians publicly joined together and announced their intention to inform their fellow citizens and the rest of the international community of Soviet compliance with the Helsinki Final Act.

For those of us who are able to join any political or social organization at will, it is difficult to understand the significance of the formation of the Helsinki Monitoring Group. In a nation whose people have been subjugated to Soviet communism by a brutal and oppressive regime, the founding of the Helsinki Monitoring Group was an act of tremendous courage. Under the leadership of Mykola Rudenko, a former war hero and an internationally renowned writer, the Ukrainian Helsinki Group challenged the Soviet police state with something that transcends military might and power, the human desire for freedom and dignity.

Today, Rudenko and many others who joined his struggle are imprisoned by a government whose greatest fear is that the message and will for freedom and human rights will spread among its citizenry. We must make every effort to support the work of the Ukrainian Helsinki Group by bringing attention to their plight and by demanding Soviet compliance with the Helsinki Final Act which our nations agreed to in 1975. I hope all of my colleagues here today will join in their work and prayers for the success of the Ukrainian Helsinki Group.●

● Mrs. HOLT. Mr. Speaker, if anybody has any doubt about the nature of the Soviet Union, I would invite his attention to the fate of the brave Ukrainian citizens who 5 years ago formed a group to monitor Soviet compliance with the human rights provisions of the Helsinki accords.

The Ukrainian human rights group has been systematically persecuted for no reason except its commitment to building freedom in a despotism. Of the 36 members, all are imprisoned, committed to internal exile, or exiled to the West.

The slavemasters of the Kremlin are determined that not even a slight breath of freedom shall penetrate their land. And they want the whole world to follow the Soviet model, for the existence of freedom anywhere is a threat to them.

They do not fear that the West will attack them militarily; what they fear

is that some small currents of the spirit of freedom might reach their subjects.

They have spent more than 60 years trying to stamp out Ukrainian nationalism and crushing the other captive nationalities that long for self-rule and liberty, but they have not succeeded.

They will not succeed, Mr. Speaker. The instinct for freedom is too strong for the Kremlin imperialists, and dissenters within the Soviet Union are in constant clandestine communication with the free world.

Today we salute a band of Ukrainian patriots who are being martyred for their stand for human rights. I know that someday the Ukraine will be free.●

● Mr. BLANCHARD. Mr. Speaker, I would like to take this opportunity to join in the special order taken today by my esteemed colleague from Pennsylvania, Mr. DOUGHERTY, and my esteemed colleague from Massachusetts, Mr. DONNELLY, on the occassion of the fifth anniversary of the founding of the Ukrainian Public Group To Promote the Implementation of the Helsinki Accords.

All of us in Congress, and throughout the world, who care deeply about human rights, can only have kind comments for the brave members of the Ukrainian Public Group. The noble words on human rights contained in the Helsinki accords have been repeatedly ignored by the Soviet Union. The exile and incarceration of all of the members of the Ukrainian Public Group is but one more tragic example of how shockingly the Soviet Government regards basic human rights.

As a member of the Ad Hoc Congressional Committee on the Baltic States and the Ukraine, I congratulate my colleagues for taking this important special order. Let us work together in Congress and in all countries in the free world for human rights to be enjoyed by all individuals, everywhere.●

● Mr. ADDABBO. Mr. Speaker, it is with a great sense of urgency and deep concern for the sanctity of human rights in the Ukraine and the Baltic States that I rise today to join my distinguished colleagues in the House of Representatives in observing the fifth anniversary of the founding of the Ukrainian Public Group To Promote the Implementation of the Helsinki Accords.

While I have this opportunity I would like to praise two fellow easterners, CHARLES F. DOUGHERTY and BRIAN DONNELLY, cochairmen of the Ad Hoc Congressional Committee on the Baltic States and Ukraine, for their efforts on behalf of the people in these areas. The committee has been at the forefront of congressional interest and action in keeping the plight of these citizens in the public eye. It is through this heightened awareness among ourselves and our constituents that I hope someday these strong-willed people will regain the freedom and human rights they once knew before the Soviet Union decided "freedom" was a dirty word.

Tragically, the fifth anniversary is an anniversary devoid of happiness, with tears of sorrow instead of joy. It is an anniversary of an organization founded by a group of brave and courage men and women who have known nothing but fear and persecution, suffering and pain, since they united 5 years ago to promote the Soviet Union's compliance of the Helsinski accords.

All 37 individuals who joined the Ukrainian Helsinki Group have been hounded by agents of the Soviet Union. Many have been imprisoned and exiled. Their crimes? Nothing more than asking the Soviets to honor an international agreement helping them to secure human rights. We should not be shocked by the Soviet's Unions actions. As we all too well know, in Russia the freedom to express oneself, travel freely, and be safe and secure in one's home is for the chosen few, not the many. Time and time again the Soviet Union has shown its blatant disregard for international treaties and laws. Time and time again the Soviet Union has sought to deny "its" people the God given right to dignity and self-worth. We, a nation which will forever place the rights of its populace at the top of its priorities must continue to speak out loud and often against the inhuman practices of the Soviet Union. In doing so we will be speaking for those people who are unable or too fearful to do so.●

● Mr. FLORIO. Mr. Speaker, 6 years ago the Soviet Union joined the western world in ratifying the Helsinki accords. At that time there was great hope of a mutual undertaking between East and West for the realization of individual human liberties. At Helsinki, the Soviet Union pledged to respect the territorial rights of other nations, the right of all peoples to self-determination, to expand the exchange of information and culture among nations, and to facilitate the reunification of families separated by political boundaries.

November 9, 1981 marked the fifth anniversary of the creation of the Ukrainian Public Group To Promote the Implementation of the Helsinki Accords. The Ukrainian Helsinki Group is one of several citizen's groups formed within the Soviet Union to insure full citizen participation in the Helsinki process. These public monitoring groups have provided the west with a comprehensive review of Soviet compliance with the Helsinki accords. I do not have to elaborate that it is, in fact, a record of consistent noncompliance, including continuing suppression of religious and ethnic minorities and the harassment and jailing of Soviet citizens who attempt to exercise the rights guaranteed by the Helsinki agreement.

The brutality of the Soviet system has perhaps fallen the heaviest on the members of the Ukraine Helsinki Group. Twenty-three of its thirty-seven members are imprisoned, four are in exile, and one had died. Not one remains alive and at liberty in Ukraine today. If Soviet persecution of the Ukraine Helsinki Group has been so complete, what achievements may we attribute to the Group? First and foremost, its very emergence in 1976 rekindled the Ukrainian people's demand for national and human liberties. The group's personal suffering and perseverance in reporting have awakened the world to the Soviet Union's cynical and systematic violation of the national and human rights of the Ukrainian people on their own land.

The hopes and efforts of the Ukrainian Helsinki Monitoring Group for basic national identify and human rights have contributed to a general ferment in eastern Europe against Soviet colonialism. The continuing struggle we are witnessing in Poland, in the Baltic nations and other eastern European states, share with the Ukrainian group a common genesis and legitimacy proclaimed upon the ratification of the Helsinki accords.

Mr. Speaker, the U.S. Government and all free peoples must denounce in the strongest way the continuing Soviet persecution of the Ukrainian nation. As a founding member of the Committee on Baltic States and Ukraine, I am pleased to be a sponsor of House Concurrent Resolution 205, commemorating the fifth anniversary of the founding of the Ukrainian Helsinki Group. I have joined our colleagues, Mrs. FENWICK, in writing to Ambassador Dobrynin, urging the immediate release of the imprisoned members of the Ukrainian Helsinki Group.

The concern and vigilance by the members of this Chamber offers the Ukraine people hope in their struggle against tyranny. The members of the Ukrainian Helsinki Group are courageous and self-sacrificing. Our efforts on their behalf must be based on the same commitment to which they have given their lives.●

● Mr. RATCHFORD. Mr. Speaker, I rise today both to honor the fifth anniversary of the founding of the Ukrainian Helsinki Monitoring Group, and to urge the authorities in the Soviet Union to put an end to the persecution of this group and other individuals who have the courage to speak out against the repressive policies of the Soviet Government.

The flagrant violations of the provisions in the 1975 Declaration of Human Rights in Helsinki undermine the universal principle of the dignity of man, and the bravery of the Ukrainian Helsinki Monitoring Group is testimony that the spirits of men and women may triumph over even the most heavy-handed oppression. In a land where religion is repressed, dissent is not tolerated, and the ability to think differently comes only at a great cost to the individual who dares to do so, it is remarkable that these people will risk their security to speak out. What is not surprising, however, are the heavy-handed tactics used by an insecure government to block this spring of free thought and speech.

The grimly familiar stories of individuals who are arrested, convicted, and imprisoned on trumped-up charges merely because they dare to differ, paint a gloomy portrait of the human rights picture in the Soviet Union. The Soviet Government's attempts to destroy the Ukrainian Helsinki Monitoring Group and with it the sense of national consciousness held by so many of the 55 million Ukrainians are quite simply a travesty of the standards of respect and dignity that should be accorded every genuinely free human being.

Mr. Speaker, the rights granted to the citizens of the Helsinki Pact signatories are the most basic freedoms accorded to all members of civilized nations. Without a doubt, the persecution of members of the Ukrainan Helsinki Monitoring Group violate the very human rights that the Helsinki accords and the group itself seek to protect. I urge the officials in the Soviet Union not only to uphold the obligations of the Helsinki accords, but also to release current members of the Ukrainian Helsinki Monitoring Group from their unjust incarceration, and to put an end to the harassment of this courageous group of individuals.

● Mr. FASCELL. Mr. Speaker, I am pleased to have this opportunity to join in commemorating the anniversary of the founding of a group of individuals dedicated to the cause of human rights, the Ukrainian Public Group. This group, organized by 10 Ukrainian activists on November 9, 1976, has suffered the most severe repression of any of the 5 Soviet Helsinki Monitoring Groups.

The Ukrainian Helsinki Group addresses national issues: Diminished opportunities for Ukrainian culture, the lack of popular Ukrainian political representation, and the situation of Ukrainian political prisoners who represent 40 percent of all Soviet political prisoners. The official Soviet response to the Ukrainian Helsinki Group has been harsh. Today, 30 group members are imprisoned. KBG repression has been particularly cruel: Mykola Horbal and Vyacheslav Chornovil were framed for "attempted rape." The families of some group members have also been imprisoned. Contrary to earlier reports, on September 11, 1981, Raisa Rudenko, wife of group leader Mykola Rudenko, did not get a 3- but a 10-year term of imprisonment. Even frail old women are not exempt—member Oksana Meshko, 76, after being detained for 6 months for psychiatric "examination," was later sentenced to 5 years of internal exile.

In the September issue of Kommunist, KGB Deputy Chairman Tsvigun tried to explain away increased pressures for improved national, religious and emigration rights for Ukrainians as "the intrigues of imperialist intelligence agencies." Despite such adversity and hardship, the work of the Ukrainian Public Group continues, serving as a constant reminder of the need to secure fundamental human rights for individuals throughout the world.●

● Mr. WIRTH. Mr. Speaker, as a member of the Commission on Security and Cooperation in Europe, which monitors the Helsinki accords, I rise to congratulate the Ukrainian Helsinki Monitoring Group on its fifth anniversary.

Five years ago, on November 9, 1976, 10 Ukrainians met in Kiev to announce the founding of the Public Group to Promote the Implementation of the Helsinki accords—a citizens' group whose stated purpose is to examine how the Soviet Government is meeting its human rights commitments under the 1975 Helsinki Final Act. The group's contributions to the Helsinki process have been numerous and valuable.

Today, of the 37 men and women who founded or thereafter joined the Ukrainian Helsinki Monitoring Group, 23 are imprisoned; 3 have been imprisoned and released; 4 are in internal exile; 6 have been forced to emigrate; and 1 has committed suicide. This is evidence both of brutal repression by the Soviet authorities and of the effectiveness of the group's public campaign for human rights.

A memorandum issued by the Ukrainian Helsinki Monitoring Group in the fall of 1979 clearly enunciates the commitment of these courageous people to the principles of Helsinki. As the Madrid Review Conference on the Helsinki accords continues, and a delicate balance between human rights implementation and bilateral military security is sought, we would do well to listen to the voice of the Ukraine:

MEMORANDUM ISSUED BY THE UKRAINIAN HELSINKI MONITORING GROUP

The past two decades became marked in the world as an era of political thaw and the activation of movements that expressed the will of individuals, political groups and entire peoples. This phenomenon did not bypass the Soviet Union, as well.

As the events in 1968 in Czechoslovakia demonstrated, the Soviet government—its statements during the post-Stalin period to the contrary—was not prepared for nor did it adapt to such forms of manifestation of social life and, of all the means of resolving an irritating political situation, chose the most primitive and the most traditional means of an imperial state—military might.

In recent years we have had an analogous phenomenon inside the Soviet state. The government signed international treaty acts in Helsinki, having no intention of observing them. These acts were to have applied to someone, somewhere abroad—American Negroes or Indians—but not to Soviet citizens. As if to say, Soviet society has already secured all rights for its citizens after the October Revolution.

That is what the government thought (it also expected that, as happened earlier, the Soviet people would remain indifferent to everything), but something else happened. In that same state where politics and manifestations of social life are monopolized by the Communist Party were formed public groups to promote the implementation of the Helsinki Accords.

The position of the Helsinki groups attracted the attention of the community in the country itself and throughout the world, on the other hand evoking intolerance on the part of Soviet authorities. The Soviet government would like to drive this current of public opposition into an illegal position, into the underground, transforms it into an anti-state group and, charging it with anti-state conspiracy, square accounts with it. It would like to deprive it of the immunity of publicity and legality, of the support of world public opinion.

We believe that the Helsinki Group in Ukraine has become a national problem for today, a vital issue for the Ukrainian people. We direct the attention of Ukrainian patriots to the exceptional need for its existence, and to the fact that the Group has become a factor in the national liberation struggle of the Ukrainian people for their national and political liberation, for the human right to live freely on their own land.

We who have signed below attest before the entire world and declare to the Soviet government: the Ukrainian Group to Promote the Implementation of the Helsinki Accords lives. The existence of the Group is equivalent to our life, our right to think, to create, to express our opinions.

We do not want to stand on the sidelines while sociopolitical problems that concern us are being decided.

We cannot watch in silence while accounts are squared with patriots, with the better sons and daughters of our people.

We are vitally interested in having life in our country and in the entire world put in order, we are vitally interested in the victory of laws that would guarantee maximum human rights.

Those of us who have just joined the Ukrainian Helsinki Group state that we remain faithful to the founding documents announced by the Group and declare that we will continue to act within the framework of the law.

We also call on everyone to further the activity of the Ukrainian Helsinki Group, to spread its popularity and acquaint the widest circles of the public with its ideas.●

● Ms. FERRARO. Mr. Speaker, I ask my colleagues to join me in the fight against the Soviet Government's

unjust treatment of Ukrainian human rights activists.

As Americans, most of us have not been subjected to harassment, arrest, or persecution because of our personal beliefs. The members of the Ukrainian Helsinki Monitoring Group, who have tried to promote basic human rights for Ukrainian citizens, have not been as fortunate. Their willingness to stand up for their beliefs despite the severe consequences they have suffered, not only deserves our recognition, but also, our own willingness to stand up to Soviet oppression in the Ukraine. Thus, I urge my colleagues and the President of the United States to do their utmost in persuading the Soviet authorities to release imprisoned members of the Ukrainian Monitoring Group and to cease the persecution and arrests of human rights activists.

The United States has the right to question Soviet denial of fundamental freedoms to its citizens under the 1975 Helsinki agreement. The United States has the duty to question Soviet denial of fundamental freedoms to its citizens under the Constitution of the United States and the Declaration of Independence which constitute the basic freedoms of our democracy that we hold dear. I sincerely hope that all Americans will exercise this duty by supporting the efforts of the Ukrainian people to resist russification policies and to reachieve independence.●

● Mr. ROE. Mr. Speaker, I rise today to join my colleagues in both commemorating the fifth anniversary of the formation of the Ukrainian Helsinki Monitoring Group and saluting the bravery of that group's members who placed their very lives in jeopardy in an effort to secure basic human rights for the Ukrainian people.

In 1975 a wave of hope swept through the world as 35 nations, including the United States and the Soviet Union, signed an agreement in Helsinki calling for a new era of cooperation between them. Included in that agreement were pledges to initiate disarmament discussions, freer flow of trade and a recognition of basic human rights for all the peoples of the world.

It was the human rights declaration that raised the hopes of millions of people in Eastern Europe who fell under the Soviet Communist yoke in the period following the First and Second World Wars. For decades the Soviet ruling elite maintained strict political control over the Ukraine, Estonia, and Latvia. The freedom of speech and movement that we take for granted in our great country became the "forbidden fruit" of captive Eastern Europe. Those who dared to taste of that fruit faced some of the most heinous punishments known to modern man. Thousands of Ukrainians were taken from their homes and transferred to the waste lands of labor camps of Siberia and other desolate locations, never to be heard from again.

Mr. Speaker, it is no wonder then that the Helsinki accords of 1975 set free the passionate desire for freedom in the Ukrainian people that had been stifled but never annihilated by the Soviet aggressors.

On November 9, 1976, a group of 10 brave Ukrainians founded the Ukrainian Public Group To Promote the Implementation of the Helsinki Accords, openly challenging the Soviets to live up to the Helsinki accords they had signed a year earlier.

In our own history, they can be compared to the American patriots who declared their desire to be free from British rule.

The leader of the Ukrainian Public Group was writer Mykola Rudenko. The other brave Ukrainian heroes who joined the group were Oles Berdnyk, Petro Grigorenki, Ivan Kandyba, Levko Lukianenko, Mykola Matunevych, Myroslav Marynovych, Oksana Meshko, Mykola Rudenko, Nina Strokata, and Okeksiy Tykhy.

The Russian response to the formation of the group was quick and brutal. Within 3 months, Rudenko and several others were arrested. The Russians have once again sent a loud and clear message to the world that freedom of thought, expression, and other basic human rights would not be tolerated for any nation under their domination. But in spite of the systematic imprisonment of the members of the group, the Ukrainian people reaffirmed their desire to push for the goals outlined in the historic Helsinki agreement. In 1977, the group enlarged to 37 members and sent a series of petitions to the Soviet authorities asking that the Helsinki accords be followed in full, especially in regard to the human rights declarations.

The Soviet response was the same. More members of the group were arrested. At the present time, all members of the Ukrainian Helsinki Monitoring Group are either in jail, committed to internal exile, or have fled to the West.

They have been punished on grounds unheard of in the Soviet Union since the days of Stalin. For example, poet Vasyl Stus was sentenced to prison for 15 years because of thoughts he expressed in letters and notes to friends.

The members of the monitoring group are not the only ones who have been made to suffer by the Soviet authorities. Families of the group members have been persecuted and harassed as well. Wives have been arrested because of their husbands' "crimes" and their children are being expelled from universities.

The Helsinki Conference resumed in Madrid, Spain, last month with the Soviet Union once again a participant. While the Soviets are talking peace in Spain, they are still throwing supporters and relatives of the Ukrainian Monitoring Group into jail.

Mr. Speaker, I urge my colleagues to support a resolution I have sponsored asking President Reagan to act through diplomatic channels for the release of the monitor group from prison and to ask the Soviet Union to cease their persecution of them and their families.

We have learned in the past that the Soviet Union responds to world pressure in matters of this type. We must never let up on that pressure until the people of the Ukraine are once again a free nation.●

● Mr. GRAY. Mr. Speaker, I am honored to join with those of my colleagues who have gathered in this Chamber today to voice our deep concern at the continuing violations of human rights in the Soviet Union.

Specifically, I believe it is important for us to note that this month will mark the fifth anniversary of the founding of the Ukrainian Public Group To Promote the Implementation of the Helsinki Accords.

Mr. Speaker, this group was formed in Kiev by 10 courageous individuals, soon after the Soviet Union signed the accords. It was one of several groups which came together in the aftermath of the Helsinki conference. Sadly, it experienced the most tragic fate of any of the groups, in that all 37 people who ultimately joined the organization have subsequently undergone intense persecution by the Soviet Government—persecution ranging from police surveillance to sentences of exile and long-term imprisonment.

As we mark this anniversary, Mr. Speaker, I believe we must recognize that the only crime of these persons was to attempt to bring their government into compliance with an international agreement signed by the Soviets themselves. The Helsinki accords guarantee rights in the areas of culture, civil liberties, religious freedom, and political liberty.

These goals are far from realized in the Soviet Union, as the members of the Ukrainian Public Group know only too well. Instead, the Soviet Union has carried out a brutal campaign to suppress even the enunciation of these rights, as evidenced by the fate of the Ukrainian Public Group.

The group's activities, however, have not been meaningless. Through their courage and personal sacrifice, the members of the group have demonstrated to the entire world how the Soviet Union ignores its international agreements. For instance, as we meet here today, Mr. Speaker, fully 5 years after the signing of the Helsinki accords, the Soviet Union has established no government-sactioned enforcement mechanism. It disregards

monitoring of an international agreement by other nations as intrusion into its "internal affairs." And it labels the monitoring by its own citizens as "anti-Soviet agitation and propaganda."

Mr. Speaker, it is important that we state our concern here today, because the Soviet system of terror and repression relies on silence itself; it relies on the lack of interest and public outcry of the world community.

As men and women of conscience, we must not remain silent. We must continually call public attention to the Soviet Union's violation of human rights. For those who cannot speak out, we must raise our voices, lest their sacrifices be in vain.●

● Mr. ANNUNZIO. Mr. Speaker, it is a privilege for me to join my colleagues in commemorating the fifth anniversary of the Ukrainian Public Group to Promote the Implementation of the Helsinki accords, and I was also proud to cosponsor House Concurrent Resolution 205, calling upon the President of the United States to act through diplomatic channels for the release of these heroic Ukrainian monitors from incarceration and to prevail upon the Soviet Government to cease harassing and persecuting them.

Earlier this year, I joined with other Members of Congress in contacting the Soviet Ambassador here in the United States on behalf of Raisa Rudenko, the wife of Mykola Rudenko, Ukrainian poet-author and founder of the Ukrainian Public Group to Promote the Implementation of the Helsinki accords, and a copy of that letter follows:

JULY 28, 1981.

Hon. ANATOLIY DOBRYNIN,
Ambassador, Embassy of the Soviet Union, Washington, D.C.

DEAR MR. AMBASSADOR: We are writing to express our concern about the disappearance of Raisa Rudenko, the wife of Mykola Rudenko.

Recent reports have indicated that Mrs. Rudenko might have been arrested on 15 April of 1981. It is believed that she has been charged with a violation of article sixty-two of the Ukranian Criminal Code for allegedly smuggling poetry from her husband in prison.

We urgently request that Raisa Rudenko be released from detention, and that she be permitted communication with her husband as to her whereabouts and condition. Finally, and most importantly, we reiterate our request that Mykola Rudenko be released from the labor camp and allowed to travel to the United States for medical treatment and that his wife, Raisa, be allowed to accompany him.

Sincerely,

FRANK ANNUNZIO,
Member of Congress.

Mr. Speaker, I was also glad to join with my good friend and colleague from Illinois, the Honorable Edward J. Derwinski, in cosponsoring House Concurrent Resolution 123, to seek the resurrection of the national churches in the Ukraine, which follows:

H. CON. RES. 123

Concurrent resolution to seek the resurrection of the national churches in the Ukraine

Whereas the Charter of the United Nations, as well as its Universal Declaration of Human Rights, sets forth the objective of international cooperation "in promoting and encouraging respect for human rights and for fundamental freedoms for all without distinction as to race, sex, language, or religion . . ."; and

Whereas in the so-called Brezhnev Constitution of the Union of Soviet Socialist Republics article 52 unequivocally provides that "Freedom of conscience, that is, the right to profess any religion and perform religious rites or not profess any religion, and to conduct atheistic propaganda, shall be recognized for all citizens of the United Soviet Socialist Republics. Incitement of hostility and hatred on religious grounds shall be prohibited"; and

Whereas not just religious or civil repression but the genocide—the absolute physical extermination—of both the Ukrainian Orthodox and Catholic Churches in a nation of over fifty million brutally violates the basic civilized rights enunciated above: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that the President of the United States of America shall take in the name of human rights immediate and determined steps to—

(1) call upon the Government of the Union of Soviet Socialist Republics to permit the concrete resurrection of both the Ukrainian Orthodox and Catholic Churches in the largest non-Russian nation both within the Union of Soviet Socialist Republics and in Eastern Europe; and

(2) utilize formal and informal contacts with Union of Soviet Socialist Republics officials in an effort to secure the freedom of religious worship in places of both churches that their own constitution provides for; and

(3) bring to the attention of all national and international religious councils the nature of this outstanding Stalinist crime and perpetuated violation of basic human rights, with an appropriate address to mobilization of their resources toward the realization of this resolution's objective.

We find ourselves in continuing confrontation with the Communists for the minds of the people of the world, and although no one would disagree that all efforts should be made to stop the nuclear arms race, the spiritual struggle between freedom and communism can never cease. I feel that our commitment to freedom compels us to dedicate ourselves to the cause of freedom throughout the world and to support the continuing efforts of the Ukrainian people to win the rights of self-determination and liberty.

If we loose the struggle for the minds of men and women everywhere, our weaponry will not prevail, and this fifth anniversary of the Ukrainian Public Group to Promote the Implementation of the Helsinki accords is a most appropriate occasion to proclaim our precious heritage and remain firm in our sympathy for the aspirations of the Ukrainian people in their struggle to resist the vicious and brutal Communist system.●

● Ms. OAKAR. Mr. Speaker, over 5 years ago 35 countries of Europe and North America signed the Helsinki Final Act. Among the most important provisions of this document are the ones guaranteeing elementary human rights and freedom of cultural and national expression. In response to this important international agreement, citizen groups were formed in nearly all the signatory countries. One of the most important of the Helsinki-related groups is the Ukrainian Public Group to Promote the Implementation of the Helsinki accords, based in Kiev. The group was formed just over 5 years ago, on November 9, 1976.

Ukraine has been the scene of frightful violations of human rights in this century. Her people have suffered wars, famines, terror, and repression that have caused the violent death of many millions of Ukrainians. In recent decades, mass arrests have been implemented to stem the growing movement for human and national rights in Ukraine. Thus, Ukrainians, who comprise 20 percent of the Soviet population, constitute over half of the political prisoners. Led by writer-poet Mykola Rudenko, the Ukrainian Helsinki Group was organized by its 10 founding members to address this unhappy state of affairs.

The group issued several incisive memoranda describing the systematic violations of human rights in Ukraine. Most of these repressions, the group showed, stemmed from the efforts of Soviet authorities to deny Ukrainians their right to national expression.

It took great courage on the part of the Ukrainian Helsinki Group to publicize the reprehensible state of affairs in their country. Immediately upon the formation of the group, the KGB undertook a campaign of harrassment against its members. When vandalism and violence did not stop the activities of the group, the secret police moved in with arrests. Those arrested, however, were replaced with other Ukrainian citizens who claimed the right to act in the spirit of the human rights provisions of the Helsinki accords.

The positions of the Ukrainian Helsinki Group are not only directed toward the achievement of human rights. The Group recognizes that human rights are integrally tied with national rights. Ukraine, the group points out, one of the largest countries in Europe, has a population of 50 million and a rich and diverse economy. Besides that, the Ukrainian S.S.R. is a charter member of the United Nations. By virtue of these facts, the group argues logically, Ukraine should have its own representatives at all international gatherings, including the Helsinki follow-up meetings. Taking such a principle and courageous stand

on the national rights of Ukrainians is what led to the 10-and 15-year sentences for many of the Ukrainian Helsinki Group members. Over 30 men and women in the group have been arrested, imprisoned or exiled.

It is fitting that we pause to commemorate the founding of this significant Helsinki Group and offer our moral support to its members and encourage the United States and our allies to extend the same kind of political support. When the peoples of Eastern Europe—among them the 50 million Ukrainians—finally achieve the rights guaranteed them by the Helsinki Final Act and other international agreements, the threat posed by Soviet military might will have been defused and the whole world will then be a safer and happier place for everyone.●

● Mr. FISH. Mr. Speaker, it is with great concern that I join my colleagues in a concerted effort to liberate a group of Soviet citizens dedicated to compliance by their government with the humanitarian provisions of the Helsinki accords.

Subscribing to the principles of human, democratic, and national rights, the Ukrainian Helsinki Monitoring Group of which we speak today, has linked their struggle with the worldwide pursuit of fundamental human rights. On November 9, 1976, repressed and persecuted Ukrainians founded their monitoring group. They created, in effect, an open public group under a totalitarian regime, providing the vehicle in which Ukrainian dissent could be heard.

The Ukrainian pursuit of freedom is significant, as the Ukrainians comprise 20 percent of the Soviet population with over 50 million people—the most numerous of the non-Russian Soviet people and the second largest Republic of the U.S.S.R.

Severe repression in the Ukraine is the reason for the massive arrests of intellectuals, workers, and religious believers in 1965-66, 1972 and 1977-78. With particularly harsh prison sentences, Ukrainians are denied, inter alia, their right to emigrate. Ukrainian dissidents courageously survive in prisons, camps, psychiatric institutions and in eternal exile. The incarcerated monitors include: Anatoly Shcharansky, Vladimir Semyonich, Vyacheslav Chornovil, and Yuri Shukhevych.

Opening a new era in the struggle for human and national rights, the Ukrainian Helsinki Monitoring Group—with the support of Western democracies—has a compelling moral basis in demanding the Soviet Union uphold human rights. Interestingly, Ukrainian dissidents have and continue to strictly adhere to Soviet law and ideology. Pointing to early Soviet doctrine in which nationalism was a force to be respected, the dissidents request the Soviet constitution be upheld.

The Ukrainian Helsinki Monitoring Group has managed, despite precarious circumstances, to publish extensive documentation of widespread repression and abuse of power in the Ukraine. Reports of arbitrary arrests, illegal searches, and destruction of various aspects of Ukrainian culture have become commonplace. Foreign radio broadcasts carrying information on the monitors has prompted Soviet citizens to volunteer additional information on human rights violations in various areas of the U.S.S.R.

The success of the first Helsinki group in Moscow has encouraged other such groups in Soviet-satellite countries. It is imperative that the U.S. support these undaunted efforts to secure human rights, so that it may encourage men and women who live under Soviet oppression to voice their opposition, as have the people of Lithuania, Georgia, and Armenia.

The dissidents are looking to the West for support in their quest for basic human rights. It is essential that we support their aspirations.●

● Mr. VENTO. Mr. Speaker, I rise today to join with my colleagues to voice my support for the Ukrainian Helsinki Group.

Despite continued harassment and imprisonment by Soviet officials, this brave group of individuals have not been silenced. Their efforts to bring to public light the Soviet violations of the letter and spirit of the Helsinki accord are a true tribute to Ukrainian respect for individual rights.

However, these individuals cannot succeed alone. They need our support and the support of concerned individuals throughout the world. We must redouble our efforts to force the Soviet Union to guarantee the basic human rights as set forth in the Helsinki agreement.

This issue will not go away and like the Ukrainian Helsinki Group, we shall not be silenced.●

GENERAL LEAVE

Mr. DOUGHERTY. Mr. Speaker, it is my understanding that as many as 21 of our colleagues have submitted statements for the RECORD, and I ask unanimous consent that any of the Members who care to submit statements may have 5 legislative days to submit those statements on this very critical issue.

The SPEAKER pro tempore. Is there objection of the request of the gentleman from Pennsylvania?

There was no objection.

Mr. DOUGHERTY. Mr. Speaker, I would also like to extend an invitation to all the Members to join us at a reception which is currently going on this evening in room 2168, sponsored by the ad hoc committee and the Ukrainian committee, to meet with many of the individuals who participated in the activities of the Ukrainian group.

□ 1920

In closing, Mr. Speaker, let me just extend my personal thanks to all the members of the Ukrainian group, the members of the Ukrainian community here in this country, who have brought to the Members of Congress such a vital issue. We cannot do it alone. It is also up to the people of the United States, the people of Ukrainian descent, of Lithuanian descent, of Latvian descent, or whatever, who feel they have a cause that has to be championed, and they have an issue which has to be given the light of Congress and the light of day.

Indeed, Mr. Speaker, without their enthusiasm and without their support, the people behind the Iron Curtain would certainly be silent without recognition.

In closing, let me pledge to those people on behalf of all the Members of Congress who are part of the Ad Hoc Committee on the Baltic States and Ukraine our continuing efforts to see that the Soviet Union knows that we are here to support and champion the cause of the Ukraine and the cause of human rights for those people who believe in dignity, who believe in self-growth, and who believe that they should have the right to live and grow as free people.

LEGISLATION TO ENHANCE AMERICA'S ENERGY FUTURE AND NATIONAL SECURITY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Massachusetts (Mr. MAVROULES) is recognized for 30 minutes.

● Mr. MAVROULES. Mr. Speaker, today I rise to introduce a bill that will enhance America's energy future and national security. The bill I am introducing today, the Department of Defense Renewable Energy Utilization Act, addresses these important national concerns by giving the DOD a greater role in reshaping its own energy needs and consumption patterns.

There is no more serious threat to the long-term economic and military security of the United States than that which stems from the growing deficiency of secure and assured energy resources. The 1973 Arab oil embargo alerted all Americans, but particularly the military, to the vulnerability of their dependence on petroleum products.

America's lifeline, and its Achilles' heel, is oil. Unfortunately, this dangerous dependency carries on into the military sector. The DOD cannot afford to be immobilized by interruptible supply lines dependent on foreign nation's whims or crippling energy costs that work to divert valuable defense dollars to fuel costs, and not to improving our military preparedness. I refer to the DOD annual report for

fiscal year 1982, January 1981, which acknowledges that:

Inflation can steal defense purchasing power, and thereby (damaging) the national security.

Thus, it is counterproductive not to have the DOD participate more directly in meeting its energy needs.

Meeting these energy needs is just as important as deciding whether to build the B-1 bomber or how many tanks should be purchased in fiscal year 1983. DOD cannot move its tanks or jet aircraft, nor power its buildings or equipment without energy. Unfortunately, these energy needs are being primarily met by petroleum products. Mainly because of the demand by aircraft and ships, some 81 percent of DOD's total energy needs must be met by petroleum products.

Obviously, there is little room for using innovative alternative energy sources to meet the energy requirements of DOD's transportation sector. Renewables, where applicable, would provide the proper mechanism for giving DOD an inexhaustible and reliable energy source for its electrical power generation needs.

The DOD Renewable Energy Utilization Act establishes the appropriate mechanism for DOD to accomplish this important task by accelerating the commercialization of solar and other renewable technologies.

Program goals of industry growth, innovation, promoting small business development, and the facilitation of early transition to sustaining markets are just a few of the benefits to be derived from the Renewable Energy Act. Through these efforts of multiyear purchases, we will be able to assure private industry that the proper market assurances of large numbers of energy equipment will be provided so that they will be willing to invest in the appropriate production equipment and research and development required for innovation. These large near-term markets will provide it with a proper market stimulus for cost-reducing innovations through mass production, so that newer energy technologies can compete with conventional energy equipment. In this manner, the Renewable Energy Act can do for photovoltaics and other renewable technologies what the space program did for the semiconductor industry.

President Reagan has made it quite clear that he will hold true to his campaign promise to dismantle DOE, thus effectively removing from the energy scene a previously important participant in this area. Therefore, without DOD help, the achievement of technological developments that need to take place before photovoltaics and other renewable energy alternatives can become cost competitive with electricity from other sources will be slowed down dramatically. Postponing these major scientific breakthroughs does not make sense at a time when the solar industry desperately needs assistance from the Federal Government, and particularly needs to cure the Federal Government of its schizophrenic treatment of renewables.

I think it behooves the administration and the DOD to support Congress efforts to demonstrate to the American people not only the seriousness of our energy problems but also what alternatives are available and can be stimulated by proper Government action and policy.

Furthermore, it is shortsighted to suggest that the costs of demonstrating these technologies through the DOD—as some critics of renewable energy sources believe—outweighs the importance of getting them into the energy stream as quickly as possible. It is not an embarrassing situation for the DOD to get involved in energy-related activities. To me, it makes good sense to tap DOD resources and its disciplined approach to solving problems for energy-related advances that they stand to directly benefit from.

Defense-related programs are the dominant consumers of fuel in the Federal sector. Excluding purchases for the strategic petroleum reserve, the Pentagon purchases were approximately 97 percent of Federal fuel purchases in the first half of fiscal year 1980 and 94 percent in fiscal year 1979. The Defense Department's fuel purchases amounted to $4 billion in fiscal year 1979, while this figure jumped dramatically to an average of $7.5 billion to $9 billion in fiscal year 1980.

It is obvious that in order to effectively reduce the DOD's fuel bill, Congress and the Pentagon must join together in a strong united front to move the Pentagon much more quickly away from its overall dependence on petroleum products, and into energy systems that promote energy conservation and the use of alternate energy sources. These efforts must be accelerated during the next few years.

By the Defense Department taking the lead in utilizing promising alternate energy sources for military application, the Pentagon's efforts will result not only in reducing its consumption of petroleum products, but its experience and the accompanying technological spinoffs will be adaptable to the needs of the civilian world as well. This will assure a growing market for energy systems powered by solar and other renewable forms of energy and will hasten the general commercial, residential, industrial, agricultural, and governmental use of such systems in the United States and abroad.

Surely, the DOD has the motive, and perhaps, more importantly, it has the ability to provide a market of sufficient size, and if need be, it can underwrite prices. There is every reason to support the Pentagon as the lead agency in energy use production in this country. This course of action will not take it away from its defense-related activities. This realistic approach was even recognized by former Defense Secretary Clark Clifford who said that Americans have a right to demand that the Pentagon should use its economic power to help solve those domestic problems which are important to our total national security.

Along this vein, one renewable energy source that has a promising career with the DOD is photovoltaics, simple devices with a projected lifetime of over 20 years. Photovoltaics—solar cells which covert sunlight directly into electricity—were first used on space satellites of the 1960's at a cost of $250,000 per watt. But, as in other semiconductor technologies, such as pocket calculators, continued advances in materials research and manufacturing processes have dramatically reduced the cost of photovoltaic systems. It is encouraging to note that today this cost has fallen to only $10 to $12 per peak watt, thus making them cost competitive with diesel-fired electric generators in remote site applications. Hopefully, the mideighties will herald the appearance of the $1.60 to $2.20-per-peak-watt photovoltaic module. With DOD creating a large near-term market stimulus for cost-reducing innovations through mass production, these lowered costs will be a big boost to the photovoltaic industry.

A task force on solar energy commercialization released by the DOD in 1977 entitled "DOD Photovoltaic Energy Conversion Systems Market Inventory and Analysis" stated that:

Photovoltaics offer a number of advantages to the DOD. In addition to potential cost and fuel savings, photovoltaic energy systems would provide the DOD a highly reliable, silent power source allowing virtually unattended operation in most areas of the world. Near term benefits to the DOD include cost and logistics savings at remote sites, in portable equipment and offshore applications.

The U.S. would also receive national benefits from accelerated commercialization of photovoltaics. Over the longer term, photovoltaic energy systems will offer the nation a cost competitive source of commercial electric power or provide a user-owned dispersed source of power, thus reducing dependence on foreign energy sources. Other national benefits include the development of exports to underdeveloped countries where photovoltaic systems would be utilized for rural electrification and irrigation pumping.

Thus, the potential market for P/V and P/V-thermal systems consists of installations and specialized energy requirements at remote sites, for offshore uses, and for portable equipment. In terms of total energy consumption, installations are the prime market, P/V systems are likely to prove cost effective for use in these specialized applications several years before they become competitive with commercial electrical power on a unit cost basis. The potential high reliabil-

ity, low maintenance requirements, quiet operation, long lifetime, and modular character of P/V energy systems make them a desirable alternative for these applications.

DOD energy consumption only amounts to 2.2 percent of the national energy requirements. Thus some of the DOD markets for P/V energy systems may represent only a small fraction of the total U.S. market for comparable applications. A number of examples are also listed in the exhibit of cases where P/V energy systems for DOD applications may be directly transferred to the private sector. Examples include cathodic protection, microwave repeater stations, airway navigation, warning lights, and large scale applications at remote sites. More generally, a large P/V substitution market exists in both the DOD and private sector for systems currently powered by small generators.

In addition, there is the real potential of moving the United States further into the international photovoltaic market. There exists very little disagreement with the fact that developing Third World countries need reliable energy sources. The U.S. photovoltaics industry has recognized the significance of the foreign markets to achieve future growth and to serve as a bridge between the applications in developing countries and grid-connected residential and commercial applications for photovoltaic systems domestically in the future. Countries, such as the United States, which are developing photovoltaic technologies have a strong commitment to promoting exports to the developing countries, particularly of the global Sun Belt region. Reasons for this emphasis include the lack of a conventional energy distribution infrastructure—often resulting in very high energy costs—the availability of solar energy in such areas, and policies of national governments to promote the use of renewable resources as a means of reducing oil imports and the development of local industries.

Through DOD advances in photovoltaic military applications, that have private sector applications, these forward-looking steps can be easily transferred abroad, thus not only linking these developing nations' energy advances to the United States but also allowing for the direct transfer of advanced energy technology. Surely, our national security can only be enhanced through these efforts in international cooperation for energy resources advances.

Legislative initiatives have attempted to stimulate DOD interest in the very real benefits of alternate energy sources such as photovoltaics. DOD has been involved in a number of projects to promote energy conservation and alternate energy sources. Though the Department has been doing an admirable job in promoting a steady, incremental progress toward long-range national energy conservation goals wherever possible, more needs to be done, particularly in stressing the attributes of renewables. The DOD has taken just about all the steps that it can with respect to energy conservation, and more emphasis must now be placed on exploiting the benefits of alternate energy sources, especially as a displacement fuel for conventional fuels and overall operating costs. With respect to providing a viable energy source for military construction and power systems purposes, photovoltaics and other renewables offer a solution to substituting conventional fuels for other energy resources.

In addition, during the time of war when the DOD and its supporting industries' energy needs would at least triple, the use of photovoltaics as an alternate fuel source becomes even more valuable. Hence, it makes good sense for the DOD to become more directly involved in the development of photovoltaic energy as a replacement for conventional petroleum fuels in the field of electrical power generation.

The time has come for Congress to create a permanent Department of Defense program that will establish for the DOD a badly needed continuity in its long-range plans for promoting solar technologies. This will assist the industry in determining exactly what it must do on its own to make this energy alternative a viable energy source for the DOD.

By temporarily creating through Government procurement a large enough market for solar cells, mass production techniques will be instituted so as to drive down the cost of the cells, thus stimulating a larger private demand for them.

Up to a few weeks ago, two Federal programs were involved in defense-related photovoltaics activities, the Federal photovoltaic utilization program (FPUP), Public Law 95-619, title V, part 4 of the National Energy Conservation Policy Act, and recent military construction authorization and appropriations bills. The FPUP program was established to use Federal facilities as proving grounds for photovoltaic applications which would have the potential for substantial energy impacts on the public sector in the future. The military construction budget, on the other hand, calls for the Department of Defense to install photovoltaic systems wherever it is cost effective. Unfortunately, for a number of years, there have been two conflicting cost-effective formulas dictating what the DOD does with this renewable energy source. These inconsistent formulas, which come from the authorizing and appropriating language to the DOD military construction budget, have effectively prevented the DOD from effectively applying photovoltaics in a more aggressive manner.

Unfortunately, neither program has provided the proper impetus for promoting both photovoltaic commercialization and market development. Worse yet, President Reagan, who has shown great sympathy for the nuclear energy industry, has exhibited a strong dislike for alternate energy sources in America. No funding has been placed in the fiscal year 1982 DOE budget for photovoltaic commercialization or market development, only for research and development. As a matter of fact, the President's budget is replete with such devastating budget cuts in the area of alternate energy sources. This is surely a sad state of affairs for America's energy future.

Photovoltaic projects, originally set to receive $160.2 million in fiscal year 1981, received only $144.6 million after the President's rescission and deferral scheme for fiscal year 1981. For fiscal year 1982, this funding level stands at only $97.6 million. In addition, in the general area of solar energy, with a $585 million original funding level for fiscal year 1981, this figure dropped to about $303 million after reconciliation for fiscal year 1982. Though this figure of $303 million is a disappointment to those who want to see energy independence achieved within the foreseeable future, it certainly is more generous than President Reagan's $193.3 million figure for fiscal year 1982.

America's energy misfortunes are compounded by the administration's blanket decision to slowly take apart DOE, and provide no viable substitute for DOE, the Federal energy agency.

This sad situation signals to me, loud and clear, that DOD must step in and take over in those critical energy areas that affect its energy needs. In the case of photovoltaics, its technology, reliability, and cost effectiveness has been proven time and time again, and these factors have placed photovoltaics at a level ready for commercialization. Now, more than ever, the DOD must step in to replace the DOE in advancing the commercialization and market development of photovoltaics and other renewable energy sources that have direct military and civilian applications.

We can no longer depend on the DOE to carry the ball for photovoltaics and other renewables, and we cannot rely on DOE's past track record in this area to fall back on for support and guidance. After all, Federal agencies primarily are the mouthpiece of the governing administration, and past administrations have not followed the congressional intent for Federal energy programs.

In the past, the Carter administration was very lax in pursuing congressionally created photovoltaic programs. President Carter's cry for meeting 20 percent of our Nation's energy needs through solar energy could

never have been achieved had we relied on his budget recommendations. As illustrative of that administration's shortcomings in this area, it even failed, in the fiscal year 1980 budget, to have the DOE or even OMB request any funds for the FPUP program. With good reason, the House Science and Technology Subcommittee on Energy Development and Applications was greatly concerned that the congressional mandate to begin FPUP in 1980 was being ignored. Ultimately, only about $38 million of the original $98 million was ever funded for FPUP purposes, and $7 million of this still remains uncommitted. Never really having gotten off the ground properly, the FPUP program expired at the end of fiscal year 1981, leaving an unimpressive story to tell. This is hardly a step in the right direction for promoting energy self-sufficiency.

The question that comes to my mind, at this point, is: Who or what will fill the gap for promoting photovoltaic and other solar energy uses in America, particularly through the tapping of our military resources?

The Federal track record in photovoltaics has never experienced a winning moment. Criticism leveled against the DOE's past treatment of photovoltaic programs that was observed on September 19, 1978, before the Senate Subcommittee on Energy Research and Development of the Senate Committee on Energy and Natural Resources is aptly appropriate today to capsulize DOE's experience with photovoltaics to date. Senator GARY HART's opening statement for the subcommittee record stated:

> Present and past administrations have fallen into a disturbing habit of submitting unrealistically low budget requests for this program in the interest of demonstrating fiscal restraint, leaving Congress to authorize and appropriate the program at levels consistent with the developmental needs of this technology. The unfortunate result has been the evolution of a Federal photovoltaics program which lacks coherence, a sense of mission and priorities, and the commitment of the Department of Energy.

It seems reasonable to deduce that, based on the DOE's past track record, it has been painfully slow in addressing the mandate of Congress to start a purchasing program for photovoltaics. And certainly, fiscal year 1982 does not promise to be a great year for DOE photovoltaics efforts, which now will be advancing at a snail's pace.

Perhaps, though, we should be looking on the bright side, for regardless of DOE's failings in the photovoltaic area, DOD's experiences have been more impressive, but still rather limited when compared to Congress original intentions for what role photovoltaics will play in America's energy future.

DOD has been rather outspoken in the past with respect to the very real benefits it stands to receive by utilizing photovoltaics. Though realizing that there are appropriate military applications for this energy source, the DOD has unfortunately been dealing with photovoltaics on a limited scale for a number of years. In "Program Plan for Department of Defense Participation in the DOE/DOD Initiative for Solar Photovoltaics Utilization" of April 1978, it summarizes the conclusion that appeared in a report released by the Federal Energy Administration entitled "DOD Photovoltaic Market Inventory and Analysis." This report sought to lay out the groundwork for promoting these conclusions as part of the FPUP program. The conclusions were:

> DOD is the largest single Federal user of petroleum fuel and therefore, has the maximum energy savings payoff potential.
>
> DOD has a greater variety of electric powered equipment and facilities and can cover more application types, which would result in greater spin-off to private sector markets.
>
> A coherent in-house product design, development, production and deployment structure exists, from R. & D. labs to procurement offices, depots, and maintenance facilities.
>
> Extensive test and evaluation facilities exist throughout the world. This is especially significant in that the test facilities themselves are a major early market for photovoltaics. By conducting official DOD testing on early applications at the test sites, the lead time for introduction of these new systems in DOD can be shortened.
>
> Physical security at military bases can insure against vandalism, which could be a serious problem for other agencies. This would not necessarily hinder visibility; an aggressive public affairs program can accomplish visibility and technology transfer.
>
> Existing facilities provide the capabilities to implement, monitor, and evaluate the cross impacts of various options in a controlled environment.

With the DOD's public position evidencing a strong support of and commitment to photovoltaics, it appears obvious that DOD's efforts to utilize photovoltaics to a greater degree could only be assisted by substituting the two conflicting formulas presently applicable to DOD photovoltiac activities for a formula that offers a realistic and straightforward approach to determining the cost effectiveness of photovoltaics for military construction and power systems purchases.

Ever since DOE and DOD initially got involved in photovoltaics and other solar renewables, there has been a problem in devising a formula that realistically appraises the cost effectiveness of these valuable energy resources, within a world of rising energy costs, volatile political situations in oil-producing countries, and the need to develop alternate energy sources. Gone are the days when solar renewables were considered merely novel or an energy source for the future. The future has arrived today. Photovoltaics and other solar renewables have proven their reliability and usefulness time and time again.

Congress and DOD must join efforts in developing these promising energy alternatives. America has everything to gain and nothing to lose by this effort. The Department of Defense Renewable Energy Utilization Act offers the DOD the opportunity to do its part to guide this Nation to a higher level of energy independence and energy security, which in turn leads to our national security.

Forced to live beneath an energy ceiling, America needs the DOD's expertise, resources, and commitment to national security to move it closer to an energy independence that is secure, reliable, and permanent.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. GILMAN) is recognized for 5 minutes.

● Mr. GILMAN. Mr. Speaker, yesterday, October 16, and earlier today, October 17, I was in New York City in pursuance of my duties as a member of the U.S. delegation to the United Nations General Assembly, and was consequently unable to be present in the House Chamber to vote on a number of matters that came up.

Yesterday, I was absent for rollcall No. 298, the matter of approving the Speaker's approval of the Journal of the previous day's proceedings, which passed, 303 to 8; I would have voted "yea." I also missed rollcall No. 299, on ordering the previous question on the rule for the consideration of the 1982 continuing appropriation; I would have voted "nay," in order to allow an amendment to the rule to be offered, but the previous question was ordered, 185 to 174. Finally, there was a vote on the rule itself (rollcall No. 300), on which I would have voted "aye," and which passed, 197 to 169.

Earlier today, a number of votes developed on technical matters. I would have voted "aye" on rollcall No. 304, the question of approving the Speaker's approval of yesterday's proceedings—which motion passed, 301 to 39—and I would have voted "aye" on a technical amendment to a private bill, H.R. 1797 (rollcall No. 305), which amendment passed, 353 to 0. I would have voted "no" on the Foley motion to allow the House to adjourn to a later time today (rollcall No. 306) which passed, 191 to 172, and I would have voted "no" on the Foley motion to adjourn (rollcall No. 307) which passed, 188 to 172.●

ALASKAN NATURAL GAS PIPELINE WAIVERS ARE UNWISE

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CORCORAN) is recognized for 5 minutes.

● Mr. CORCORAN. Mr. Speaker, the House will soon be considering Alaskan Natural Gas Transportation System (ANGTS) waivers submitted to Congress on October 15 by the President. Congressional consideration of these waivers will be on an expedited basis provided for in the Alaskan Natural Gas Transportation Act of 1976. Congress must act by mid-December on the waiver approval legislation, House Joint Resolution 341.

These waivers would transfer the bulk of the financial risks from the sponsors and lenders to the consumers. Consumers could end up paying for an incomplete system that may never transport any gas at all. The lenders that testified before the Energy and Commerce Committee's Subcommittee on Fossil and Synthetic Fuels, of which I am a member, made it clear that this waiver package does not necessarily mean that this project will receive the financing that is needed to complete it.

In 1977, President Carter made a decision to support the Northwest Energy Co.'s Alcan proposal. The Congress supported this proposal as well, but we were assured by Mr. McMillian, chairman and chief executive officer of Northwest Energy Co., that consumers, in his words, would not "have to bear the hypothetical burden of the noncompletion of the project."

Mr. Speaker, after 7 days of hearings with the testimony of 63 witnesses, I have concluded that the proposed financing package for this $50 billion project is not in the best interest of the millions of gas consumers throughout our country. In the coming days, I will be providing further information emphasizing the reasons why we should reject this ANGTS waiver package. I urge you, Mr. Speaker, and our colleagues, to oppose this waiver legislation.●

AIR TRAFFIC CONTROLLERS SHOULD BE REHIRED

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 15 minutes.

Mr. GONZALEZ. Mr. Speaker, last October 5 I addressed a letter to the President of the United States, Mr. Reagan, in which in essence I requested that he consider the calling back of the majority, if not all, of the air traffic controllers who were fired by him earlier this year.

I pointed out in the letter some of the basic reasons for my request. Principally, I pointed out that it seemed so revengeful in view of the fact that the union, to all intents and purposes, had been broken, and, therefore, it was a question of not only being merciful but it was a question of being reasonable and avoiding a billion-dollar expenditure in the course of trying to hire new air traffic controllers.

Mr. DYMALLY. Mr. Speaker, will the gentleman yield?

Mr. GONZALEZ. I am glad to yield to the gentleman from California.

Mr. DYMALLY. Mr. Speaker, I commend the gentleman from Texas (Mr. GONZALEZ) for bringing this matter to the attention not only of Congress but of the people of the United States.

I, too, wrote the President. I said to him, "You have won. You have punished them. Be compassionate. You have made your point. Let's not be punitive."

I regret to say, I say to my friend, the gentleman from Texas, that the President wrote me a most disappointing letter through his legislative coleader saying that he had no intention of recalling these men back to their jobs.

Mr. GONZALEZ. Mr. Speaker, did the gentleman say that he received a reply from the President himself?

Mr. DYMALLY. No; the letter was from his legislative assistant.

Mr. GONZALEZ. I was beginning to feel a little bit disinflated, because I received a letter from his chief liaison officer in the White House, and I wanted to point out that the gentleman would have been very, very unusually treated if he had received a letter directly from the President in answer to one that he directed to the White House.

This is the first President in 20 years that I have had occasion to work with who apparently has that as a practice, because he does not demean himself by answering letters from an individual Congressman. Even Gerald Ford, who first used Mr. Friedersdorf as his chief liaison, and Mr. Nixon used a different approach. I have this much to say, that at least you would get a reply from them. I, too, like the gentleman from California, received a nonreply, an unresponsive letter via Max Friedersdorf.

Mr. DYMALLY. Mr. Speaker, I say to my friend, the gentleman from Texas, that I was in a meeting at Raleigh, N.C., last weekend, and there sat a wife and a husband, and the son was absent. The husband and the son were air traffic controllers. The father was management, and he took the side of the President. The mother, as we walked out of the reception area, whispered to me, "I hope you continue to support the controllers because I think my son is right." She disagreed with her husband. I cannot express the tension that exists in that house.

I believe the President lacks compassion, and we know that the airlines are suffering. In fact, in today's NBC show we saw a number of United Air Lines pilots being used as salesmen because they run the risk of having 1,000 pilots being laid off because of the cutbacks.

I think the President has made his point. I think the Nation has accepted his punitive action toward the controllers. They are ready to come back.

Mr. Speaker, this makes no sense economically or from a human point of view. It makes no sense to continue to have these men out there when we run the risk of reduced traffic, reduced income for the airlines, and reduced income for these men and women who are out of work.

Mr. GONZALEZ. Plus the hazards that the coming days of the winter will bring about and enhance in air travel. It will necessitate either a further cutback on air travel, which has already been severely cut back, or greater risks to the traveler.

Mr. Speaker, I am deeply grateful to the gentleman from California (Mr. DYMALLY), because his experience parallels my experience.

Mr. Speaker, I place in the RECORD at this point my letter to the President dated October 5, 1981, as follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., October 5, 1981.

Hon. RONALD REAGAN,
President of the United States,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT: I am writing to request that you reconsider your position regarding re-hiring of air traffic controllers who went on strike.

First, hiring and training replacement air traffic controllers will be expensive. Estimates I have head from the Department of Transportation suggest that the cost of replacing the controllers will be on the order of one billion dollars. At a time when the Administration is looking for ways to save money, it makes eminent sense to avoid the needless cost of replacing the nation's air traffic controllers.

Second, re-hiring controllers would not alter the status of their union, which is likely to be decertified. If the Union is decertified, it would be pointless to pretend that re-hiring the controllers would mean accepting any of their union's demands. It would not mean that even in the unlikely event the union somehow remains certified.

Third, continuation of the blacklisting of the controllers will mean continuation of large scale cutbacks in air service. It will also mean extension of the present anticompetitive air traffic regulations, which, for example, prevent new carriers from entering any major market. It will mean continued delays at most major terminals, at most peak hours. There is no need to impose indefinitely these conditions on the traveling public, nor any need to continue regulations that discourage the competition that is the cornerstone of this nation's economic policy.

Fourth, the existing situation compromises safety. For example, controllers have been taken out of the tower at Stinson Field, a general aviation field in San Antonio. This was done despite the fact that there are busy fields on each side of San Antonio—the San Antonio Municipal Airport, Kelly Air Force Base, Randolph Air Force Base, and Stinson Field. This creates a complex local traffic pattern, and operation of Stinson without tower assistance frightens people who live in the area. The School Superintendent of the area affected has

strongly objected to the threat posed by loss of tower assistance at Stinson Field. A copy of his letter is attached.

Fifth, I understand that lack of controller availability has required the Air Force to reduce training and logistics traffic in the San Antonio area. Military training flight time has been curtailed for several years as one means of reducing military costs—I do not think it should be subjected to additional curtailment, particularly at a time when readiness is the prime objective of the Department of Defense.

You could act now to ameliorate these and other effects of the lack of air traffic control staff. Continuation of the policy of blacklisting controllers who went out on strike gains nothing; it imposes substantial unnecessary costs on the government; and it needlessly extends the problems noted above. On the other hand, an offer to rehire controllers would avoid those problems and show clearly that a firm hand need not be vengeful.

I hope you will reconsider your position on this matter.

With best wishes, I am,

Respectfully yours,

HENRY B. GONZALEZ,
Member of Congress.

Mr. Speaker, I might also say that when I received the nonanswer via the President's chief of White House liaison with the Congress, I then designated my administrative assistant as my alter ego to correspond, and she replied to Mr. Friedersdorf pointing out the inconsistencies in his transmission of the message.

Mr. Speaker, I have before me an editorial which appeared in last week's issue of Business Week for November 9, 1981, and Business Week is certainly anything but a liberal publication. If anything, it is antiunion. It was one that supported the President ferociously when he fired the air traffic controllers, and I think it is even very partisan in the sense that it has been very much in support of President Reagan and his administration, even during last year's campaign. I have this editorial, which is headed "Rehire Air Controllers." They have written a very well-reasoned editorial as to why it would inure to the benefit of the country and the President if he would rehire the air traffic controllers. The editorial to which I referred is as follows:

REHIRE AIR CONTROLLERS

Even though the decertification of the Professional Air Traffic Controllers Organization is still under appeal, it is clear that the Reagan Administration's victory over the union is total. The misled air controllers have been punished, their inflated self-importance punctured, and the Administration has demonstrated firmly and properly that it will not tolerate a strike by federal employees. Now it is time for it to turn to the serious problems caused by a shrunken air control system. Specifically, it should find ways to hire back 2,000 or so controllers who are needed right away as bad weather sets in and more people start traveling during the holidays.

The reduced air control system is imposing heavy costs—one study estimates losses at $12 billion—on the airlines and the public, including business. Disastrous losses by the major airlines in the third quarter are further evidence that the harm is substantial.

Bringing back fired air controllers will present some personnel problems. Under normal private industrial practice, for example, rehired workers who were fired for misconduct lose their seniority and certain other benefits. But traditionally people rehired by the federal government, even if they were originally fired for wrongdoing, receive credit for past service. Any rehired veterans among the strikers could win back certain preferential rights.

But such matters are within the control of the President and Congress, and they should make sure that rehired strikers obtain no advantages over workers who obeyed the law and refused to strike. The essential point is that it makes no sense for business and the general public to keep paying a heavy price for a war that has already been won.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio (Mr. SHAMANSKY) is recognized for 5 minutes.

● Mr. SHAMANSKY. Mr. Speaker, on November 16, I was unable to be on the House floor for rollcall votes Nos. 298 and 299. Had I been present I would have voted "yea" on rollcall No. 298 and "yea" on rollcall No. 299.●

EXPORT-IMPORT BANK FINANCING NOTIFICATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina (Mr. NEAL) is recognized for 5 minutes.

● Mr. NEAL. Mr. Speaker, I am notifying the House today of the U.S. Export-Import Bank's proposal to provide credits of $550 million to help finance the sale of U.S. goods and services for the Yacyreta hydroelectric project on the Parana River between Argentina and Paraguay.

The Eximbank is prepared to extend the loan to Entidad Binacional Yacyreta, an authority created by the Governments of Argentina and Paraguay to build the $10.4 billion power project. According to the Eximbank international competition for contracts on this project has been intense.

I am submitting for the RECORD copies of Eximbank materials describing the Yacyreta project and outlining the terms of the proposed Eximbank participation in the sale of U.S. goods and services.

This notification from the Eximbank was referred to me as chairman of the Banking Committee's Subcommittee on International Trade, Investment and Monetary Policy. Under section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended, the Eximbank must notify Congress of proposed loans or financial guarantees, or combinations thereof, of $100 million or more. Unless the Congress determines otherwise, the Eximbank may give final approval to the transaction after 25 days of continuous session of the Congress after notification.

I would welcome any comments or questions my colleagues might have on this proposed transaction. The Eximbank material follows:

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C. November 4, 1981.

Hon. STEPHEN L. NEAL,
Chairman, Subcommittee on International Trade, Investment and Monetary Policy, House Banking Committee, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Eximbank has submitted a statement to the Speaker of the House of Representatives and the President of the Senate in accordance with the provisions of Section 2(b)(3)(i) of the Export-Import Bank Act of 1945. I am taking the liberty of providing you with a copy of this statement.

Sincerely,

NANCY S. PIGMAN,
Congressional Relations Officer.

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., November 4, 1981.

THE SPEAKER OF THE HOUSE OF
REPRESENTATIVES,
The Speaker's Room,
U.S. Capitol,
Washington, D.C.

DEAR MR. SPEAKER: Pursuant to Section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States Senate with respect to the following transaction involving U.S. exports to Argentina and Paraguay.

A. DESCRIPTION OF TRANSACTION

1. Purpose

Eximbank is prepared to extend a direct credit in the amount of $550 million to Entidad Binacional Yacyreta ("EBY"), to assist in financing the export from the United States of U.S. goods and services for the construction of the Yacyreta hydroelectric project on the Parana River between Argentina and Paraguay.

The project will consist of a 70 mile long earth dam impounding a reservoir of 1,700 square kilometers, two spillways, fish passage facilities, a navigation lock, an irrigation intake in each country and a conventional covered powerhouse with twenty Kaplan turbine and generator units rated at 135 MW each. Total power available on completion will be 2,700 MW.

The total cost of the project is estimated at $10.4 billion, including escalation during construction, working capital and debt repayment during construction. Non-local costs are estimated at $4.4 billion, including U.S. costs of $647 million (6.2 percent of total project costs) for financing under the proposed Eximbank credit.

2. Background

From the outset, foreign competition for this project has been intense. Fourteen international companies or consortia were prequalified for the generating and electromechanical equipment (see attachment). Five international consortia were prequalified for the main civil works contract. Eximbank has been in constant contact with its foreign government counterparts throughout the world with respect to the financing

terms and conditions offered by foreign suppliers receiving official support. In accordance with the consensus understanding among the leading industrial countries, most export credit agencies, including the Austrians, Germans and Japanese provided official notification that they would support the project through a ten year repayment term beginning six months after installation of the last turbine, now estimated to occur in 1991. Early in the competition almost all export credit agencies offered the minimum consensus interest rate for Argentina at that time of 7.75 percent per annum. Bids submitted in July 1980 included this interest rate.

In response to this competition Eximbank issued a letter of interest on September 29, 1978, and subsequently a preliminary commitment on February 28, 1980, indicating that Eximbank was prepared to consider financing for up to $830 million in contract value of U.S. goods and services for the project on terms matching those of other government export credit agencies. Eximbank has twice extended the availability of its commitment, as have other government export credit agencies extended their commitments, because the award process had been slowed by difficulties in evaluating bids for the civil works contract. EBY has now filed its application for an Eximbank credit in compliance with the terms of the preliminary commitment.

The U.S. equipment to be financed under the credit will include hydroelectric turbines at a cost of $287 million, already awarded to Allis-Chalmers, heavy construction equipment estimated at $242.4 million, for which awards to specific U.S. suppliers are expected by the end of 1981, and other electro-mechanical equipment estimated at $117.6 million, for which awards to U.S. suppliers are expected by the third or fourth quarter of 1982. The commitment of Eximbank has been reduced from the $705 million figure in its preliminary commitment to $550 million because the electric generators which had been included in the preliminary commitment have been awarded to Germany and Japan thus reducing the eligible U.S. goods and services from $830 million to $647 million.

3. Identity of the Parties

EBY is a bi-national authority organized by Argentina and Paraguay under the Treaty of Yacyreta of December 3, 1973, with a capital of $100 billion divided equally between Argentina and Paraguay. The shareholders for the respective countries are Aqua y Energia Electrica, the Argentine Government entity responsible for a major portion of the generation, transmission and distribution of electricity throughout Argentina, and Administracion Nacional de Electricidad, the public agency reponsible for Paraguay's electric power development. Although Argentina and Paraguay, through EBY, will be co-owners of the project, Paraguay will sell virtually all of its share of electricity to Argentina, which will utilize most of the power produced.

The Government of the Republic of Argentina, acting through its Ministry of Finance, will guarantee the payment of all indebtedness owed by EBY to Eximbank under the Eximbank Credit. The Government of Argentina will similarly guarantee other external indebtedness incurred by EBY in the construction of the project.

4. Nature and Use of Goods and Services

The U.S. equipment which is eligible for financing under the Eximbank credit and which will be used in the project consists of the following:

	Millions
16-18 Kaplan type hydroelectric turbines rated at 135 MW each (2-4 of the 20 turbines required will be manufactured in Argentina under an Allis-Chalmers transfer of technology agreement)	$287.0
Heavy construction equipment (bulldozers, graders, compactors, loaders, trucks, concrete plant equipment, etc.)	242.4
Other electromechanical equipment (transformers, conductors, steel lines, powerhouse cranes, pumps, etc.)	117.6
Total	647.0

The turbines have already been awarded to Allis-Chalmers, and although formal awards for the civil works contract and the other electromechanical equipment have not yet been made, it is anticipated that heavy construction equipment and electromechanical equipment to the extent indicated above will be sourced in the United States.

Allis-Chalmers estimates that up to 18 million man hours of labor is represented in the manufacture of the turbines alone. This will be extended over an eight year period involving 1000 employees at Allis-Chalmers' manufacturing facility at York, Pennsylvania. Caterpillar Tractor Co., (which along with WABCO, Grove, Ford and others, is expected to be a major supplier of heavy construction equipment) estimates that the manufacture of that equipment will result in over 2,000 man years of production from its four major plants in Illinois in addition to another 4,000 man years of production from subcontractors. The impact upon U.S. manufacturers of the additional electromechanical equipment will be equally significant.

B. EXPLANATION OF FINANCING

1. Reasons

The proposed credit of $550 million by Eximbank will facilitate the export of $647 million of U.S. goods and services. The favorable impact on U.S. manufacturers of the turbines, heavy construction equipment and other electromechanical equipment for the project, their sub-suppliers throughout the country and employment in the areas where the plants are located would not be possible without the Eximbank financing terms offered to meet extensive and intensive foreign competition. None of the goods to be exported is in short supplying in the United States, and Eximbank perceives no adverse impact on the U.S. economy.

The Yacyreta hydroelectric project is the largest project ever undertaken by the Republic of Argentina. It is designed to utilize Argentine's largely undeveloped hydro potential (presently only 32 percent of installed energy capacity). This is particularly important since petroleum, in 1977, accounted for 64 percent of Argentina's total primary consumption of energy. In 1973 a feasibility study was undertaken by a consortium of U.S., German, Argentine and Paraguayan firms, culminating in the Treaty of Yacyreta between Argentina and Paraguay. The International Bank for Reconstruction and Development and the Inter-American Development Bank conducted a review of the project in 1976 followed by a Joint Appraisal Mission in 1978. This focused on the Argentine electric power sector since Argentina for the foreseeable future will use virtually all of the EBY power. It was determined that the project was the "least cost" solution for Argentina's future power needs from the mid '80's onward. This project has the support of both the IBRD and IDB which have extended loans of approximately $210 million each for civil works.

2. The financing plan

The total cost of U.S. goods and services to be exported from the Untied States for the project is estimated to be $647 million, which will be financed as follows:

Cash payment	$97,059,000
Eximbank credit	550,000,000
Total	647,059,000

(a) *Eximbank Charges.* The Eximbank Credit will bear interest at the rate of 7.75 percent per annum, payable semiannually. A commitment fee of .5 percent per annum will be charged on the undisbursed portion of the Eximbank Credit.

(b) *Repayment Terms.* Indebtedness incurred by EBY under the Eximbank Credit will be repaid by EBY in twenty approximately equal semiannual installments of principal beginning May 15, 1992. This date is six months after the planned start-up of the last turbine, the same repayment term supported by other government export credit agencies for their suppliers.

Attached is additional information on Eximbank activity in and economic data on Argentina.

Sincerely,

WILLIAM H. DRAPER III.

LEGISLATION TO CREATE A NATIONAL INSTITUTE ON ARTHRITIS AND MUSCULOSKELETAL DISEASES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 10 minutes.

● Mr. PEPPER. Mr. Speaker, I am today introducing a bill which, if enacted, will bring to this Nation an important new focus on the most widespread, crippling diseases—arthritis and musculoskeletal disorders.

On June 10, the Subcommittee on Health and Long-Term Care of the Select Committee on Aging, both of which I am privileged to chair, held a hearing to examine the state-of-the-art in arthritis research and the adequacy of Federal support for this endeavor. We heard testimony from victims of arthritis as well as nationally prominent physician researchers. Out of this hearing grew my determination that increased attention and a sharper focus on arthritis and other musculoskeletal disorders were absolutely imperative. The impact of these diseases—in human, social, and economic terms—is too profound and too serious to be on a back burner any longer.

The tangible expression of a national commitment to accelerate the attack on this collection of diseases, which debilitate at least one-sixth of our population, would be the creation of a National Institute on Arthritis and Musculoskeletal Diseases. That is the purpose of the legislation I introduce today. I will describe the provisions of this measure in some detail, but first I believe it is important to provide to my colleagues and to the public the facts and circumstances which, in my view, make imperative the establishment of this new Federal research institute.

Nearly everyone has a relative or friend who suffers from the ravages of arthritis pain. Arthritis and related diseases affect more than 37 million people in the United States. Arthritis limits the mobility of more people than any other disease. Sixteen million have osteoarthritis, but arthritis is not exclusively a disease afflicting the elderly; 250,000 children suffer from juvenile arthritis. Yet funding for research attacking the causes and identifying treatments and cures of this epidemic disease has been pitifully small. The National Institutes of Health expend only $1.74 per arthritis sufferer. This level of effort contrasts sharply with the economic cost of arthritis. Current estimates indicate that arthritis now costs the Nation as much as $25 billion every year. A study in one State found that fully half of all workers' compensation claims are arthritis related. The cost of workers' compensation to insurance carriers—and thus to employers—resulting from arthritis and other musculoskeletal conditions is over $200 million in California alone.

Musculoskeletal conditions rank first among all disease groups in cost attributable to lost earnings and services from nonfatal illness, and they rank second only to circulatory diseases in total economic cost. The level of lost earnings and medical expenses resulting from musculoskeletal disorders now exceeds $30 billion annually. Such conditions account for 20 percent of medicare hospitalization costs, in excess of $1 billion each year.

More than 100 different diseases of the joints and related structures have been identified as rheumatic diseases. Other diseases and conditions which are not by definition rheumatic, but which affect bones, are addressed by researchers under the rubric of musculoskeletal disorders. These vary widely in nature and effect. Their severity ranges from discomfort to severe pain and disability; some are life threatening.

Osteoarthritis, a disease characterized by progressive joint degeneration, affects millions of older Americans. Osteoporosis, loss of bone mass, occurs in varying degrees in most elderly women; nearly 90 percent of women 75 years of age and older have X-ray evidence of the disease.

Since musculoskeletal conditions are most common in elderly persons, and since the aging population is expected to increase substantially over the next several decades, the frequency of occurrence and the impact of such conditions will likewise increase unless efforts are focused on means of reducing the incidence of these pervasive health problems.

Millions of our citizens are victims of rheumatoid arthritis, a chronic, inflammatory disease characterized by fatigue, immobility, and deformity. The disease runs an erratic and frustrating course, with periods of both exacerbation and remission. It is often chronic and progressive, and its cause is not yet known.

The general public normally views arthritis as a condition affecting older persons, but some 250,000 children suffer from one or more forms of this painful and debilitating disease. It may affect a variety of organs—heart, lungs, and eyes—as well as joints.

Lupus is a serious, potentially fatal disease which attacks many tissue and organ systems, including joints, skin, kidneys, and heart.

Other forms of rheumatic disease and musculoskeletal disorders include Lyme arthritis, which is transmitted by ticks; scleroderma, a serious treatment-resistant disease characterized by hardening of the skin; inherited connective tissue diseases such as osteogenesis imperfecta and Marfan's

syndrome; rheumatic fever; gout; and pseudogout.

The National Institute of Arthritis, Diabetes, and Digestive and Kidney Diseases, the NIH research institute which houses the arthritis and musculoskeletal research programs, is a patchwork body that is expected to address a constellation of unrelated research needs from digestive diseases to hematology to dermatology. There is no rhyme or reason to the conglomeration of these programs, and arthritis and musculoskeletal research has suffered as a result.

The potential economic benefit to the Nation and the widespread alleviation of pain and suffering that would result from an increased focus on research in arthritis and musculoskeletal disorders is enormous. Even a tenfold increase in these efforts could be repaid many times over through lower job absenteeism, reduction in the need for attendant care, home health care, institutionalization, medical expenses, and reduced workers' compensation payments, among others. The tendency of some arthritis sufferers to turn to quack remedies would be drastically reduced if we were able to improve treatments, cure forms of rheumatic disease, and prevent such diseases. People with arthritis often become frustrated to the point of desperation, seeking to lessen the pain of their disease. Nearly $1 billion a year is expended by arthritics on unproven remedies. Consider the potential for discovery that even a tenth of that amount could mean to millions of Americans.

Even with the meager research dollars that currently are expended, research investigators have brought us a variety of exciting developments that have increased exponentially the level of our scientific knowledge about many of the 100 forms of arthritis.

Over the past decade genetic markers have been found for several rheumatic diseases, including the discovery of HLA-B27 in ankylosing spondylitis, a spinal arthritis that primarily strikes young men; HLA-DRW4 in rheumatoid arthritis, which affects all ages and sexes, but is most common in women; HLA-DRW2 and HLA-DRW3 in systemic lupus erythematosus [SLE, or lupus], which often attacks young black women, along with whites, of childbearing age; and HLA-DRW5 in a form of childhood arthritis which affects the eyes. It is now possible to identify populations with a high risk of contracting these rheumatic diseases. As a consequence, researchers are striving to identify infectious agents or other environmental factors which trigger disease in those people who are susceptible to it. But little epidemiological research has been conducted to aid in this search because funds simply are not available. For the same reason—lack of money—precious little research has been undertaken to unlock the mysteries of juvenile arthritis. Similarly, there has been a paucity of attention given to osteoarthritis.

Many research scientists believe they are very close to identifying the causes of various forms of arthritis. With accelerated effort, prevention, improved treatments, and cures now are in the realm of the possible. Some of the areas under active exploration include abnormalities of the body's immune system and the role of particular viruses and collagens; the interrelationship between sex hormone activity and immunologic and genetic factors; tissue and bone transplantations; lymphapheresis, or blood purification; and many others.

In the field of orthopedic and other musculoskeletal research, studies of biochemical, hormonal, and nutritional factors in bone metabolism and mineralization may bring effective treatment and prevention of osteoporosis. Advances in recent years have made widespread the application of surgical joint implantations. Currently, some 120,000 hip replacements and 40,000 knee joint replacements are performed annually. Although highly successful in the short term, the prognosis for long-term or permanent success of these procedures is not assured. Researchers are giving attention to corrosion of replacement materials, load failures, infections, and allergic reactions.

Mr. Speaker, it is imperative that a vigorous attack be launched against rheumatic diseases and other musculoskeletal disorders. In my view, the instrument for this attack should be the creation of a National Institute on Arthritis and Musculoskeletal Diseases.

My bill would create such an institute within the National Institutes of Health. It is patterned on the statutory authority of other NIH research institutes. It is based upon, and follows, an evolutionary thread of existing law beginning with the National Arthritis Act, a 1975 measure which established a National Commission on Arthritis. That Commission was charged with the development of a long range arthritis plan with specific recommendations for the use and organization of national resources to combat arthritis.

The Commission put together a document that is at once massive in size and comprehensive in scope, a plan that reflects the thinking of the best researchers, physicians, and other professionals in the field of rheumatology, as well as persons with arthritis and parents of children who have arthritis.

Unfortunately neither the National Arthritis Act nor the plan the law mandated has come close to being implemented. Because of this, and because the need is so great, a sharp new focus on arthritis research is imperative.

That is the reason for this bill, which adds to title IV of the Public Health Service Act a new part J and establishes a National Institute on Arthritis and Musculoskeletal Diseases. The Institute is directed to undertake research and demonstrations relating to the cause, prevention, and treatment of arthritis and musculoskeletal diseases; to promote coordination of research programs in the public and private sector; to make grants for research; to establish an information clearinghouse; and to conduct research training.

The Director of the new Institute is charged with developing a plan for a national program to expand, intensify, and coordinate activities of the Institute and to carry out the plan. The national program is expected to encompass research in epidemiology, etiology, and prevention of arthritis and musculoskeletal diseases; development, trial, and evaluation of drugs and devices; refinement, development, and evaluation of implants and prosthetic devices; and set up monitoring of the causes of athletic injuries and seek ways to prevent such injuries. Sports-related disorders also are a focus of the new Institute.

The bill authorizes support for new and existing multipurpose arthritis and musculoskeletal disease research centers and provides a specific funding authorization. It also establishes an interagency coordinating committee, chaired by the Director of the Institute, the mission of which is to improve coordination of all research and service programs relating to arthritis and musculoskeletal diseases.

Mr. Speaker, I am absolutely convinced that the creation of a National Institute on Arthritis and Musculoskeletal Diseases will result in major advances in the prevention, treatment, and cure of the most widespread of diseases afflicting Americans. The current level of funding or only a modest increase for research on rheumatic and musculoskeletal diseases, along with the increased visibility a separate Institute would provide, offer the potential for great human and economic benefit to the Nation.

Finally, it is appropriate and fitting to pay tribute, in connection with the development of this legislation, to a legendary patroness of the health sciences, Mary Lasker, who believes strongly in the need to strengthen the national attack on arthritis. As in so many areas of our mutual concern over the years, her deep commitment and enthusiasm in this matter have bolstered my own.

I welcome cosponsors of this legislation and urge my colleagues to add their support to this important proposal. HENRY WAXMAN, who so ably

chairs the Subcommittee on Health and the Environment, which has jurisdiction over the National Institutes of Health, has expressed interest in reexamining the adequacy of funding and visibility of research in the area of arthritis. It is anticipated that the bill will be considered in the spring, when other aspects of the work of the NIH will be before the subcommittee.

I include the text of the bill at this point in the RECORD.

H.R. 5006

A bill to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal Diseases

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

ESTABLISHMENT OF INSTITUTE

SECTION 1. Title IV of the Public Health Service Act is amended by adding at the end the following new part:

"PART J—NATIONAL INSTITUTE ON ARTHRITIS AND MUSCULOSKELETAL DISEASES

"ESTABLISHMENT OF INSTITUTE

"SEC. 481. There is established in the Public Health Service a National Institute on Arthritis and Musculoskeletal Diseases (hereinafter in this part referred to as the 'Institute').

"RESEARCH AND TRAINING IN ARTHRITIS AND MUSCULOSKELETAL DISEASES

"SEC. 482. In carrying out the purpose of section 301 with respect to arthritis and musculoskeletal diseases the Secretary through the Institute and in cooperation with the advisory council to the Institute established under section 432 shall—

"(1) conduct, assist, and foster research, investigations, experiments, and demonstrations relating to the cause, prevention, and methods of diagnosis and treatment of arthritis and musculoskeletal diseases, including sports related disorders;

"(2) promote the coordination of research programs conducted by the Institute, and similar programs conducted by other agencies, organizations, and individuals;

"(3) make available research facilities of the service to appropriate public authorities and to health officials and scientists engaged in special studies related to the purposes of this part;

"(4) make grants to universities, hospitals, laboratories, and other public or private agencies and institutions and to individuals for such research projects relating to arthritis and musculoskeletal diseases and disorders, as recommended by the advisory council to the Institute;

"(5) establish an information clearinghouse on research, prevention, and treatment of arthritis and musculoskeletal diseases and collect and make available on a timely basis, through publications and other appropriate means, information as to, and the practical applications of, research and other activities carried out pursuant to this part;

"(6) secure from time to time, and for such periods as necessary, the assistance and advice of persons from the United States and abroad who are experts in the field of research authorized by this part; and

"(7) in accordance with regulations and funds appropriated or donated for the purpose, provide research training and instruction and establish and maintain research traineeships, in the Institute and elsewhere, in matters pertaining to the diagnosis, prevention, and treatment of arthritis and musculoskeletal diseases, including sports related disorders, with such stipens and allowances (including travel and subsistence expenses) for trainees as may be deemed necessary, with the number of persons receiving such training and instruction and the number of persons holding such traineeships to be fixed by the advisory council to the Institute, and in addition provide for such training, instruction, and traineeships through grants, upon recommendation of the advisory council to the Institute, to public and nonprofit private institutions.

"NATIONAL ARTHRITIS AND MUSCULOSKELETAL DISEASES PROGRAM

"SEC. 483. The Director of the Institute, with the advice of its advisory council, shall develop a plan for a National Arthritis and Musculoskeletal Diseases Program to expand, intensify, and coordinate the activities of the institute respecting the diseases, and shall carry out the program in accordance with such plan. The program shall be coordinated with the other research institutes of the National Institutes of Health to the extent that they have responsibilities respecting such diseases and shall, at least, provide for—

"(1) investigation into the epidemiology, etiology, and prevention of all forms of arthritis and musculoskeletal diseases, including sports related disorders, primarily through support of basic research in such areas as immunology, genetics, biochemistry, microbiology, physiology, bioengineering, and any other scientific discipline which can contribute important knowledge to the treatment and understanding of these diseases;

"(2) research into the development, trial, and evaluation of techniques, drugs, and devices used in the diagnosis, treatment, and prevention of arthritis and musculoskeletal diseases;

"(3) research on the refinement, development, and evaluation of technological devices that will replace or be a substitute for damaged bone, muscle, and joints and other supporting structures; and

"(4) establish mechanisms to monitor the causes of athletic injuries and identify ways of preventing such injuries on scholastic athletic fields.

The plan required by this section shall be developed within one hundred and eighty days after the date of the enactment of this part and shall be transmitted to the Congress at that time.

"MULTIPURPOSE ARTHRITIS AND MUSCULOSKELETAL DISEASE RESEARCH CENTERS

"SEC. 484. (a) The Secretary, acting through the Institute may, after consultation with its advisory council provide for the development, modernization, and operation (including staffing and other operating costs such as the costs of patient care required for research) of new and existing centers for arthritis and musculoskeletal diseases. For purposes of this section, the term 'modernization' means the alteration, remodeling, improvement, expansion, and repair of existing buildings and the provision of equipment for such buildings to the extent necessary to make them suitable for use as centers described in the preceding sentence.

"(b) Each center assisted under this section shall—

"(1)(A) use the facilities of a single institution or a consortium of cooperating institutions, and

"(B) meet such qualifications as may be prescribed by the Secretary, and

"(2) conduct—

"(A) basic and clinical research into the cause, diagnosis, early detection, prevention, control, and treatment of, arthritis and musculoskeletal diseases and complications resulting from such diseases including research into implantable biomaterials and biomechancial and other orthopaedic procedures; and

"(B) research training programs for physicians, scientists, and other health professionals.

"(c) Each center assisted under this section may conduct programs to—

"(1) estabish the effectiveness of new and improved methods of detection, referral, and diagnosis of individuals with a risk of developing arthritis and musculoskeletal diseases; and

"(2) disseminate the results of research activities and develop means of standardizing patient data and recordkeeping.

"(d) The Secretary shall give appropriate consideration to the need for centers especially suited to meeting the needs of special groups affected by arthritis and musculoskeletal diseases, especially children and the elderly.

"(e) The Secretary shall evaluate on an annual basis the activities of centers receiving support under this section and shall report to the appropriate committees of Congress the results of his evaluations not later than four months after the end of each fiscal year.

"(f) Support of a center under this section may be for a period of not to exceed five years and may be extended by the Director of the Institute, for additional periods of not more than five years each, after review of the operations of such center by an appropriate scientific review group established by the Director of the Institute, and recommended for approval by the advisory council to the Institute.

"(g) For purposes of this section, there are authorized to be appropriated $12,000,000 for the fiscal year ending September 30, 1983, $15,000,000 for the fiscal year ending September 30, 1984, and $18,000,000 for the fiscal year ending September 30, 1985.

"ARTHRITIS AND MUSCULOSKELETAL DISEASE COORDINATING COMMITTEE

"SEC. 486. (a) In order to improve coordination of all activities in the National Institutes of Health, in the Department of health and Human Services, and in other departments and agencies of the Federal Government relating to Federal health programs and activities relating to arthritis and musculoskeletal diseases, including sports related disorders, the Secretary shall establish a Coordinating Committee to be composed of representatives of the Department of Health and Human Services (including the Food and Drug Administration), the Veterans' Administration, the Department of Defense, and other Federal departments and agencies involved in research, health services, or rehabilitation programs affecting arthritis and musculoskeletal diseases. The committee shall include the Directors (or their designated representatives) of each of the research institutes of the National Institutes of Health involved in arthritis and musculoskeletal diseases related research. The committee shall be chaired by the Director of the Institute and shall prepare a report, not later than sixty days after the end of each fiscal year, for the Secretary detailing the work of the committee in

seeking to improve coordination of departmental and interdepartmental activities relating to arthritis and musculoskeletal diseases during the preceding fiscal year. Such report shall include:

"(1) a description of the work of the committee in coordinating the research activities of the National Institutes of Health relating to such diseases during the preceding year, and

"(2) a description of the work of the committee in promoting the coordination of Federal health programs and activities relating to arthritis and musculoskeletal diseases to assure the adequacy of such programs and to provide for the adequate coordination of such programs and activities.

"(b) The committee shall meet at the call of the chairman, but not less often than four times a year.".

CONFORMING AMENDMENTS

SEC. 2. (a) Section 431(a) of the Public Health Service Act (42 U.S.C. 289a(a)) is amended by striking out "arthritis, rheumatism, and".

(b)(1) Subsection (a) of section 434 of such Act (42 U.S.C. 298c-1) is amended by striking out "Arthritis, Diabetes," each place it appears and inserting in lieu thereof "Diabetes".

(2) Subsection (b) of such section is amended (A) by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes", and (B) by striking out "Arthritis and Musculoskeletal and".

(3) Subsection (c) of such section is amended (A) by striking out "arthritis and musculoskeletal and", and (B) by striking out "arthritis, musculoskeletal and"

(4) Subsection (d) of such section is amended (A) by striking out "Arthritis and Musculoskeletal and", and (B) by striking out "arthritis,".

(5) Subsection (e) of such section is amended by striking out paragraph (1) and by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(6) The heading for such section is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".

(c)(1) Subsection (a) of section 436 of such Act (42 U.S.C. 289c-3) is amended (A) by striking out "arthritis, diabetes mellitus," and inserting in lieu thereof "diabetes mellitus", and (B) by striking out "an Arthritis Interagency Coordinating Committee,".

(2) Subsection (b) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(d)(1) Subsection (a) of section 437 of such Act (42 U.S.C. 289c-4)) is amended by striking out "the National Arthritis Advisory Board,".

(2) Subsection (b)(2) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(3) Subsection (d) of such section is amended by striking out "and the National Arthritis Advisory Board, six of the members of each" and inserting in lieu thereof ", six of the members of".

(4) Subsection (g) of such section is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(5) Subsection (h)(3) is amended by striking out "Arthritis, Diabetes," and inserting in lieu thereof "Diabetes".

(6) The heading for such section is amended by striking out ", ARTHRITIS,".

(e) Sections 438 and 439 of such Act (42 U.S.C. 289c-5, 289c-6) are repealed.

(f) The heading for part D of such Act is amended by striking out "ARTHRITIS, DIABETES," and inserting in lieu thereof "DIABETES".●

EARLY WARNING REPORT, WEEK OF NOVEMBER 16, 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. ASPIN) is recognized for 5 minutes.

● Mr. ASPIN. Mr. Speaker, today at the request of the Budget Committee I am inserting this week's early warning package in the CONGRESSIONAL RECORD. This week the House of Representatives is likely to consider three additional spending bills, the conference reports on the Transportation and District of Columbia appropriation bills, and the House-reported Defense appropriation bill. These bills are each under target. This package also contains brief summaries of the potential budget impact of authorization bills that are scheduled for floor action. These materials factually compare the total amount of spending provided or authorized by these bills with the assumptions for such spending that resulted from congressional approval of the first budget resolution for fiscal year 1982. The committee intends to insert into the CONGRESSIONAL RECORD these staff analyses, and analyses of all other appropriations, entitlement, or revenue bills as they are scheduled for floor action. We hope to provide these "early warnings" to interested Members every Monday. I believe that it is very important for the House to have information that compares such bills to the budget resolution. Achievement of the resolution spending targets is not likely to occur unless the Members are clearly aware of the budget impact of their votes.

EARLY WARNING—HOUSE BUDGET COMMITTEE

H.R. 4995, DEPARTMENT OF DEFENSE APPROPRIATIONS BILL, 1982

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.
Subcommittee: Defense.
Chairman: Mr. Addabbo (New York).
Ranking Minority Member: Mr. Edwards (Alabama).
Scheduled: Wednesday, November 18, 1981.

I. Description of bill

The purpose of this bill is to make appropriations for the Military functions of the Department of Defense. Functional areas provided for in the bill include the pay, allowances and support of military personnel, operation and maintenance of the Forces, procurement of equipment and systems and research, development, test and evaluation. Appropriations for military assistance, military construction, family housing and civil defense are provided in other bills.

The bill in total is under the 302(b) targets for this subcommittee by $12.1 billion in budget authority and $3.2 billion in outlays.

Title I.—Military personnel

	Budget authority	Outlays
President's September request	38.7	38.4
House committee recommendation	37.4	37.2
Difference from request	−1.3	−1.2

Permanent change of station (PCS)

In fiscal year 1982 the Defense Department will spend approximately $3 billion on movement of military personnel and their household goods from one duty assignment to another. The Committee estimates that on the average the DOD will move two out of every three of its military personnel on a permanent change of station move during the course of the year. The Committee believes that this is excessive and directed several actions to reduce the number of moves and improve management procedures. The reduction is $170.2 million.

Subsistence

As a result of audit reports estimating waste, fraud, abuse and mismanagement, and because of improper budget procedures the Committee is deleting $100 million from the approximately $2.6 billion that will be spent for subsistence support of military personnel in fiscal year 1982.

Installment reenlistment bonuses

The Committee is making the reduction based on changing the basis of award for reenlistment bonuses from lump sum back to the pre-1979 installment method. This reduction of $392.9 million makes no change in the number of bonuses that can be awarded just in the method of payment.

Recruiting and Advertising

The Committee makes the reduction of $100.0 million from the approximately $1.3 billion that was budgeted for recruiting and advertising for fiscal year 1982. Based on the increase over fiscal year 1981 and the improved recruiting situation of the Military Services it is expected that this reduction will have no adverse impact on military recruiting.

Title II.—Military retired pay

	Budget authority	Outlays
President's September request	14.98	14.71
House Appropriations Committee recommendation	14.93	14.66
Difference from request	−0.05	−0.05

The difference of $50 million is based on adjustments for Military Pay Accounting, Waste, Fraud, and Abuse, and Budget Reconciliation Act adjustment for the change in the Survivors Benefit Plan.

Title III.—Operations and maintenance

	Budget authority	Outlays
President's September request	62.6	60.6
House committee recommendation	61.2	59.5
Difference from request	1.4	1.1

Fuel prices

Based on the current world oil price situation, the Committee has reduced the DOD request by 9 cents per gallon. This reduces the DOD request by $499 million.

Army

The Committee reduced Army O&M by $418 million with the major cuts recommended in Europe Base Operations, Training, Medical, and Service-Wide Support, and fuel.

Navy

The Committee reduced Navy O&M by $352.2 million with the major cuts recommended in Central Supply and Maintenance, Advance Funding for Ship Overhauls, and fuel. There were major add-ons in General Purpose Ship Operations, Leased Communications, and Change orders for Ship Overhauls.

Air Force

The Committee reduced Air Force O&M by $800.8 million with the major cuts recommended in JCS Exercises, Base Operations and fuel.

Defense agencies

The Committee increased Defense Agency funding by $306 million with major "add-ons" to Overseas Dependent Education and JCS Directed and Coordinated Exercises.

Title IV.—Procurement

	Budget authority	Outlays
President's September request	64.2	43.6
House Appropriations Committee recommendation	63.7	43.7
Difference from request	−0.5	+0.1

The decrease in budget authority and increase in outlays in due to the changes in "mix" between the appropriations which have varying first year outlay rates. Areas where significant changes are recommended by the Appropriations Committee are:

A reduction of $186 million is proposed for multiyear contracting for the F-16 aircraft, based on the use of prior year funds, and the BLACKHAWK which does not appear to meet two of the criteria for multiyear contracting (stability of funding and confidence in cost estimates).

Additional reductions in Army procurement are for the PATRIOT missile system, Laser Hellfire system, TOW missile modification, M88 Recovery Vehicle, Ammunition, and Communication and Electronics Equipment. The Committee recommended adding fundg for the U.S. ROLAND missile, C-120 Airplane, AAH Helicopter (14), AH-1 Helicopter (12), various ammunition items, Other Support Equipment, and $140 million for Guard and Reserve Readiness Equipment.

A reduction of $1,221 million is recommended for Navy procurement to include: $162 million for Navy Aircraft with no quantity reductions, $104 million for aircraft modification, $88 million for various missile and torpedo programs including SPARROW, PHOENIX, HARPOON, MK 48 Torpedo, and M46 Torpedo modification. A net reduction of $726 million is recommended in Shipbuilding and Conversion for: Trident advance procurement, CVN aircraft carrier advance procurement, TALS SEABEE Barge Carrier, Fast Logistics Ships (T-AKRX) (Conversion), and a general reduction of $216 million. Additional reductions are recommended in Civil Engineering Support Equipment, Personnel-Command Support Equipment, and Aviation Support Equipment.

A net increase of $662 million is recommended for Air Force procurement. Reductions for aircraft are recommended for the Long Range Combat Aircraft (−$100 million), A-10 aircraft, F-15 aircraft (−6 aircraft), and spares and repair parts. Funds are recommended to be added for the A-7K aircraft (6 aircraft) (assuming authorization for these aircraft), KC 10A Aircraft (+4 aircraft) MC−130H Aircraft (+4 aircraft), C-130H aircraft (+8 aircraft), Wide Bodied Cargo Airlift, and modification programs. The AIM-7F/M SPARROW missile program is recommended for reduction. Additional funds are recommended for the Minuteman MK-12A Reentry Vehicle, Rapier, and the Special Update program (classified). Other program reductions are recommended for munitions Support Equipment, and Vehicular Equipment. Program increases are recommended for Electronics and Telecommunication Equipment, and other Base Maintenance and Support Equipment (includes Special Update program which is classified).

Title V.—Research, development, test, and evaluation (RDT&E)

	Budget Authority	Outlays
President's September request	20.3	18.3
Committee recommendation	19.3	17.8
Difference from request	−1.0	−0.5

Areas where significant changes are recommended by the Appropriations Committee are:

A reduction of $191 million is recommended for Army RDT&E to include a net reduction of $105 million for changes recommended by the authorization conference; a reduction of $13 million for programs which exceeded fiscal year 1982 level by unjustifiably large percentages; and other reductions for the Synthetic Flight Training Systems, Aircraft Weapons, Joint Tactical Fusion program, Major Range/Test Facilities, as well as numerous other programs.

The Committee recommended added funding of $37 million for the Remotely Piloted Vehicles program. This program had been reduced by $37 million in the October amended budget request.

A reduction of $369 million is recommended for Navy RDT&E to include a net reduction of $197 million for changes recommended by the authorization conference; a reduction of $8 million for programs which exceeded the fiscal year 1981 level by unjustifiably large percentages and additional reductions for Productivity Enhancement, Extremely Low Frequency Program, Ship Development (Engineering) for survey and estimating work on inactive carriers, avionics development, the HXM Helicopter, as well as numerous other programs.

A reduction of $322 million is recommended for Air Force RDT&E to include a net reduction of $39 million for changes recommended by the authorization conference, a reduction of $19 million for programs which exceed the fiscal year 1981 level by unjustifiably large percentages; and additional reductions for the Long Range Combat Aircraft (B-1) (−$179 million); Advanced Radiation Technology; no funding for the Next Generation Trainer; no funding for the Alternate Fighter Engine; as well as reductions in numerous other programs. Additional funding of $51 million over the budget request is recommended for the Advanced Ballistic Reentry System.

A reduction of $176 million is recommended for RDT&E Defense Agencies to include a reduction of $58 million for the Defense Nuclear Agency, $55 million for Experimental Evaluation, and $7 million based on authorization conference action.

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this appropriation bill exceeds the target for discretionary budget authority, the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is below the 302(b) target for discretionary action by $11.3 billion in budget authority and $2.8 billion in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	181,436	105,357
2. Prior action		
3. Total action to date	181,436	105,357
4. 302(b) target	192,698	108,128
5. Over (+)/Under (−)	−11,262	−2,771
6. Amounts assumed but not yet considered		
7. Over (+)/Under (−)	−11,262	−2,771
8. Mandatory amounts in bill	15,172	14,843
9. Prior action		49,304
10. Total	15,172	64,147
11. 302(b) target	21,525	70,022
12. Over (+)/Under (−)	−6,353	−5,875
13. Supplemental amounts needed	5,497	5,410
14. Over (+)/Under (−)	−856	−465

IV. Explanation of over/under

The total of the 302(b) subdivisions made by the Appropriations Committee must equal the total amounts of the 302(a) allocation, but the assumptions which make up the subcommittee target need not be the same as the program assumptions that underlie the Budget Resolution. The specific assumptions behind the 302(b) target are not known—as a result, the specific programmatic reasons that the bill is over or under the subcommittee targets can not be precisely identified. This bill is within its 302(b) allocation for total discretionary amounts.

V. Comparison with the President

This bill is under the President's requests for items in this bill by $4.3 billion in budget authority and $2.8 billion in outlays.

VI. Credit (in millions of dollars)

The Budget Resolution contains non-binding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and First Budget Resolution assumptions.

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. Credit program limits in the bill			
2. Limits assumed in the budget resolution not acted on in the bill			
3. Credit programs not subject to limit			
4. Total in bill			

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
5. Budget resolution assumptions			
6. Over (+)/Under (−)			

There are not credit programs in this bill.

VII. Amendments

A number of amendments are anticipated including one to be offered by Mr. Addabbo deleting funding for the B-1B Bomber.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: Discretionary fiscal year 1982 appropriations in HR 4995.

Line 2. Prior action: The fiscal year 1982 budget authority and outlays for this committee that were appropriated in prior bills.

Line 3. Total action to date: Line 1 plus line 2.

Line 4. 302(b) target: The target for discretionary appropriations set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+) or Under (−): Line 3 minus line 4.

Line 6. Amount assumed but not yet considered: These are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee.

Line 7. Over (+) or Under (−): Line 5 minus line 6.

Line 8. Mandatory amount in bill: Funding for mandatory programs (entitlements).

Line 9. Prior action: Outlays from budget authority enacted for years prior to fiscal year 1982, plus permanents and advance appropriations assigned to the Appropriations Committee.

Line 10. Total: Line 8 plus line 9.

Line 11. 302(b) target: The target for mandatory amounts set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that changes the level of mandatory programs.

Line 12. Over (+)/Under (−): Line 10 minus line 11.

Line 13. Supplemental amounts needed: Amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise.

Line 14. Over (+)/Under (−): Line 12 plus 13.

CONFERENCE REPORT, H.R. 4209, FISCAL YEAR 1982 DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES

This bill is under its targets for discretionary spending.

Staff analysis

Committee: Appropriations.
Subcommittee: Transportation.
Chairman: Mr. Benjamin (Indiana).
Ranking minority member: Mr. Coughlin (Pennsylvania).
Scheduled: Thursday, November 19, 1981.

I. Description of bill

This conference report provides funds for the Department of Transportation and related agencies for fiscal year 1982.

The conference report as a whole is under the 302(b) targets for this subcommittee by $1,056 million in budget authority and $145 million in outlays (the sum of lines 5 and 12 below). If amounts assumed in the budget resolution but not yet considered are added, and mandatory programs are fully funded, the subcommittee could be under its targets by $997 million in budget authority and $88 million in outlays (the sum of lines 7 and 14 below).

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and HBC scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Their target for discretionary programs is therefore the main focus for this Early Warning report. Further, if a conference report exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the conference report plus discretionary amounts not yet considered is below its 302(b) target for discretionary action by $1,064 million in budget authority and $252 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this conference report:		
1. Discretionary amounts in conference report	10,268	6,458
2. Prior action		
3. Total action to date	10,268	6,458
4. 302(b) target	11,332	6,710
5. Over (+)/Under (−)	−1,064	−252
6. Amounts assumed but not yet considered		
7. Over (+)/Under (−)	−1,064	−252
The amounts shown below are only for mandatory appropriations included in this conference report:		
8. Mandatory amounts in conference report	345	332
9. Prior action	166	13,200
10. Total	511	13,532
11. 302(b) target	503	13,425
12. Over (+)/Under (−)	+8	+107
13. Supplemental amounts needed	59	57
14. Over (+)/Under (−)	+67	+164

IV. Explanation of over/under

Despite the fact that the House Budget Committee is unable to give a definitive answer to the question of where a particular bill is over or under its 302(b) allocation, it does compare the items in a bill to the assumptions contained in the budget resolution. It is important to note that the line-item assumptions in the budget resolution are not binding on a committee. Although within the totals assumed in the budget resolution for this conference report, the conference report makes several changes among funding priorities including:

A reduction of $500 million in budget authority and $400 million in outlays for the purchase of Consolidated Rail Corporation (ConRail) securities. The Committee anticipates that funds appropriated for operating expenses in fiscal year 1981 will be available to finance operations through fiscal year 1982.

An increase of $122 million in budget authority and $226 million in outlays for AMTRAK.

A decrease of $142 million in budget authority and $118 million in outlays for Urban Mass Transportation Administration (UMTA).

An increase of $125 million in budget authority and $21 million in outlays for interstate highway transfer grants.

A decrease of $215 million in budget authority and $32 million in outlays for the Appalachian highway system which is maintained in the Energy and Water Appropriation bill.

A decrease of $198 million in budget authority and $179 million in outlays in FAA operations.

For mandatory items, the conference report plus assumed "full funding" of mandatory items would be over its budget authority target largely because the target seems not to make an allowance for the civilian agencies pay raise that will become effective this October.

V. Comparison with the President (Discretionary amounts only)

This conference report is above the President's September request for discretionary items in the conference report by $844 million in budget authority and over by $633 million in outlays and below the President's March request by $489 million in budget authority and $151 million in outlays.

VI. Credit (In millions of dollars)

The budget resolution contains only nonbinding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the conference report and the first budget resolution assumptions.

	Direct loan obligations	Primary guarantee commitments	Secondary guarantee commitments
1. Credit program limits in the conference report		445	3
2. Programs assumed to be limited in the budget resolution but not acted upon in the conference report			
3. Credit programs not subject to limit	291	−291	
4. Total in conference report	291	154	3
5. Budget resolution assumption	291	129	3
6. Over (+)/under (−)		+25	

The Transportation Subcommittee total limitations proposed for guarantee programs (in this conference report) exceed the budget resolution by $25 million. The Transportation Subcommittee set limitations for guarantee programs that differed from the resolution as follows:

Aircraft purchase loan guarantees are limited to $175 million, $75 million above the resolution, but a 50 percent cut from the 1981 level. The Committee expressed concern that an abrupt termination of the program would adversely affect carriers which had made investments based on the availability of guarantees.

Railroad rehabilitation and improvement financing fund guarantees are limited to $270 million, $50 million below the resolution. The Committee noted that the largest pending loan guarantee application had been withdrawn.

VII. Amendments

None.

VIII. Definitions of terms in summary table, section III

Line 1. Discretionary amounts in bill: discretionary fiscal year 1982 appropriations in H.R. 4209.

Line 2. Prior action: the fiscal year 1982 budget authority and outlays for this committee that were appropriated in prior bills.

Line 3. Total action to date: line 1 plus line 2.

Line 4. 302(b) target: the target for discretionary appropriations set by the Appropriations Committee pursuant to the Budget Act.

Line 5. Over (+)/Under (−): line 3 minus line 4.

Line 6. Amounts assumed but not yet considered: these are amounts assumed in the fiscal year 1982 Budget Resolution for which funding has been deferred by the Appropriations Committee, probably until next Spring's supplemental appropriation bill.

Line 7. Over (+)/Under (−): line 5 plus line 6.

Line 8. Mandatory amount in bill: funding for mandatory programs (entitlements).

Line 9. Prior action: outlays from budget authority enacted for years prior to fiscal year 1982, plus permanents and advance appropriations assigned to the Appropriations Committee.

Line 10. Total: line 8 plus line 9.

Line 11. 302(b) target: the target for mandatory amounts set by the Appropriations Committee. The target set by the Appropriations Committee includes the effect of assumed authorizing legislation that changes the level of mandatory programs.

Line 12. Over (+)/Under (−): line 10 minus line 11.

Line 13. Supplemental amounts needed: amounts for any new entitlement legislation assumed in the Budget Resolution, for the October 1 pay raise.

Line 14. Over (+)/Under (−): line 12 plus 13.

CONFERENCE REPORT, H.R. 4522, DISTRICT OF COLUMBIA APPROPRIATIONS

This bill is under its targets for discretionary action.

Staff analysis

Committee: Appropriations.

Subcommittee: District of Columbia.

Chairman: Mr. Dixon (California).

Ranking minority member: Mr. Coughlin (Pennsylvania).

Scheduled: Tentatively, Wednesday, November 18, 1981.

I. Description of bill

This bill provides appropriations for payments and loans to the District of Columbia.

This bill as a whole is under the 302(b) targets for this subcommittee by $14 million in budget authority and $13 million in outlays (the sum of lines 5 and 12 below). The only mandatory amounts in this subcommittee's jurisdiction are outlays from prior-year budget authority.

II. Comparison with target for discretionary appropriations action

Pursuant to the Budget Act and House Budget Committee scorekeeping, the subcommittee has two targets: one for discretionary programs and one for mandatory programs. Since the Appropriations Committee is bound by existing entitlement law, it generally cannot effectively change the amounts required for the funding of mandatory programs. Its target for discretionary programs is therefore the main focus for this Early Warning report. Further, if the conference report on this approriation bill exceeds the target for discretionary budget authority, the bill will be subject to the "delayed enrollment" provision of Section 305 of the fiscal year 1982 First Budget Resolution. As shown on line 7 below, the bill plus discretionary amounts not yet considered is below the 302(b) target for discretionary action by $14 million in budget authority and $14 million in outlays.

III. Summary table

[In millions of dollars]

	Budget authority	Outlays
The amounts shown below are only for discretionary 1982 spending in this bill:		
1. Discretionary amounts in bill	557	516
2. Prior action		
3. Total action to date	557	516
4. 302(b) target	571	530
5. Over (+)/under (−)	−14	−14
6. Amounts assumed but not yet considered		
7. Over (+)/under (−)	−14	−14
The amounts shown below are only for mandatory appropriations included in this bill:		
8. Mandatory amounts in bill		
9. Prior action		32
10. Total		32
11. 302(b) target		31
12. Over (+)/under (−)		+1
13. Supplemental amounts needed		
14. Over (+)/under (−)		+1

IV. Explanation of over/under

The total of the 302(b) subdivisions made by the Appropriations Committee must equal the total amounts of the 302(a) allocation, but the assumptions which make up the subcommittee target need not be the same as the program assumptions that underlie the Budget Resolution. The specific assumptions behind the 302(b) target are not known—as a result, the specific programmatic reasons that the bill is over or under the subcommittee targets cannot be precisely identified.

The bill would appropriate a total of $557 million for the Federal payment to the District of Columbia, $14 million less than the amount assumed in the Budget Resolution.

V. Comparison with the President's request

This bill is below the President's request for discretionary items in this bill by $14 million in budget authority and $14 million in outlays.

VI. Credit

The Budget Resolution contains non-binding targets for credit program amounts. This is the first year that there has been a credit scorekeeping system. There is no 302(a) and 302(b) allocation for credit program annual limits. For comparative purposes only, the table below shows the bill and First Budget Resolution assumptions. The budget authority and outlay effects of credit activity are reflected within the 302(a) and 302(b) allocations for budget authority and outlays.

[In millions of dollars]

	Direct loan obligations	Primary guarantee commitments
1. Credit program limits in the bill	145	
2. Limits assumed in the budget resolution but not acted on in the bill		
3. Credit programs not subject to limit		
4. Total in bill	145	
5. Budget resolution assumptions	145	
6. Over(+)/under(−)		

The only credit activity in this bill is loans to the District of Columbia. The bill would limit those loans to $145 million in 1982, the same amount assumed in the Budget Resolution.

SUMMARY OF AUTHORIZATIONS

H.R. 4500—SBA PILOT PROGRAMS

This bill would reauthorize and extend for two years (through fiscal year 1983) two pilot programs administered by the Small Business Administration (SBA) under section 8(a) of the Small Business Act. One program allows the SBA to enter into procurement contracts with a participating Federal agency and then, in turn, subcontract the work to socially and economically disadvantaged small businesses. The other program allows the SBA, in specific situations, to waive Federal bonding requirements for section 8(a) contractors. H.R. 4500 would create no spending authority.

H.R. 4793—FEDERAL PHYSICIANS COMPARABILITY ALLOWANCE ACT EXTENSION

The Act extends the existing authority to allow Federal agencies to pay special allowances to physicians in order to encourage such personnel to remain in the Federal government. The special allowance may not exceed $7,000 for an individual who has served for less than two years and may not exceed $10,000 for those who have served for more than two years.

An amendment to the Act authorizes special adjustments in annuity payments for former civil servants or former Members of Congress whose retirement pay may be lowered because they ended their retirement to return to Federal service, but later left the service or Congress to continue such retirement.

CBO estimates that no additional fiscal year 1982 cost is associated with this bill.

H.R. 4879—DEPOSIT INSURANCE FOR INTERNATIONAL BANKING FACILITY DEPOSITS

This bill would allow Federal deposit insurance to be extended to a greater portion of foreign deposits in U.S. banks in an attempt to attract more of those deposits to the U.S. This bill creates no spending. Indeed, in future years, Federal outlays could be reduced because insurance premium receipts paid into the Federal Deposit Insurance Corporation Fund would increase if new deposits are attracted to the American banking system.

H.R. 4515—TO REMOVE LIMITATIONS ON FNMA AND FHLMC MORTGAGE PURCHASES

H.R. 4515, as reported, would eliminate the limit on the purchase of mortgages older than one year by the Federal National Mortgage Association (FNMA) and the Federal Home Loan Mortgage Association (FHLMC). Currently, no more than 20 percent of the conventional mortgages purchased by FNMA and FHLMC may be more than one year old at the time of purchase. Because the volume of newly originated conventional mortgages has fallen off sharply in recent months, the removal of this limit would allow FNMA and FHLMC to provide a larger secondary market support for mortgage lenders. In addition, it is hoped that this will allow distressed mortgage lenders more opportunity to sell older, lower yielding mortgages and improve their financial condition. This is not a spending bill. FNMA and FHLMC are government-sponsored enterprises with mixed, private and public boards of directors and with private capital.

H.R. 4482—U.S. COURT OF APPEALS FOR THE FEDERAL CIRCUIT

H.R. 4482 merges the appellate division of the existing U.S. Court of Claims and the U.S. Court of Customs and Patent Appeals into the U.S. Court of Appeals for the Fed-

eral Circuit. It also establishes a new article I trial court, the U.S. Claims Court, composed of sixteen article I judges. This court will hear cases currently under the jurisdiction of the trial division of the U.S. Court of Claims. As a transitional measure, those individuals in active service as trial commissioners of the Court of Claims will become article I judges of the Claims Court. It is expected that enactment of this legislation will result in no significant additional cost to the government.

H. CON. RES. 203—TVA PAY

H. Con. Res. 203 is a concurrent resolution and, thus, not a law. As such it has no spending effect whatever. The purpose of the resolution is to express to the Board of the Tennessee Valley Authority the intent of Congress that no TVA employee should be paid in excess of the Federal pay cap.

H.J. RES. 349—MULTINATIONAL FORCE AND OBSERVERS PARTICIPATION RESOLUTION

Funding for the participation of the United States in a Multinational Force of Observers (MFO) to implement the treaty of peace between Egypt and Israel has already been provided in H.J. Res. 325, the first continuing resolution for fiscal year 1982. This subsequent authorizing legislation is necessary to permit the assignment of U.S. military forces to the MFO and to set out the other details of U.S. participation.

The fiscal year 1982 cost of U.S. participation in the MFO is $125 million in budget authority and outlays. The amounts were not assumed in the first budget resolution and were not provided for in the Appropriations Committee's 302(b) allocation. If the costs of this bill are added to the amounts in the reported version of the fiscal year 1982 Foreign Assistance Appropriations bill the 302(b) allocation would be exceeded. However, these funds have already been appropriated, and the no House action has been scheduled on the fiscal year 1982 Foreign Assistance bill. Consequently, while action on this authorization bill has no effect on fiscal year 1982 spending, the earlier appropriations of $125 million for the MFO may result in a budget problem when (and if) the fiscal year 1982 Foreign Assistance Appropriation bill is considered in the House.

It should be noted that although U.S. participation in the MFO was not assumed in the first budget resolution, and not provided for in the 302(b) allocation of the Appropriations Committee, the required funding can be accommodated within the totals available within function 150, International Affairs. This is because appropriation bills already approved by the House have set spending for the Department of State and for food assistance programs at levels which are below those assumed in the resolution.

H.R. 3663—THE MOTOR BUS ACT OF 1981

This bill is a regulatory reform bill and is neither a spending bill or an authorization. The bill follows previous rail and aviation deregulation legislation by deregulating the bus industry. The bill will be marked up Monday, November 16 in a session by the Public Works Committee and is expected to be brought before the Rules Committee on Tuesday and possibly to the floor Wednesday or Thursday.●

SOVIET PIPELINE—POLICY BY OMISSION

(Mr. LONG of Louisiana asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. LONG of Louisiana. Mr. Speaker, the Reagan administration has made the financing of the natural gas pipeline from West Siberia to Western Europe a key issue in East-West commercial policy. This single issue will be significant in determining whether the West will have a unified or divided position on trade with the Eastern bloc. Western participation in construction of the pipeline and subsequent sales of Soviet gas to Western Europe will also sharply increase the West's economic ties with the Soviet Union.

Earlier this year, I asked Secretaries Haig, Regan, Baldrige, and Edwards to respond to a series of questions about U.S. policy toward the construction of the proposed pipeline. The Secretaries' response to my inquiries were inserted in the CONGRESSIONAL RECORD on July 10 and 14. The pipeline issue was also explored in "Energy in Soviet Policy," a recent publication of the Subcommittee on International Trade, Finance and Security Economics of the Joint Economic Committee.

Since my initial letters, the administration has taken several steps that have implications for our overall policy toward commercial ties with the Eastern bloc. Germany has reached an informal agreement with the Soviet Union on financing the construction of the pipeline. During the economic summit in Ottawa, the President reportedly urged Chancellor Schmidt to reconsider Germany's participation in the construction and use of the pipeline. Shortly before the summit, however, the Department of Commerce granted an export license to Caterpillar for equipment to be used on the construction of gas pipelines designed for internal Soviet consumption.

In the wake of an evolution of U.S. policy and further reports of European commitments to the construction of the pipeline, I again sought the opinions of key administration officials. The highlights of their responses follow:

AUGUST 6, 1981.

Hon. ALEXANDER HAIG,
Secretary of State,
Department of State,
Washington, D.C.

DEAR MR. SECRETARY: Several months ago I asked you some specific questions on the financing and construction of a massive new Soviet natural gas pipeline from the Yamburg gas field in Siberia to West Europe. Your answers and those of other Secretaries were most helpful. I shared them with my colleagues in Congress by inserts in the CONGRESSIONAL RECORD July 10 and 14th. Since then several significant developments have occurred:

1. The Ottawa meeting was held at which the pipeline, we understand, was discussed.

2. The approval by the administration of the Caterpillar pipelaying equipment export for use in constructing Soviet pipelines.

3. The agreement between German banks and companies and the Soviet Union on the first part of the Yamburg pipeline equipment financing.

The additional questions I have deriving from these recent developments are the following:

1. Has the Reagan administration taken a position in opposition to the pipeline agreement or one of conditional approval if the Europeans build in sufficient safeguards to avoid undue vulnerability to Soviet use of the "gas lever"? How did the U.S. proposal of alternative nuclear and coal developments fit into our discussions with the Europeans? What are the time dimensions and realism of the alternative source proposals, e.g. When could U.S. coal be available in volume to the Germans for alternative use, is a new nuclear electric program in the FRG politically feasible? Did we also influence the new Norwegian agreement to supply gas to the FRG as an off-setting arrangement?

2. Was the approval of the sale of Caterpillar company of pipelaying equipment to the Soviet Union an indication of a Reagan administration's policy on the use of foreign availability and critical technology criteria in strategic trade? Is this a precedent to be used in CoCom discussions? Has the Reagan administration indicated that use of "foreign policy" criteria will be similar or different than in the Carter administration, e.g. the several Dresser drilling bit cases?

3. What specially have the Germans agreed to, under what conditions? We hear conflicting reports on Soviet concessions on interest rates, gas pricing, pay back, etc. What are the facts? Does this initial financing agreement indicate that the larger Western consortium agreement is now likely to follow? How soon and with what specific details?

4. What would be the implications to the Soviet Union and East Europe if the agreements on the pipeline were not reached? A recent analysis of the Wharton Economic Forecasting Analysis group (WEFA) indicates the criticality of the pipeline to the Soviet bloc. Do you agree with their analysis? Does this not give the West more leverage than we have yet used? Is it possible by United States action for the West to better use its critical leverage in the pipeline arrangements?

Please provide us answers before Labor Day so that I may share your responses with my Congressional colleagues in a timely fashion.

Sincerely,

GILLIS W. LONG,
Member of Congress.

DEPARTMENT OF STATE,
Washington, D.C., September 10, 1981.

Hon. GILLIS W. LONG,
U.S. Senate.

DEAR MR. LONG: I am writing in response to your letter to Secretary Haig of August 14 regarding the proposed Siberian to Western Europe gas pipeline. I regret the delay in responding to you.

Let me note as a preface that the pipeline is an issue still very much in flux. Although there have been press reports of intensified Soviet-European negotiations and agreements on some aspects of the project, a large number of details remain to be worked out. Furthermore, President Reagan and his counterparts at the Ottawa Summit agreed to consult on the pipeline alternatives and European energy security. Our concerns and the upcoming consultations with our allies

and friends, will have to be factored into any final European decision on the project.

We are concerned about the significant security problems that could accompany expanded European-Soviet energy relations. Yet, we recognize also that a U.S.-European confrontation on the question of the prospective pipeline would not serve our interests and would increase tensions within the alliance. We have strong views regarding the project, and hope that U.S.-European consultations on this issue will result in a common Western position.

Let me now turn more specifically to the questions you raised.

President Reagan expressed his concerns about the security implications of the proposed project at the Ottawa Summit. As noted above, he and his counterparts agreed to consult on energy alternatives to the pipeline which would limit European dependence on Soviet sources of energy and maintain, or even improve, Europe's overall energy security. The President noted that detailed consultations on energy alternatives will have to include technical discussions on the prospects for expanded European use of coal, increased reliance on nuclear power and the prospects for non-Soviet oil and gas.

We are now laying the foundation for the technical discussions. We expect that senior US officials will meet with their European counterparts in the next one or two months to discuss these issues.

Our initial assessments indicate that in light of the long lead time required to bring the proposed pipeline into operation, alternative energy sources are a real possibility. We hope that within the next five years the US coal infrastructure will be more than sufficient to meet European demand. The feasibility of expanding nuclear power in Europe will depend on technical and economic as well as political factors. In addition, further changes in the international petroleum market and the European demand for liquid hydrocarbons may well reduce the commercial attractiveness of the proposed pipeline over the medium term.

Foreign availability was an important consideration but not the only factor in the Administration's decision to approve the sale of 100 Caterpillar pipelayers to the Soviet Union. Had we refused the license request it is virtually certain that the Caterpillar order would have gone to foreign competition. Komatsu of Japan has sold similar pipelayers to the Soviets in recent years. The pipelayers themselves represent low technology equipment without military applications, and as such are controlled for foreign policy rather than security reasons. They are not on the COCOM list of Western controlled strategic goods. Therefore this decision does not set a precedent for COCOM discussions. A review of the criteria for foreign policy controls on sales of oil and gas exploration and production equipment is in progress.

As I mentioned above, many details of a prospective Soviet agreement with certain West European countries on the pipeline remain to be worked out. We too have noted reports of progress regarding certain parts of the financing package and equipment sales. But based on the best information available to us, the details of both the financing and equipment supply aspects of the package deal have not yet been concluded. Furthermore, the discussion on gas pricing is still at a preliminary stage.

Your final questions suggest that the pipeline has important implications for the Soviets and their Eastern European allies. We generally agree with that assessment. The pipeline would contribute to the development of the Soviet gas infrastructure and provide a market in the West which would be an important source of hard currency. If the details were to fall through, the Soviets would need to reconsider their energy, fiscal and more general economic plans.

It may be the case, as you suggest, that in light of the Soviet's desire for the deal, the West has a great deal of leverage which could be used in negotiating pipeline arrangements. Since we are not privy to the specific details of Soviet-European exchanges on this subject, it is difficult to evaluate what leverage the Europeans have sought to employ. As noted in our earlier letter to you, negotiators have been relatively successful in coordinating their proposals and independently presenting a united front to the Soviets. It is possible that closer collaboration at the later stages of discussions, should the negotiations proceed to that point, would offer the Europeans an opportunity to extract the best possible terms.

I hope you find this information responsive to your questions.

Sincerely,

RICHARD FAIRBANKS,
Assistant Secretary for Congressional Relations.

THE SECRETARY OF ENERGY,
Washington, D.C., September 25, 1981.

Hon. GILLIS LONG,
House of Representatives,
Washington, D.C.

DEAR MR. LONG: Thank you for your recent letter on the potential Northwest Siberian pipeline. It is my understanding that you have sent the same letter to the Departments of State, Treasury, and Commerce. As these other agencies will be addressing those questions which relate to their expertise, I shall focus my comments on questions 1 and 4.

The Reagan Administration has deep energy security concerns regarding the potential Northwest Siberian pipeline. At the Ottawa Summit, the President expressed these concerns to the other Heads of Government and suggested that we cooperate in developing alternative supply options. During the weeks ahead, we will be discussing these matters in-depth with our allies and friends as we seek to develop a common approach to the multifaceted and complex problems which we are facing. With regard to the emergency management option which you mention, we believe that increased capabilities to reduce vulnerability to possible supply interruptions are desirable regardless of the state of negotiations on the Northwest Siberian pipeline.

With regard to alternative energy supply sources, we believe that increased dependence upon Soviet gas may not be the only option available to Western Europe. The pipeline could not be completed before the latter part of this decade and there is time for Western Europe to develop alternative sources which could go a long way toward replacing prospective Soviet gas deliveries. Although no single alternative could replace the total amount of gas that would flow through the pipeline when it is at full capacity as originally conceived, a combination of supply alternatives could help meet the European objective of source diversification and supply security.

As you noted, expanded use of coal and nuclear power are clearly options which should be considered. American coal resources are so vast that no export program would be constrained by supply availability and we are firmly committed to expanding our coal sales to Western Europe. Although the expanded use of nuclear power in West Germany and other European countries is politically sensitive, the U.S. is prepared to collaborate further in advancing European programs. We also consider the accelerated development of North Sea gas to be desirable. In this regard, we are pleased with the recently concluded Statfjord gas agreement that will bring Norwegian gas to continental European markets by the mid-1980's. (However, it should be noted that this was a commercial venture in which the U.S. Government played no role.) As stated above, we wish to discuss alternatives to the Northwest Siberian pipeline with the West Europeans in the weeks ahead in order to develop a mutually satisfactory approach.

The Northwest Siberian pipeline is critically important to Soviet energy and economic planning and the failure to complete it could have profound implications. At present, the USSR earns about half of its hard currency from oil sales to the West. By the mid-1980's these earnings may be eliminated due to the peaking of Soviet oil production, domestic consumption requirements and the needs of their East European clients. Without offsetting hard currency earnings, sales of other commodities or contingency measures, the USSR would experience significant financial difficulties in maintaining current levels of purchases.

Furthermore, it should be pointed out that the USSR needs Western assistance to accelerate the development of its huge gas reserves in Northwest Siberia. Completion of the pipeline would help facilitate the development of Soviet gas resources because it would contribute to the infrastructure needed for domestic gas resource extraction, processing and distribution. Since gas is the one bright spot on the Soviet energy horizon, failure to complete the Northwest Siberian pipeline could have both severe domestic energy and foreign exchange implications.

I trust that these comments are responsive to your concerns.

Sincerely,

JAMES B. EDWARDS.

THE SECRETARY OF COMMERCE,
Washington, D.C., September 18, 1981.

Hon. GILLIS W. LONG,
House of Representatives,
Washington, D.C.

DEAR MR. LONG: Thank you for your letter concerning the proposed Siberia to Western Europe gas pipeline.

The following responses correspond to the numbered questions in your letter:

1. The Reagan Administration has concerns about the significant security problems that may result from the construction of the pipeline. Our estimates show that if the pipeline were completed, France and West Germany would be dependent on the Soviet Union for approximately twenty-six and thirty percent, respectively, of their gas. President Reagan expressed these concerns at the Ottawa Summit and agreed with his counterparts to explore possible energy alternatives to the pipeline which would limit European dependence on Soviet sources of energy and improve Europe's energy security. The President noted that detailed consultations on energy alternatives for Western Europe should include expanded use of coal, increased reliance on nu-

clear power, and the prospects for oil and gas from sources other than the Soviet Union. The Administration is now preparing for these discussions. Senior U.S. officials will meet with their European counterparts within the next two months.

Because the pipeline could not be completed before the latter part of this decade, other energy sources for Western Europe are a real possibility. The Administration has instituted a high-priority program to facilitate and increase the export of United States coal. We believe that in the next five years, our coal infrastructure will be sufficient to meet European demand. The feasibility of expanding nuclear power in Europe will depend on technical and political factors. We are prepared to assist the Europeans in developing their nuclear capabilities. Norway recently agreed to supply gas to Continental Europe by the mid-1980s. The Administration did not have an active role in these negotiations, but has encouraged the accelerated development of North Sea gas. In addition, changes in the international petroleum market will help reduce the commercial attractiveness of the proposed pipeline.

2. The 100 Caterpillar pipelayers recently authorized for export by the Administration are not high technology equipment. Furthermore, the end-use statement signed by the Soviets specifically states that the pipelayers will not be used on the Siberian pipeline. The license was approved because foreign countries could sell comparable equipment to the Soviets. Only national security controls are considered in COCOM deliberations; because the pipelayers are not high technology equipment, they are controlled for foreign policy and not for national security reasons.

The Reagan Administration is currently conducting a review of oil and gas export controls. An Administration position should be announced in the near future. This policy will be consistent with the decision to license the Caterpillar pipelayers.

The Dresser licenses to export technical data and training to build a rock bit plant were controlled for national security reasons but were later revoked after the Soviet invasion of Afghanistan. In addition to the review of oil and gas export controls, the Administration is currently conducting a broad-based review of foreign policy controls. In the past, our allies have complained that we have used foreign policy controls arbitrarily and without prior notice to them. The aim of our policy review will be to determine whether foreign policy controls should be used only in accordance with contingency plans developed with our allies in advance of crises.

3. Because the project is still in the negotiation stage, it is not possible at this time to provide you with specific terms on the financing of the pipeline. A consortium of West German banks has announced achievement of an understanding on financing with the Soviets, but many aspects of the financing, equipment sales, and gas purchase proposals remain to be settled. As the major purchasers of gas and suppliers of equipment and financing, the West Germans would probably set the pace and tone for negotiations by other possible participants.

4. The analysis by the Wharton Economic Forecasting Group accurately states that the pipeline is extremely important to Soviet energy and economic planning. The pipeline would contribute to the development of the Soviets' gas infrastructure and provide them an important source of hard currency. Failure to complete the pipeline could have a profound effect on the Soviet economy.

In view of the Soviets' desire for the pipeline, the Europeans do have a great deal of leverage which could be used in negotiations. The Administration has not been privy to the details of the negotiations and cannot accurately evaluate what leverage the Europeans have sought to use. However, to date, the Europeans have been relatively successful in coordinating their proposals and presenting a united front to the Soviets. It is possible that closer collaboration at the later stages of discussions, should the negotiations proceed to that point, would offer the Europeans an opportunity to extract the best possible terms.

Sincerely,

MALCOLM BALDRIGE,
Secretary of Commerce.

DEPARTMENT OF THE TREASURY,
Washington, D.C., September 22, 1981.

Hon. GILLIS W. LONG,
House of Representatives,
Washington, D.C.

DEAR MR. LONG: This is in response to your letter concerning the financing and construction of the Soviet natural gas pipeline to Western Europe. I understand that similar questions were sent to the Departments of State, Energy, and Commerce. I will therefore direct my response mainly to your questions on the financing of the pipeline and the implications for the Soviet economy of a cancellation of the project.

At this time, I am not aware of firm financial commitments for the proposed Siberian pipeline. Such key aspects of the project as official political risk insurance for bank creditors, interest rates, gas pricing and pipe sales contracts are still being negotiated by European and Japanese businessmen. Thus, recently reported deals for financing of specific components of the project should not be regarded as complete or final. We expect, nevertheless, that terms for private commercial financing would reflect market conditions, even though interest may be capitalized, and that official involvement would be consistent with the OECD International Arrangement on Official Export Credits.

If there were a cancellation of the project it would be likely to retard Soviet gas development and reduce potential hard currency earnings from Soviet energy exports, although these effects cannot be predicted with complete confidence. If the Soviets are able to conserve more energy and increase the use of fuels other than oil, such as gas, more oil would be available for export to the West. If they are not successful and the gas project is cancelled or reduced, then hard currency earnings will decline. In this case, sacrifices elsewhere in the Soviet economy could become necessary. How stringent these measures would have to be depends inter alia on the Soviet's need for imports from the West (e.g. grain) and on the world market prices of these imports and the non-energy goods that the Soviets export. As the Wharton Econometric Forecasting Associates study suggests, cancellation of the pipeline deal would require important changes in Soviet energy and economic plans, but the East Bloc would still have several options for adjustments, such as more rapid development of import substitution or other export industries. This may be one of the reasons why the Europeans have had limited success in pressuring the Soviets to agree to more favorable pipeline terms.

President Reagan is very much concerned over the dangers of possible increased Western European reliance on Soviet natural gas. He expressed this concern to our Allies at the Ottawa Summit. In response, the Allies agreed to consult with us on their needs for Soviet energy. Technical level talks involving U.S. and European experts are being planned. During these consultations, we will more fully examine Europe's alternative and contingency energy and gas supply plans in order to identify steps needed to allay security concerns and put Western energy relations with the Soviets on the most favorable terms.

Sincerely,

W. DENNIS THOMAS,
Assistant Secretary
(Legislative Affairs).●

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. DUNCAN (at the request of Mr. MICHEL), after 2 p.m. today, for an indefinite period on account of hospitalization.

Mr. AUCOIN (at the request of Mr. WRIGHT), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. HANSEN of Utah) to revise and extend their remarks and include extraneous material:)

Mr. GILMAN, for 5 minutes, today.

Mr. CORCORAN, for 5 minutes, today.

Mr. PAUL, for 60 minutes, on December 2.

(The following Members (at the request of Mr. DONNELLY) to revise and extend their remarks and include extraneous material:)

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. FORD of Michigan, for 5 minutes, today.

Mr. SHAMANSKY, for 5 minutes, today.

Mr. NEAL, for 5 minutes, today.

Mr. PEPPER, for 10 minutes, today.

Mr. ASPIN, for 5 minutes, today.

Ms. FERRARO, for 30 minutes, today.

Mr. STOKES, for 60 minutes, November 19, 1981.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. LONG of Louisiana, and to include extraneous matter, notwithstanding the fact that it exceeds 2 pages of the RECORD and is estimated by the Public Printer to cost $1,320.

(The following Members (at the request of Mr. HANSEN of Utah) and to include extraneous matter:)

Mr. MICHEL in two instances.
Mr. BROYHILL.
Mr. MCGRATH in two instances.
Mr. FORSYTHE.
Mr. CONTE.
Mr. LAGOMARSINO in two instances.
Mr. GINGRICH in two instances.
Mr. CONABLE.
Mr. ROUSSELOT.
Mr. LEBOUTILLIER in two instances.
Mr. DERWINSKI in two instances.
Mr. COLLINS of Texas in three instances.
Mr. ASHBROOK in two instances.
Mr. FRENZEL in five instances.
Mr. NELLIGAN.
Mr. GILMAN.
Mr. WEBER of Ohio in two instances.
Mr. JAMES COYNE.
Mr. DENARDIS.
Mr. PAUL.
Mr. WOLF.
Mr. RITTER.

(The following Members (at the request of Mr. DONNELLY) and to include extraneous matter:)

Mr. EDWARDS of California.
Mr. WILLIAM J. COYNE.
Mr. AUCOIN.
Mr. RODINO in two instances.
Mr. WHITTEN in two instances.
Mr. IRELAND in two instances.
Mr. FROST.
Mr. ROE in two instances.
Ms. OAKAR.
Mr. O'NEILL.
Mr. SHAMANSKY.
Mr. SOLARZ in two instances.
Mr. MINISH.
Mr. FLIPPO.
Mrs. SCHROEDER.
Mr. SANTINI.
Mr. LONG of Maryland in four instances.
Mr. FUQUA.
Mr. LEHMAN in two instances.
Mr. SCHUMER.
Mr. GEPHARDT.
Mr. WEISS.
Mr. FORD of Michigan.
Mr. LONG of Louisiana.
Ms. FERRARO.

SENATE JOINT RESOLUTION REFERRED

A joint resolution of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S.J. Res. 34. Joint resolution to provide for the designation of the week commencing with the third Monday in February 1982 as "National Patriotism Week"; to the Committee on Post Office and Civil Service.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; according (at 7 o'clock and 29 minutes p.m.), the House adjourned until tomorrow, Wednesday, November 18, 1981, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

[*November 17 (second legislative day), 1981*]

2530. A letter from the Assistant Secretary of Defense (Comptroller), transmitting selected acquisition reports and SAR summary tables for the quarter ended September 30, 1981, pursuant to section 811(a) of Public Law 94-106; to the Committee on Armed Services.

2531. A letter from the Assistant Secretary of the Air Force (Research, Development and Logistics), transmitting notice of the proposed conversion to contractor performance of the refuse collection and disposal function at Pope Air Force Base, N.C., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2532. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment and services to Turkey (Transmittal No. 82-01), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2533. A letter from the Secretary of Housing and Urban Development, transmitting a status report on projects assisted under section 608 of the National Housing Act, requested in House Report 96-979; to the Committee on Banking, Finance and Urban Affairs.

2534. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment and services to Turkey (Transmittal No. 82-01), pursuant to section 36(b) of the Arms Export Control Act, together with certification that the sale is consistent with the principles contained in section 620C(b) of the Foreign Assistance Act of 1961, pursuant to section 620C(d) of the act; to the Committee on Foreign Affairs.

2535. A letter from the Deputy Administrator of General Services, transmitting a report on the latest investigations of the cost of travel and the operation of privately owned vehicles to Federal employees while engaged on official business, pursuant to 5 U.S.C. 5707(b); to the Committee on Government Operations.

2536. A letter from the Maritime Administrator, Department of Transportation, transmitting a study comparing the relative costs of repairing and outfitting the training vessel *Bay State* with the costs of reactivating and converting the SS *Tulare* of the U.S. National Defense Reserve Fleet for use as a training ship of the Massachusetts Maritime Academy, pursuant to section 1609 of the Omnibus Budget Reconciliation Act of 1981; to the Committee on Merchant Marine and Fisheries.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[*November 17 (second legislative day) 1981*]

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 3663. A bill to amend subtitle IV of title 49, United States Code, to provide for more effective regulation of motor carriers of passengers; with an amendment (Rept. No. 97-334). Referred to the Committee of the Whole House on the State of the Union.

Mr. DERRICK: Committee on Rules. House Resolution 275. Resolution waiving certain points of order against H.R. 4995, a bill making appropriations for the Department of Defense for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97-335). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 276. Resolution providing for the consideration of H.R. 2559, a bill to authorize appropriations for the Coast Guard for fiscal year 1982, and for other purposes (Rept. No. 97-336). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Resolution 277. Resolution providing for the consideration of House Concurrent Resolution 220, a concurrent resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt (Rept. No. 97-337). Referred to the House Calendar.

Mr. MINISH: Committee on House Administration. House Resolution 244. Resolution providing for upgrading of three positions on the Capitol Police, and for other purposes (Rept. No. 97-338). Referred to the House Calendar.

Mr. PEPPER: Committee on Rules. House Concurrent Resolution 220. Concurrent resolution providing for the commemoration of the 100th anniversary of the birth of Franklin Delano Roosevelt (Rept. No. 97-339). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

[*November 17 (second legislative day), 1981*]

By Mr. ANNUNZIO:

H.R. 5000. A bill to provide that interest shall be paid on funds placed in escrow for purposes of paying taxes and insurance on residential real property and certain other types of property; to the Committee on Banking, Finance and Urban Affairs.

By Mr. BEREUTER (for himself, Mr. UDALL, Mr. LUJAN, Mr. CLAUSEN, Mr. KAZEN, Mr. YOUNG of Alaska, Mr. SEIBERLING, Mr. LAGOMARSINO, Mr. WON PAT, Mr. MARRIOTT, Mr. MILLER of California, Mr. CORRADA, Mr. PASHAYAN, Mr. MURPHY, Mr. VENTO, Mr. COELHO, and Mr. GEJDENSON):

H.R. 5001. A bill to authorize the States and the Indian tribes to enter into mutual agreements and compacts respecting jurisdiction and governmental operations in Indian country; to the Committee on Interior and Insular Affairs.

By Mr. BREAUX (for himself and Mr. FORSYTHE):

H.R. 5002. A bill to improve fishery conservation and management; to the Committee on Merchant Marine and Fisheries.

By Mr. GAYDOS:

H.R. 5003. A bill to amend title 28, United States Code, to authorize the Attorney General to acquire and exchange information to assist Federal, State, and local officials in the identification of certain deceased indi-

viduals and in the location of missing children and other specified individuals; to the Committee on the Judiciary.

By Mr. GEPHARDT (for himself, Mr. BAFALIS, Mr. FORD of Tennessee, Mr. GUARINI, and Mr. GRADISON):

H.R. 5004. A bill to amend the Internal Revenue Code of 1954 to clarify the tax treatment of variable annuity contracts; to the Committee on Ways and Means.

By Mr. MAVROULES:

H.R. 5005. A bill to amend title 10, United States Code, to promote the use of solar and other renewable forms of energy in military facilities and equipment; to the Committee on Armed Services.

By Mr. PEPPER:

H.R. 5006. A bill to amend the Public Health Service Act to establish a National Institute on Arthritis and Musculoskeletal Diseases; to the Committee on Energy and Commerce.

By Mr. SMITH of Oregon:

H.R. 5007. A bill to provide for the designation of the Burns Paiute Indian Colony of Oregon as the beneficiary of a public domain allotment and to provide that all interests in public domain allotments in Harney County, Oreg., which are held by Indian allottees who die intestate and without heirs, shall escheat to the United States to be held in trust for the benefit of the Burns Paiute Indian Colony of Oregon and added to the Burns Paiute Indian Reservation; to the Committee on Interior and Insular Affairs.

By Mr. WIRTH (for himself and Mr. SWIFT):

H.R. 5008. A bill to amend the Communications Act of 1934 to make certain technical revisions regarding the administration of such act, and for other purposes; to the Committee on Energy and Commerce.

By Mr. BRINKLEY:

H. Con. Res. 222. Concurrent resolution directing the Commissioner of Social Security and the Secretary of Health and Human Services to immediately conduct a study and report to Congress on steps which can be taken to correct the benefit disparity known as the notch problem, in order to insure equitable and fair treatment for those who have based their retirement plans on benefit levels which have existed for the past decade; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

[*November 17 (second legislative day), 1981*]

By Mr. GOODLING:

H.R. 5009. A bill for the relief of Annie L. Mitchell; to the Committee on the Judiciary.

By Mr. WHITE:

H.R. 5010. A bill for the relief of Frank C. Koper; to the Committee on the Judiciary.

By Mr. STUMP:

H. Res. 278. Resolution to refer H.R. 4994 to the Chief Commissioner of the U.S. Court of Claims; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

[*November 17 (second legislative day), 1981*]

H.R. 2250: Mr. BENEDICT.

H.R. 3474: Mr. CONTE, Mr. STANTON, Mr. BROOMFIELD, Mr. HILER, and Mr. SMITH of New Jersey.

H.R. 3721: Mr. D'AMOURS.

H.R. 3940: Mr. BEDELL, Mr. DANIEL B. CRANE, Mr. DYSON, Mr. GINGRICH, and Mr. LUKEN.

H.R. 4147: Mr. IRELAND and Mr. LEHMAN.

H.R. 4571: Mr. MITCHELL of Maryland, Mr. WON PAT, Mr. BEDELL, Mr. CONYERS, Mr. DASCHLE, and Mr. OTTINGER.

H.R. 4573: Mr. SEIBERLING.

H.R. 4833: Mr. ROBINSON.

H.R. 4835: Mr. DREIER, Mr. WHITEHURST, Mr. FAZIO, and Mr. FISH.

H.R. 4898: Mr. FIELDS.

H.R. 4930: Mr. APPLEGATE, Mr. ASHBROOK, Mr. BENJAMIN, Mr. BROYHILL, Mr. COATS, Mr. CORCORAN, Mr. DANIEL B. BURTON, Mr. LEHMAN, Mr. MARKEY, Mr. WEISS, Mr. MILLER of California, Mr. RAILSBACK, Mr. MCKINNEY, Mr. MINETA, Mr. HOLLENBECK, Mr. BROWN of California, Mr. BINGHAM, Mr. ST GERMAIN, Mr. PEYSER, Mr. MINISH, Mr. DAVIS, Mr. GUARINI, Mr. LANTOS, Mr. HOWARD, Mr. WOLPE, Mr. HOYER, Mr. PANETTA, Mr. GREEN, Mr. GILMAN, Mr. HUGHES, and Mr. DWYER.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

[*November 17 (second legislative day), 1981*]

H.R. 4995

By Mr. FOGLIETTA:

—At the end of the bill, add the following new section:

SEC. 701. None of the funds appropriated by this Act may be used for the purpose of converting to performance by contractor personnel any firefighting functions or base-security functions that are currently performed by Department of Defense personnel.

By Mr. GREEN:

—Page 68, after line 22, insert the following new section:

SEC. 792. Of the total amount appropriated under title IV, entitled "Procurement", with the exception of amounts appropriated for acquisition of spare parts and repair parts, and of ammunition, and title V, entitled "Research, Development, Test, and Evaluation", of this Act, three percent shall be withheld from obligation and expenditure.

—Page 68, after line 22, insert the following new section:

SEC. 792. Of the total amount appropriated under title IV, entitled "Procurement", and title V, entitled "Research, Development, Test, and Evaluation", of this Act, three percent shall be withheld from obligation and expenditure.

By Mrs. ROUKEMA:

—At the end of the bill, add the following new section:

SEC. . Not more than 98 percent of the total amount appropriated by this Act for procurement under title IV, and not more than 98 percent of the total amount appropriated by this Act for research, development, test, and evaluation under title V, may be obligated or expended. None of the reduction required by the preceding sentence in funds available for procurement may be taken from amounts appropriated for procurement of spare parts.

By Mr. WEBER of Ohio:

—Strike out section 778. Redesignate succeeding sections accordingly.

EXTENSIONS OF REMARKS

SOCIAL SERVICE DIRECTOR SUPPORTS REAGAN EFFORTS

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. BROYHILL. Mr. Speaker, during recent days we have heard primarily from the people who are very much opposed to the President's efforts to reduce Federal spending. Today I would like to call to my colleagues attention the comments from Mr. Ben Carpenter, the very efficient, effective, and respected director of the Department of Social Services in Gaston County, the largest county in my congressional district.

Mr. Carpenter indicates that the news media has exaggerated the effects and the size of the Federal budget cuts. He is indeed correct.

Mr. Carpenter recognizes the need to return more authority, power, and flexibility to the States. He is indeed correct.

Mr. Carpenter recognizes the need to reduce the bureaucracy and to cut down on the paperwork and regulations which occupy far too much of his employees' time. He is again correct.

Mr. Carpenter believes that local administrators should have as much flexibility as possible in administering the complex programs. Again, he is correct.

Mr. Speaker, I wish the Members of Congress had the same opinions about these programs as my constituent, who is on the frontline administering the programs we enact here in Washington. I believe more deserving people would be served at less cost to the hard-working taxpayers.

I urge my colleagues to read the interview written by my friend, Bill Williams, the editor of the Gastonia Gazette. Thank you.

MAN ON A "HOT SEAT"

(By Bill Williams)

There is one man in Gaston County who probably has grown accustomed to the hot seat, but then everything is relative. The seat he thought was hot last week might have been cool compared to what it might be next week, or the week after that.

The man's name is Ben Carpenter. He is director of the Gaston County Social Services Department. He has been in that position since April Fool's Day, 1974. He is still trying to figure out who got fooled, himself or the Social Services board.

One day this week, I picked up the phone and without any forewarning to the man on the other end dialed Carpenter's number. I asked if he had 10 minutes, and he said yes. I told him that I wanted to do a column on what it's like to be a Social Services director in a time when social services is not a growth commodity. He said he would answer to the best of his ability and he wouldn't pull his shots.

So, the following is the result of that question-and-answer period.

Q.: What's it like sitting in the hot seat of Social Services director now?

A.: It's kind of frustrating. We are going through a period of uncertainty and there are going to be some cutbacks. We know that. It is frustrating to me to have to let people off. I have never had to do that before. It's unpleasant. I have had to let five service workers go, and that will get me through July, and then we will have to have some other reduction in force, and then more after that. After awhile, it becomes difficult to organize an agency with what you have left. There are caseloads that are not being covered and the staff is pushing for some kind of resolution. I could give a better resolution if I knew what the bottom line was going to be.

Q.: What, in your opinion, is the thrust of President Reagan's social services proposals?

A.: The president is determined to get some control over the bureaucracy, and I support this. He is determined to give to the states certain responsibilities which the federal government has assumed down through the years. This has merit, because if you can get hold of the bureaucracy, you can get hold of the other problems. Red tape takes time from the real job. I ran a survey some time back and found that only 35 percent of the staff's time was going to service. The rest was going to paper work. We have picked that up now to 60-65 percent. We are offering more service without more people. If the amount of red tape could be cut, we could get that up to 80-85 percent without more people. Block grants could do that, depending on what the states would do.

The president is determined, also, because of the election mandate, to reduce the amount of money going into entitlement programs. The whole thrust is to balance the budget and to do that he has to cut into social programs.

Q.: Is there as much cutting back as has been prophesied in the press?

A.: I think that the press has had some statistics that are not exactly right. For instance, some time ago, there was a story that said that 40 percent of the payments to mothers with dependent children would be cut out. That was totally misleading. My personal belief is that this will be no more than 10 percent.

Q.: What is your general philosophy of "Welfare?"

A.: I am a fiscal conservative. Any program ought to be cost effective. The greatest value possible should come from a dollar. There would be some local ability to control what is being done, and that we don't have . . . in terms of caring for dependent children, providing a decent nutritional level, services to foster children and to abused children. I believe in that. But I believe that we have lost the ability to apply on the local level remedies for unusual situations.

As an example: A man called the other day complaining about some young girls who were getting assistance. These girls, he said, were having young men into their homes for ulterior purposes. On the other hand, the man knew of an old lady who couldn't get assistance because her son was living with her and she simply did not meet the standards of eligibility. We have to consider his income with hers.

Q.: What one change would you make in the system if you had your way?

A.: Well, aside from reducing the amount of paperwork, I would make it possible for my staff to have some discretion in making decisions on whether to help or turn down help. We need more authority in emergency situations. I have a $25 million budget, but I can't apply any of that in real emergency situations.

Q.: Is there going to be a significant number of people hurt seriously because of budgetary cutbacks?

A.: There will be a significant number who think they are hurt. We have a $4 million AFDC (Aid to Families with Dependent Children) budget. That will be reduced about $400,000 annually, spreading over 2,000 cases. There will be some cutback in the foodstamp program, and that will hurt some. The administration is trying not to hurt the older-people programs. Whether this will be a significant amount, I have no way of knowing.

Q.: What is the state of "welfare" in Gaston County today? How many are on your rolls?

A.: There are 5,000 on AFDC; 12,000 on food stamps; five or six thousand eligible for Medicaid in any given month; 1,600 service cases (non-financial cases such as those in protective services, adoption, counseling, family planning, etc.) . . . probably between 15,000 and 20,000 people in all—about 10 percent of the county's population. We are spending about $15 million of our $25-million budget on Medicaid. This is growing from 17 to 22 percent annually.

Q.: If there are no significant cutbacks, what will a graph over the next 10 years show?

A.: It would probably show that we would have about the same percentage of population—about 10 percent—and that Medicaid alone would grow to $40 or $50 million in those years. The county's cost would be $10 million as opposed to $1 million now. AFDC would remain about $4 million a year. The staff probably would be about the same.

Q.: If you had your 'druthers,' what would you prescribe for Gaston County's social services efforts during the next 10 years?

A.: The first thing would be a coordinated human services effort. I would consider the total needs of a person in terms of what you can provide to get this family self supporting, to get this person to be a contributing member of society. Second, I would provide institutional care for the person who needs it, the person who is not going to be able to live alone in society, can't meet his or her own needs because of physical or whatever problems. And third, I would institute some system of internal cost-effective auditing. We are externally audited all the time but internally we don't look at the correlation

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

of one part of county government with another. Part of this is because we rely so much on the dollars that come down to us from elsewhere.●

ARTHUR SHULTZ—A TRIBUTE

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. McGRATH. Mr. Speaker, I read with sadness about the death of Arthur Shultz, who passed away on November 2 at the age of 71.

For the last 12 years, Art was a resident of Lynbrook, where he made an invaluable contribution to the lives of all senior citizens in our community.

As the author of "As a Senior Sees It," a weekly newspaper column, Art covered the activities of senior citizens' clubs and organizations in the town of Hempstead, passing along helpful information, advice, and news.

Art was also a member of the Lynbrook Republican Club, the Village Independent Party, the Masonic Order, the Malverne Square Group, the Nathan Hale Senior Citizens Housing Project of Lynbrook, the Valley Stream AARP, and he served as the chairman of the Mayor's Senior Citizen Advisory Board.

He was able to make friends in many areas of life and he used his experiences to help the elderly.

To the end, Art maintained his marvelous sense of humor, as this excerpt from his last column shows:

> Some new suggestions have been bantered about to take the place of "Seniors." The latest that we heard have been: Experienced Persons, Prime Generation, Silver Citizens * * * of course, we could get realistic about the whole thing and admit that we are old and proud of it." ("As A Senior Sees It," Local News, Nov. 7, 1981.)

Art Shultz served as an example for all of us that age need not deter us from productive activity and our zest for living.●

THE 25TH ANNIVERSARY OF THE CITY OF STANTON

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. PATTERSON. Mr. Speaker, it is an honor to invite my colleagues to join me in recognizing the city of Stanton, as it celebrates its 25th anniversary. Stanton is commonly referred to as "the Crossroads to Vacationland" because it is centrally located amidst some of southern California's best known tourist attractions. These include Disneyland, Knott's Berry Farm, the Movieland Wax Museum, and some of the region's most popular beaches. Stanton is a city whose citizens enjoy a smalltown atmosphere within a modern urban setting.

Early in the 19th century, the area which we now know as Stanton was part of Rancho Los Alamitos. In 1834, Rancho Los Alamitos was purchased by California Governor, Jose Figueroa, from Juan Jose Nieto. Figueroa later sold the property to Dan Able Sterns, in 1842. Cattle were bred on Rancho Los Alamitos until 1861, a year in which the beef market suffered from a sharp decline in demand. That same year, a disastrous flood followed by a period of severe drought paralyzed the area. Financial losses forced Sterns to give up Rancho Los Alamitos. The land was later subdivided and sold in the local market.

The Southern Pacific Railroad came into the Stanton area around the turn of the century. The advent of rail service in this region enticed prospective property buyers and new settlers migrated to the area.

In 1911, the city of Anaheim proposed the creation of a sewer farm on a 16-square-mile site which included the Stanton territory. Local ranchers quickly mobilized and with the help of wealthy landowner Phil Stanton, they incorporated their city. The new city was officially named Stanton—probably after Phil Stanton, although no one knows for sure—and its citizens were triumphantly able to prevent the sewer farm from encroaching upon their community.

Stanton was disincorporated in 1924, so that the State might construct roads and make other infrastructural improvements in the area. The town was reincorporated in 1956, by which time the territory that was originally known as Stanton had been subdivided so extensively that the new city consisted of barely more than 3 square miles. The first mayor of the "new" Stanton was Victor Zuniga. Those who served with Mayor Zuniga include Herbert Cook, mayor pro tem; Max Moolick, city clerk; and Councilmen Frank Kohl, Jesse E. Phillips, and Henry Mendez.

In 1957, Stanton was the home of 1,500 residents. Today it is a city of 24,726. The city is currently governed by Mayor Lawrence J. Romagnino and Councilmen Charles J. Rell, mayor pro tem; Frank W. Marshott; Martha V. Weishaupt; and Joseph M. Wheeler. The Stanton city clerk is Lynda Burgess; the city manager is Dr. James Neal; and the assistant manager is Kevin O'Rourke.

Although the "Crossroads to Vacationland" is primarily a residential community, it is home to approximately 350 retail and wholesale businesses. Stanton is certainly a city worthy of your recognition. Mr. Speaker, it is with pleasure that I ask my colleagues to rise with me in wishing the city of Stanton a very happy 25th anniversary.●

BILL TO IMPROVE FISHERY CONSERVATION AND MANAGEMENT

HON. EDWIN B. FORSYTHE

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. FORSYTHE. Mr. Speaker, today Mr. BREAUX and I are introducing a bill which will amend the Fishery Conservation and Management Act of 1976 (FCMA) to provide for a more timely and smoothly functioning fishery management system and to bring the act up to date in light of our experiences during the past several years.

As I have previously stated in the CONGRESSIONAL RECORD, November 4, 5, 9, 1981, the FCMA management system devised in 1976 has become overburdened to the degree that even routine amendments for fishery management plans are taking as long as 23 months to put into place. While I fully support the need to carefully consider what we are doing before we impose regulatory restraints on the fishing industry, it makes no sense to take so long to do anything that the legitimate conservation and management objectives of the FCMA are frustrated and the interests of the fishing industry left unprotected. For this reason, the legislation being introduced today is designed to clarify, simplify, and expedite the implementation of the FCMA and the functioning of the regional fishery management councils created by the act.

One means by which this is accomplished is by setting specific time limits for the Secretary of Commerce to act on management plans and amendments to those plans. The regional fishery management councils should have a reasonable expectation that when they devote so much time to developing management regimes, the Department of Commerce will determine whether the council proposals are consistent with the national standards, the FCMA, and other applicable law in an expeditious manner. The schedule of review times provided for in this legislation will insure that the Department of Commerce has an adequate amount of time to advise the councils of its disapproval of all or part of a council proposal, to inform the council of the reasons therefore, and to give suggestions for improvement. The effective management of natural resources simply cannot be accomplished if bureaucratic procedures delay decisions interminably. Wise management of our natural resources requires timely decisions.

This legislation also deals with another aspect of sound decisionmaking, the identification of the need for and the collection of the necessary data

for conservation and management of our fishery resources. The regional councils have commented on numerous occasions that there is a need for them to be able to collect data in order to determine whether a fishery management plan is needed. This legislation provides that if a council determines that the statistics and other data available to it are insufficient or unreliable for the purposes of determining whether a plan is needed or for preparing a plan, the council may prepare and submit to the Secretary a data collection program for the fishery which sets forth the types of statistics which the council considers necessary and a justification for the need for such data. The Secretary is to review and approve or disapprove each proposed data collection program within 60 days after the date on which it is submitted to him.

Another amendment to the FCMA contained in this legislation provides that if the Secretary of Commerce makes a certification under paragraph (1) of section 8(a) of the Fisherman's Protective Act of 1967, regardless of whether the President directs any action to be taken under paragraph (4) of such section (8)(a) as a result of such certification, then the reduction, or termination, of allocations to a foreign nation are to proceed in accordance with section 201(e)(2)(A) of the FCMA. The reduction, or termination, of allocations under this section is now linked only to whether the nationals of a foreign country, directly or indirectly, are conducting fishing operations or engaging in trade or taking which diminishes the effectiveness of the International Convention for the Regulation of Whaling. The proposed amendment will insure that actions by a foreign nation under such agreements as the International Convention for the High Seas Fisheries of the North Pacific Ocean and the International Convention for the Conservation of Atlantic Tunas could subject a foreign nation to the potential reduction or loss of its allocations as well.

Other provisions of this legislation: First, clarify that conservation and management measures shall prevent overfishing while allowing on a continuing basis the full utilization of optimum yield by the U.S. fishing industry; second, clarify that guidelines established by the Secretary to assist in the development of fishery management plans do not have the effect of law; third, relieve the Secretary of Commerce of the burden of submitting certain reports on the implementation of the FCMA; fourth, specify that the Federal Advisory Committee Act (FACA) does not apply to the regional councils, the councils' scientific and statistical committees, or the councils' advisory panels. The legislation amends the FCMA to establish procedures to insure adequate public notice and full public knowledge of council meetings and operations; fifth, gives the Secretary the authority, pursuant to a council plan requiring the issuance of permits under a limited entry system, to establish fees at levels exceeding administrative costs; sixth, requires that any fishery management plan prepared by a council include draft regulations for implementing the plan. The Secretary must publish the regulations proposed by the council, as well as any suggested revisions and an explanation of why such revisions are necessary. The Secretary is given a specified period of time in which to promulgate final regulations once the management plan is approved. If the Secretary does not publish final regulations within the specified number of days, the regulations proposed by the council will automatically go into effect. Indentical procedures will apply with regard to amendments to a plan; seventh, clarifies that U.S. observers aboard foreign vessels are responsible for carrying out enforcement as well as scientific and other functions necessary or appropriate to carry out the purposes of the act. In addition they will be expected to cooperate in carrying out such other scientific programs relating to the conservation of living resources as the Secretary deems appropriate. Such programs could include, for example, participating in studies relating to seabird mortality in the Japanese high seas salmon fishery in the North Pacific.

As a package, I believe this legislation goes a long way toward dealing with the problems the fishing industry has brought to our attention in recent months. Effective citizen participation in the fishery management process is only possible if citizens are able to see that their participation has a positive impact on their lives and if they perceive that the process is a cooperative arrangement between Government and the people it serves. Enactment of this bill will bring us all closer to what we were seeking when we passed the FCMA in 1976—assurance that the national fishery conservation and management program involves, and is responsive to the needs of, interested and affected states and citizens; promotion of efficiency; full use of Federal, State, and academic capabilities in carrying out research, administration, management, and enforcement; and the establishment of workable and effective procedures which meet the needs of all concerned.●

MUNICIPAL CLERK'S WEEK

HON. HENRY B. GONZALEZ

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. GONZALEZ. Mr. Speaker, today I am reintroducing a resolution which would authorize the President of the United States to proclaim the second week in May starting in 1982 as "National Municipal Clerk's Week." The purpose of this resolution is to recognize and honor on a nationwide basis those who bear the title of municipal clerk. The International Institute of Municipal Clerks, representing thousands of our Nation's most established professional public servants, has endorsed such recognition and has set aside this special week in honor of this group.

As a matter of historical perspective, the municipal clerk goes back to pre-Biblical times. The ancient cities of Greece had their own city secretary who's primary duty was to read aloud official documents. The office of clerk can be traced back to the Middle Ages, where initially, a clerk was any member of a religious order. This was derived from the word "cleric" or "clergyman." Our early American colonists established the office of clerk and it quickly became a way of life.

Mr. Speaker, since the earliest days, municipal clerks have been at the heart of virtually all the official act of local government, bringing together the local residents and their government. The result of this has been the orderly maintenance of public records without which responsive local government could not exist.

At this time I would like to encourage my colleagues to join in with me in recognizing this special week for those special individuals who efficiently serve the principles of local government day after day.●

REAGAN THE "LIBERAL"

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. GINGRICH. Mr. Speaker, to hear the liberal elements in the Democratic Party and the news media tell it, President Reagan's budget cuts are right out of the dark ages. Actually, President Reagan's economic recovery program is more "liberal" than the late President John F. Kennedy's economic policies. And I do not know of anyone who considers JFK to have been a coldhearted reactionary. President Reagan's budget cuts are not near as drastic as critics of his pro-

gram would have the American people believe.

Robert Akerman recently made this point in a column which appeared in the Atlanta Journal of November 9, 1981. Akerman writes:

On balance, the Reagan budget is more liberal than that of the supposed great liberal, John F. Kennedy. Just 20 years ago Kennedy devoted approximately 30 percent of the federal budget to social programs, but Reagan is a "reckless reactionary" because he is trying to cut back to 52 percent.

In short, Akerman's column gives historical perspective to the Reagan budget cuts.

The article follows:

REAGAN A JFK LIBERAL?

Sometimes it takes something from way out in left field to give us a jolt and put things in better perspective.

Not that the Libertarian Review in particular or libertarianism in general is "left" in the Marxist sense; indeed, the socialist welfare state is the very thing that libertarianism is fighting. But, as you will see from what follows, libertarianism is way out in one field or another compared to the political perspective most folks have.

And I think it's good for us to learn how things look from that perspective even if we don't choose to stay that far out in the field for the whole ball game. So I want to share a point made in the farewell issue of Libertarian Review, which is more or less being merged with another publication called Inquiry.

The point is that President Reagan's cuts in social welfare spending are not nearly so drastic a reversal as most people think. Libertarian Review provides some figures that are at least useful as an antidote for the overreaction coming from the liberals at the other extreme of the political spectrum.

For one thing, the publication confirmed the point which I have made, and which Reagan himself has made, that he has not cut the size of the federal government, he has only slowed its rate of increase. It's easy to lose sight of that in all the talk about spending "cuts."

True, because defense spending is being increased (a fact which Libertarian Review deplores), some social programs are actually being reduced. But what Libertarian Review makes clear is that even these cuts are not as severe as the liberals make out, and really seem to believe.

The fact is that "even after the cuts, Reagan will be devoting a greater portion of the federal budget to social spending than did the Kennedy administration." In 1961, the total federal budget was $97.8 billion. Of that, $46.6 billion or roughly 48 percent was devoted to defense. About $29 billion, or 29.8 percent, was devoted to social spending. These percentages remained stable from 1961 through 1963.

But whereas Kennedy devoted 48 percent of the budget to defense, Reagan's 1982 budget would allocate only 27.2 percent to defense—and even after what Libertarian Review calls "his massive military spending spree," the defense portion will reach only 37.6 percent by 1986.

In contrast, social spending will take more than 52 percent of the 1982 Reagan budget compared with that 29.8 percent of the Kennedy era.

The libertarian publication isn't making these points to praise Reagan; on the contrary, they think he's not cutting enough in social welfare spending. Since they believe in a radical reduction in all government programs, they accuse him of being "too moderate." Nonetheless, it is a refreshing way to look at it after all the screaming from the liberals about Reagan's "brutal cuts."

I made the same point myself some time back with regard to one specific example, aid to college students. As much as the cuts may hurt individual families under current conditions, the truth is that what Reagan is trying to cut is a form of aid to middle- and upper-income families that did not exist prior to 1978.

I do not necessarily endorse all of Reagan's cuts—I have commented on individual issues in previous columns. But what occurs to me after considering the criticisms from the libertarian perspective is how quickly we become addicted to federal programs, with entitlements enacted in fairly recent legislation becoming accepted as eternal rights within a matter of a few years—and how quickly we lose perspective as a result of superficial reporting that forgets what happened yesterday.

On balance, the Reagan budget is more liberal than that of the supposed great liberal, John F. Kennedy. Just 20 years ago Kennedy devoted approximately 30 percent of the federal budget to social programs, but Reagan is a "reckless reactionary" because he is trying to cut back to 52 percent. Doesn't that thought shake you up a bit, and at least raise the question of why so many people need so much more government help than they did in Kennedy's day?●

THE MANAGUA FOUR

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LAGOMARSINO. Mr. Speaker, at the time this body was debating the wisdom of sending foreign aid to Nicaragua, those who argued in favor of that aid repeatedly pointed to the private sector's existence in Nicaragua as evidence of the Sandinista regime's commitment to pluralism, that it was not committed to establishing a Marxist regime in that Central American nation.

It must be apparent by now to all those advocates for aid to Nicaragua that any hope for pluralism has been abandoned with the arrest of the four Nicaraguan businessmen who protested the policies of the Government. Both a Wall Street Journal commentary and a Washington Post editorial put into very clear perspective the situation in Nicaragua, and I urge my colleagues to give careful consideration to those thoughts.

I would like to raise only one other point. What does it take to convince skeptics there is a Marxist regime in Nicaragua and the threat of its happening again in El Salvador, Guatemala, or even Mexico, is a very real possibility?

[From the Wall Street Journal, Nov. 4, 1981]

THE MANAGUA FOUR

Central American sources tell us that those four Nicaraguan business leaders the Sandinista police routed out of bed and arrested two weeks ago have been sentenced—to seven months in prison. Their crime: signing a letter to the ruling junta protesting a speech by junta strongman Humberto Ortega threatening to hang dissenters against the government's Marxist-Leninist policies "along the streets and highways of the country."

So far as we can tell, word of the sentencing hasn't filtered out officially. But even if our sources are premature, the human rights of the four, Enrique Dreyfus, Benjamin Lanzas, Gilbert Cuadra and Enrique Bolanos, had already been damaged by their Gestapo-style arrest. And they are by no means the only ones feeling the pressure as the Sandinistas move toward the repressive stage of Marxist-Leninist development. Yet we have heard no outcry whatsoever from the "human rights" lobby in the U.S.

We wonder why this is. Is it because business leaders have no human rights? It should be kept in mind that these particular business leaders actually participated in the revolution against Anastasio Somoza two years ago. Alfonso Robelo, who also signed the letter but who has not yet been arrested, was in the triumphant junta that was formed after the Somoza forces were routed.

Mr. Robelo has not escaped trouble, however. After his four colleagues were arrested a mob of 400 Sandinistas attacked his home, throwing rocks through the windows, scrawling obscenities on the walls and splashing his car with red and black paint. His current whereabouts are unknown.

Mr. Robelo and the four jailed men are members of a private-sector umbrella organization called COSEP, which in the U.S. would be equivalent to the Business Roundtable, NAM, Chamber of Commerce and a variety of trade associations all rolled into one. If you can imagine Ronald Reagan sending Irving Shapiro, Reginald Jones, David Rockefeller and Lee Iacocca to the chain gang you have an idea of what's involved. As we have mentioned before, the junta also is cracking down on the church and the press. The country's one independent newspaper, La Prensa, also once a Somoza foe, has been threatened with permanent closing if it continues to insist on reporting the junta's activities honestly.

The policies the business leaders criticized are no mystery. In addition to threatening to hang opponents, Mr. Ortega has issued a statement saying, "Our revolution has a profoundly anti-imperialist character, deeply revolutionary and rooted in class; we are anti-Yankee; we are opposed to the bourgeoisie; we are guided by scientific doctrine, by Marxism-Leninism." And if that is not enough to get the message across, there is the steady buildup of the Nicaraguan army under the guidance of 1,000 Cubans and the constant inflow of heavy weapons from Communist countries.

Yet while all this was going on, the Sandinistas had the effrontery to send an emissary to Washington to tell Congress and the Washington press that nothing interesting was happening. The emissary, Sandinista international relations secretary Julio Lopez, explained that the arrested businessmen would have to prove their charges (for example, that the government is Marxist-

Leninist) or go to jail. Biggest joke of all, he insisted there were no Cuban troops in Nicaragua.

Of course, there is plenty of precedent for the Sandinistas to believe that Washington will swallow any kind of nonsense. After all, didn't Jimmy Carter sign a statement that the Sandinistas were not fomenting revolution elsewhere—a condition of the aid program voted by Congress—even though there were reports from the field even then that they were aiding guerrillas in El Salvador? Haven't American "human rights" advocates always had a double standard, attacking alleged violations by regimes friendly toward the United States and ignoring any mayhem committed by "anti-Yankee" people like Mr. Ortega? And haven't American banks funneled refinancing to the Sandinistas on the basis of phony promises that the private sector in Nicaragua would be protected?

Among the questions the jailed businessmen asked in their letter were: "What use does it serve to proclaim a mixed economy if you continue to confiscate firms illegally? What use does it serve to proclaim to guarantee a free press if you continue to close the communications media? What use does it serve to proclaim pluralism if you impede political parties from carrying out their meetings, attack them with 'divine' mobs, as you characterize them, in order to seize the country in an excess of chaos and violence?"

What good indeed? Quite obviously to convince liberal Yankees that they are not seeing a repetition of the Cuban march toward tyranny. But even if American human rights defenders are unwilling to believe that, we wonder how they can ignore the fact of the businessman arrests.

[From the Washington Post, Nov. 9, 1981]

TOWARD A POLICE STATE

Yet another long step has been taken toward Cuban-style totalitarianism in Nicaragua. Three business leaders from the private sector have been convicted and sentenced to seven months in prison simply for signing an open letter criticizing official economic policies. A fourth signer arrested with the three was freed. A prominent opposition politician, a former member of the first post-Somoza Sandinista junta, was attacked in his house by a mob.

The reasons for concern over the fate of these men go beyond the evident fact that the attack on them is an attack on economic rationality in a country where the economy is in a calamitous condition, in good measure because of arbitrary interference by an untutored, Marxist-oriented government. In Nicaragua, the private sector has been one of those key independent areas of national life to which Nicaraguans and others could look to see whether the junta intended to honor its pledges of respect for a pluralistic society. Two other key areas, the press and the church, are already under siege.

But there is another consideration. The private sector, by its readiness to seek out a way of coexisting with the junta, has been instrumental in winning for the Sandinistas at least a tentative stamp of approval from the United States and other wary outsiders. The very businessmen who are the junta's most recent victims, for instance, have lobbied in Washington for a resumption of American economic aid. Just the day before the four were arrested on Oct. 21, their complaint about junta mismanagement had been cited in the U.S. Senate as it approved a foreign aid amendment providing $33 million for Nicaragua, all of it intended to be directed to the private sector. For the junta to move against these businessmen can only be taken as an assault on Nicaragua's American tie, frail as it is.

The junta's violation of its citizens' rights has now developed to the point where even those Americans who are otherwise sharply critical of administration policy are increasingly disenchanted with the Sandinistas and increasingly open in their critiques of the junta's domestic policies. As this happens, moreover, signs multiply that Reagan administration officials are getting ever more frustrated at what some of them take to be Nicaragua's important role in funneling arms and perhaps also troops from Cuba to El Salvador. Strictly from its own point of view, this is a strange time for the junta to be reminding Americans that it seems to be becoming a Communist-controlled police state.●

IRISH NATIONAL CAUCUS

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. McGRATH. Mr. Speaker, this Friday, November 20, many Irish Americans from the New York metropolitan area will gather for the annual Irish National Caucus dinner. I would like to take this opportunity to express my support and appreciation to the membership of the Irish National Caucus for their work in promoting human rights in Northern Ireland and seeking an end to the violence that has plagued that area for over a decade.

Contrary to reports published in Washington and other areas of the Nation, the Irish National Caucus has repeatedly condemned all violence in Northern Ireland. The organization utilizes all of its funds within the United States to keep the public informed of ongoing developments in the struggle against oppression of the Catholic minority in Ireland's six northern counties. Just as other organizations keep Members of Congress up to date on human rights issues in other parts of the world, the Irish National Caucus has done an outstanding job of shedding light on human rights violations in Northern Ireland. The caucus faces a rather difficult task because it is monitoring the activities of an ally of the United States which has strong ties to the American press and various business and cultural interests.

As I have asked on many occasions, I hope that all Members of this great body will join me in supporting the work of the Irish American Caucus and all organizations dedicated to preserving respect for freedom and human rights in Northern Ireland and throughout the world.●

DR. HENRY THOMAS YOST, JR.

HON. SILVIO O. CONTE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. CONTE. Mr. Speaker, this Sunday, a very distinguished scholar and constituent of mine passed away in Northampton, Mass. A distinguished biologist, educator, and author, Henry T. Yost, Jr., the president of the American Association of University Professors and Rufus Tyler Lincoln professor of biology at Amherst College, died at the age of 56.

A resident of Amherst, Dr. Yost was born in Baltimore, served in the U.S. Army from 1943 to 1946, and was graduated from the Johns Hopkins University with a bachelor's degree in 1947. After receiving his doctorate in 1951 from Johns Hopkins, Dr. Yost was appointed instructor of biology at Amherst College. In 1951, Dr. Yost also began his career as an active volunteer with the American Association of University Professors (AAUP).

In his three decades of service to the 70,000-member AAUP, Dr. Yost fulfilled two terms on the association's council, was a member of committees on professional ethics and teaching, research, and publications, and from 1973 to 1980 was chair of the AAUP Committee on Government Relations. As committee chair he frequently testified before the U.S. Congress in an effort to advance the welfare of higher education. In June 1980, Dr. Yost was elected 37th president of the 66-year-old AAUP, and on November 12 of this year was honored by the association when a resolution was passed by the AAUP Council establishing the Henry T. Yost faculty fellowships and student internships in higher education.

Author of numerous publications, including the textbook "Cellular Physiology," Dr. Yost coauthored one of the most definitive and highly regarded scientific textbooks, "Science of Genetics." Published in 1976 by Prentice-Hall, "Science of Genetics" was acclaimed by Nature magazine as "the most readable and exciting student text" and as "the best general text on genetics." ASM News stated in its August 1977 issue:

> Out of Amherst College has come a most interesting and stimulating book . . . [Yost] possesses a keen sense of history and a commitment to accuracy and depth.

Dr. Yost was former chairman of the Western Massachusetts Health Planning Council, former chairman of the Valley Health Planning Commission of Western Massachusetts, a member of the science advisory board of the Consumers Union, and member of the executive committee of the Massachusetts PAX. Twice awarded fellowships

to the Chester Beatty Research Institute in London, Dr. Yost was a member of the New York Academy of Sciences and the Radiation Research Society. A 1965 recipient of an honorary master's degree from Amherst College, he was also a member of the Genetics Society of America and the Botanical Society of America.

Dr. Yost is survived by his wife of 33 years, the former Martha Jean Thomas, and a daughter, Brenna Duncan. A memorial service will be scheduled at Amherst College at a later date.●

A FRIENDLIER CLIMATE IN MEXICO

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LAGOMARSINO. Mr. Speaker, in the aftermath of the Cancun Economic Summit Conference, we can be optimistic that cooperation rather than confrontation will mark our relations with both developed and developing nations of the world.

Of particular importance to the United States is a close, cooperative relationship with Mexico. The meetings between the two leaders of Mexico and the United States have demonstrated a growing respect and mutual understanding which will serve as the basis for probably the closest relationship our two nations have ever enjoyed. A report by William Randolph Hearst, Jr., supports this analysis, and I believe it merits the attention of my colleagues:

A FRIENDLIER CLIMATE IN MEXICO

(By William Randolph Hearst Jr.)

MEXICO CITY—Take it from me—a new era of friendlier and more mutually beneficial relations between Mexico and our country is opening up.

This became apparent to me in a nearly hour-long talk this week with President Jose Lopez Portillo, who is being widely acclaimed for his statesmanship in conducting the 22-nation Cancun Summit Conference.

As host and chairman, he is credited with having averted a confrontational crisis between the leaders of the Northern industrialized nations and the Southern so-called Third World—underdeveloped countries.

So, thanks to his skillful diplomacy and our own president's personal magnetism and conciliatory attitude, a measure of success was achieved at Cancun.

President Lopez Portillo told me he thinks the most important achievement was the willingness of the North-South leaders to seek a solution of world economic problems through cooperation rather than confrontation. He feels the conference "opened the door" to a fresh economic approach between the Western industrialized nations and the Third World countries, and believes the "spirit of Cancun will make irreversible" the movement toward establishment of this new international economic order.

Important as all that may be, what impressed me most about the meeting with the dynamic Mexican leader, whose Spanish ancestry dates back four centuries, was how his attitude toward the United States has changed since Ronald Reagan became president. Our relations with Mexico had deterioriated to one of its lowest points under the Carter administration, poisoned by a quarrel over the price of natural gas and what the Mexicans felt was a lack of respect by President Carter for Mexico and President Lopez Portillo. There were numerous irritants on both sides, but what particularly shocked the Mexicans was Carter's reference, during his presidential visit to Mexico City, to an ailment suffered by many visitors here as "Montezuma's revenge." It was true, but hardly diplomatic.

President Reagan moved quickly to remedy relations with Mexico. As president-elect, he met with President Lopez Portillo in the Mexican border town of Juarez. The Mexican president was one of the first foreign leaders to visit the White House after Reagan became president. By treating the proud Mexican with great respect and warmth, telling him "my house is your house," President Reagan quickly won his friendship.

That has led to what President Lopez Portillo told Joe Kingsbury Smith, our National Editor, and me is a "new climate" in relations between our two countries. That new climate was one of the major factors which prompted the Mexican leader to agree in August to sell to our government over a five-year period 109 million barrels of oil for our government's strategic reserve. He did this despite strong opposition from some of the Arab oil producing countries which want to keep America dependent on Middle East oil as a means of influencing American policy toward Israel.

Saudi Arabia flatly refused to sell the Carter administration oil for our strategic reserves, and warned that if its commercial oil sales to the U.S. were diverted to the strategic reserves, it would cut off all supplies.

The most encouraging word we received from President Lopez Portillo was assurance that he may go even further to free us from our virtual bondage to Arab oil producers.

We asked him if America's oil supplies from the Middle East were cut off, would he, as a good neighbor, supply the United States with sufficient oil to meet its basic economic and security needs.

"I do hope we shall never find ourselves in that position," he replied. "But in case we should, Mexico, within the limits of its possibilities, would do everything possible to satisfy America's needs."

That's what I call not only a good neighbor, but a better ally than some of those with whom we are linked and committed to defend in the NATO alliance.

President Lopez Portillo is also striving to play the role of peacemaker in Central America and the Caribbean. He hopes to bring about normalization of relations between Cuba and the United States.

By helping Cuba explore for off-shore oil, he is hoping to make Castro less dependent on the Soviet Union.

"I believe it is quite possible to solve many of the serious problems of Cuba if we can help them discover a sufficient amount of oil," he told us. "By solving those problems, there will be detente in the area. We do not want to link any political ideology to these solutions. This is something we would very much like the American public to understand. We are making extraordinary efforts to create a detente in the area."●

AN IMPROVED APPROACH TO CHARITABLE GIVING

HON. BARBER B. CONABLE, JR.

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. CONABLE. Mr. Speaker, recently I introduced legislation which could result in significantly more contributions to charities without an additional cost to individual donors.

H.R. 4979, and S. 1834 introduced in the other body by Senator MOYNIHAN, reflect an idea which began with Robert Sproull, the president of the University of Rochester. The idea stems from the observation that when a person donates his corporate dividened check to a charity, he receives an income tax deduction for the donation but the corporate tax still has been paid with respect to that dividend amount. This is because a corporation does not receive a deduction for its dividends to shareholders. Therefore, corporate dividends are paid with "after-tax" dollars; that is, after the corporate tax has been paid. Thus, in order for a corporation to pay a shareholder a $100 dividend it must begin with an amount greater than $100, so that it will have $100 left after paying the corporate tax. Since most corporations have a marginal tax rate of 46 percent, they must begin with $185 in gross taxable income in order to have $100 in net after-tax income available for distribution.

The legislation would allow a corporate deduction for dividends which a shareholder directs a corporation to send to a charitable organization. The heart of the proposal embodies a mechanism for allowing the additional deduction only to corporations which match the shareholder's dividend by an amount which reflects the reduced corporate income tax because of the new deduction. Thus, the reduced corporate income tax inures neither to the shareholder nor the corporation, but to the charity. The charity receives an increased contribution in the amount of the reduced corporate tax.

While H.R. 4979 reflects the basic concept, the mechanics of implementing it may require some further attention. I trust that any technical rough edges will be identified and addressed as the bill advances through the legislative process.●

PARTY OR NATION?

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. GINGRICH. Mr. Speaker, the liberal Democratic Party leadership

continues to put petty partisan advantage above the national interest. The liberal Democrats' opposition to bipartisan social security reform was one such example. Another example of their party-before-Nation strategy is now obvious. Liberal Democrats are hoping the recession will cause their political stock to soar—the American worker be damned. We should not forget that liberal Democratic tax-and-spend economic policies caused today's recessionary economy. It is amazing that the liberals' great hope to return to power comes from a recession they caused. This tells us something about the moral and intellectual makeup of American liberalism.

Where are the alternative policies the liberal Democrats would substitute for the Reagan economic recovery program? They have none. What the liberal Democrats do have to offer, as the Wall Street Journal says, is:

A continuation of the tax, tax, tax—spend, spend, spend policies that have seriously weakened the economy and sent inflation and interest rates into double digits.

The liberal wing of the Democratic Party allegedly has a patent on compassion for working Americans. But is it compassionate to favor a recession—which hits working people the hardest—in order to regain political power? Is it compassionate to urge the reintroduction of policies that created economic disaster?

The Wall Street Journal and the Atlanta Journal have editorialized against the liberal Democrats' party-before-Nation strategy. "Tip's Gauntlet" from the Wall Street Journal of October 29, 1981, and "Party or Country?" from the Atlanta Journal of September 22, 1981, expose the liberal Democrats' cruel opportunism.

The editorials follow:

[From the Wall Street Journal, Thursday, Oct. 29, 1981]

TIP'S GAUNTLET

Gloomy economic predictions have put House Speaker Tip O'Neill in a jovial mood this week, no doubt because he is persuaded he has outmaneuvered the President on economic policy. The Speaker told the press, in effect, that the President will have to grovel, confessing that his policies are all wrong, if he wants any help from the Democrats.

We would suggest that the President respond not by groveling but by declaring war. The nation is now entering a recession, which most economists have long warned would be the price of correcting the policies Mr. O'Neill and the like pursued for decades. Mr. Reagan has a policy mix with the hope of both curing inflation and limiting the price of correction. It is by no means clear that these policies will fail. But if they do fail, it will be because the Congress, thanks to the efforts of leaders like Speaker O'Neill, is refusing to bring the federal budget under control.

The Speaker and his henchmen are the nation's economic problem. They are deliberately and cynically undermining the President and his program to protect the institutional power Congress and its leaders have amassed over the last decade. A man who can beam over the prospects of recession and continued inflation is not thinking about the welfare of the country but merely of cutting the President down to size. The O'Neill Democrats fervently hope that the economic program will fail so that they can capitalize at the polls.

The President's attempts to overhaul Washington's old ways have stirred all the Machiavellian instincts of the place. Suddenly big spender Congressmen preach sermons about the looming deficit. An attempt by the administration to reform the school lunch program by making it apply only to poor kids is first undermined by the Congress and the bureaucracy and then turned into a media manipulation exercise by Senate Democrats. The hypocrisy spreads like cancer cells.

Most important of all, he has the American people, and it is evident that they understand the fight in Washington quite well. A new Gallup Poll shows that 64 percent would favor giving the President a right he has requested to veto budget items line by line, versus 24 percent who would be opposed. This would be the most effective way to restore budget control, as has been demonstrated in states where that power exists. Congress will fight every inch of the way against giving the President that power, since it would curtail its own. But if the President took his case to the people and combined that with the use of the crude, bludgeon-type veto power he has now, he might well win. Certainly a full-court press for the item veto would be a precise and effective way to pick up the gauntlet Tip O'Neill is throwing down.

The President cannot afford to let the challenge go unanswered. The Speaker says that until the President admits his policy has failed, the Democrats will offer no alternatives. But everyone knows they have no alternative except a continuation of the tax, tax, tax—spend, spend, spend policies that have seriously weakened the economy and sent inflation and interest rates into double digits. The President, who does have a program, and a good one given the difficulties he inherited, must not let himself be put on the defensive by the likes of these.

And like children who have been warned not to waste water, Congressmen now are taking delight in wrenching the money spigots open again. The Senate voted 87-8 Tuesday for a $7.6 billion Interior Department appropriations bill that was some $1 billion over the target the President set last month.

With the entire Washington community responding as it always does to a President who wants to bring the government under control, the President is not well-equipped with troops. Senate Republicans have deserted him, preferring to duck the hard work of spending cuts and preferring to talk up tax increases. The administration itself shows signs of division and panic, with part jawboning the Fed for easy money and part dropping hints about tax boosts. Thatcherization looms.

But the President is the President, and he is not without weapons. The veto is one, and he should use it liberally in the months ahead even at the risk of delaying the task of rationalizing the government. He certainly ought to be able to get his own officials together to get them speaking with one voice.

[From the Atlanta Journal, Sept. 22, 1981]

PARTY OR COUNTRY?

The response by leading Democrats to the Reagan administration's suggestion that cost-of-living increases in eight benefit programs be deferred next year causes us to wonder whether they view the greater challenge to be rebuilding the party or rebuilding the country.

Leaders, such as House Speaker Tip O'Neill, appear to react with glee to the prospect that a new Democratic constituency is being created by the President. We wonder, therefore, whether Democrats will oppose the deferral plan because they have an alternative, because they honestly believe the delays unnecessary, or because they see the opportunity to recruit disgruntled beneficiaries.

The pool is substantial. The deferrals would affect recipients of such benefits as Supplemental Security Income, black lung, railroad retirement, federal and military and veterans retirement, food stamp and nutrition allowances and Social Security.

Since the election last fall, national Democrats have been groping for an issue on which to rebuild the party. President Reagan appears to have provided it.

Given such an opportunity, it is too much, we suppose, to hope that Democrats weigh program costs and react on the basis of what is in the best interest of the country rather than the party.

Spending for entitlement programs has to be addressed. Democrats will find beneficiaries easy to organize in opposition. If they choose to take the lead role in blocking the President's suggestion, they have a responsibility to the country to offer alternatives.

Opposing these deferrals will provide Democrats a cheap and easy win—but as soon as they do, we expect them to present as alternative plan to contain runaway costs in entitlement programs.●

A TRIBUTE TO JOHN M. THORNE

HON. MARTIN FROST

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. FROST. Mr. Speaker, I rise with sadness to report the passing of John M. Thorne, a resident of Grand Prairie, Tex., and a personal friend. Mr. Thorne was a man of such stature that I feel compelled to call his life to the attention of my colleagues.

A lawyer, civic leader, and coach, John Thorne was unique because he combined his personal and professional dedication in bettering his community. He helped to foster the growth of business and industry in the Dallas-Fort Worth area through his service on the original board of directors of the North Texas Commission. For that service, Thorne received a commendation from the commission for his 10 years of service and was also recognized with an honorary citizen award from both Dallas and Fort Worth.

By helping to found the Grand Prairie Crime Commission, Thorne took a stand in the war on crime. He was a president of the Grand Prairie Chamber of Commerce and received its Citizen of the Year Award for 1978-79. And on September 11, 1981, Thorne was recognized by the Grand Prairie Rotary Club when he was made a Paul Harris Fellow and $1,000 was donated in his name to promote education and service projects.

What was unique about John Thorne, however, was his ability to sustain a high profile in the business community without compromising his commitment to the youth of that community. He put his natural athletic instincts to good use by organizing the Dallas Parochial League, an organization which now sponsors and supervises all athletic competition among Catholic schools in the area diocese. Mr. Thorne also helped start a statewide Catholic high school girls' basketball competition which is now known as the Texas Catholic Interscholastic League.

John Thorne clearly embodied the spirit of voluntarism that is missing in many communities across the country. At a time when the Federal Government is retreating from its commitments to "people programs" it will be to people of John Thorne's talents and personal commitment that we will look to for filling the void.

He will be missed by his many friends and relatives in the Dallas-Fort Worth area. To his wife Lois and his family, I extend my deepest condolences.●

BURNS PAIUTE INDIAN TRIBE

HON. DENNY SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. SMITH of Oregon. Mr. Speaker, I am introducing legislation today that would provide for the designation of the Burns Paiute Indian Tribe as the beneficiary of a public domain allotment in Harney County, Oreg.

This legislation is needed to resolve a matter which occurred when Jesse T. James, a Burns Paiute Indian and sole owner of a 160-acre public domain allotment, died intestate and without legal heirs.

According to Federal law, public domain allotments valued in excess of $2,000 are to escheat to the United States and held in trust for such Indians as the Congress may designate. In the case of Mr. James' allotment, the land is valued in excess of $9,000.

Section 373b of title 25, United States Code, which is the Federal law governing the probate disposition of allotments, has rarely been used, but to prevent the necessity of future legislative action, this bill would provide that any other restricted public domain allotment located in Harney County, Oreg., and held by an Indian allottee who dies intestate and without legal heirs shall also be held in trust by the United States for the Burns Paiute Indian Tribe.

Although this legislation is basically technical in nature, it is very important to the Burns Paiute Indian Tribe. The tribe would like to develop the allotment for agricultural purposes, and by doing so, the tribe hopes to become more economically self-sufficient. I commend the tribe's effort to become more economically independent and would urge expeditious action by Congress on this legislation.●

THE COMMUNICATIONS TECHNICAL AMENDMENTS ACT OF 1981

HON. TIMOTHY E. WIRTH

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. WIRTH. Mr. Speaker, I am today introducing legislation to improve the Federal Communications Commission's effectiveness by making several primarily technical and housekeeping revisions to the Communications Act of 1934. The bill, entitled the Communications Technical Amendments Act of 1981 would, if enacted, reduce the FCC's costs and enable the Commission to better serve the public interest.

The Communications Technical Amendments Act of 1981 is based largely on the "Track I" legislative proposals which the FCC submitted to Congress earlier this year in response to requests from both the House and Senate. Most of the Commission's suggested amendments are merely technical revisions of existing law. The remaining provisions permit the FCC to have greater flexibility in reorganizing staff, in carrying out its duties, and in reducing the amount of unnecessary paperwork. My bill incorporates most of the Track I proposals.

The following is a section-by-section summary of each provision.

SECTION-BY-SECTION SUMMARY

Section 1: Specifies the short title of the bill to be the "Communications Technical Amendments Act of 1981."

Section 2: Modifies overly restrictive prohibitions on FCC Commissioners' and Commission employees' financial interests in companies with communications-related interests. (The existing law forbids Commission employees to own even one share of stock in a company such as Greyhound Buslines, which incidentally owns and operates radios on their transportation vehicles.)

Section 3: Deletes outdated language referring to terms of Commissioners; ties Commissioners' salaries to the Executive Schedule; permits the Commission to locate its main office within two miles of the District of Columbia; permits the Commission to reorganize its staff; gives the Commission the authority to accept reimbursement from sponsors for expenses incurred by Commission employees in attending conventions, conferences, and meetings.

Section 4: Permits the Commission to accept the voluntary and uncompensated services of individuals who hold amateur station operator licenses in the preparation and administration of amateur station operator examinations, and in the detection of violations of the FCC rules governing the amateur radio band. (This proposal would conserve Commission resources by permitting the Commission to use the services of individuals and organizations interested in amateur radio, by bolstering manpower resources available to detect amateur ban violators of the Act and Commission rules.)

Section 5: Permits the Commission to reorganize its bureaus and offices.

Section 6: Clarifies the Commission's jurisdiction over all radio communications. (This proposal would clarify court precedent that radio signals are interstate by their very nature, regardless of particular instances where it might be argued that the radio transmission did not cross state boundaries. Enactment of the amendment would aid the Commission's enforcement efforts against violators in the CB band, which have in some cases successfully defended themselves by arguing that the Commission had not proven that their signal crossed state lines.)

Section 7: Gives the Commission the authority to enter into contracts with private testing laboratories, for type acceptance testing of devices that are capable of emitting radio frequency energy, where the owner or operator of the laboratory does not have a conflict of interest with the device being tested. (This proposal gives the Commission the flexibility to conduct equipment testing through private laboratories, while guarding against conflict of interest problems.)

Section 8: Permits qualified persons who are legally eligible to obtain employment in the United States to obtain radio operator licenses. (This proposal would permit legal aliens to obtain commercial radio operator licenses which are needed for jobs in telecommunications, airline, and other industries. For example, restricted permits for aircraft radio communications are required for aircraft mechanic or baggage handler positions.)

Section 9: Authorizes the suspension of licenses of persons who aid and abet violations of the Communications Act.

Section 10: Brings the Communications Act into compliance with international agreements concerning the licensing of certain aircraft radio stations and operators.

Section 11: Authorizes the Commission to intercept radio communications and to disclose information thereby obtained to federal agencies in an emergency which endangers human life, or to an agency which is charged solely with carrying out a specialized law enforcement function if that agency is already authorized under federal law to intercept radio communications in carrying out such functions; permits the Commission to enter into contracts with such agencies for reimbursement for the services rendered. (In specific instances, the Commission is called upon to provide a service to other Federal agencies by monitoring and intercepting certain radio communications. This proposal would permit the Commission to provide this service within the

constraints of existing law, and to contract with these agencies for reimbursement for the services rendered.)

Section 12: Authorizes the Commission to require the temporary cessation of any regulated radio frequency transmission if such transmission causes electromagnetic interference to any radio communications or electronic equipment and if such interference causes imminent danger to the safety of human life; specifies that the cessation will continue for no more than 60 days without Commission proceedings. (This proposal gives the Commission authority to shut down radio transmission in an emergency endangering human life—e.g., Space Shuttle radio communications interference. If after a 60 day period the interference still has not ceased, the Commission must conduct proceedings before it can continue to require the cessation of the radio transmission.)

Section 13: Increases license terms from 5 to 10 years for non-broadcast licenses; makes the license terms of auxiliary broadcast station licenses—such as remote pickups, studio-transmitter links, and intercity relay transmitters—run concurrently with the main station license terms. (Since auxiliary licenses are contingent upon possession of the main license, they should run concurrently.)

Section 14: Authorizes the Commission to allow the operation of citizens band radio service and radio control service without licenses, if the Commission finds that operation of such services without licenses would serve the public interest, convenience, and necessity. (At present, the Commission's licensing in the CB band is basically a rubber-stamp procedure, albeit at considerable cost to the Commission. Permitting the Commission to de-license this service would remove unnecessary burdens upon the millions of applicants for CB and radio control service licenses and the Commission.)

Section 15: Permits the Commission to limit the grounds for a petition to deny an application for authorization of a nonbroadcast radio station to allegations of electromagnetic interference, except that an allegation of antitrust violation must be considered where there is no other means by which to make such an allegation.

Section 16: Permits the Commission to grant temporary radio operation authorizations for renewable periods of 180 days if extraordinary circumstances require temporary operations in the public interest.

Section 17: Makes consistent the Act's provisions regarding agreements to withdraw competing applications for a construction permit. (This proposal would conform the Act's language in the case of competing applications for construction permits, to that adopted in the Budget Reconciliation Act of 1981 for the case of a license renewal applicant competing with applications for construction permits.

Section 18: Defines the terms "willful" and "repeated" for the purposes of the Act.

Section 19: Deletes obsolete language.

Section 20: Permits the Commission to eliminate construction permit requirements for public coast stations, privately owned fixed microwave stations, or stations licensed to common carriers; for other stations or classes of stations, requires construction permits unless the Commission finds that a waiver of such requirement for a construction permit serves the public interest, convenience, and necessity. (This proposal would permit the elimination of construction permits in those services which it has proven to be an unnecessary administrative and financial burden on the potential entrant and on the Commission.)

Section 21: Deletes section 325 of the Act, which requires a Commission permit in order to export programming for use on a foreign station whose signal can be received in the United States. (This section was enacted in 1934 to control two problems then existing: the broadcast of certain objectionable programs into the United States from Mexican stations and persistant electronic interference from the same source. These problems are no longer of serious concern and, to the extent that they still exist, there are treaties with Mexico, Canada, and other nearby foreign nations which can form the basis for international cooperation. In addition, the section raises serious First Amendment concerns of prior restraint.)

Section 22: Authorizes the Commission to receive assistance from private sector frequency coordinators in the private land mobile and fixed services. (This proposal would provide a statutory basis for present Commission practice.)

Section 23: Shifts the burden of notification of interested parties in licensing cases from the Commission to the appellant; requires the Commission to file the records upon which the order complained of was entered within 40 days, in accordance with the Federal Rules of Appellate Procedure (Rule 17). (This proposal shifts the burden of notification to those who have the easier access to the information of who are the interested parties.)

Section 24: Establishes the time from which certain petitions for review must be filed as the release date of the text of the order, decision, action, or report complained of. (This proposal provides a clear starting time for when an appeal of a Commission order must be filed. It also insures that potential appellants have the benefit of reviewing the official text of the order, decision, or report before the deadline for filing a notice of intent to appeal.)

Section 25: Specifies the effective date of Commission orders to be thirty days from the release of the public notice of the order, unless the Commission designates a different effective date.

Section 26: Clarifies that cable systems are subject to the Commission's forfeiture authority. (This proposal would remove any ambiguity regarding the Commission's forfeiture authority over cable operators. The amendment would also ratify current Commission practice.)

Section 27: Directs the courts to retain illegal radio equipment operated in violation of section 302 or unlicensed equipment wrongly used in violation of section 301, and to thus prevent its continued operation in cases of conviction of such violations. (Illegal or unlicensed radio equipment is often returned to individuals who have been convicted of manufacturing, distributing, or selling such equipment. This proposal would aid in the Commission's enforcement efforts and substantially reduce interference problems experienced by the general public.)

Section 28: Amends section 605 to permit the Commission's use of volunteers in the amateur radio band. (This proposal conforms section 605 to section 4(f)(4) to accommodate the use of volunteer monitoring of the amateur radio band for purposes of detecting violations.)

Section 29: Replaces obsolete language.

Section 30: Extending to FCC employees statutory protection against assaults and death for Federal employees. (Commission employees are sometimes put into dangerous circumstances due to their investigation of unlicensed radio operations by drug smugglers and others. This proposal would afford greater employee protection to the Commission's investigators and inspectors.)●

VETERANS DAY

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. SEIBERLING. Mr. Speaker, last March the House unanimously approved House Joint Resolution 182, designating April 26, 1981, as "National Day of Recognition for Veterans of the Vietnam Era." I was a cosponsor of House Joint Resolution 182, and I joined with my colleagues in commending the contribution and sacrifice made by the men and women who served with our Armed Forces in Vietnam.

I also noted at the time that if there was to be any real meaning behind Vietnam Veterans Recognition Day, Congress would have to take concrete action to address the special problems faced to this day by our Vietnam veterans. Suicide, alcoholism, unemployment, and drug abuse are all problems associated with Vietnam veterans. In 1979, Congress recognized the need for counseling programs tailored to the particular needs associated with service in Vietnam, and authorized the creation of a Vietnam veterans' outreach counseling program. Despite the success of the program, the Reagan administration attempted to terminate it.

I am pleased to note that the 97th Congress has demonstrated its willingness to translate the sentiments expressed in House Joint Resolution 182 into meaningful programs. Last month, Congress cleared legislation which specifically address some of the problems faced by Vietnam veterans. That legislation, H.R. 3499 (Public Law 97-72), extends until September 30, 1984, the readjustment counseling program. Public Law 97-72 also extends through December 31, 1983, the period during which Vietnam-era veterans can use remaining GI bill eligibility to pursue on-the-job training programs, vocational courses, or a high school diploma, and establishes a VA-run small business loan program to provide loans to disabled and Vietnam veterans. Most important, Public Law 97-72 finally makes Vietnam veterans who are suffering from problems linked to the use of the defoliant known as agent orange eligible for Vietnam hospital, nursing home, or outpatient care. This provision will almost certainly help ease the suffering of Vietnam veterans who have faced the agonies of cancer, skin

rashes, and incapacitating headaches, and the heartbreak of parenting deformed children—all problems associated with exposure to agent orange.

An article in today's Washington Post about Veterans Day ceremonies in Washington Highlights both the problems and prospects for Vietnam veterans. Many of the Vietnam veterans described in the article suffered debilitating injuries in Vietnam. All of the members of the Young Veterans Choir, in town to sing on Veterans Day, are suffering from posttraumatic stress syndrome. Yet they have, at last, begun to turn the corner on the problems associated, directly or indirectly, with their service in an unpopular conflict. I hope that Congress will continue to provide our Vietnam veterans with the assistance they need to put the war behind them. The Post article follows these remarks:

[From the Washington Post, Nov. 12, 1981]

FLAGS, MEDALS AND A SOLEMN PLEDGE

VETERANS DAY RITE LAUDS THREE GENERATIONS

(By Peter Perl and Celestine Bohlen)

Wearing the medals of four wars, three generations of veterans gathered before the Tomb of the Unknown Soldier in Arlington National Cemetery yesterday to hear Secretary of Defense Caspar Weinberger pledge that "never again will we ask young men and women to serve in a war we do not intend to win."

"To keep peace with freedom, we must be so strong both in military force and in national will and resolve that no aggressor will choose to strike us or our allies," Weinberger told a crowd of 3,000 flag-waving veterans who gathered under sunny skies on Veterans Day and the 60th anniversary of the dedication of the Tomb of the Unknown Soldier.

In downtown Washington, also at the 11th hour of the 11th day of the 11th month—commemorating the moment of the Armistice that ended World War I—there was a different kind of Veterans Day gathering.

The scars and shattered limbs didn't show beneath their brown choir robes as 54 Vietnam veterans stood in a courtyard off New York Avenue. Neither did their emotional wounds as they began to sing.

The Young Veterans Choir, the members of which all are currently under treatment for post-traumatic stress syndrome at the Veterans Administration hospital in Menlo Park, Calif., came to Washington carrying messages in song and poetry and in reminiscences of a war that they continue reliving and continue escaping.

Most of the nation's 2.7 million Vietnam veterans came home years ago to schools, jobs and families. But these 54 are among those who are still making that journey home. Their message yesterday was that they don't want to carry forever the badge of Vietnam, that they want finally to be considered just as veterans, American sons, brothers and fathers.

"Finally, this is my veterans parade," said Fernando Valdez, 32, a Mexican-born former Army helicopter crew chief from San Diego. "It has been a very long time coming."

On Oct. 3, 1970, Valdez's helicopter was shot down over the central highlands of Vietnam. The crash severed his right arm, shattered his legs and blinded his left eye. He came home with more than 20 combat decorations, but the decade that followed his homecoming was a downward spiral culminating in heroin addiction, federal and state bank robbery convictions, four years in prison and, finally, mental collapse, he said.

Only in the last year, through the group therapy he shares with other troubled young veterans, Valdez said he has turned a corner, kicked drugs and started rebuilding. "I am trying to become an asset rather than a liability or a casualty," he said.

The Young Veterans Choir visit was organized by various veterans groups and by Rep. Tom Lantos (D-Calif.) who represents the hospital's home district. The visit coincided with the opening of an exhibit at Octagon House at 1799 New York Ave. NW, of the designs submitted for the new Vietnam Veterans Memorial, planned for a site on the Mall near the Lincoln Memorial.

The choir sang songs of love and brotherhood, and several veterans recited original poetry about their experiences.

"I am learning how to be a loving father and a loving husband for the first time," said Larry Connolly, a 33-year-old former marine who specialized in flame throwers and rocket assaults. Connolly, who landed in the Menlo Park program only after being turned away from other VA facilities, said he hoped the country would be reminded on Veterans Day of the need for such programs.

Connolly, who carries shrapnel in his legs, said he had grown increasingly paranoid and violent in recent years, slowly stockpiling an arsenal at his Northern California home and eventually accumulating four automatic rifles, a machine gun, a mortar, 200 pounds of explosives and 20,000 rounds of M16 rifle ammunition.

A few months ago, he said, he tried to run down his wife with a truck and then tried to kill himself, he said. His gun misfired.

"I have still been fighting [the war] and I am finally letting it go," Connolly said. "I am trying to become a normal loving American male. . . . I want people to know that."

With the planned construction of the new Vietnam Veterans Memorial, the war and its veterans are moving more firmly into America's official memory. While Vietnam veterans were in a small minority at Arlington yesterday, several veterans leaders said their organizations are seeing a gradual influx of these younger ex-servicemen.

"They're coming out of the so-called Vietnam syndrome," said A. Leo Anderson, chief of Veterans Affairs for the District of Columbia. "They're settling down, getting married, going into debt. They're coming back to reality."

Most of the Vietnam veterans who turned up at Arlington wore civilian garb, avoiding the conscious statement of the veterans organizations. "There are a lot of us around," said Jim Imparato, a 30-year-old Vietnam veteran from Philadelphia who drove here for the ceremonies. "Maybe we just don't want people to know it."

Imparato came to Washington with Max Inglett, 30, who is now in a wheelchair because of spine injuries received in Cambodia. Inglett, a Californian, decided last month to trek across the country, gathering support for a legislative program to prevent future Vietnams.

"He's got a lot of guts," said an admiring Imparato who decided to join Inglett's cause when he saw his fellow veteran on TV. But Imparato said he had always wanted to attend the Arlington ceremonies. "Veterans are veterans," he said. "I don't care which war they were in."

Yesterday, silence—marred only by airplanes passing above—greeted Weinberger, standing in for President Reagan, as he walked up the marble steps with former representative Hamilton Fish (R-N.Y.), 92, to lay a red-white-and-blue wreath at the marble Tomb of the Unknown Soldier.

It was Fish who sponsored the 1921 bill, the last signed by Woodrow Wilson, to bring home an unknown soldier from the battlefields of World War I. Thirty seven years later, two more soldiers—their names "known but to God"—were buried in the marble tomb, honoring the dead of World II and the Korean War.

Yesterday, Neil Keltner, national commander of the Legion of Honor, which hosted the Arlington ceremonies, said a fourth soldier should be buried at the crypt in Arlington, one honoring the dead and missing from America's most recent war.

At about the same time, the Young Veterans Choir was singing its final song, "Blowing in the Wind," with its final question:

"How many deaths will it take till we know

"That too many people have died?"●

ISMET DELETIOGLU—A TRUE AMERICAN GIVES THANKS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. SOLARZ. Mr. Speaker, as Thanksgiving approaches, I would like to pay tribute to a remarkable and generous Turkish American, Ismet Deletioglu, who each year opens his restaurants in Chicago to thousands of people who otherwise would spend this holiday alone and hungry.

This Thanksgiving will be the sixth that Mr. Deletioglu has hosted the poor, the elderly, and the forgotten of the Chicago area to a complete traditional turkey dinner in his restaurants. He and his family and friends will work to prepare and serve the meal to all who respond to his invitation.

For Ismet Deletioglu knows all too well the problems of loneliness, poverty, and hunger. One of seven children, he was orphaned at the age of 10, and went to work to support himself at any jobs he could find in his poor Turkish fishing village.

Matt was able to reach the United States 14 years ago, penniless and alone. Like many immigrants, he struggled to learn the language and customs of his adopted country. Working as many as three jobs at a time, he scrimped and saved, but finally he was able to open his own restaurant, the French Port. His business prospered, and he opened another restaurant.

But he wanted to share his good fortune with others, particularly at the holidays. He remembered the ancient Turkish custom where the wealthy open their homes to feed the poor 1 day a year and decided to open his

Chicago restaurant to feed the poor on Thanksgiving.

Explaining why he has continued this tradition and why he chooses to spend his holiday feeding the lonely and hungry, Matt replies:

I think people should care * * * What we do, we do from the heart. Not for publicity or money. Just from the heart * * *

This year, in tribute to the compassion, commitment, and warmhearted generosity of this "new" American, the Daughters of the American Revolution awarded Matt the DAR Americanism Medal. This award, which symbolizes the best of our American traditions, is a fitting tribute for this energetic and active man.

Matt Deletioglu is a credit to our Nation, an authentic patriot who has prospered through hard work and dedication while enriching our society with the best of his old culture and traditions.

I am proud to count Matt Deletioglu among my friends and to have the opportunity today to recognize his contributions to our great country and pay tribute here in the Congress to his efforts to help thousands of our less fortunate citizens experience a warm and memorable Thanksgiving.●

MIRACLE WORKER

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. IRELAND. Mr. Speaker, Frostproof, Fla., has produced its own version of the miracle worker recently, and I had the pleasure of spending some time with him in Washington last week.

Daniel Johnston, a 17-year-old Frostproof student was in Washington to receive an award for his achievement in developing a computer program designed to teach sign language to the hearing impaired, or teachers of the hearing impaired.

I had heard about Daniel from several proud members of his community, as they tracked his success story through the regional competition in Atlanta for inventors of aids for the handicapped, and on to Washington as one of the Nation's leading finalists in competition sponsored by the National Academy of the Sciences.

Needless to say, I was very proud to have a resident of the Eighth Congressional District achieve this high honor. It illustrates quite clearly, I believe, that much of this country's greatest innovations and research comes from individuals, like Daniel, working for their own personal fulfillment, either on their own or within their small businesses.

Daniel's success is also linked to the helping hands he received in Polk County. After quickly exceeding the capabilities of the machinery at his high school, nearby Webber College extended the use of their computer equipment, as well as the advice and counsel of Dr. Al Strictland. A local doctor learned of Daniel's talent and limited resources for computer equipment, and offered a loan to enable him to purchase necessary supplies to complete his research.

Dr. Fred Lenfesty, president of Polk Community College is looking forward to having Daniel pursue his college career there, and has provided much encouragement to him for his future studies in this exciting field.

The display of support and enthusiasm for Daniel and his project is remarkable, and, I think, one of the nicest aspects of his victory.

His talent and the helping hands of his community provided Daniel Johnston with the opportunity to be a miracle worker in his own right.●

EXECUTIVE DISSENT—AGAINST THE BUDGET CUTS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. RODINO. Mr. Speaker, last week, J. Richard Munro, president of Time, Inc., addressed the Union League Club of New York about the folly, the unfairness and the shortsightedness of the Reagan administration's actual and planned cuts in social spending, while the Reagan tax cuts benefit mostly higher income people.

In excerpts from that speech printed last Sunday in the New York Times, Mr. Munro also criticized the administration's retreat from civil rights enforcement and from safety, health, consumer, and environmental protections.

It is clear from Mr. Munro's remarks that at least one corporate executive is deeply concerned about the effects of the Reagan economic program on the future of not only the truly needy but all members of our society.

The Times article follows:

[From the New York Times, Nov. 15, 1981]

EXECUTIVE DISSENT—AGAINST THE BUDGET CUTS

(By J. Richard Munro)

I know that business executives are not supposed to disapprove of the Administration's spending program. Polls show support among us hovering around 90 percent. That's a phenomenal vote of confidence. I support the new policies that promote growth, new investment and greater productivity.

Yet, in the rush to fight inflation and stimulate investment, I fear that we have cut too deeply, that we have put too high a burden on the poor and elderly, and that we are jeopardizing the long-term goals of this program and the interests of business.

I am especially concerned about the cuts in social spending. They have gone too far, too fast. And too few of us understand their impact.

Most of us probably have found comfort in the notion that the cuts were marginal and that the cuts fall equally on everyone. The cuts are anything but evenhanded, and the effects are far from marginal as the numbers show. About 70 percent of the 1982 cuts now in place come from programs affecting the poor.

You can go down the line—education at all levels, jobs and training programs, Medicaid, housing aid, food stamps, school nutrition, support for poor families with children, energy assistance, unemployment insurance, and numerous other social services. Every one of these received major spending cuts, adding up to $25 billion of the $35 billion total cut from the budget this summer.

That doesn't include $13 billion in more cuts just proposed, and the $100 billion in cuts projected for 1984. Although those cuts are mostly unspecified, programs for the poor will again be on the chopping block.

Combined with tax cuts that benefit mostly higher-income people, this program adds up to a major redistribution of money in our society, from the lower end to the upper end of the scale.

Despite Administration assurances, the truly needy will have to cut back family budgets that simply can't be stretched any more.

The truly needy include the elderly and disabled poor. But the group that concerns me most is children, in families headed by a woman.

One out of 6 of all American children, about 10 million, lives in poverty today. One out of 4 of all children will need welfare support at some time before growing up. About one out of 6 of all children has no regular source of medical care. One out of 3 has never seen a dentist. Among black children, 2 out of 5 are poor.

Under the new budget, they are losing a little here and a little there, not too much taken one by one. But when the losses total several hundred dollars this year per family with even greater losses next year and the next, that will have a great impact.

We should also be concerned about the many social services, Government and privately run, being cut severely under this budget. In Fairfield County, my wife and I are active in the Juvenile Diabetes Foundation. It is just been hit by Federal budget cuts that sharply reduce its research program. Actually, I think we can probably raise money locally to replace some of the loss. But what about similar organizations with no access to corporate contributions or well funded local governments?

Let me sum up. The budget cuts are leaving serious and immediate human needs unmet. And if the budget cuts continue as scheduled, the problems of the poor will worsen intolerably. As business executives, I do not think we should stand by and let this happen.

On a practical level, let's consider the opportunity cost of letting the cuts go through. This year, we have the chance to restore business incentives for greater investment. The President, the Congress, and, most important, the public are behind us. Yet, this public support will vanish if the burdens of this program remain so uneven, and if the promised surge of prosperity pays off only for those already well off.

While we can talk about the need for patience until the long-term benefits arrive,

the next election is a year away—close to the bottom of what appears to be a deep recession—at the very time the budget cuts put more holes in the "safety net" for people.

Also, while the economy declines, safety, health, consumer and environmental protections are weakening; civil rights enforcement is taking a giant step backward, and the share of taxes paid by corporations drops significantly.

That's not a scenario designed to build confidence in the current program. Consequently, in the next election, people may decide that they're not getting the changes they really wanted. And it'll be another generation before we get a similar chance to enact business incentives.

George Will wrote in a recent column that programs like Social Security spring from Americans' acceptance of "the ethic of common provision." He went on to say that President Reagan "must convince Americans that his conservatism is compatible with that ethic."

Let's consider the economic effects. Remember that in a few years, the children of today will be our employees, adding, we hope, to our bottom line. Because of the end of the baby boom, there will be far fewer of them available. And we can already read projections of labor shortages later in this decade, especially in skilled labor. Budget cuts in training and education will worsen that problem.

Consider also Social Security: There are three workers today for every beneficiary. In 30 years, there will be two, when the children of today should be in their prime working years.

Out of economic necessity, we can't afford to let the productive potential of any of today's children languish because of our neglect.

More than ever, they are vital to our future, and we should help them get the best possible start in life. That means good schools, good nutrition, health care, housing, stable homes.

Yet, we're moving in the opposite direction now and in the foreseeable future. That disturbs me, and I think it should disturb you.●

RESOLUTION NO. 33028

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. AuCOIN. Mr. Speaker, I am today presenting, for inclusion in the RECORD, a copy of a resolution passed by the Portland City Council concerning waterway user fees.

The action taken by the Portland City Council represents a viewpoint that nearly every Oregonian understands. The administration's plan to impose fees on users of the inland waterway system was proposed without consideration of the impact of the fee on competing modes of transportation. The effect of this action on America's inland ports would be devastating.

To impose this tax on Oregon would be particularly destructive since it already is suffering from one of the highest unemployment rates in the country. Oregon's timber industry is already in the worst shape since the 1930's. This condition has been made worse by the fiscal and monetary policies advocated by this administration.

I commend this resolution to you Mr. Speaker, as an expression of what knowledgeable and thoughtful Oregonians are saying about this grossly inequitable proposal. Oregonians, regardless of political persuasion, stand united in their opposition to this move.

RESOLUTION NO. 33028

Whereas, waterborne commerce has historically played a dominant role in the economy of Portland and Oregon; and

Whereas, Portland is the leading export port on the United States West Coast and thus contributes substantially to the United States' balance of trade; and

Whereas, the Portland area has long been the sponsor of the annual navigation channel dredging by the Corps of Engineers; and

Whereas, the costs of this dredging have been more than offset by the consequent revenues generated to the regional and national economies; and

Whereas, the Columbia/Snake River system has benefited not only the economies of communities in both states bordering the Columbia River, Oregon and Washington, but also a number of landlocked hinterland states; and

Whereas, the imposition of the segmented waterway user fees proposed by the Administration would severely jeopardize the competitiveness of Portland as a seaport; and

Whereas, the imposition of segmented user fees will inhibit the full development and utilization of the Columbia-Snake River slack water lock and dam system: Therefore be it *Resolved,* By the City Council of the City of Portland, Oregon:

One, that Congress reject legislation having the port-specific user charges;

Two, that Congress not adopt any type of user charge legislation pending completion of the Section 205 study as well as additional studies on the impact of proposed legislation on the port system in the United States;

Three, that, if user charge legislation is adopted it assess charges on a uniform basis, as contained in the legislation introduced by Senator Mark O. Hatfield of Oregon; and

Four, that a copy of this memorial be sent to the President of the United States, the Secretary of Transportation, the Director of OMB, and each member of the Oregon Congressional delegation to emphasize our belief that budget balancing at the cost of this Nation's transportation system would be a grave danger to local economies and to the economy of the United States as a whole.

Adopted by the Council November 12, 1981.

GEORGE YERHOVICH,
Auditor of the City of Portland.●

W. AVERELL HARRIMAN: A MONUMENT TO DEMOCRACY

HON. LEO C. ZEFERETTI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. ZEFERETTI. Mr. Speaker, I am proud to have this opportunity to join with my colleagues in paying tribute to W. Averell Harriman.

One wonders how any man could have crowded so much useful and dramatic activity into a single lifetime. He has managed to combine longevity with youthfulness, wisdom with exuberance, and good fortune with an extraordinary sense of public responsibility. His astounding record of getting what he goes after is matched only by his passion for excelling. Among his chief qualities are a dogged determination and a singleness of purpose until the objective has been achieved.

Any President, knowing 10 years in advance that he would need a personal White House staff chief on international affairs, could not have designed a range of experience more germane than the one W. Averell Harriman has completed in his career. No other American has, over the years, been so intimately and continuously involved in so many major decisions and milestones in American foreign policy. No other has participated in so many of the first history-making conferences.

Very few men possess W. Averell Harriman's wealth of experience and breadth of knowledge. His vitality and vigor are a source of amazement to his contemporaries. He is a unique man in American history and is one of the truly great men of our times. He has brought to his multitudinous responsibilities above all else a quality of Yankee shrewdness and realism—an invaluable astringent. Perhaps more clearly than anyone else, he recognized the character and conditions of the cold war with the Russians under Stalin.

The experience of W. Averell Harriman now add up to establish him as the leading "Kremlinologist" of our time. He has spent more time in direct consultation with Stalin, Khrushchev, Molotov, Dobrynin, Brezhnev, and other leaders of Communist Russia, living or dead, than any other American official. He was U.S. Ambassador to the Soviet Union from 1943 to 1946, a period that bridged the end of World War II and the outset of the cold war. He accompanied President Roosevelt to the conferences with Churchill and Stalin at Teheran and Yalta, and went with Truman to Potsdam. He also served as the European field manager for the Marshall plan, the most successful roadblock ever erected against Communist imperialism.

W. Averell Harriman, who turned 90 last week, is proving to be one of the most remarkable monuments to democracy this Nation has produced, far more durable and unchanging than most other national landmarks. While he has been serving this Government, even the U.S. Capitol, the veritable symbol of the Republic, has been pushed forward 32½ feet and given a new face. W. Averell Harriman is more

than a national monument. He is a living symbol of the relative constancy of American foreign policy over the last five decades.

In paying tribute to this fine gentleman, I merely want to add my personal best wishes for continued health and happiness in the years ahead.●

THE CRUSADING CORRIGANS, FATHER AND SON

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Ms. OAKAR. Mr. Speaker, cities have institutions and most institutions have traditions. John T. Corrigan, prosecuting attorney of Cuyahoga County for the past quarter of a century is, indeed, one of those institutions. And it appears as if his son, Michael Corrigan, may one day carry out what has become a tradition in our county.

John T. Corrigan's intellectual honesty and professional integrity are beyond reproach. He has maintained an order recognized in our community and one that ideally should be emulated across our Nation.

[From the Cleveland Plain Dealer, Nov. 16, 1981]

THE CRUSADING CORRIGANS, FATHER AND SON

(By Thomas S. Andrzejewski)

The timbre of their voices is alike—a sonorous, no-nonsense delivery. If the ceiling of the Sistine Chapel could talk, it would sound either like John Thomas Corrigan or his son, Michael John Corrigan.

The Corrigans are county prosecutors. John the father, 58, has been Cuyahoga County prosecutor almost as long as most adults can remember, since 1957. Michael the son, 32, is one of his 110 assistants, albeit one who has had a goodly share of the more publicized, so-called "newspaper cases."

Other prosecutors have been known to imitate the John T. delivery that is genetically Michael's. It is as if the sparkling-clear, straightforward-sounding resonance has some magic that wins cases and assigns you to the side of righteousness—without preaching, just with logical, orderly recitation of the facts that on first listening, at least, slams shut a steel trap on any alibi.

It is no surprise the Corrigans sound like that. Both apparently think like that—so much so that the animosities against John T. are there for Michael to deal with. He has been called a moralist, racist and persecutor.

But it is likewise true that the respect for the legal acumen of the father—and for his honesty, idealism and crusade for strong beliefs about justice—is slowly attaching itself to the son.

Michael was graduated with honors from Boston College after a four-year football scholarship. He worked several years as a construction laborer. The combination left him educated and able to deal with people on several social levels, much like his father, a World War II infantry sergeant and the son of a Cleveland policeman.

Michael may be cut from the same bolt, but the weave and pattern of the fabric don't always go in the same directions.

"I've never tried to imitate my father," said Michael in an interview. "I emulate my father to a certain extent. I don't intend on attempting to fill his shoes. I think I am my own person.

"I think we're substantially different. My father was raised in a time era where you could become an adult and still be idealistic. I'm raised in a time era when it's very difficult to become an idealist, so you become a realist very quickly."

Court-watchers soon will be treated to three novel events. One is that John T. himself will try a case, the first in 11 years. Second, Michael will try it with him.

Third, father and son, both strongly in favor of the death penalty as punishment and deterrent, will be trying the first capital punishment case here under Ohio's new and untested death penalty. It is against two men accused of shooting Cleveland Patrolman Anthony J. Johnson to death following a bank robbery Oct. 21.

"I look forward to trying this case with my father, there's no question about that," said Michael. "But this case is more important to me, probably not because of my father, but because it involves the killing of a police officer.

"I've been blessed with a lot of good cases, and there's no question, many of them I've gotten as a result of my relationship with the boss."

John T. (he is routinely referred to by his middle initial, to distinguish him from the other John Corrigans in public office) is almost a living legend as the long-time reigning prosecutor. It is taken for granted that the reign is becoming a dynasty, and Michael is heir apparent.

Michael has joked with acquaintances about how one would go about getting a job with the prosecutor's office.

"First you have to go to St. Ignatius and be Irish. And it helps if your father's the county prosecutor," he has been quoted as saying.

John T. is mostly predictable, usually respected although not always liked. The dislike comes about because he sticks to a rigidly conservative point of view.

That has put him at odds with obstreperous young (and sometimes older) lawyers of the liberal bent, judges experimenting with creative sentencing, well-meaning reformists and just about anyone who would give the accused an inch of leeway when Corrigan is convinced there is a mile of evidence against him.

His prosecutions in several cases involving black defendants—ranging from self-styled Black Panthers to con men to Cleveland councilmen—have raised charges of unequal treatment and insensitivity to racial issues.

Corrigan has staunchly responded to such charges that he must pursue prosecution when a crime is committed, and he personally believes he has done so without regard to race or any other extralegal factor.

He has three more years in his current term, and expects to run once more. Neither John T. nor Michael says Michael will be the successor. John T. says it is up to Michael if he cares to pursue a political career; Michael says simply that he always will want to remain a prosecutor.

Unlike his father, he is sometimes rowdy and a prankster compared to the image of the dignified, strait-laced John T. Michael has a propensity to get into an occasional beef with a defense lawyer that might become loud and mean—and to have embarrassing, out-of-court contacts with law enforcement agents.

Last summer he sideswiped a Westlake police car because, he said, he was distracted by his overheated engine indicator light. He said he did not contest a ticket for failing to keep an assured clear distance.

Two years before he joined the prosecutor's office in 1974, he was pinched on Public Square while sitting in his pickup truck, wearing a pirate's mask outside a bank.

Police were called—ironically by his girlfriend, a bank employe, for whom he was waiting. She had been told of a suspicious person outside. He was released after police established his identity as someone other than a bank heist artist.

The mask may not have charmed his girlfriend—as he intended—as much as the live turkey he leashed to the door of her parents' Bay Village home. Michael had a date with another girl, he explained, and needed somewhere to drop off the bird.

Three years ago, Michael was married. He and his wife, Cathe (he would not say what jokes he has played on her) have a son, 2, and are expecting another child.

All this is not to say that John T. is a super-straight, humorless, uninteresting defender of society's rights.

True, he appeared for years in navy blue suits, tailored at the place policemen have their uniforms made, and white starched shirts. In recent years he's given in to pastel shirts and lighter suits.

But he always has beamed a charming smile, sometimes looking like a husky, 6-foot-2 pixie when joking around. To many old-timers he's just Jack Corrigan, a proper but fun-loving Irishman, who with the boys can be as salty as they come.

His office always has been loaded with wholesome-looking, ageless, pleasant female secretaries. On one occasion, Gentleman Jack excoriated a newsman vigorously enough to burn some ears and redden some faces during a discussion of matters ranging from the honesty of his assistants to racial policies of Cleveland policemen—topics known to bristle him even when he is in the best of humor.

Michael is trying to nurture the kinds of good working relationships his father has with police. Michael is not a desk-bound prosecutor, often working the field with investigating officers.

"In my seven years here, I never, ever tried a case in which I wasn't thoroughly convinced the party was guilty," said Michael. "I never will."

Michael has gathered about him a coterie of a half-dozen other assistants that, according to some of his colleagues, former colleagues and defense lawyers, has become the ruling clique of the prosecutor's office. Others chalk up the friendships to human chemistry.

Michael has four sisters. One, Margaret, is on maternity leave from her job as an assistant district attorney in Boston.

John T. said one family event would thrill him more than trying a case with his son. That would be deputizing his daughter as an assistant county prosecutor, and watching her and Michael try one together.●

PRESERVING VOTING RIGHTS

HON. PETER W. RODINO, JR.

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. RODINO. Mr. Speaker, those of us who have fought over the years for the preservation of the Voting Rights Act can be encouraged that President Reagan has announced that he is now firmly committed to protect what he aptly termed "The crown jewel of American liberties."

While he stopped short of full support of the voting rights legislation recently passed by the House with spectacular bipartisan backing, he expressed a willingness to carry on a discussion of those issues on which we may differ. It is important to note, however, that he unequivocally endorsed extension of the act for 10 years "to protect all our citizens" and continuance of the bilingual ballot provisions in the manner voted by the House.

He disagrees with the "bailout" provisions written into the legislation and with the section 2 amendment regarding the proof required for voting rights suits to succeed.

But the President has wisely altered his original views on the Voting Rights Act.

Therefore, in the course of the dialog the President has invited, I do not think it should be difficult to convince him of the correctness of the actions we have taken on these issues. The "bailout" standards we have set are reasonable—demanding, yes, but reasonable in that they provide incentive and opportunity for jurisdictions to comply with the law and escape preclearance.

The section 2 amendment to which he objects merely reflects what legislative history shows the Congress always intended: That proof in a voting rights suit could rest on either discriminatory result or purpose; that success in a constitutional lawsuit should not rest on how well local officials might have covered their tracks; that this amendment will simply make section 2 comport with the language in section 5, the preclearance section. Our bill is sound, just, and necessary to protect the "most sacred right of free men and women"—to use the President's words. He should now employ the enormous prestige of his office and his proved personal powers of persuasion once again in the Senate to secure passage there of the most successful Civil Rights Act in our history.●

OUR FUTURE—AND THE ENERGY WE NEED: DR. HANS OSBORG SPEAKS OUT

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, I believe that the greatest aspect of the energy crisis over the years has been the crisis of stagnation. We have weathered oil shortages, gas lines, price chaos, and lagging productivity; but we have seen little in the way of constructive planning for the future. The real crisis is the crisis of neglect. The debate on energy has been bereft of solid ideas on how to go forth into the 21st century with a new set of energy sources. Pretending that current sources will remain adequate is wishful thinking; thinking that mere conservation will help us to limp through the next 50 years is a dangerous pipedream.

Dr. Hans Osborg is a noted chemist and metallurgist from Port Washington, N.Y. I recently met with Dr. Osborg, and he offered me a concise and cogent memorandum on the advisability of methanol use. His ideas, aside from being lucid and easily understood by laymen, are forceful and constructive. In short, Dr. Osborg believes that the use of methanol as a multidimensional energy source is a profitable and valuable way to proceed.

I would like to share with you a memo on methanol and its proposed myriad uses that Dr. Osborg recently sent me:

MEMORANDUM

To: Congressman LeBoutillier.
From: Hans Osborg.
Subject: A simple approach, regarding as sound, for the relief of the energy crisis.

In the course of my thirty years of trailblazing in chemical energy, including military, commercial, and industrial applications, certain conclusions concerning basic policies and goals have become self-evident:

Chemical energy must become available domestically in unlimited quantities and at relatively low costs.

In the past, most energy has been generated through the burning of hydro-carbon products such as oils and natural gas. However, only 45 percent of the U.S. hydrocarbon requirements can be obtained from hydro-carbons available within the U.S.

Petroleum products are essential and irreplaceable raw materials for chemical industry, providing products necessary for industry, commerce, and civilian consumption. It is, therefore, unintelligent, if not inexcusable, to burn petroleum products and natural gas.

Available knowledge in science and technology teaches that energy can be conveniently and economically generated from domestic raw materials such as coal and shale.

However, the burning of coal can be regarded as only a temporary expedient, as its combustion dangerously contaminates the atmosphere with carbon dioxide, leading to the well-understood "greenhouse effect". It is, therefore, essential to convert coal into products more suitable for energy generation.

Stationary power plants, as well as motive energy, can be adequately supplied through the use of Methanol, made from coal or natural gas. Methanol can be burned in stationary power plants. This will automatically minimize the formation of carbon dioxide.

For automotive use, the application of Methanol as a fuel is well enough understood to prove that it can become one of the, if not the, dominant fuels of the future. However, use of 100 percent Methanol is possible only if automobile engines are modified drastically. With 150 million (or more) engines in daily use, this is a task which will require a longer period of time than we have available.

Straight Methanol can become a relatively inexpensive and abundant fuel for automotive propulsion in about fifteen to twenty years.

In the interest of national security, the first practical target should be the replacement of about one third of the gasoline with Methanol. In this manner, the U.S. would become independent of imported oils and eliminate its negative trade balance.

The solubility of Methanol in gasoline is presently limited to 10 percent of Methanol. Miscibility can be increased by certain proprietary Additives of domestic origin. It has been established that up to about 30 percent of Methanol can be added to gasoline without separation with the help of small percentages of such Additives.

In addition to the technological advantages and the beneficial effect on the U.S. trade balance, the proposed Methanol/gasoline fuel mixture will make it possible to provide automotive fuels at a lower cost than gasolines, whether derived from oil or coal.

A lower cost fuel, abundantly available, will contribute materially to the recovery of the American automobile industry and allow Americans to live the life they are accustomed to instead of accepting conditions dominating life in Japan and Europe.

The shrinking of car size and the increase in mileage per gallon are but two factors which, by themselves, are insufficient to restore American automobile industry. A cheaper fuel will also make it possible to manufacture cars suitable for family use and vacations, thus reviving the tourist industry and providing more adequate funds for maintenance of our highway system.

The use of Methanol is known to minimize pollution. The introduction of the Methanol-gasoline mixture will obviate the converter. (The introduction of the converter is in reality an admission of failure to think logically: change of fuel makes more sense than correction of inadequate combustion.)

The converter has produced its own evils:

It increases gasoline consumption;

It consumes valuable chemicals which are essential as catalysts in many chemical processes;

It has a limited lifetime.

Once the 30 percent Methanol/gasoline mixture has been established, further increases in Methanol will become possible.

The project discussed herein has been conducted, under my sponsorship, by the Franklin Institute Research Laboratories in Philadelphia. All of the funding has been private, without any expectation of government support. The next step of the project requires further funding, which is now

being discussed with selected leading industrial companies.

It would be very helpful to continue this project at an accelerated pace if the proper agencies in Washington, or Congress itself, would wish to take a position in support of our approach.

HANS OSBORG.

PORT WASHINGTON, NY., *September 1981.*●

WWNC—AMERICA'S NO. 1 RADIO STATION

HON. BILL HENDON

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. HENDON. Mr. Speaker, for the third consecutive year, radio station WWNC in Asheville, N.C., has been rated the No. 1 station in the United States.

Based on the national Arbitron ratings, WWNC commands a 39.3 percent share of the radio market which includes western North Carolina and portions of eastern Tennessee and northeastern South Carolina. That is a larger share than any of the nearly 9,000 other licensed radio stations in the Nation and it comes against competition from 14 other fine stations which serve the western North Carolina broadcast area.

I am pleased to congratulate General Manager Sheldon Summerlin, Sales Coordinator Billy Curran and disc jockeys Randy Houston, Fred Brown, Scotty Rhodarmer, and Wiley Carpenter on their great accomplishment.

The following is an article which recently appeared in the Asheville Citizen, explaining the achievement of WWNC. I commend it to the attention of my colleagues.

[From the Asheville Citizen, Aug. 21, 1981]

WWNC RADIO STATION RATES NO. 1 FOR THIRD YEAR IN ROW

(By Merianne Epstein)

WWNC Radio in Asheville has been rated the number one station in the United States for the third year in a row.

Scotty Rhodarmer, WWNC's 5:30 a.m. to 10 a.m. announcer, was rated the number one announcer in the country for the third straight year.

The ratings were done by Arbitron, a national firm that measures radio and television audiences. No radio station has been rated number one three years in a row. In fact, WWNC was the first radio station to get the top rating for two years running.

"This is not a glamour award," said Sheldon Summerlin, station general manager and vice president. "We've come in first and there are close to 9,000 licensed radio stations in the country."

The number-one rating is based on the share of a listening audience that a radio station obtains. According to Summerlin, there are 14 stations competing for the biggest share of the audience within WWNC's broadcast area.

"Think of the shares as a piece of pie," Summerlin said. "We have 39.3 percent of the pie, which is the largest share of any radio station in the nation.

"The first time we were rated number one was in 1979 and it was the first time a country station had gotten number one. That in itself was an achievement," he said.

"Last year it happened for the second year in a row. No station in the history of Arbitron—which started in the early 1950s—had gotten it two years in a row."

Achieving the number-one rating for the third year in a row means that WWNC isn't "just a flash in the pan or a fluke," according to Summerlin. "It means we've established ourselves as a legitimate nationally rated broadcast facility.

"I don't want to take credit for this," Summerlin said. "I probably do less than most people around the station." He feels that the station has given the public what they really want and hasn't tried to sell them on an idea or concept.

The station staff members are all local, a point of pride for Summerlin. Other stations try to hire the best personnel they can find across the country, he said. "We find local people that have talent," he said, "and teach them the rudiments of broadcasting. They don't have to have any radio experience.

"We have a weatherman named Cloudy Colman. He's an old country boy, lived here all his life. He's never been to radio school and had never been on the radio before," Summerlin said.

"He tells weather by the old methods—the bark on the trees, the hair on woolly worms, the depth of potatoes in the ground and his arthritis," he said.

The station has tried to capitalize on popular television shows such as soap operas, "Real People" and "That's Incredible," he said.

"Most radio stations just have announcers. We have 'characters' that come in and out and talk to the DJs on the air. It's like the soap operas on TV. We offer continuing stories that you have to keep up with. We make it really entertaining." WWNC's cast of characters include Bertha the Maid, Cousin Melvin, Uncle Fudlow and Captain Barney.

WWNC Radio want on the air in 1927 and began broadcasting country music in 1969. During its first year of operation it was owned and operated by the Asheville Chamber of Commerce. It is now owned by Multimedia Inc. of Greenville, S.C.●

TRIBUTE TO FAY ROTENBERG

HON. THOMAS P. O'NEILL, JR

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. O'NEILL. Mr. Speaker, I am sorry to report the recent death of my friend Fay Rotenberg of Brookline, Mass.

Fay was an active worker on behalf of both charitable and political causes. She will be sorely missed by all who had the good fortune to know her.

My wife Millie joins me in extending our heartfelt condolences to her family.

At this point I would like to insert the Boston Globe obituary on Fay and the eulogies delivered at her funeral by Norman Lamm, the president of Yeshiva University, and by Rabbi Abraham Klausner.

[From the Boston Globe, Aug. 20, 1981]

FAY ROTENBERG, 69, BACK BAY SHOP OWNER

Funeral services will be held at noon today in Temple Israel, Boston, for Fay (Amgott) Rotenberg of Chestnut Hill, owner of Rug Gallery Inc. on Newbury Street, Back Bay. Mrs. Rotenberg, who was 69, died Tuesday in New England Deaconess Hospital after a brief illness.

Previously, she had been the owner for more than 30 years of the Studio Shop in Copley Square, one of the first contemporary furniture stores in New England. Mrs. Rotenberg also owned the Studio Shop in Rockport where she was a summer resident for more than 40 years.

Mrs. Rotenberg was well known for her involvement in politics. She campaigned for many national and state Democratic candidates and was active in the Brookline League of Women Voters. Through her son, Jon A. Rotenberg, a former state representative from Brookline, she met and became friends with Speaker of the House, Thomas P. (Tip) O'Neill, Jr.

Long an observer of the political scene, Mrs. Rotenberg began corresponding with O'Neill, offering her comments and suggestions. Mrs. Rotenberg also corresponded with former Secretary of State Henry Kissinger, and her letters apparently had some impact.

Once during the Ford Administration, Mrs. Rotenberg's son Jon was introduced by O'Neill to Kissinger. Upon hearing Jon's last name, Kissinger immediately asked if he were related to Fay. In 1978 Mrs. Rotenberg finally met Kissinger and again her son, Jon was the connection. For about $1300, he "bought" a private chat with Kissinger at a celebrity fund-raising affair at Emerson University.

A 45-minute chat with the man his mother so admired was Jon's birthday present to her that year. Both Kissinger and O'Neill continued to correspond with Mrs. Rotenberg during her recent illness.

As founder and president of the Newbury Street League, Mrs. Rotenberg was instrumental in getting more street lights for Newbury street. She also was a director of the Back Bay Association, a life member of Hadassah and Beth Israel Hospital, an advisor to the B'nai B'rith Youth Organization, and was a Girl Scout leader in Brookline.

She was a national vice president of the Women's Division of Yeshiva University, New York City, and a past president of the New England region of the division.

An accomplished interior decorator, Mrs. Rotenberg decorated three student lounges at the University and most recently decorated a lounge in the Yeshiva University High School for Boys, Manhattan. For her efforts, she was honored with the university's distinguished service award two years ago at a luncheon at the Waldorf-Astoria in New York. Mrs Rotenberg also received several national and regional awards for her interior design works.

Mrs. Rotenberg was a graduate of Lasell Junior College in Newton and Beth Israel School of Nursing and attended graduate school at Boston University. In the 1930s she worked as an evening supervisor of nurses at Beth Israel Hospital and had received the Kaufman Award which is given to an outstanding nurse.

Born in Worcester, Mrs. Rotenberg had lived in Brookline before moving to Chestnut Hill 20 years ago.

Besides her son, she leaves two daughters, Judi Ross of Newton and Jane Moss of

Chestnut Hill; a brother, Milton Amgott of New York City; and two grandchildren, Abigail and Alison Ross of Newton.

IN TRIBUTE TO FAY ROTENBERG BY NORMAN LAMM

Along with all other members of the Yeshiva University family who knew and cherished Fay Rotenberg, my wife and I were dismayed to learn of her untimely death.

Indeed, the word death seems so incongruous with the picture of this vital, vigorous, lively lady. The very use of the past tense rings so false and seems so awkward when used of a woman whose humor, human concern and sanguine outlook made her so much part of the present and so promising of the future.

Fay was both a conceiver and executor of ideas in the realm of philanthropy. She performed both functions for Yeshiva University with elan. She perceived the need for an aesthetic dimension to student life, and so devoted herself to the enhancement of the "quality of life" of our undergraduate students, both men and women. She initiated and carried out the renovation and refurbishing of student lounges at Yeshiva College, at Stern College and at the boy's High School. All this she did in a spirit of love, warmth, and friendship, with no thought of the recognition it would bring her.

Nevertheless, the University did recognize her splendid volunteer work by designating her as Guest of Honor twice within one year—1980—at the New England Heritage Dinner and at Yeshiva University Women's Organization National Luncheon at the Waldorf Astoria.

But our real feelings for Fay went beyond the formal acknowledgements of her beneficence. She not only gave generously, but she was a model and inspiration for others to do likewise. And even more than what she gave and what she raised, was what she was—a warm and responsive human being who combined universal concerns for all people with special dedication to her own folk; a sparkling sense of humor with a well-developed artistic flair; intellectual curiosity with a penetrating directness; pride in her own children with concern for all children; an exterior of handsome toughness with an inner core of beautiful goodness and generosity of spirit.

Fay was a lovable human being, and we shall not soon meet the likes of her. Together with her mourning family, we feel bereaved and an aching sense of emptiness.

Our consolation is that the nobility of her deeds, the singularity of her personality, and the integrity of her loyalties will prove imperishable and be her everlasting memorial.

In the concluding works of King Solomon's immortal tribute to Jewish Womanhood in the concluding chapter of the Book of Proverbs:

"Give her of the fruit of her hands,
And let her works praise her in the gates."

May her soul be bound up in the bond of immortal life.

IN TRIBUTE TO FAY ROTENBERG BY RABBI ABRAHAM KLAUSNER

It is not usual for a Rabbi, presiding at a Memorial Service, to introduce himself to the assembled. I do so. In a significant sense, I am part of the eulogy I offer in remembrance and in praise of Fay Rotenberg.

I am Rabbi Abraham Klausner. I served briefly in this Temple and this community, many years ago. In that brief period, one of those wondrous things happened. A rare friendship developed between Fay and myself. I shall tell you about it.

Fay as you well know, spent the fullness of her life amid beautiful things. She sensed, I believe, the relationship between the sacred and the beautiful, as expressed in the poetic line: Ivdu Et Adonoy B'hadrat Kodesh—Serve the Lord in the beauty of holiness. One of the last of the communications I received from her was a notice that she was to be honored by Stern College, a division of the Yeshiva University, for her devotion to that institution, which took the form of creating a beautiful environment for student and faculty as they pursued their studies. Closer to home, here in Boston, the city of her concerns, with the Newberry League, she sought, again, to invest in the ordinary, the extraordinary, and make beautiful the secular.

There are three forms of beauty. There is the beauty of nature revealed in the graceful symmetry of a tree, the fragrance of a flower, the sparkling star pinned against the black velvet of night—and in this connection I think of Fay's smile—this beauty results from the action and interaction of the forces of nature upon the substances of the earth.

The second type is the beauty of the artist, the creative soul. A Michelangelo chisels stone, and a living David leaps forth. Bialik fashions words and phrases, and our people's experience are forever imprisoned in the memory of humankind. A Beethoven organizes sound, and the impressive symphony breaks forth. Such is the beauty of the creative artist, which results from the reaction of the soul of people and the skill of their hands upon the substances of the earth.

Now, my friends, the highest type of beauty is that which results from the reaction of soul upon soul. It is the beauty of nations at peace, a society that is just and responsive, a beauty that is brought to its highest expression in a friendship that is true and loyal, supportive and understanding. It was a wondrous and a beautiful thing that happened, as I tell it now, so many years ago, when first we met and a friendship was urged upon us, one that has sustained us through all these years, even to this hour of death, as we shared our respective hopes, aspirations and accomplishments.

We are, all of us, giving people. It is one of the attributes that makes us human. Giving takes many forms. Giving can be obligatory or dutiful, it can also be gracious. With Fay giving was an art in which she sought to express her feelings for others and her gratitude for life itself. Birthdays, festivals, and celebrations generally were occasions for remembering and sharing, for reaching out and saying, with gift and form, the things we hardly ever, but should always want to say.

In a film story, the name of which I do not remember, there is a scene that impressed me deeply. A child speaks to his parent, asking him what he thought he had done with his life, what have you accomplished? What have you made or provided for the future? The Parent stares at his child, hesitates a moment, and that says, I thought you might be my contribution for all our tomorrows. For Fay—her children, the three Js, as she always referred to them in her writings to me, were her offerings to the future, they were her beauty, her perfection. Oh, what pride she took in them. They in turn were for her an extraordinary source of courage and confidence in all her days and all her efforts.

A tradition has developed, calling for a brief eulogy. Though sensitive to that tradition, I continue to speak. But you will understand. I have come a long way across sometimes the desert and sometimes the oasis of many years. I have the feeling that if I continue to speak, she is with us. When I finish, she will be gone. I am reminded of David, King of Israel, who knew that he would die upon a Sabbath. He then sat, each Sabbath, and composed his psalms, knowing full well that the angel of death would not take him while he sang the praises of the Lord. As long as we speak, and tell of her concerns and devotions to her faith, we feel she is with us.

In our religious ways, we are given to forms and coloration. For Fay Judaism was pervasive. Like a spring of living waters, it refreshed her soul, and thus she was able to lend herself to the totality of Jewish life, dramatized by the Sabbath Eve Dinner to which her family and friends were regularly gathered to celebrate not merely the day, but the very spirit which tries to make us a little less than the angels of heaven.

Perhaps that was her goal in life. To make us more than we are, to encourage us towards the fulfillment of the promise that is within each of us.

Come then, and let us give thanks to God for the years she served as our conscience, years in which she brought joy and comfort into the hearts of so many of us. We ask of God to teach us of His ways, that we may learn from this sadness to be evermore responsive to each other. We ask that her spirit, now and forever, permeate the lives of her children, Jane, Judi and Richard, Jon, her brother Milton, and the greatest of her blessings, her grandchildren, Abigail and Alison, and all of us so privileged to move in the orbit of her love and her attention.●

VETERANS DAY: NOT JUST ANOTHER DAY OFF

HON. WILLIAM J. COYNE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. WILLIAM J. COYNE. Mr. Speaker, Veterans Day is too often seen by many as just another day off from work. I am happy to say that this is not the case with David Minsterman of Pittsburgh. His recognition of this solemn day of remembrance is especially worthy of note in view of the fact that, at 14 years of age, he is too young to know firsthand the horrors of war.

David brought the meaning of Veterans Day to a personal level in an essay competition sponsored by the Disabled American Veterans, Greater Pittsburgh Chapter 8. His essay, which describes the loss of his great uncle in a submarine attack on the U.S.S. *Turner* in 1944, was chosen the winner of that competition over 91 entries.

I would like to share what David had to say with my colleagues—an example

of someone who sees Veterans Day as more than just another day off:

WHAT VETERANS DAY IS ALL ABOUT

(By David Minsterman)

Veterans Day is the one day we bring to mind all the men and women who helped save our country. We remember all the people whose lives were interrupted and most of all, those whose lives were lost in the service of their country.

On January 3, 1944, my great uncle was killed. He was serving aboard the destroyer, the U.S.S. *Turner*. His ship was returning from three successful battles over a period of many months. Ten miles off New York Harbor, the destroyer was anchored for the night. At 6 a.m. the U.S.S. *Turner* was torpedoed and sunk. My uncle and all the men aboard were lost at sea. Harry Randall was only 20 years old when he died, only six years older than I am today. I think it's good for us to think about men and women like my uncle, because if it wasn't for them the United States of America wouldn't be the great country it is today.

A lot of children think of Veterans Day as just a day off from school. I think teachers should take time out to explain just what Veterans Day really means. Maybe they could ask each student to write a paragraph about a person in their family who served their country in the military service. Every family has its own heroes, and when children realize that Veterans Day is for their family too, it would become an important day for everyone.

Veterans Day only comes once a year, so I think we should do everything we can to honor all the people who died fighting for their country, and for all the people who came back but whose lives were changed by these dreadful wars. We honor all the people who served in times of peace, and the men and women in the service now, who keep our country strong and ready to fight if that terrible time would ever come.●

WHEN IS AN ENDORSEMENT NOT AN ENDORSEMENT?

HON. DON EDWARDS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. EDWARDS of California. Mr. Speaker, President Reagan's recent remarks regarding extension of the Voting Rights Act have caused deep concern not only among minority group members but among all Americans who care about civil rights.

While ostensibly endorsing full extension of this most important of our civil rights statutes, the President gave his tentative support to two amendments which would greatly harm the effectiveness of the Voting Rights Act.

In a guest editorial by Vernon E. Jordan, Jr., which appeared in the New York Times on November 16, 1981, the implications of the President's mixed message are explored. I commend the article to the attention of my colleagues.

My colleagues will also be interested in an editorial which appeared in the Los Angeles Times on November 16, 1981. The editorial examines what is, to many, the most troubling aspect of the President's statement—his endorsement of language which would require a finding that the framers of a voting law intended their law to discriminate before such a law could be invalidated. As the editorial points out:

To prove intent by fathoming the minds of legislators . . . is an impossible task. And that is what opponents of the Voting Rights Act intend it to be.

The articles follow:

[From the New York Times, Nov. 16, 1981]

DILUTING VOTING RIGHTS

(By Vernon E. Jordan, Jr.)

When is an endorsement not an endorsement? The answer is: when President Reagan backs extension of the Voting Rights Act of 1965.

The President's "endorsement" of extending the act, which expires in 1982, was qualified with backing for amendments that would weaken the act.

In the process, the President missed an opportunity to strengthen his image among blacks.

Minority-group members' anger at the Reagan Administration's disastrous economic program could have been countered, at least to some small degree, by a strong, forthright statement endorsing the version of the Voting Rights Act extension that has already been passed by the House of Representatives.

The President's move was not only a political mistake that will make it even harder for his party to attract minority-group voters, but also it was a disservice to the conservatism he symbolizes. True conservatism seeks to "conserve" the best of the past. It venerates constitutional rights, individual freedom, and protection of civil rights from Government abuse. Therefore, the Voting Rights Act, with strong enforcement provisions that do not permit local governments to escape their responsibilities, is in essence a deeply conservative law. It has the support of many citizens and legislators who proudly label themselves "conservative."

Superficially, the President's endorsement of extending the act for 10 years fits that tradition. He spoke of voting as a "sacred right" and of reaffirming his commitment to voting-rights protection.

However, the President then went on to say that he supports two changes in the bill passed by the House. Far from being minor amendments, those changes would seriously undermine the effectiveness of the Voting Rights Act.

The first change would be to further liberalize the "bailout provisions" through which states and local government covered by the law could escape Justice Department oversight of their electoral operations. Such governments now need "pre-clearance" by the Justice Department for any proposed changes in their election laws or procedures.

Many people agree with the President that a bailout for jurisdictions that have not violated voting rights for a period of time is "a matter of fairness." But to me, it is an escape hatch that virtually invites local power elites to lie low for long enough to get out from under Federal coverage. Even with the law as it stands, abuses occur. Introducing a "reasonable bailout" feature just asks for trouble.

The pre-clearance procedure is simple and reasonable; to date, more than 800 requested changes in local laws have been routinely approved. Hardly burdensome, as its foes argue, it does not warrant a bailout amendment. The Justice Department and the courts are not likely to come down on local officials unless there is blatant violation of voting rights, such as the one that moved a Federal court to suspend City Council elections in New York City because they discriminated against minority-group voters.

Perhaps more serious is the President's support for using intent-to-discriminate as the test of whether the Goverment should act to protect voting rights. The House bill uses the "effects" standard: Changes in election laws and procedures can be challenged if they have a discriminatory, negative effect on minorities.

Intent to discriminate is impossible to prove. Local officials don't wallpaper their offices with memos about how to restrict minority-group members; access to the polling booth.

Discriminatory effects, however, are clear to all. They can be measured, and judged. A redistricting plan that wipes out black representation in a state legislature could be spotted and dealt with for what it is—a discriminatory change in election laws that deprives minorities of their voting rights.

But if the standard is intent to discriminate, the onus would be on the people whose rights were violated to try to prove that the change was deliberately made to deprive black voters of representation. The evidence would be virtually impossible to assemble.

So the President's endorsement of the Voting Rights Act is a sham. It observes the letter but not the spirit of voting-rights protection. And it will make the coming battle over the voting-rights extension in the Senate much harder to win.

[From the Los Angeles Times, Nov. 16, 1981]

INTENTIONS THAT ARE NOT HONORABLE

Lawyers have been struggling for centuries over the issue of "intent," a legal concept that calls for knowledge of the motives of a criminal—or of a legislature—whose actions lead to a wrongful result.

Should it be necessary to prove an intent to do wrong in order to punish an offender more severely or to invalidate a statute?

That question is now plaguing Congress in the dispute over extension of the Voting Rights Act of 1965, and the debate could have a major effect on government policy not only on civil rights but also in many other important areas.

Under existing law, the government must prove intent, as well as illegal effect, in its prosecutions of state or local governments for violations of the Voting Rights Act. But, by an overwhelming vote, the House of Representatives wants to exclude proof of intent from legislation extending the act beyond its expiration next August.

Just as adamantly, the Reagan Administration and Senate conservatives want to retain intent, and a 1980 decision of the U.S. Supreme Court supports their position. The Court held, 5 to 4, that there has been no violation of the rights of black voters in Mobile, Ala., even though the effect of an ordinance mandating at-large elections has been to prevent blacks from winning election to the City Commission.

In the view of the majority, there was no proof of intentional discrimination and, for

that reason, the ordinance must stand. But the justices in the minority argued that a discriminatory intent had been proved by "the totality of the relevant facts"—chief among them the probability that no black would ever sit on the City Commission because of the at-large system.

The congressional debate could directly affect the enforcement of other civil-rights legislation, including prohibitions against housing and employment discrimination. If the conservatives prevail and the government must prove the additional burden of intent, it would be impossible to prosecute a majority of cases, however obvious the violations might be.

Yet the conservatives are inconsistent. While demanding proof of intent in the case of racial discrimination, they want to remove it from pending legislation that would make it a crime to disrupt overseas intelligence activities by publishing the names of American secret agents.

In other words, the conservatives demand a showing of intent only if it will weaken or narrow the grounds for enforcement of a statute whose purposes they oppose. But they would discard intent entirely if it would impair the enforcement of a statute that they favor.

Obviously there are cases in which intent is a legitimate factor in determining the degree of guilt. The man who shoots his neighbor accidentally might be guilty of manslaughter or another offense if his victim dies, but he is not guilty of murder.

In the case of civil rights, however, it is absurd to argue that laws that result in obvious discrimination must be left in force in the absence of proof of deliberate intent to discriminate.

In the Mobile case, city officials had to know that creation of at-large elections would keep blacks out of public office. Blacks number 35 percent of the voters in Mobile, and the effect of the law was to force them to run against candidates of the 65 percent white majority.

In the case of at-large elections or racial gerrymandering, government prosecutors should have to prove only that discrimination does exist, not that the offending jurisdictions meant it to exist.

To prove intent by fathoming the minds of legislators—particularly in the case of laws written 10, 20 or 100 years ago—is an impossible task. And that is what opponents of the Voting Rights Act intend it to be.●

PAUL LEWIS

HON. AUSTIN J. MURPHY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. MURPHY. Mr. Speaker, a few days ago, Paul Lewis, director of district 15 for the United Steelworkers of America, passed away. He was a man of great integrity with a true concern for the men and women he represented, as well as for his community. As a tribute to Paul, I ask that the following editorial, which appeared recently in the Valley Independent, be entered into the RECORD.

The Mon Valley in particular lost a valuable member of its community the other day with the death of Paul (Putsy) Lewis, the director of district 15, United Steelworkers.

Paul Lewis had an excellent reputation as a sensible exponent of the labor movement. He was not one of those radical types often pictured with labor unions.

He was a man who knew reason. He was a man who believed in the principle of a working relationship between those who manage the company and those who work for that company.

As a result of that, he was able to maintain the respect from both sides of any bargaining table, and that is sorely needed in today's complex society.

That's a big reason why he will be missed by the Mon Valley community. There are many others, some of which he never bragged about, but just went along doing what was asked of him to do—solely with the intention of providing help for others less fortunate.

We recall his input into the United Way of Mon Valley as a member of the board of directors. He always championed and totally believed in the United Way concept, and made a great contribution toward that end.

That was only one area in which Putsy Lewis contributed. There are many other examples, all of them outside his realm as the leader of Mon Valley steelworkers. He always found the time to offer his advice and wisdom, collected over a number of years of close contact with human needs.

One local union leader expressed it well when he said his shoes will be difficult to fill. We totally agree with that.

Our sympathy is extended to his thousands of steelworker family and most particularly to his immediate family. The valley truly has lost a valuable asset.

[From the Valley Independent, Nov. 12, 1981]

PAUL LEWIS

The Mon Valley in particular lost a valuable member of its community the other day with the death of Paul (Putsy) Lewis, the director of District 15, United Steelworkers.

Paul Lewis had an excellent reputation as a sensible exponent of the labor movement. He was not one of those radical types often pictured as associated with labor unions.

He was a man who knew reason. He was a man who believed in the principle of a working relationship between those who manage the company and those who work for that company.

As a result of that, he was able to maintain the respect from both sides of any bargaining table, and that is sorely needed in today's complex society.

That's a big reason why he will be missed by the Mon Valley community. There are many others, some of which he never bragged about, but just went along doing what was asked of him to do—solely with the intention of providing help for others less fortunate.

We recall input into the United Way of Mon Valley as a member of the Board of Directors. He always championed and totally believed in the United Way concept, and made a great contribution towards that end.

That was only one area in which Putsy Lewis contributed. There are many other examples, all of them outside his realm as the leader of Mon Valley steelworkers. He always found the time to offer his advice and wisdom, collected over a number of years of close contact with human needs.

One local union leader expressed it well when he said his shoes will be difficult to fill. We totally agree with that.

Our sympathy is extended to his thousands of steelworker family and most particularly to his immediate family. The Valley truly has lost a valuable asset.●

MEN OF THE YEAR

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LONG of Maryland. Mr. Speaker, last Monday, November 9, 1981, Allen Quille and Bernie Maizlish were honored at the St. Frances Academy third annual "Men of the Year" dinner in Baltimore, Md.

Allen Quille, a native Baltimorean, is an officer or board member of more than 25 local and international organizations and charitable institutions, including the Equal Opportunity Commission, the Better Business Bureau, United Fund, Democratic National Finance Committee, Jewish National Fund, Israel Bonds, Salvation Army, American Red Cross, and Boy Scouts and Girl Scouts of America.

Under his leadership, more than $2 million has been raised for the restoration and renovation of America's oldest black school, St. Frances Academy and Convent.

Bernard Maizlish, born in Russia, and raised in Cuba, became a U.S. citizen when he joined the armed service during World War II. After he was wounded in combat and discharged, Mr. Maizlish returned to his boyhood craft of watchmaking. He enrolled as a student and later became an instructor at the Joseph Bulova School of Watchmaking, where he worked with the school's foundation to teach disabled veterans and handicapped civilians. He was the first alumnus chosen to hold the lifetime position as trustee for the Joseph Bulova School for disabled veterans.

Mr. Maizlish, in the traditional Jewish sense of Tzdaka—charity—believes the highest degree of charity is that which is given anonymously.

We are proud of these two men for their concern for their community and the needy. My congratulations and best wishes to them both.●

ALCOHOL IS HARMFUL TO THE UNBORN

HON. GEORGE E. BROWN, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. BROWN of California. Mr. Speaker, another report will soon be issued correlating drinking with birth defects, defects which are easily preventable. Fetal alcohol syndrome affects between 1 in 300 and 1 in 750 births in the United States, yet few women seriously consider the hazards of alcohol upon their unborn children.

We must educate the American public to these hazards and allow them to make responsible decisions about drinking based upon all the facts. One means of doing this is to cosponsor my bill, H.R. 2251, or Senator THURMOND's bill, S. 1435, which would place warning labels on alcoholic beverages.

As the evidence mounts and the harmful effects of fetal alcohol syndrome are known, it becomes imperative for the Government to act. If we do not do it now, then future generations will have to care for these unfortunate individuals. We have a responsibility to our citizens, present and future, to give them an opportunity to lead full, productive lives.

I urge my colleagues to consider the following information carefully and to support my bill as part of a comprehensive program for better health care.

[From the Riverside, Calif., Press-Enterprise, Nov. 12, 1981]

BINGE EARLY IN PREGNANCY CAN HURT FETUS, TESTS SHOW

CHAPEL HILL, N.C.—University of North Carolina scientists say they have new evidence that one or two episodes of heavy drinking by a woman early in pregnancy can seriously damage her unborn child.

The evidence indicates the condition known as fetal alcohol syndrome may begin as early as the third week after conception—well before most women suspect they are pregnant.

The evidence was uncovered in experiments done on laboratory mice by Dr. Kathleen Sulik of the School of Medicine and Dr. Malcolm Johnston of the Dental Research Center. Their findings are to be published in the Nov. 20 issue of the journal Science.

Their results confirmed and expanded on studies by Dr. William Webster, a scientist at the University of Sydney, Australia, Sulik said. Webster said last year that even brief exposure to alcohol can cause severe malformations in mice not commonly seen in fetal alcohol syndrome.

Sulik and Johnston said they have shown for the first time that mouse embryos can survive early alcohol injury to be born with subtle defects in appearance that are remarkably similar to those in human fetal alcohol syndrome.

Defects in children include smaller eyelid openings, flat nasal bridges, shorter noses and longer upper lips. The most serious results are mental retardation and hyperactivity.

Sulik said fetal alcohol syndrome affects between one in 300 and one in 750 births in the United States.●

AMENDMENTS TO THE FISHERY CONSERVATION AND MANAGEMENT ACT, NOVEMBER 17, 1981

HON. JOHN B. BREAUX

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. BREAUX. Mr. Speaker, today, I have introduced, with the co-sponsorship of our distinguished colleague, Mr. FORSYTHE, amendments to the Fishery Conservation and Management Act (FCMA). I am sure that the Members have enjoyed reading the recent series of remarks by Mr. FORSYTHE, the ranking minority member of our Fisheries and Wildlife Conservation and the Environment Subcommittee, which detail some of the problems we have identified with the existing fishery management process. These problem areas were originally identified during the last Congress and have been more fully explored and developed in recent hearings conducted by the subcommittee.

I think it is possible to sum up the problems we have uncovered with the simple statement that the current regulatory process being applied by the Federal Government does not fit the problems of a regionally structured conservation and management regime for renewable, living marine resources. How has this problem been manifested in practice? By the inability of regional fishery management councils to timely develop management plans for various species of fish; by the necessary and illogical application of Federal agency regulatory management practices to the resource conservation efforts of such councils; by the inability of either the Federal Government or regional councils to implement emergency regulations for the protection of every threatened fishery; by continuing inadequacies in observer and enforcement efforts; and by continued second-guessing of council-formulated management plans by the Federal Government. In short, the regional fishery management councils, which were created by the Congress in 1976 and charged with the ultimate responsibility for protecting and developing the fishery resources of the United States for the benefit of U.S. fishermen, have been prevented from effectively carrying out their mission.

The amendments we are introducing today are designed to correct this problem. Generally, the bill will:

First, streamline the procedures for public notice and participation in the development of fishery management plans and amendments thereto in a manner that strikes a balance between the need for local input in such process and the need for expenditious implementation of plans and plan amendments;

Second, require the Secretary of Commerce to review proposed Council management plans and to conduct those regulatory reviews as are required by Federal law in a timely fashion; third, more clearly delineate the standards for secretarial review of proposed fishery management plans; fourth, grant States the fishery resource management responsibility over Federal "enclaves" within State waters; fifth, permit the councils to collect recent data and information relevant to either the threshold question of whether or not a management plan for a particular fishery resource is necessary or the actual preparation of such a management plan. This provision will not, however, permit the councils to request data solely for the purpose of collecting information; sixth, require the councils to supplement existing Federal and State data protection schemes with their own procedures so as to fully protect those individuals who submit data to such councils; and seventh, more carefully spell out the duties and responsibilities of foreign fishing observers so as to increase the ability of the United States to enforce its foreign fishing regulations.

A number of other amendments necessary to insure the development of U.S. fishery resources for the benefit of U.S. fishermen are included in the bill.

Mr. Speaker, I would like to also take this opportunity to address one issue that has not been included in the proposed legislation—a solution to the vexing problem of foreign processing ships operating in state internal waters. Much evidence was presented to the subcommittee on this very complicated issue. It is my hope that we will be able to arrive at a solution to this issue that proves satisfactory to all parties by the time the legislation we are introducing today is considered. I believe that this goal can be accomplished through the dedicated efforts of all concerned Members and I have instructed the subcommittee staff to continue discussions with all affected parties.

Mr. Speaker, I believe this bill represents the consensus of the numerous witnesses who have appeared before the subcommittee during the past 3 months and I urge my colleagues to join us in sponsoring, and insuring the enactment of, these necessary reforms.●

HENRY HACKER—A CADET'S DREAM COMES TRUE

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. SOLARZ. Mr. Speaker, over the years, I have sponsored many fine young cadets to the Military Academy in West Point, N.Y. I am particularly proud of Henry Hacker, an outstanding young individual who will be among the first graduating cadets to take advantage of our 1978 legislation enabling qualified cadets the opportunity to enter medical school.

I respectfully request permission to reprint an article in the CONGRESSIONAL RECORD from the Newsletter, the West Point Jewish Chapel Fund, titled a "Cadet's Dream Comes True." This article refers to Cadet Hacker's desire to become a doctor as well as to graduate from the Academy. I am sure you will agree that Cadet Hacker is truly a special individual. I congratulate this fine young American and wish him untold success in his promising future.

CADET'S DREAM COMES TRUE

Henry Hacker took a chance and won.

A member of the Jewish Chapel Squad who graduated this year, he will go to the Uniformed Services University of the Health Sciences in Bethesda, Md., as a member of the Medical Service Corps.

He had always wanted to be a doctor, but when he applied to West Point in 1977, graduates of the Military Academy were not allowed to go to medical school.

"I knew that Congress was considering a bill at the time to change that. I gambled that it would pass and I won," he said.

In 1978, Congress passed a law allowing two percent of the USMA graduating class to attend medical school if they qualified. This year one and a half percent of the 906-member class qualified to attend. Henry Hacker was among them. A chemistry major at West Point, with a minor in electrical engineering—a combination that he admits was "challenging"—Cadet Hacker was considering an unusual specialty—bionic medicine.

Elated at his assignment, Cadet Hacker recalled his senior year in high school in Brooklyn, N.Y., when his father was seriously ill in the hospital and he wasn't sure he could attend college at all. Medical school seemed unattainable. Appointment to West Point by Congressman Stephen Solarz was the answer to a lot of hopes and dreams.

Admitting that it was tough, the slight, dark-haired intense young man winces a little when he recalls plebe year. "The Jewish Chapel services and the food at the Oneg Shabbats afterward gave us something to look forward to, especially in plebe year," he recalls.

Another extracurricular activity that makes his eyes light up when he discusses it is flying. He is working on his pilot's license and hopes to continue that in Maryland. At graduation, however, his spirits were flying on sheer happiness.●

CAREENING CREDIT

HON. ED BETHUNE

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. BETHUNE. Mr. Speaker, I ran across an article in today's Wall Street Journal that should convert a number of deficit watchers into off-budget credit watchers.

It makes a very important point, and that is that the Federal deficit tells less than half the story about the extent of Federal borrowing. For those of us who are concerned about the extent of the Government's claim on the capital market, the focus should be on the careening Federal credit activity taking place off budget.

CAREENING CREDIT

Not so long ago, everybody watched the CPI. It went up and up at a snappy clip—what fun. But after some months of slowing and faltering, watching it got kind of boring. Nowadays, everybody watches the budget deficit. It, too, goes up and up; but the deficit watchers are missing the point.

The deficit watched by watchers is the difference between what the government will take in and what it'll put out as it appears in the federal budget. The size of the shortfall is taken as an indicator of how much government will be borrowing. And that's why people watch the deficit. But the picture given by the budget deficit is not the full picture; in fact, it's not even half the picture.

There exists another budget and this budget also generates a deficit which requires government borrowing. It's called off-budget. Off-budget is where the financing needs of federal credit programs reside. And what big needs they are. Since 1977, new loans and loan guarantees have towered over the budget deficit. Last year, off-budget credit represented over a fifth of the funds raised in the domestic credit market.

Off-budget credit ranges from high visibility items like bailouts for Chrysler and New York City to more obscure programs like assistance for Indians and railroads, although most programs are targeted for housing. Generally, government credit programs fall into three types: direct loans, loan guarantees and borrowing by sponsored agencies. Many programs provide more than one type of credit. The purpose of all the programs is to provide cheap credit for those who might otherwise be shut out of the market.

Most of the financing itself is an undercover job, done through a conduit known as the Federal Financing Bank. This bank borrows money from the Treasury and it borrows largely on the basis of "entitlements" without effective oversight. Not surprising, then, that since its creation in 1974 the amount of off-budget credit extended has zoomed. Indeed, off-budget credit is the fastest growing form of credit in the domestic credit market.

This credit activity—no matter how sneaky its procurement—has exactly the same impact as on-budget demands for credit: It crowds out private borrowers. Thus, hoping to bring down interest rates by limiting on-budget borrowing is like hoping to tackle Earl Campbell with only one arm.

Aside from its contribution to federal activity in the credit markets, this kind of credit allocation is bad for the economy. After all, the point of allocating credit is to give credit to enterprises which fail the test of the marketplace on the premise that the social benefits outweigh the costs. This is a nice way of saying that credit allocation channels funds away from projects earning risk-adjusted market rates of return to those earning below-market rates. Credit allocation, by design, misallocates credit from productive uses to less productive uses.

All this works together to keep interest rates high, productivity low and economic growth slow. And it all works together largely unseen and unevaluated by anyone but agency bureaucrats and lobby groups of the sectors favored by cheap government credit.

Now that attention is focused on getting the government out of the credit markets, it would be a great time to rein in off-budget credit allocation. Especially since Congress has turned mulish about cutting the on-budget deficit by cutting spending. So we were delighted with the administration's announcement to snip some $20 billion from loan guarantees. The proposal includes a hefty $16 billion chunk off housing finance with the rest coming out of a dozen or so other loan guarantee programs.

It could, of course, be argued that limiting new federal credit guarantees to $161 billion this year is not nearly enough. And it isn't. But at least that $20 billion slice represents some sort of recognition that it's a waste of energy and political capital to beat back the on-budget deficit when the off-budget one careens into space.●

"BEAR" BRYANT FOR PRESIDENT

HON. RONNIE G. FLIPPO

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. FLIPPO. Mr. Speaker, I am pleased to have the opportunity to congratulate one of Alabama's finest citizens and an American sports living legend, Coach Paul "Bear" Bryant.

On Saturday, November 14, 1981, with an impressive victory over Penn State, Coach Bryant entered the football record books beside the immortal Amos Alonzo Stagg as the winningest coach in collegiate football. Coach Bryant now has 314 victories in 37 years as a head coach, a truly awesome record.

Bryant attended the University of Alabama and played on the 1934 Crimson Tide team that defeated Stanford in the Rose Bowl. He began his coaching career as a Crimson Tide assistant in 1936. Before returning to his alma mater as head coach in 1958, Bryant built successful programs at Maryland, Kentucky, and Texas A. & M. He has led Alabama to 12 Southeastern Conference championships and 6 national crowns during his 24 years there. He was named National Coach of the Year in 1961, 1971, and 1973. The Alabama Crimson Tide has played in 22 consecutive bowl games under Coach Bryant's leadership. This, too, is a na-

tional record, and no other team is a close second.

While history often judges men by their victories, and Coach Bryant clearly has a place in history because of his, those who know Coach Bryant know him as a special man who cares about his players and is more concerned about teaching "good living" than he is in setting records. Coach Bryant is an inspiration to all Alabamians, indeed to all Americans. People have tremendous respect and admiration for him. Among those who have played for Coach Bryant are such greats as Joe Namath, George Blanda, Steve Sloan, Richard Todd, and Ken Stabler. Those are just the quarterbacks; 44 of Coach Bryant's former players or assistant coaches have become head coaches for collegiate or professional teams.

Coach Bryant is an excellent motivator and an extremely popular figure throughout the State of Alabama. Alabama political figures are pleased that Coach Bryant has decided not to run for their jobs, for Alabamians would undoubtedly elect him President.

I join thousands of other Alabamians in congratulating the greatest football coach of all time, Coach Paul William "Bear" Bryant, and in wishing him many more victories.●

REAGAN'S UNDECLARED WAR ON WOMEN, CONTINUED

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mrs. SCHROEDER. Mr. Speaker, the Small Business Administration is designed to give special assistance, in the form of loans, management consulting, guaranteed loans, Government contracts, and so forth, to small businesses.

Comes now President Reagan's new SBA chief, Michael Cardenas, arguing that "having special programs for women is discriminating."

If special programs are discriminatory, why does Mr. Cardenas stay on as the head of the SBA?

The full flavor of Mr. Cardenas' disengenuous comments can be obtained by reading the November 16, 1981, Wall Street Journal, "Special Programs for Women Dying Away at Reagan's SBA."

SPECIAL PROGRAMS FOR WOMEN DYING AWAY AT REAGAN'S SBA

(By Sanford L. Jacobs)

Special help for women seems to be going out of vogue in Washington, where the Reagan embrace of laissez faire means programs for special groups are out of favor. The new team at the Small Business Administration has practically killed the women's programs there.

"I do not think," says SBA Chief Michael Cardenas, "we ought to have special programs especially for women. I feel having special programs for women is discriminating," Mr. Cardenas says women do not need programs tailored for them because they can find management assistance and business training in SBA's other programs.

Rather than special programs, the SBA should inform women how the agency can help them, he says. "My philosophy is to increase our outreach to them, to have them have more access." He adds: "With few exceptions women have accepted it."

One who does not accept it is Marlene Johnson, president of the National Association of Women Business Owners. "This administration believes that if you leave everyone alone, everyone will be O.K.," Miss Johnson says. "But historically that is not true. The strong prey on the weak."

Many women run their businesses successfully without special help, says Miss Johnson, owner of a St. Paul advertising agency. But many others benefit from programs that help them overcome the "cultural differences" that make business ownership tougher for some women than for men.

Nearly a casualty of the SBA retrenchment was the American Woman's Economic Development Corp. in New York. AWED is considered one of the best private, nonprofit training and management assistance programs for women entrepreneurs that the SBA has funded. But last February the SBA said it would end the funding in April. Beatrice A. Fitzpatrick, AWED's chief executive, rallied support from many corners, including conservative Republicans like Senator Paul Laxalt of Nevada, a pal of President Reagan.

The SBA didn't cut off AWED's funds entirely, though it threatened to several times during the year. But the agency let months pass without sending any money, so AWED couldn't pay suppliers or employes. Women helped by the program chipped in $56,000; corporations provided $122,000 more.

Federal money covered practically the entire AWED budget when the cutoff notice came. Miss Fitzpatrick has obtained commitments from corporate and individual donors to cover more than half her budget for the 12 months ending next Sept. 30. Still, AWED is asking the SBA for nearly $600,000 for the period and lesser amounts for the next two years. "That is pretty steep," Mr. Cardenas says, though he says no decision on the funding request has been made.

Miss Fitzpatrick has asked for $389,000 in fiscal 1983 and $184,000 in fiscal 1984. "We can't just go from all federal money to none overnight," she says. "I don't think we should be punished because we are helping women."●

HON. ALBERT L. SKLAR

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LONG of Maryland. Mr. Speaker, it is with great pleasure that I invite my colleagues to join me in tribute to the Honorable Albert L. Sklar, an outstanding dedicated public servant retiring from the Eight Judicial Circuit Court after 17 years.

A native of Baltimore, Judge Sklar was graduated from the University of Baltimore Law School in 1932 and was admitted to the Maryland Bar that same year.

He was elected to the Maryland House of Delegates in 1939 and served there until 1955. Judge Sklar's career as a public servant extended beyond his responsibilities as a Delegate. He served as counsel to the Junior Association of Commerce from 1935 to 1946, was a member of the Tax Revision Commission of Maryland from 1939 to 1941, and was a member of the Postwar Redevelopment Commission from 1941 to 1945.

He later served as the chairman of the Commission to Revise the Public Service Laws of Maryland and with the expertise he developed went on to become a member and chairman of the Public Service Commission from 1958 to 1964.

In addition to his public career, Judge Sklar has been active in religious and social groups. He was president of the University of Baltimore Alumni Association from 1965 to 1972, was president of the Menorah Lodge of the B'nai B'rith and the Histadrut Council, and was a board member of the Chizuk Amuno Congregation. He also served on the board of the Jewish Children Family Services of Associated Jewish Charities, and was a member of the Amicable Lodge and Scottish Rite.

In recognition of his years of outstanding service, he has received the Menorah Lodge's Man-of-the-Year Award, the Dr. Herman Seidel Humanitarian Award, and the Alumnus of the Year Award from the University of Baltimore.

His dedicated service has touched the lives of many people, and his contributions will be truly missed. I am privileged to ask my colleagues to rise with me in commending an outstanding public servant—Judge Sklar, we thank you.●

VETERANS' NEWS BRIEFS

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. SANTINI. Mr. Speaker, I would like to share with my colleagues an article which appeared in the October 25 edition of the Las Vegas Sun. This article, written by Bill Morris who is the commander of a Disabled Veterans chapter, correctly summarizes some of the flaws of a veterans-related bill which the House passed earlier this fall, H.R. 4034, the HUD-Independent Agencies appropriations bill. I voted against this bill because of its tremendous budget outlays which seemed inconsistent with our new commitment to bring Federal expenditures more into line with available resources.

The Sun article points out that the bill was over budget requests, but more important, that the cutbacks it did call for were taken from the wrong areas. The article goes on to make some very good suggestions concerning ways in which the Veterans' Administration could cut costs, bring down the price of this bill, and still give priority service to our American veterans. I intend to make these recommendations to the VA and recommend this article to you to read.

[From the Las Vegas Sun, Oct. 25, 1981]

VETERANS' NEWS BRIEFS

(By Bill Morris)

As promised here is a report on H.R. 4034.

When the President took office he submitted a proposed budget to Congress. Congress took a look at it and came up with its own version . . . the Gramm/Latta Budget Compromise. Reagan agreed to accept it.

H.R. 4034 established the funding for the Veterans Administration for fiscal year 1982. However, the president said he will veto it if it gets through Congress as it provides a larger figure than what he originally asked for, and was not in compliance with his policy.

The bill squeaked through the House with a margin of 209 for and 197 against the measure with 27 not voting. Jim Santini voted against it.

At the VFW National Convention in the summer of 1980 then candidate Reagan stated, "To me it is unconscionable that veterans in need are denied hospital and medical care because of inadequate funding which has closed hospital beds and cut health care personnel within the VA."

In his nationwide speech Sept. 23 the president asked for an additional $451.7 million to be further slashed from the VA budget. A majority of the cuts ($297 million) would come from the VA's medical care account.

I agree that some cuts need to be expected, but why not cut from the top and leave the veterans alone. The VA is top-heavy with bureaucrats. For example, why does the VA need 300 lawyers?

The VA medical system can provide health care to veterans at about one-third the cost of care to the private sector.

If cuts are necessary, and they are, why not make the VA clinics part of the VA hospital system? This would automatically eliminate several positions, all high-paying, such as director, assistant director, fiscal, medical chief of staff, several heads of departments and many others. This would save a considerable amount of money annually. Independence can sometimes be a bane to one's existence.●

HON. W. AVERELL HARRIMAN

HON. TOM BEVILL

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Thursday, November 12, 1981

● Mr. BEVILL. Mr. Speaker, it is a true pleasure to join with my colleagues in the House to honor one of the great living Americans, W. Averell Harriman.

Throughout his long and distinguished public career, Governor Harriman has served his Nation and his party with the highest caliber of statesmanship, character, and personal integrity.

It was my personal privilege to serve with him on the Democratic Advisory Council of Elected Officials, for which he chaired the Foreign Affairs Task Force.

Governor Harriman shared freely of his wise counsel and rich personal and professional background. His service to this Nation as an elected official, as Ambassador, and as counselor to our Presidents has set him apart as one of our most knowledge citizens on the workings of our democracy.

As he enters 91st year, we should all be thankful for this generous and highly cultured gentleman. I join with America's citizens in honoring him, and in wishing him continued health and happiness.●

REMARKS OF THEODORE EDISON ON THE ENVIRONMENT

HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. MINISH. Mr. Speaker, the name of Edison is justly celebrated for many achievements associated with our economic and technological progress over the last century. I am honored to represent West Orange, N.J., where the great inventor made his home, and among my distinguished constituents is Mr. Theodore Edison, son of the great "Wizard." Mr. Edison recently communicated to me a brief essay in which he reflected on the relative demands of progress and of preserving our environment. I share these thoughts with you:

OCEAN BEACHES, AND THE PRESERVATION OF "VARIETY"

A great many people are beginning to realize that population pressures are tending to produce such universal regimentation that our lives will become poorer instead of richer unless we take immediate steps to preserve "variety."

For example, I think that thousands of the visitors to ocean beaches would like to see substantial parts of those beaches kept at least somewhat inaccessible. Although such people may not visit a "remote" beach very often, each one of them may count each trip to it a rewarding and memorable experience, rather than just another outing: the "reward" in each case being partly dependent on an understanding of the area's unusual natural features. When off-road vehicles invade such places, feelings of peace and solitude are sure to be destroyed, and unique elements of the area can soon be lost forever. Why does every bit of beach have to be made so accessible that a journey to it degenerates into a mere alternative to going to the movies?

By way of simile, would it not be a tragedy to banish all classical music from a metropolitan area, without possibility of recall, just because a search for excitement may make rock and roll temporarily more popular? Who knows that tastes won't change?

Natural ocean beaches come and go, and I understand that in extreme cases they can change from a 200-foot width to almost zero (or vice versa) as the result of a single storm. Potential disaster areas can easily be created when careless visitors are presented with more and more opportunities to strip sensitive protective vegetation from the dunes. Would it not be best to reduce the chance of irreparable damage by keeping human activities in outstanding natural areas as simple as possible?●

WORKSHOP MEMBERS VISIT CAPITAL

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LONG of Maryland. Mr. Speaker, on Wednesday, November 18, 1981, six men and women, who are participating in the "Senior Power in Government" workshop at the University of Baltimore, will journey to Washington for a firsthand look at their Nation's Capital.

The 6-week workshop, conducted in cooperation with the area Agency on Aging, will acquaint older Baltimoreans with the political process and includes both classroom sessions at the university and field trips to Washington, Annapolis, and places of interest in Baltimore.

Seniors who will visit with us Wednesday are: Gwendolyn West, director of the Northwest Senior Center, Hilda Lurie, Esther Cohen, Inez Blair, Sydney Tucker, and Jack Glassman. Also visiting will be Dr. C. Richard Swaim, assistant professor, Public Affairs Institute, University of Baltimore.●

WASTEFUL DEFENSE SPENDING

HON. JAMIE L. WHITTEN

OF MISSISSIPPI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. WHITTEN. Mr. Speaker, I believe it is essential that attention be called to some of the serious problems involving wasteful spending in the name of defense.

Mr. Speaker, I probably have had as much experience with defense appropriations as anyone else serving in Congress. I was a member of the Naval Appropriations Subcommittee beginning in 1943 and served on the Defense Subcommittee until 1974. Since that time I have continued to follow the subject closely. I have always supported strong national defense but I have learned through experience the vast difference between defense and defense spending.

We are aware of the warnings sounded by President Eisenhower about the military establishment and the arms industry. And we recall the convictions of our former colleague and the former Secretary of Defense, Mel Laird, that a strong economy is the first requirement for strong defense.

Mr. Speaker, I fear that too many have come to judge our defense strength by the size of defense spending. Not only is this dangerous but simply spending in the name of defense is highly inflationary, doubly so when it is wasteful. I submit that there is even greater danger when our leaders, the Secretary of State and the Commander-in-Chief, may be led to believe that we are stronger than we actually are just because of increased defense spending.

For these reasons, and based on my years of experience in defense appropriations, I joined in initiating a broad study of defense procurement practices and related matters. We did this in February as the huge increases in defense spending were being proposed. That study has been completed and the Defense Department has been asked to reply to the findings.

On October 19, 1981, in view of the gravity of some of the findings, a copy of the investigative staff report was provided to the Secretary of Defense for his response and action. In addition, many of the major issues set forth in the report were separately identified in the letter of transmittal to provide emphasis. One month later no response has been made by the Secretary.

The committee has directed the surveys and investigations staff to continue its efforts in this area, and it is anticipated further such reports will follow.

For the benefit of Members and others I include in the RECORD a brief summary of the report.

SUMMARY OF INVESTIGATIVE STUDY

In February of this year, the Defense Subcommittee directed the Committee's Surveys and Investigations Staff to conduct a broad investigation into the procurement practices of the Department of Defense. This Staff submitted a comprehensive report on September 23, 1981, followed by supplements on October 23 and 27, 1981.

The DOD supports between one-fourth and one-third of all scientists and engineers in the United States. About $10 billion is spent each year on Defense-related R&D. Much of the technology of the R&D community has resulted, for example, in the construction of a combat ship requiring 35,000 design changes and 6,000 change orders so that every possible "Buck Rogers gadget" as it is developed can be included. Thus, the development time has lengthened for each succeeding generation of weapons systems. For example, the Polaris A-1 took 5 years, the Polaris A-3 took 6 years, the Poseidon C-3 took 9 years, and the Trident C-4 will take about 11 years! Low-cost estimates are encouraged in order to get R&D programs through the approval and budget process, and money is spent and results accepted whether or not a quantified strategic or tactical combat need exists.

There is the lack of competitive procurement as required by enacted legislation. Only about 11 percent of DOD's procurement dollars are spent under the competitive procurement method, thereby driving procurement costs upward.

The DOD has placed its priorities and funds in areas of R&D and the procurement of weapons systems, neglecting the logistical support for these systems for many years. The 82nd Airborne Division, the Army's premier combat outfit, frequently failed to submit requisitions for material that was sorely needed due to the fact that sufficient Army O&M funds were not available notwithstanding billions of dollars unobligated and unspent.

The Army has requested $869 million in fiscal year 1982 to procure 600 Infantry/Cavalry Fighting Vehicles (IFV/CFV). A premature decision to type-classify and produce these expensive multipurpose vehicles has resulted in vehicles produced which will not effectively meet requirements. Production problems and changes in tests required to assess doctrine, tactics, vulnerability, and supportability have delayed planned achievement of an initial operating capability by more than 1 year and will probably result in costly design changes and additional program delays.

Development of the PATRIOT air defense missile system continues to progress under constrained conditions pending the results of DOD directed tests. The PATRIOT force included in Army's air defense plan does not meet all of the Army's D-day requirements, and recent studies show this need can be met by a number of options. If the PATRIOT is chosen as the option, production costs can be reduced and delivery can be expedited by increasing the number of units produced each year.

The concept of a Rapid Deployment Joint Task Force has evolved from a force of light divisions capable of rapid response to contingencies throughout the world, to a very costly, unified command for Southwest Asia. Program costs are currently estimated at $17 billion but will likely be higher; yet there is no approved operational plan in existence as yet for the RDJTF.

The primary constraining factor on the RDJTF's potential for success is transportation, especially the woefully inadequate airlift. Planning for the Maritime Prepositioning Ships program, as well as sealift support, in general, in many instances appears to consist of ill-conceived, urgency driven, stop-gap measures that either do not fulfill requirements or are contrary to them. Duplicative and potentially costly communications planning shortfalls are also in evidence.

Military spending in preparation for chemical warfare has been limited in recent years to protective equipment. The planned fiscal year 1982 procurement of modifications to warning devices presently in the U.S. inventory at a cost of $67 million. A less expensive modification kit is available which would result in an initial procurement savings of approximately $57.8 million.

The full cost of the proposed B-1 LRCA program will be considerably more than the "baseline" cost of $19.7 billion. The aircraft will have less capability than directed by Congress, and the highly concurrent schedule for development and procurement poses significant risks to timely deployment and adequate support of the system.

The Army has requested over $2.2 billion this year to procure M-1 tanks. This tank still has design deficiencies, fails to meet several requirements pertinent to maintainability and supportability, and actual production continues to lag far behind previously planned and funded delivery schedules.

A decision by the Navy to remove the automated propulsion control system from TARAWA Class LHA, amphibious assault ship (installed at great cost), will cost the taxpayers an additional $30 million.

Deficiencies in the Target Acquisition Display System of the Army's new AH-64 Attack Helicopter (the cost of which has escalated more than 100 percent since the award of the maturity development contract) make the capability of the entire weapon system questionable.

Contractors' pyramiding of prices for components and parts is costing the taxpayers millions of dollars annually. In one instance, a part purchased by DOD from a prime contractor at a cost of $199,405 had been obtained by this prime from a subcontractor at a cost of only $9,770. After passing through the hands of several other subcontractors, the cost increase to DOD over the original subcontractor's actual base price was 1,941 percent.

Defense contractors continue to pass unallowable overhead costs on to DOD. Examples of unallowable costs contractors have attempted to hide in their overhead pools include $1,500 for 10 tickets to the premier of the movie "Superman" and $266 for a tour of Tijuana, Mexico. Due to manpower shortages in DOD audit functions, these items were discovered on a sampling basis, and no one knows how many such charges go undiscovered and are actually paid each year.

Post initial provisioning reviews are not being conducted as required by regulation. As a consequence, there is a severe shortage of spare parts, and cannibalization has become a way of life in the field. For example, at RAF Bentwaters in June 1981, the cannibalization rate on the A-10 was 9.7 percent for each 100 sorties flown. This situation is not confined to the A-10 but includes items as uncomplicated as the Army's "off-the-shelf" M-880 Dodge pickup truck.

The implementation by the military services of a strong, workable challenging procedure for requisition of nonstandard and nonstocked items, which they have resisted for years, could save the taxpayers about $141 million annually.

Tens of millions of dollars of inventory losses are due to inadequate supply processes, losses in transit, and theft. For example, in fiscal year 1980, DLA alone experienced a net loss on Government property it handled in the amount of $41.7 million.

The Leader/Follower procurement technique can lead to an increase of competitive procurement and result in savings of hundreds of millions of procurement dollars. The Army's Missile Command used this technique to good effect in the procurement of only three weapons systems and achieved estimated savings exceeding $171 million.

Pursuit of an agressive component breakout program can result in substantial savings in the purchase of spare parts by the military services. One major contractor charged DOD 630 percent more for spare parts than it would cost if these spares had been procured directly from the component manufacturer.

Higher prices are paid for DOD procured items because of erroneous or improper pro-

curement method coding, inadequate or nonexistent technical specification data, and restrictive procurement specifications. The net effect of these procurement practices is an increase in sole-source and/or noncompetitive contract awards.

The military services are paying significantly different and sometimes higher prices to procure the same items. The Army currently has two contracts for the same supply item, one of which is administered in Philadelphia and the other in Dallas. The cost of the item is $29.42 under the Philadelphia contract but $55.00 under the Dallas contract.

The Naval Sea System Command (NAVSEA) continues to practice unsound contracting policies in applying economic price adjustment clauses to overhead. This failure was emphasized to NAVSEA early in this study. NAVSEA's response has failed to reflect an understanding of this deficiency, and they continue doing business in the same old way—compounding the problem. NAVSEA stands alone among DOD agencies in its handling of economic price adjustment clauses.

Problems exist in contracting for engineering, maintenance, technical, and logistic support services because of continuous reliance on contractors rather than DOD personnel. A series of negotiated contract extensions that resulted in the Government paying about $1.2 million more than the going competitive rate for repair services that totaled about $8.6 million.

Neither DOD nor the military services are cognizant of the numbers of persons or costs involved in contractor-supplies technical services or the total effect such services have on the present state of readiness. In 1980, the Logistics Management Institute, an outside study agency, reported approximately 4,500 in-house and contractor civilians provide technical assistance to U.S. forces in CONUS, overseas, and aboard Navy ships. DOD was unable to obtain these figures from internal management systems.

Processes for material obligation validation are inadequate, ineffective, and time-consuming. Requisitions for material no longer required have not been cancelled and, conversely, valid requisitions have been erroneously cancelled—seriously delaying the receipt of needed supplies by combat units.●

GUN CONTROL OVERSEAS

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LEHMAN. Mr. Speaker, an excellent article on the subject of gun control overseas appeared recently on the editor's page of the U.S. News & World Report. I found it very informative and compelling, and would like to share it with my colleagues who may have missed it.

[From the U.S. News & World Report, Sept. 28, 1981]

GUN CONTROLS OVERSEAS

(By Marvin Stone)

A proposed federal law to regulate the ownership of handguns is being pushed toward hearings in Congress. Moreover, advocates of gun control are expected to raise the issue when the President's crime-prevention package, now in preparation, comes up for congressional debate.

To provide a basis for comparison, we asked our correspondents around the world how other countries deal with gun sales. Their reports:

Ottawa. In Canada, all guns must be registered. To buy a handgun, you must get a five-year certificate from the local police, who will check your mental stability and general conduct and ask why you need a firearm. You take the certificate to a dealer and pick out the gun you want. You describe it to the police and if they approve, they give you a certificate to buy it. The dealer checks the permit and makes a record.

London. Owning a rifle or handgun in Britain requires a license renewable every three years. To buy a gun, an individual must apply directly to the chief police officer of the area. Typical of conditions imposed are membership in an established shooting club and keeping the gun and ammunition in the club's security at all times. A license to own a gun is not necessarily permission to carry it around.

Paris. For a handgun under 35 centimeters (about 13¾ inches) in length, you need a permit authorized by the government representative in the locality, who checks your reasons and record. The only people allowed to carry handguns are police officers or, sometimes, persons who transport large sums of money. The penalty for illegal possession is one to three years for the first offense, two to five for the second.

Bonn. Prolonged examination is necessary to get a hunting license, which permits acquisition of a rifle or shotgun. A handgun then is permitted also, to give wounded animals the coup de grâce. The only other ground for buying a handgun is special need such as regular transport of large sums or being a target for terrorists. Weapons must be registered.

Rome. Any Italian without a criminal record can legally buy a gun. Italians buying weapons are automatically registered with the police. To carry a firearm away from home, a second permit is required. A proposal to let only police officers carry guns outside the home was heavily defeated four days after the attempted assassination of Pope John Paul II.

Geneva. Nearly every Swiss home has a rifle or revolver, because servicemen are required to keep their weapons there; abuses reportedly are rare. Licensing and registration are required for buying a personal handgun or other firearm. Sale to ex-convicts, alcoholics and the mentally ill is forbidden.

Stockholm. All sales of firearms are registered, and the police examine every application. Few people own personal handguns. Mailorder guns are banned.

Moscow. Citizens can't legally have firearms without special permission—or hunting knives, either, except in the far North. Hunters in a club can have weapons if they register them with the police and keep them at the club.

Tokyo. Handgun ownership is restricted to a very few types of persons. Police-administered tests and screening of prior conduct have been tightened more and more. License duration has been shortened to three years. Illegal possession draws fines up to $13,000.

Peking. Even air rifles are restricted in the People's Republic of China. The purchase of a firearm requires permission from a work unit and a permit from a security agency. An individual almost never receives a permit for a handgun.●

CUTS IN PUBLIC HOUSING FUNDING

HON. CHARLES E. SCHUMER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. SCHUMER. Mr. Speaker, the Reagan administration's desire to end all subsidies for construction of rental housing for low- and moderate-income families is well known. Less well known but perhaps more damaging is its steady withdrawal of support for an important existing housing resource—the Nation's 1.2 million units of public housing, which provide shelter for over 3.4 million tenants.

Notwithstanding the administration's hook or crook accounting methods, cuts in the operating subsidies and modernization programs, combined with increases in tenant rent payments, will cause very real harm. Tenants who are already stretched thin will be paying more but getting less. Housing authorities will be unable to provide even their current level of maintenance, repairs, and services. Those authorities which are not yet in desperate financial condition will be so soon others will face bankruptcy and the closing of units.

On Sunday, November 15, the New York Times printed a story describing the administration's plans concerning public, housing and the drastic impact that these plans will have. I submit that article to be printed in the RECORD and hope that my colleagues will take the time to read it.

The article follows:

NEW YORK ASSAILS REAGAN PROPOSAL ON PUBLIC HOUSING

(By Lee A. Daniels)

A Reagan Administration plan that would reduce Federal aid for public housing, coupled with rent increases for all 600,000 tenants of the New York City Housing Authority, will have "a traumatic and devastating effect," the agency's two top officials charge.

Joseph J. Christian, the authority's chairman, said last week that the proposed reductions in Federal aid "would severely restrict what we could do across the board."

"Our operations would no longer be recognizable as the program we're running today," he said.

John Simon, the authority's general manager, said the reductions and the increase in rents could result in "great instability and turmoil" throughout the 264 housing projects in the city. The rent increases, which are scheduled to take effect next year, will require tenants to pay 1 percent more of their income toward rental in each of five years.

"It seems they have declared World War III on public housing," Mr. Simon said, referring to Federal officials.

$185 MILLION SUBSIDY LAST YEAR

The two men were reacting to an Administration request to Congress for $1.06 billion in Federal subsidies for the nation's local housing authorities for the current fiscal year, which began Oct. 1. That would be 69 percent of the amount that, according to the Housing Act of 1974, agencies could have expected under a formula established by the act.

Even if Congress should appropriate more that the Administration is requesting, the Administration could spend less.

In 1980, Federal subsidies to local housing agencies totaled $962 million, about 85 percent of what they were eligible for under the established formula. Nationally, the Federal Government provides operating subsidies for 1.2 million units of public housing that shelter 3.4 million tenants.

The Federal subsidy for New York's housing agency last year was $185.2 million, the officials said. They said that left them with a $31 million shortfall, which was made up by reducing numerous services and by leaving 10 percent of the agency's 12,000 staff positions unfilled.

While the subsidy would go to about $204 million under the Administration's request to Congress, the housing agency's increasing expenses and deficit—factors taken into consideration by the 1974 formula—would mean that the Federal aid would be less than Congress envisioned in the Housing Act of 1974.

The Administration's new request for funds was strongly criticized last week at a meeting in Washington of the National Association of Housing and Redevelopment Officials. The group contended that the Federal subsidy should remain at least at 85 percent of the formula, which would be about $1.26 billion.

Philip Abrams, a deputy assistant secretary of the Federal Department of Housing and Urban Development, said last week that the proposed reduction in subsidies could be offset with improved management and larger contributions from state and local governments.

However, public housing officials said it was unrealistic to expect local and state governments, which themselves are financially strapped, to make additional contributions to local housing authorities.

SHARP COMMENTS UNUSUAL

In addition, housing officials in New York City and elsewhere in the nation contend that public housing, from the construction of the buildings to the support of numerous operating programs, has been a Federal responsibility since projects began to be built in the 1930's and that the Government cannot simply walk away from them now.

The sharp comments by Mr. Christian, the New York City Housing Authority chairman, and Mr. Simon, its general manager, during an hourlong interview at the authority's headquarters in Manhattan, were a departure from their usually low-key public stance.

Mr. Simon set forth his views last month in a letter to the Department of Housing and Urban Development, which was later submitted to a Congressional subcommittee. In the letter, Mr. Simon said that the proposed reductions would force the agency "to make the kind of cuts that will lead to a rapid and substantial deterioration of all Federal projects in New York City."

He also said they would produce "tenant unrest in very difficult areas of the city" and lead "to the probability of rent-withholding actions, some legally sanctioned by court orders for lack of services which will further damage the financial viability of the authority."

Specifically, Mr. Christian and Mr. Simon said the proposed reductions would force the New York City Housing Authority to take these actions:

Cut its workforce by 1,200 people, including 200 in management and supervisory positions.

Reduce its 1,400-member police force by 100 officers.

Eliminate half of all painting contracts, now let to private contractors through public bidding, for apartments and public spaces. According to city law, the authority must repaint these areas every three years. Because of a necessarily greater gap between paint jobs, Mr. Simon said, the agency would be "extremely vulnerable to rent abatement claims." a situation that would "further exacerbate its financial conditions by incurring additional legal and administrative expenses."

Eliminate half of all maintenance and repair contracts and purchase of materials for such work.

Eliminate routine replacement of all gas ranges and refrigerators, which are normally replaced on a 16-year cycle.

Close down all community centers, day-care centers, centers and programs for the elderly, and all other tenant and youth programs.

"There's going to be a cumulative impact on our tenants," Mr. Christian said in the interview. "Many of them are being affected by budget cuts in other social service areas. Now they'll see us raising rents while cutting services. It's not going to go over well."

His words were underscored by Harold Pinkney, chairman of the 49-member Resident Advisory Council, the Housing Authority's official tenants union. Members of the council, a volunteer body, are elected by districts from all of the agency's projects.

In a separate interview, Mr. Pinkney—who praised the authority for its current and past work—said the proposed Federal reductions would be "very devastating" for the tenants and the authority.

"Many tenants are stretched thin now," he continued, adding that if the Housing Authority increased rents and cut services, "they're asking for trouble—a citywide rent strike is a real possibility."

Such a situation would represent an extraordinary turn of events for the authority, which is the oldest and widely regarded as among the most stable and best-run public housing agencies in the country.

The popular image of New York's housing projects is represented by such giant projects as the 3,500-unit Whitman-Ingersoll development in Brooklyn or the 2,000-unit Frederick Douglass Houses in Manhattan. Two of these high-rise complexes have more than 3,000 units, eight have more than 2,000, and 63 have more than 1,000 apartments. However, the large majority of the authority's projects are low-rise buildings of less than 700 units each.

In managing this vast enterprise, the Housing Authority collects about 97 percent of the rents due every month—it collected $256.3 million last year—and is generally credited with a good record and you won't be wrong," said Robert Maffin, executive director of the National Association of Housing and Redevelopment Officials, referring to the New York agency. "That's the comment you'll get from any quarter."

Federal housing officials, who have officially commended the New York Authority's management record in the past, recently asked them to help the Chicago Housing Authority revise its management procedures. The Chicago authority, the second largest in the country, has been beset with chronic management and financial difficulties.

Mr. Simon noted that the Housing Authority had a waiting list of about 160,000 people, even though, because of the extremely low turnover in project apartments, in would take them 18 years to get an apartment. The length of that waiting list, he said, "speaks volumes about the need for housing among poor people in the city."

"And yet," Mr. Christian added, the Federal Government "is cutting back on its help. I think they're trying to eliminate Government's responsibility for housing, period."●

DULANEY HIGH SCHOOL STUDENTS VISIT NATION'S CAPITAL

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LONG of Maryland. Mr. Speaker, on Wednesday, November 18, 1981, 230 young men and women from the senior class of Dulaney High School, Lutherville, Md., will journey to Washington for a firsthand look at their Nation's Capital.

These students, lead by Mr. Robert Webster, Mr. James McNamara, Mr. Anthony Capezio, Mr. Edwin Lynch and Mr. Maynard Keadle, will tour Capitol Hill on their own, observe the House and Senate in session, and sit in on committee hearings.

I am delighted these students are taking this opportunity to visit with us, and I hope their interest in our Nation's political process will continue.

Students who will visit us Wednesday are:

Patti Abers, Nancy Aleszczyk, Martha Allen, Bill Auslander, Lisa Allen, Jennifer Azzam, Ruthie Babcock, Debbi Barrett, Michael L. Cirri, Dave Carey, Keith Blades, Jennefer Baer, Bob Adolph, Joan M. Baker.

Dave Bauer, Debbie Bennett, Jeff Bauer, Jim Boulden, Melanie Pefinis, Beth Merlin, Yvonne Beare, Mary Beth Berie, Janet James, Janice Bedford, Pam McDade, Scott Heffner, Charles Brown, Jill Campbell.

Maria Carlucci, Suzanne Cooke, Vance Cole, John Corsi, Laurie McIntosh, Barb Williams, Christina Mosner, Bill Copenhaver, Jamie Flattery, Scott Conewell, Pam Carlson, Karen Conley, Kim Jensky, Steve Marshner, Pat Burton, Missy Hoffman.

Carol Dudley, Karlene Crowley, Melanie Cutler, Larry Detweiler, Barrie Degraw, John DeSantis, Kathy Ehrlich, Ginger Engel, Carol Drussell, Dianne Diehl, Eric Hetrick, John Chlan, Walter Eppler, Nancy Ettenhofer.

John Faillace, Sharon Fleming, Jim Fahey, Chris Cross, Sherri Craig, Kris Ettenhofer, Barbara Cobb, Joseph Gagliano, Bill Schroeter, Harry Walker, Bill Pearce, Don White, Dennis Rice, Ursula Vinson.

Roy Littler, Dereen Schafer, Stephen LaRocca, Amy Funk, Joe Glass, Claire

Foley, Bill Gavenes, Fred Fisch, Nick Garcia, Betty Gladstone, Nick Filipidis, Steve Flemke, Laura Friedel, Guy Garey.

Kyle Grume, Robet Gugerty, John Hammann, Chris Harting, Amy Hempey, Denise Hanna, David Jeter, Adriane Green, Chris Hayes, Lisa Griesbaum, Scott Heffner, Erik Hopf, Lisa Hovermale, Mary Huffman.

Raymond Isenock, Glen Jackson, Jessica Jett, Mike Jones, Jeff Maclay, Lauran Rough, David Langrehn, Alex Inde, Peggie Johnston, Mark Hull, Senda Johnston, Chris Klaben, Karen Johnston, Kathy Hoyt.

Scott Kenney, Jeff Klass, Gretchen Knapp, Glenn Kroneberger, Karen Hotton, Cindy Lederer, Shaune Kellett, Beth Ann Lansinger, Rich Krueger, Craig Landsman, Kris King, David King, Beth Kirchner, Margie Lanzette.

Karen O'Connor, Tracey Schuerbolz, Sandy Rudolf, Kathy Rowe, Cathy Russo, Stacey Shinn, Linda Shirley, Steve Smith, Tom Smith, Joselina Sorra, Matthew Stegman, Erik Stensvold, Renuka Ramaiah, Tom Siedlecki.

Shaida Sina, Kelly Sporer, Linda Singh, Andy Berner, Jaqueline Stepcick, Sheelah Sullivan, S. Wagner, Tiffany S. Tagg, Scott Thilbodeau, Cathy Thompson, Marni Tilrico, Mark Tipmongkol, Michael Valencia, Hector Vinas.

Kenneth Warfield, Maria Voelker, Bob Volk, Ann Wazenski, Shelley Workman, Jeff Zimmerman, Brian Znamirowski, Ted Wollinski, Dave Workinger, Amy White, Karen Zurwelle, Joseph Wynn, Tom Wilkes, Steve Wientge.

Lou Fazio, Claudie Lee, Robert Lee, Lynn Leonard, Kenny Long, Andrew Marley, Amy Marshall, Kelly Lindsay, Lisa Lorenzo, Neil Lewis, Mark Lentz, Soo Lee, Robb Lippy, Mark Mathias, Sondra Lee.

Charles McManus, Tamara McMillan, Scott McQuaid, Jennifer Melcher, Joe Montalbano, Neil Moore, Linda Morgan, Sandy Murphy, Carol Miller, Bonnie Miller, Lisa Miller, Glen Miles, Julie Mordicai, Kim Oliver, Werner Petzold.

Mitchell Platis, Patricia Paresi, Carol Over, John Pearce, Howard Plopper, Tish O'Donnell, Ernie Papaminas, Jayme Poetzman, Kevin Propheter, Scott Richardson, Stewart Riley, Chris Rindone, Woods E. Robinson, Eugene Roth, Marianne Reinhardt.

Neil Nordberg, Donald Roberts, David Rittenhouse, Steven Riley, Kim Rennie, Eileen Quinn, Pam Pozanski, Simone Ryland, Julie Sackett, Mimi Schuerholz, Duane Seibert, Carol Seiders, Marty Ryan, Sean Fealey, Mike Sharkey.●

VARIABLE ANNUITY CONTRACTS AND REVENUE RULING 81-225

HON. RICHARD GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. GEPHARDT. Mr. Speaker, I am introducing legislation today to clarify the tax treatment of variable annuity contracts funded with mutual fund shares. This legislation essentially codifies the result reached by the Treasury Department in revenue ruling 81-225. That is, in order for such variable annuity contracts to achieve tax deferral of earnings under the tax law, the mutual fund shares funding such contracts must not be available to the general public for purchase other than through the variable annuity. While codifying the ruling, this legislation reverses the inequitable retroactive application of the ruling. In addition, the legislation clarifies two technical matters not specifically addressed in the ruling. Under the legislation, investment managers of the assets funding the variable annuity contracts may be unaffiliated with the issuing insurance company and a contract holder may allocate or reallocate contract amounts attributable to him among segregated asset accounts of the insurance company or among subaccounts of one segregated asset account.

Mr. Speaker, I will not take long today to discuss our social security system and individual retirement. Suffice it to say that no one seriously contends, nor was it ever intended, that individuals rely solely on their social security for retirement income. Consequently, individuals must save and invest for their retirement security. The variable annuities which are the target of revenue ruling 81-225 are generally purchased with "after-tax" dollars and any earnings on such accounts are taxed as ordinary income when paid. Additionally, there is no income tax deduction for the purchase amount. Annuities clearly have been, and will hopefully continue to be, an excellent means for middle-income Americans to provide retirement savings. Therefore, although the annuity is purchased with "after-tax" dollars and there is no income tax deduction for that purpose, these annuities remain a viable retirement vehicle because taxation is deferred on the income earned on these invested amounts until eventually paid out to the annuitant. Commensurate with the benefit to the individual from retirement savings, is the benefit to our Nation from the expanding capital formation base. Private retirement savings must be encouraged.

The Treasury and the IRS have been on a 5-year program to substantially restrict annuities as a base for retirement security. In 1977, the IRS released a revenue ruling that was quickly and decisively overturned by a Federal district court. However, due to a technical device, that decision was overturned. The Treasury has recently been attempting to do administratively what they unsuccessfully tried to get Congress to do in 1978.

This most recent Treasury ruling is grounded on a public access policy argument; that is, a person who invests in mutual fund shares through an annuity should not achieve tax deferral if a person who invests directly in the same mutual fund shares is taxed currently. The Treasury ruling is designed to prevent the use of annuities in situations where the capital used to purchase the annuity is invested in an asset that could have been purchased directly without the use of an annuity.

While this latest theory of the Treasury has never before been stated anywhere in the more than 50-year history of the rules governing annuity taxation, my legislation adopts the Treasury's theory. I do this because it is critical that Congress act expeditiously to provide certainty in this area so that companies and consumers alike can make informed and thoughtful financial decisions. Additionally, legislation will insure certainty by clarifying questions that the ruling did not address and are now causing great confusion and uncertainty.

Let me briefly address the other aspects of this legislation. First, my legislation reverses the egregious abuse of administrative discretion concerning the retroactive application of the ruling. Without warning or rationale, that ruling imposes a 1981 tax liability on persons who in good faith and often on the advice of independent tax advisers, purchased these annuities with the understanding that earnings from them would be deferred pursuant to the tax law as in effect for over 50 years.

The public access rationale could not have been foreseen and is contrary to at least three recently published rulings that sanctioned variable annuities where mutual fund shares that supported the variable annuity were also offered through another account to the general public. Further, it will be almost impossible for any insurance company to compute and report the earnings on the annuity as required by the retroactive application of the ruling. In short, the retroactive application of this revenue ruling, based on agency whim rather than clear statutory guidance, is inherently inequitable.

Second, under the Federal securities law, variable annuity contract holders have the right to remove an investment manager. It would be an extraordinarily curious result for the exercise of those rights to lead to a negative tax consequence; nor should the tax law, through administrative action particularly, indirectly repeal our securities laws. Consequently, my legislation clarifies that an independent investment manager is permissible. Of course, my legislation does not allow the contract holder himself to be the investment manager.

Finally, the tax law has for years clearly sanctioned the tax-free—like-kind—exchange of one annuity contract for another. Contract holders wishing to change investment orientation to reflect our ever-changing economic conditions should be able to accomplish this same goal by allocating or reallocating contract amounts pur-

suant to the terms of a single contract without formally going through the cumbersome and expensive administrative aspects of the more formalistic exchange procedure.

In summary, Mr. Speaker, this legislation provides critical statutory guidance concerning the proper tax treatment of variable annuities funded by mutual fund shares. In concurrence with the approach already taken by the Treasury, the Congress is establishing as a policy matter through legislation, that the earnings on these annuities should not be tax deferred unless the mutual fund shares are not otherwise available to the public. However, while the legislation adheres to the result reached by the Treasury, the retroactive application cannot and must not be condoned.

I urge all my colleagues to support the rapid enactment of this legislation.

Thank you, Mr. Speaker.●

HANDGUN BODY COUNT

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LEHMAN. Mr. Speaker, the handgun body count for the month of September was 690. That is more than all the people killed in Japan, Great Britain, Switzerland, Canada, Israel, Sweden, and West Germany during the entire year of 1980. The U.S. News & World Report recently published a report of the regulations regarding gun sales in other countries, which may help to explain why their fatalities are so few in comparison to our own.

The list follows:

HANDGUN BODYCOUNT—SEPTEMBER 1981

ALABAMA (2)

Gertha Davis, Sandy Portis.

ARIZONA (11)

Irene Barley, Michelle Brevaire, Julio Castillo, Maria Castillo, Ernest Cleveland, Johnny Douglas, Susie Douglas, Kenneth McGruder, Leon Morgan, Gary Rushing, Huga Torres.

ARKANSAS (3)

Robert Martin, Gregory Snodgrass, Rose Webster.

CALIFORNIA (80)

Mark Anthony, Apolonio Baragas, Kenny Bolen, Linda Brazel, Frank Brooks, Frank Bustos, Richard Carrington, Willie Citizen, Cecil Connors, Tony Cordero, Fairbank Crawford, Frances De Pold, Lance Dugan, Charles Eaton II, Victor Espinosa, Joe Eyerman, Charles Eyler, Joseph Fedenisn, Fabriel Flores, Shirley Franklin, Diana Gallardo, Theodore Harper, Anthony Herrera, Buella Hopson, Vanessa Iberri, Shirley Jessup, Rodney Kiest, Carl Kilborn, Mrs. Bertie King, Bertie King, Glen King, Robert Labuzan, David Ledesma, hector Leroy, Manuel Leyva, Greg Lock, Betty Loree, Robert Labuzan, Larry Manuel, Lonnie McDermott, Thomas McMillan, Pierre Middleton, Jacob Monroe.

Mary Monroe, Bryan Morgan, Manuel Nazario, James Neasham, Loraine Neasham, Houston Newton, Edward Parra, Clayton Peoples, Luiz Pino, Benny Plue, Carroll Prier, Marcos Quintana, Fernando Ramirez, Javier Ramirez, Peter Reyes, Jose Rodriguez, Richard Seabridge, Johnny Smith, Roy Smith, Arthur Stone, Vivian Stringfellow, John Taylor, Robert Thorpe, Jesus Valdez, Mario Vasquez, Adolpho Velez, Cynthia Warden, Everett Washington, Jr., Stephen Williamson, Larry Wood, Francisco Zamora, Unidentified male, Unidentified male, Unidentified male, Unidentified male, Unidentified male, Unidentified male.

COLORADO (13)

Felix DeLemma, Brenda Ford, David Goddard, Grace Goddard, Marie Greene, David Hines, K. S. Kafka, Shanon Kennedy, Jacqueline King, Chester Moody, Helena Myer, Betty Nelson, Lorna Stiles.

CONNECTICUT (5)

Gurtaili Heri, Frank Piccolo, Olin Robinson, Vincent Roccisano, John Wrabel, Jr.

DISTRICT OF COLUMBIA (3)

Khalid Muhammed, Louis Smith, Unidentified male.

FLORIDA (57)

Wilgun Alexis, Cecilia Agra, Nathaniel Broom, Luther Bryant, Dennis Butterworth, Rafael Camacho, John Camp, Pable Correa, Narciso Cuevas, Edward Davis, John Davis, Amelia Exposita, Conrado Exposita, Gustavo Fernandez, Gerald Forsyth, Blanche Gamble, Nestor Garcia, Jacqueline Garganus, Charles Garrett, William Genco, Thomas Gorman, Orlando Hernandez, Kevin Hyatt, Sherry Hyde, Joseph Mandell, Barbara Miles, John Niemi, Dr. Juan Ocana, Joseph Oliveti, Paul Plichta, Luis Quiala, Marsha Rigby, "Roberto", Erasto Sanchez, David Santiago, Johnny Stokes, Carlos Sueira, Thomas Sullivan, Tommy Thomas, George Tullis, Sr., Thomas Turner, Ed White, John Williams, Louise Wilson, Willie Woody, William Wydra, Unidentified female, Unidentified female, Unidentified female, Unidentified male, Unidentified male, Unidentified male, Unidentified male, Unidentified male, Unidentified male, Unidentified male.

GEORGIA (8)

Amos Bonner, Tony Brown, Richard Garcia, William Greer, Henry McLemore, Jr., David Plair, Jerry Washington, Unidentified male.

HAWAII (2)

Evagelia Tuiloma, Unidentified male.

IDAHO (4)

Pedro Martinez, Martin Vasquez, Richard Whitacre, Unidentified male.

ILLINOIS (89)

Pable Acevedo, Anthony Alejandro, Patricia Avery, John Baker, Frank Barajas, Dennis Batts, Carrie Bell, Paul Benifield, Gregory Brown, Nancy Bryant, Margaret Carr, Leroy Carter, Nichlas Chomor, Chikyu Chung, Dennis Clark, Gregory Clark, Morris Connor, Eldra Danner, Jr., Frank Depasquale, Keith Dicks, Timothy Dongan, James Dunlevy, Gregory Enright, Frank Ensinger, Ernest Felix, James Flowers, Harold Freeman, Charles Garrett, Carl George, Juan Gomez, Baby Girl Gray, Alejandro Guman, Andrew Gyce, Greg Hardy, Darrell Harris, Percy Herron, Andre Jacobs, Timothy Jenkins, Bernard Johnson, Cynthia Johnson, Derrich Johnson, Donald Johnson, Glen Johnson, Corle Jones, Jackie Kendall, Hammond Lavois, James Lewis, Sean Malone, Helga Marschall, Calvin Maxwell, Jerry Mayberry, Michael Makler, Albert McAfee, Kevin Miller, Mike Morales, Thomas Morgan, Jessie Myers, Willie Myers, Emma Oliver, Lee Pearce, Sylvester Peck, Robert Peretti, Miguel Quilos, Jose Ramos, Edgar Richmond, Edwin Roman, James Rosenborogh, William Rufus, Sylvester Rusin, Sebley Russell, Michael Ryan, David Serrano, Roy Simpson, Eva Smith, Nehamon Smith, Robert Smith, Willie Tigner, Augustine Torres, Jose Trinidad, Sreekanth Varma, Wilfredo Vasquez, Muriel Ward, Richard Wells, Dwight White, Alicia Woodridge, Abelardo Zirondore, Unidentified male, Unidentified male, Unidentified male.

÷

MOBILIZING THE AIRWAVES—FREEDOM'S CHALLENGE TO TOTALITARIANISM

HON. JOHN LeBOUTILLIER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. LeBOUTILLIER. Mr. Speaker, America, alone among all nations of the world, has established freedom as a fundamental right bequeathed to all men by their Creator. "We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness." Even before independence, freedom was on John Adams' mind when he wrote in 1765 that the settlement of America constituted "the opening of a grand design in Providence for illumination of the ignorant, and the emancipation of the slavish part of mankind all over the Earth."

The very essence of the American Revolution was the founding of freedom and the establishment of lasting institutions to guarantee the rights of freedom and citizenship. The depth of this commitment lies in the fact that, if a government becomes destructive of freedom, one of the rights of the people is to abolish such a government and replace it with a new government most likely to effect the safety and happiness of the people.

Thus, freedom was not viewed as a right pertaining to Americans alone, a phenomena relative to a country's specific culture or history. Rather, the Founding Fathers rightly judged freedom as a fundamental right visited upon all men by their Creator and, as such, rooted by that Creator in the very nature of man. It was, in short, an "inner measure" of man's ultimate purpose, and all cultures and histories were to be judged by the extent to which they would contribute to its realization.

In stark contrast to this tradition is that system of terror given birth in the Soviet Union which seeks to destroy the very soul of man. November 7, 64 years ago, marks the birth of the "Great October Socialist Revolution." Thus began a metamorphosis so complete and so sinister as to enslave an entire people. With 60 million innocent victims in its wake, this revolution swiftly emerged as the most morally abhorrent and repressive system ever to darken and stain the pages of human history.

Today, the Soviet Union is not simply a state. It is a "prison of peoples," dedicated to the final eradication of the Judeo-Christian way of life and the sacred values on which it rests. It is the enemy of all people and the captor of each who would be so unfortunate as to come under its sway. It is, in short, the enemy of the eternal basis of the spirit—freedom.

Throughout the world, the Soviet Union is conducting one of the most sophisticated disinformation efforts the world has ever known. It makes use of pamphlets and reviews, of cinema, theater, and radio, of schools and universities. Little by little, it penetrates all classes of people and even reaches the more intellectually advanced of the community with the result that few are aware of the poison which increasingly pervades their minds and hearts. Aware of the universal desire for peace, Soviet propagandists pretend to be the most zealous promoters in the movement for world peace. At the same time, they stir up class warfare in small villages and towns throughout the underdeveloped world, causing suffering and death. Knowing their system offers no internal guarantee of peace, they have recourse to unlimited armaments. Under various deceptive names, they establish organizations and periodicals with the sole purpose of carrying their ideals into quarters otherwise inaccessible. They worm their way into freedom-loving organizations and, without receding from their subversive principles, they invite free men to collaborate with them in the realm of so-called humanitarianism and charity.

America's most powerful weapon against the Soviet system is the power of the truth. With an improved Voice of America, Radio Free Europe/Radio Liberty, and most recently, Radio

Marti, America would have the means to transmit the truth, unhindered by totalitarian instruments of fear and repression, to all the enslaved peoples of the world. The remarkable success Radio Free Europe has had in unifying the Polish people serves as a vivid reminder of this power.

The power of truth could, over time, create "Polands" throughout the Soviet orbit, including the Soviet Union itself. It could unravel the Soviet Empire without a single American boy going off to war.

In an interview which I recently conducted with Alexandr Solzhenitsyn, he complained that Voice of America broadcasts were deliberately toned down so as not to be damaging to the Soviet leadership. He said:

Your radio broadcasting does not provide the need spiritual help for people. This is one aspect. The other one—you sell yourselves on a lower level than you really are. You—you do harm to yourselves. Thirdly, you limit even very ordinary information on current events. In foreign policy, you deal with sources very gingerly, and in a very circumspect manner, like Afghanistan.

In Frankfurt, Germany there is an emigre publication ("Pasev") being published, and it—it teems with very valuable data on Afghanistan, because its staff members go to Afghanistan and meet with Afghanistan partisans.

But the Voice of America will never lower itself and use their sources. In fact, instead of giving us news items, they help us toward ignorance—toward disinformation—and this is one of the basic mistakes and shortcomings of the Voice of America, because they are affliliated with the State Department, and they have acted in a way, as to never violate State Department policy. Therefore they give us stones instead of bread.

In a study entitled "Mobilizing the Airwaves: The Challenge to the Voice of America and RFE/RL" published by the Heritage Foundation, the current status of the radios and how to increase their effectiveness is examined. The author, Mr. Paul Olkovsky, research assistant for the Heritage Foundation, correctly underscores the fact that the last 10 years have taken their toll on RFE/RL and VOA. With the pursuit of detente and the proclamation that America must get over its inordinate fear of communism, the radios have been seriously underfunded and allowed to lapse into technical obsolescence.

Moreover, Mr. Olkovsky points out that well-deserved criticism has been directed particularly against the Voice of America because of the nature and quality of its programing. Quoting Ludmilla Alexeyeva, a noted Soviet dissident who was a VOA listener for over 20 years, Mr. Olkovsky states: "VOA's broadcasts are frequently boring . . . politically acute topics, which other radio stations are discussing, are avoided. Very often facts, unpleasant for the Soviet authorities, are either hushed up or smoothed over."

I commend this study to my colleagues, part I of which is printed below. Parts II and III will follow on consecutive days:

MOBILIZING THE AIRWAVES: THE CHALLENGE TO THE VOICE OF AMERICA AND RFE/RL

INTRODUCTION

For tens of millions of East Europeans, the most reliable information about their own country comes from outside. Each day they listen—often secretly—to the radio broadcasts beamed from the West. No sources of information are more important to them, or to U.S. interests, than the Voice of America (VOA) and Radio Free Europe/Radio Liberty (RFE/RL). The radios broadcast around the clock in some forty languages and their signals reach significant portions of the western Soviet Union and its European satellites. Without these programs, Poles certainly would not have been informed of the momentum of the Solidarity workers' movement, nor would other East Europeans have known of its existence.

It is clearly in the national interest of the United States that these stations continue to operate. As the peoples under Communist domination are informed about the realities of their governments and the nations of the West, they are less likely to be misled by Party propaganda. The Soviet Union pays tribute to the power of these programs in its own way by spending a tremendous sum to jam them.

Yet the radios are in danger at home. During the detente era, they were seriously underfunded and needed technical improvements were not made. In view of the potential these stations hold for American security policy, it is important that this trend be reversed. This study examines the current status of the radios and how to increase their effectiveness.

THE DECLINE OF THE BROADCASTS

The last ten years have taken their toll on RFE/RL and VOA. With the pursuit of "detente" and the proclamation that America must get over its "inordinate fear of communism," the radios have been seriously uderfunded and allowed to lapse into technical obsolescence. Efforts to make VOA programming as bland as possible have eroded employee morale. While the Voice of America, an agency of the U.S. government, and Radio Free Europe/Radio Liberty, a private corporation funded by the U.S. government, have differing missions, the inherent difficulties of broadcasting to the Eastern Bloc are similar.

Increased funding is urgently needed to modernize equipment, particularly to combat jamming by the Soviets and to extend the broadcast signal to regions not now reached. Programming must be more flexible to adapt to audience circumstances and interest. Staffs need to be increased, while security must be provided when personnel occupy vulnerable posts abroad.

HISTORY AND CURRENT OPERATIONS OF RFE/RL

Until 1976, Radio Free Europe/Radio Liberty functioned as two completely separate organizations. Radio Free Europe began broadcasting in July 1950 in the wake of the Berlin Blockade and the Communist seizure of power in Czechoslovakia. After the Hungarian Revolution in 1956, accusations arose that inflammatory broadcasts by Radio Free Europe might have misled the people of Hungary into believing that the United States was ready to intervene on their behalf. Although these allegations were unfounded, Radio Free Europe modified its broadcasting policy; it became a surrogate free press for the countries of Eastern Europe.

Radio Liberty began broadcasts to the Soviet Union as Radio Liberation in January 1951. It was then a part of the "American Committee for Freedom of the Peoples of the U.S.S.R., Incorporated." The Committee's main activity was sponsoring shortwave broadcasts by recent emigres. Like Radio Free Europe, Radio Liberation's policy evolved from broadcasting quasi-wartime propaganda to providing a "home service" station that filled the Soviet people's need for information. This gradual shift in emphasis led to changing the name of the station to Radio Liberty in 1963.

Radio Free Europe and Radio Liberty are unique in international broadcasting. They operate in much the same manner as the broadcast media in the United States, providing international news and commentary; but they supplement this by reporting and interpreting events in a manner understandable to Soviet or East European citizens. Correcting misinformation or expanding on the partial information given by the official Communist media are also integral parts of their programming.

When covert funding of Radio Free Europe and Radio Liberty by the Central Intelligence Agency was revealed in 1970, President Nixon was pressured to shift appropriation authority to Congress. In 1972, he established the "Presidential Study Commission on International Broadcasting" to examine whether Radio Liberty and Radio Free Europe should continue to receive U.S. funding and support, and what form such funding should take, or whether the stations should be shut down. The Chairman of the Senate Foreign Relations Committee, J. William Fulbright, led the attack against the radios and branded them "relics of the Cold War."

The Commission, chaired by Milton S. Eisenhower, published a report to the President in 1973 titled "The Right To Know" In which it concluded that:

"* * * the Commission feels that the use of United States Government funds for Radio Free Europe and Radio Liberty should be put into proper perspective. It is our conviction that the special contributions of Radio Free Europe and Radio Liberty to a better understanding by citizens of the Iron Curtain countries of what is happening in the wider world and their own countries have an indirect but very appreciable long-term effect. Hence, the cost of the radios cannot be considered separately from our nation's total cost of working for peace and deterring agression. Over a long period of years, the contribution can obviate military expenditures many times greater than the broadcasting costs. Contrariwise, elimination of the radios could lead over time to increased military costs."[1]

The Eisenhower Commission suggested that a "Board for International Broadcasting" be created. In 1973, Public Law 93-129, later amended after the merger of the two radios in 1976, established the Board for International Broadcasting "to review and evaluate the mission and operation of RFE/RL, Incorporated, and to assess the quality, effectiveness and professional integrity of its broadcasting within the context of the broad foreign policy objectives of the United States."[2] The BIB is composed of

[1] "The Right to Know," report of the Presidential Study Commission on International Broadcasting, 1973, p. 56.

[2] The Board for International Broadcasting, sixth annual report, 1980, p. 1.

five voting members appointed by the President to fixed three-year terms and two ex officio members (the chief operating executive of the radios and the Chairman of the Board of RFE/RL). It handles the funding for RFE/RL and acts as a coordinator between the radio and the executive and legislative branches of the U.S. government.

Today, Radio Free Europe/Radio Liberty, Incorporated, broadcasts over 1,017 hours weekly in six major languages of Eastern Europe and fifteen languages of the Soviet Union. Most of RFE/RL program operations are based in Munich, West Germany, but transmitters broadcast from Spain and Portugal, and correspondents report from several capitals of Europe. RFE/RL has studios, administrative offices, and programming facilities in New York City and Washington, D.C. Its staff numbers 1,662 worldwide. Its FY 1981 revised budget is $97,495,000 at the exchange rate of 1.74 Deutsche Marks to the dollar, including $3,000,000 in emergency funds should the exchange rate fall below DM 1.74.

Besides broadcasts to the Eastern Bloc, RFE/RL operates the largest private research facility in the West concentrating on Soviet, East European and communist affairs. RFE/RL estimates that it reaches an audience of 32 million East Europeans and 14 million Soviet citizens. Constant Soviet jamming prevents millions more from receiving the broadcasts.●

AMENDMENT FOR DEFENSE APPROPRIATIONS

HON. ED WEBER

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. WEBER of Ohio. Mr. Speaker, I am submitting for the CONGRESSIONAL RECORD an amendment I intend to offer to H.R. 4995, the defense appropriations bill. Section 778 of this bill limits members of the National Guard, the Air National Guard, and other Reserve units in the amount of drill pay which they may collect for the time they spend fulfilling their commitment to these units if they are also employed as technicians by these units.

This bill unfairly discriminates against this group of Federal employees, but no others. In no way do we limit the ability of other Government employees to collect drill pay for the time they spend in the Guard on weekends, yet we are limiting this one group because they are employed as technicians.

At the same time that the Federal Government is actively encouraging private sector employers to cooperate in enabling their employees to serve as members of the Guard, we are making it harder for a very select group of Federal employees to serve as "weekend warriors."

Therefore Mr. Speaker, I encourage all of my colleagues to join me in deleting this section which unfairly places a pay cap which discriminates against one select group of people.

AMENDMENT

Amendment to H.R. 4995, as reported offered by Mr. WEBER of Ohio: Strike out section 778. Redesignate succeeding sections accordingly.●

"CASEIN LOBBY"

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. FRENZEL. Mr. Speaker, on November 8 the Washington Post printed an excellent article regarding lobbying efforts in behalf of legislation to curb casein imports. The article very aptly points out the folly of pursuing a protectionist avenue which would likely have no positive impact on the dairy farmers it is meant to assist.

There appears to be no indication whatsoever that lower casein imports would encourage casein users to use nonfat dry milk as a substitute. More likely, rather than pay premium prices for this sort of substitute, users would turn to less costly alternatives.

Further, limiting casein imports would have a disastrous effect on our efforts to encourage the European Community to make some less protectionist changes in its own central agriculture policy. It is petty hard to convince our trading partners to lower their trade barriers when groups like these are trying to raise ours. I urge my colleagues to examine the article as an example of an interesting, unusual, and apparently painless, lobbying effort.

HOW A LOBBY MILKS A NONISSUE TO STAY ALIVE

(By Robert G. Kaiser)

In the gallery of dubious issues invented in Washington, let history make room for casein, a substance that seems ideally suited for the conversion of molehills into mountains.

Casein is milk protein, and it is a marvelous product—the dairy cow's answer to Kryptonite. It is used to make pharmaceuticals, glue, paper coatings, coffee whitener, artificial whipped-cream topping, baby formula, imitation cheese and probably the occasional kitchen sink.

Casein also makes a big political furor, thanks primarily to the dairy lobby, which seems determined to gain a symbolic victory on casein simply to demonstrate it can win on some issue. Any issue.

Hundreds of thousands of taxpayers' dollars have already been spent investigating casein. Now President Reagan's secretary of agriculture wants to cut the import of casein by half, a move his own department says would cost U.S. consumers $115 million.

Reagan has gone along by asking for yet another government study of casein, which will cost tens of thousands of dollars more. So tomorrow morning the International Trade Commission, the government agency empowered to investigate charges of unfair trading practices, begins this latest inquiry.

The story of casein is an example of the way lobbyists an members of Congress can seek out issues that might make them look good with voters at home and with the clients who hire them to influence government decisions. Import restrictions on casein would not measurably improve any dairy farmer's standard of living, but the lobbyists and some members of Congress have been working for such restrictions as though they were crucial to the farmers' survival.

Among casein's many unusual qualities is this: None of the stuff is "Made in U.S.A." This country is by far the world's leading producer of milk, but the government's dairy price support program does not cover casein. Therefore producers would lose money if they manufactured casein, a product that comes from the same milk curds that go into cottage cheese. So all the casein used here must be imported.

That's the rub. America is a free-trading nation in principle, but not in agricultural products. Few agricultural commodities and no dairy products can come into this country freely, but casein is officially categorized as an industrial, not an agricultural, product. There is no limit and no duty on its importation, and it comes in at a cheap price compared to other forms of milk protein.

On the basis of these facts, the American dairy industry, and particularly its representatives in Washington, have decided to make a big—yea, an enormous—deal out of casein.

The principal figure in this effort is Patrick B. Healy, secretary of the National Milk Producers Federation. Healy contends that imports of casein "must be controlled" to preserve markets for U.S. dairy products and to reduce the cost of the government's dairy price support program. Healy has been fighting for restrictions on casein imports since Earl Butz was secretary of agriculture.

The dairy industry's friends in Congress have been echoing Healy's certainty about the ill effects of dairy imports as if they had read the message on a new stone tablet, "Look at casein," shouted Rep. James M. Jeffords (R-Vt.) in a recent House debate, "If we just eliminate casein imports, we do away with 3.3 billion pounds" of milk surpluses.

The dairy industry argues that if casein imports were limited, users would turn to nonfat dry milk as a substitute, increasing consumption of that product. That would reduce government surpluses of nonfat dry milk, the industry says, thus lowering the cost of the dairy price support program.

If the program can be made cheaper, the industry argues, there would be less justification for holding down the basic dairy price support.

This is the industry's line. It has all the intellectual sinew of a cover story. In fact, dry milk cannot be used for most of casein's uses. There wouldn't be much substitution, according to all the government studies, and according to industry officials, too. The suspicion is irresistible that the dairy lobby in Washington is primarily interested in casein as a fight it might win.

"It's a classic example" of the way lobbyists look for issues to score points on, according to Ellen Haas of the Community Nutrition Institute, a "public interest" lobbying organization. "They had to win on something."

It is indisputable that the dairy lobby has not been having one of its best seasons. Tough and resourceful as ever, it has been unable to avoid the repercussions of huge government-owned surpluses of dry milk, cheese and butter—surpluses produced in

part by the lobby's past successes in raising basic dairy price supports.

This year dairy farmers are hurting. Their prices are not keeping up with inflation, and their real incomes will fall. Healy and others in Washington who have to explain these unhappy developments to their troops presumably would like to have a victory on casein to balance the bad news.

As an official of one of the big dairy co-ops put it, action restricting casein imports would have "a tremendous psychological impact. It's all we've got. You've got to get something out of Congress."

One of the dairy lobby's traditional advantages has been tenacity, and the casein crusade is no exception. Healy has been pressing it for years, and in 1979 he persuaded the House Ways and Means Committee to ask the International Trade Commission to investigate the impact of casein imports.

Unfortunately for the dairy lobby, the ensuing study did nothing to bolster its case. The ITC concluded that there was "virtually no relationship between imports of casein and the purchases of nonfat dry milk under the price support program." The commission found that powdered milk could not be substituted for most uses of casein, which depend on its unique physical properties.

The dairy lobby rejected that finding and began to press the Carter administration to conduct another study, this one inside the Agriculture Department. Bob Bergland, Jimmy Carter's secretary of agriculture, held the dairy lobby off for months. But in the spring of 1980, shortly before the important Wisconsin ("America's Dairyland") primary, he put the new study into motion. "We can't prove there was a connection between the two events," a smiling civil servant at the department said later.

Last June the department's study was published. It concluded that the Trade Commission had been correct—neither import quotas nor a duty on casein would significantly affect consumption of powdered milk.

Under the law, it would be possible either to reduce imports by up to half the amount imported in a representative recent period of time, or impose a duty of up to 50 percent of the value of the casein. The Agriculture Department's study concluded that a quota roughly cutting imports in half would convince most users of casein to do without the stuff or find substitutes based on soybeans, not powdered milk. The report estimated that just 10.3 million additional pounds of powdered milk would be consumed each year. (The government currently has 800 million pounds of powdered milk in storage, and is adding millions more each week.)

A 50 percent import duty would result in "no increase in the use of domestically produced skim milk solids, the report said. Either move, it said, would add tens of millions of dollars to the retail costs of products based on casein.

Despite the real conclusion that no legal quota or duty could significantly affect the consumption of powdered milk, the lobby preferred this sentence in the report:

"If no casein had been imported in 1980, commercial disappearance (that is, use) of domestic skim milk solids would have increased by the equivalent of 333 million pounds of nonfat dry milk. Thus, government purchases of nonfat dry milk would have been 333 million pounds lower, saving about $300 million on Commodity Credit Corp. outlays (for the purchase of surplus milk)."

Kenneth Clayton, author of the report, admitted in an interview that this hypothetical proposition has no basis in reality, not least because there would be no legal way to block all imports of casein, and even the dairy lobby says it doesn't want to do that. (Much casein is used for pharmaceutical products and baby formula for children who can't digest milk.)

Moreover, there would never be full substitution of milk for casein. Clayton said of this figure, "Not that it was very realistic . . . but we needed a base."

Realistic or not, friends of the dairy industry like the number Rep. Thomas E. Petri (R-Wis.) used in a recent House debate. Noting that the U.S. imported 152 million pounds of casein last year, "the equivalent of 333 million pounds of nonfat dry milk," Petri told the House: "All or most of this amount of milk may have been sold on the commercial market if it were not for the imported casein."

Later Petri was asked for the basis of this contention. "It just says 'could have,'" Petri said of his statement on the floor. He said he knew the Agriculture Department had concluded that milk could not be substituted for casein, "and that could well be true." He was speaking of a hypothetical case in which the government banned all casein imports, he said.

Sen. David Boren (D-Okla.) made Petri's use of figures look conservative in a Senate debate. Last year's casein imports displaced "upward of 4 billion pounds of domestically produced skim milk," Boren declared solemnly, offering no rationale whatsoever for his assertion.

In private conversation, some dairy lobbyists argue that the real problem with casein is prospective—that its use is growing fast and could take off if not controlled. But the facts don't sustain this contention either.

This year, it appears, casein import will total about 135 million pounds, some 17 million pounds less than last year and roughly the same level as in 1970. Casein imports jump up and down from year to year.

It is true that an increasing amount of casein goes into food products, particularly imitation cheese. Most of that apparently ends up in pizza.

Imitation cheese made with casein is cheaper—and much less tasty—than the real thing. There is a growing market for the stuff, part of it for straight imitation cheese eaten by people on diets restricting their intake of animal fats.

However, it isn't easy to make a case that casein imports—or anything else—is holding down consumption of real cheese. Americans are on a cheese binge. From 1970 to 1980, consumption of real cheese in this country grew from 2.3 billion to 4 billion pounds. This is the only segment of the dairy industry that is booming.

The dairy lobby and its friends in Congress seem to realize that they cannot make too strong a case for a significant cut in casein imports, so they have recently taken a different tack.

Originally the industry and its supporters sought a "zero quota" in casein imports, as Healy noted in a recent interview. (Now he says charges that the industry wants to exclude all casein imports are "ridiculous, ridiculous.") Then the lobby went for a quota that would cut imports by more than half.

But in September, Sen. John Melcher (D-Mont.), one of the dairy lobby's staunchest allies, introduced a new resolution in the Senate calling for a quota of about 140 million pounds a year, the average level of imports over the past five years. The Senate actually endorsed this proposal in a non-binding attachment to its version of the farm bill.

Asked why the industry had modified its objective, Healy said it was a matter of "what can be obtained." Neither house of Congress appeared willing to go along with deeper cuts, Healy said. "It's extremely important that we do cap these imports at some point," Healy added. "More and more erzatz foods are being developed from it," he said, noting that this seemed to be a pattern in other food stuffs, too. "These foods that we have eaten for millenia, that have nurtured us to where we are, should not be tampered with," Healy added.

This latest gambit leaves the industry in a quandary. It sought an International Trade Commission investigation on the ground that the current level of imports "materially interferes" with the dairy price support program. Now the industry seeks an import quota that would preserve the current level of imports.

This is one of the issues the ITC will have to deal with at the hearing that begins tomorrow morning.●

DISASTROUS NATURE OF FEDERAL INVOLVEMENT IN MEDICAL CARE

HON. RON PAUL

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. PAUL. Mr. Speaker, the last few weeks and months have brought an unprecedented number of incidents which illustrate the disastrous nature of Federal involvement in medical care.

From the relatively benign Burton-Parsons saline solution scandal to the deadly omissions of the National Cancer Institute that apparently contributed to the premature deaths of innocent children, the record of Government involvement in medical care is uniquely an abysmal one.

Those of us in the medical profession know of too many bleak examples, and now one of the bleakest has been brought prominently to the attention of the American people. I am referring, of course, to the recent admission by the National Heart, Lung, and Blood Institute that a drug called propranolol—which would have saved tens of thousands of American lives had it been available—has been and is still being banned for no reason by the FDA. The effectiveness of propranolol has been demonstrated beyond any doubt, it has been in use in Europe for 16 years, and yet Americans are still being cruelly denied its life-saving benefits.

Propranolol is a stunning example, but sadly it is not an isolated one. The FDA routinely deprives people of their full range of options—and sometimes denies them life as a result. The Health Resources Administration tells hospitals what equipment and services they may offer, thus denying local

physicians and administrators the chance to serve the communities they know.

Medical research has also been co-opted by Government, and the effect has been a narrowing of the scope of the research. Increasing Federal assumption of medical costs has allowed prices to skyrocket, bringing yet another call for Federal cost containment.

Often we physicians fall prey to the kind of thinking that perpetuates these problems: Namely, that we can somehow get Federal money while avoiding Federal interference. But the truth is that Federal financing inevitably spawns stifling Government control.

The Wall Street Journal, in a recent editorial, suggested that perhaps we do not need an FDA. I would go further. I would say we need to get Government out of medicine completely.

Missed opportunities, needless suffering, and loss of life are the tragic but inevitable consequences of Government meddling in medicine. The truth is plain: The Government has done nothing whatsoever to improve the quality of medical care in the United States. In fact, the opposite is true; Government-mandated obstructionist policies have led only to suffering and death.

The sorry state of national health care in Britain—an article about which I am reprinting below—serves as a clear and frightening guide of where our own future may lie. Medical care is far too important to be left to the control of Government planners and regulators, no matter how well intentioned.

The American people are being savaged by Government blundering in medicine; lives are being destroyed. We simply must put a stop to this indefensible outrage.

The article follows:

[From the New York Times, Nov. 2, 1981]

PRIVATE HEALTH CARE MAKING NEW INROADS IN BRITAIN

(By Steven Rattner)

LONDON.—The elegant Harley Street Clinic, on Weymouth Street, is privately owned. So are the Wellington Private Hospital near Regents Park and, over in Chelsea, the Charter Clinic and the Cromwell Hospital.

All told, a rash of recent openings has left London boasting more than a dozen privately-owned hospitals, institutions that in turn are just one segment of a system of private health care that is burgeoning across Britain.

Nearly 35 years after Britain's National Health Service was established and became a model for the world, the idea of identical health care provided for everyone free of charge by the Government is being increasingly challenged by the development of parallel private services.

TWO-TIER HEALTH SYSTEM

"Their perception is that the National Health Service is falling down," said Hugh Elwell, a health-care consultant, referring to the users of private care.

In the last two years, the number of Britons covered by one of the 12 private health-insurance plans rose by one-third, to three million people, or 6 percent of the population. The rate of growth in the number of private hospital beds has accelerated to 20 percent a year. Public hospital beds, meanwhile, have fallen by 15 percent over the last decade. Later this year, the first of a chain of private family doctors' offices is scheduled to open.

Much of this growth in private care has resulted from doubts about the ability of the National Health Service to fulfill its mission. At the moment, recent improvement notwithstanding, 630,000 people are on waiting lists to undergo surgery, which can mean delays of two years for nonemergency operations.

HEALTH BECOMES POLITICAL ISSUE

The growth in private care and the continuing uncertainties about the quality of National Health Service care has made health a hot political issue in Britain. For the last decade, Government restrictions on the development of private care have wavered as political power has shifted. Under Barbara Castle, Health Secretary under Prime Minister Harold Wilson, private care was threatened. Now all that has changed.

"The N.H.S. would find it extremely difficult to have to cope with the additional load if the private sector no longer existed," said Patrick Jenkin, the current Health Secretary. "It is quite wrong to see private hospitals and the N.H.S. as somehow vying with each other."

For its part, the Labor Party has opposed any move toward private health care.

Labor Party activists notwithstanding, private health enjoys wide support in Britain, according to a variety of public-opinion polls. A recent survey found that 60 percent of Britons favored private medicine and 20 percent opposed it. At least one major trade union has won private health insurance as part of its workers' benefits package.

A variety of studies have failed to provide any substantial evidence that the British health service, which has been accompanied by a vast bureaucracy, provides better care than the American nonnationalized system.●

RESOLUTION IN RESPECT OF JOEL HENRY HILDEBRAND

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. FUQUA. Mr. Speaker, in recognition of the achievements of the distinguished chemist, Joel Henry Hildebrand, and as a tribute to him on his 100th birthday, the Committee on Science and Technology has prepared the following resolution, which I am pleased to share with the Members:

[Committee on Science and Technology, U.S. House of Representatives]

Resolution in respect of Joel Henry Hildebrand, November 16, 1981.

Resolved, That the Committee wishes to pay its tribute to the accomplishments of the distinguished chemist, Joel Henry Hildebrand, on his 100th birthday.

Resolved, That the many and multifaceted contributions are noted by the Committee, and several of these activities are set forth as follows:

Authored or co-authored numerous texts in chemistry, including "Principles of Chemistry," "Reference Book of Inorganic Chemistry," "Regular and Related Solutions," and "Introduction to Molecular Kinetic Theory."

Authored or co-authored about 300 scientific papers. The latest, "A History of Theory of Solutions," will appear in Annual Review of Physical Chemistry on or about his 100th birthday.

Was elected to the National Academy of Sciences in 1929.

Served as president of the American Chemical Society in 1955, and chairman of its California Section in 1917.

Served as president of the Sierra Club (1937–1940).

Was manager of the U.S. Olympic ski team in 1936.

Has co-authored books on ski mountaineering, back-packing, and camp cooking.

Was a leader in the successful campaign to establish Kings Canyon National Park in California's High Sierra.

Is well known for his discovery of the oxygen-helium mixture to minimize "bends" in deep-sea divers, his having taught freshman chemistry to 40,000 students, his excellent photography, his editorships of journals, contributions to methods of science and general education.

Awards, including the Remsen Award, 1949; King's Medal, Government Great Britain; Gibbs Medal; Proctor Prize; Madison Marshall Award; William H. Nichols Medal; Norris Award, and Priestly Gold Medal, American Chemical Society; S. C. Lind Award, American Chemical Society, 1972.

Resolved, That the clerk take the appropriate steps to print this resolution and to transmit a copy of it to Joel Henry Hilderbrand.

DON FUQUA,
Chairman, Committee on Science and Technology, U.S. House of Representatives.●

THE INSANITY DEFENSE

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. ASHBROOK. Mr. Speaker, many observers of the judicial process have become increasingly frustrated as a result of the frequent use of the so-called insanity defense in criminal cases. Violent crime has become a major problem in the United States and a number of legal scholars, public officials and not surprisingly, victims of crime, have begun to raise serious questions about the routine release of admitted felons following a period of alleged psychiatric rehabilitation.

Carol Gallo, a Washington, D.C., freelance writer, has written an excellent article concerning the insanity defense. This scholarly piece first appeared in the September 26 issue of the national conservative weekly, Human Events, and more recently was excerpted in the October 1981 edition of Criminal Justice Report, a publica-

tion of the National Association of Attorneys General.

Miss Gallo presents a reasoned analysis of this issue based on the legal history of the insanity defense. I would commend it to my colleagues for reading.

The Gallo article follows:

NATIONAL ASSOCIATION OF ATTORNEYS GENERAL—CRIMINAL JUSTICE REPORT

THE INSANITY DEFENSE

(The following was excerpted from an article by Carol Gallo, a Washington, D.C., freelance writer, who is currently working on a book about the insanity defense.)

Even before John W. Hinckley II had been indicted for the attempted assassination of President Ronald Reagan his defense attorneys were lining up psychiatrists, and the controversy over Hinckley's "sanity" had started. The Hinckley affair, as well as a number of other notorious criminal cases, has focused national attention on the extent to which psychiatry has undermined justice in the United States by justifying criminality. As a result, a growing number of lawmakers, jurists, and even psychiatrists themselves are suggesting sweeping changes in insanity pleadings at both the state and federal levels.

"Not guilty by reason of insanity" is a special verdict of acquittal in a criminal trial. The verdict grants that although the accused committed the act in question, he cannot be held legally responsible because he was not sane at the time of the crime. Defendants thus acquitted are then usually committed to a mental institution for an indeterminate period and released upon the recommendation of institution psychiatrists when the psychiatrists consider the person "sane."

Since the insanity defense originated almost 200 years ago, definitions used to describe insanity have broadened, and new variations of the defense have been developed, giving criminals ever-increased chances of escaping the legal consequences of their acts. A more insidious variant of the insanity plea is the "diminished capacity" defense, where psychiatric testimony is used to argue that the accused, although clearly sane, still should not be held responsible for his acts because a "mental condition" diminished his capacity to harbor the criminal intent required for conviction.

This was the basis for the so-called "Twinkie Defense" of Dan White, whose controversial trial for the murder of two San Francisco city officials drew national outrage and has resulted in current attempts at major legislative overhaul of allowable criminal defenses. Dr. Martin Blinder, one of the psychiatrists who testified for White, told the jury that White had been depressed before the crime and had been eating junk food, which led to further depression and more junk food, and the sugar made White violent.

Let us trace the historical development of the insanity defense:

In the Anglo-American legal tradition, before a person can be convicted of a crime, two questions must be answered. The first is, did the accused perform the act in question? The second is, did he have criminal intent? An example will illustrate the point the law is trying to make.

A man is driving a car when a small child darts out in front of him. He tries to avoid hitting the child but cannot do so, and the child is killed. Hypothetically, if this man were tried for murder, he would be found not guilty, because he did not intend to kill. Thus he would be distinguished from a man who saw his enemy on the street and deliberately ran him down.

Criminal intent (mens rea) is also important in distinguishing the severity of the crime. For example, two men have a sudden, heated brawl and during its course one is knocked down and killed. If brought to trial, and the survivor showed he did not kill with malice aforethought, he would be found guilty of manslaughter.

"Prior to 1800, 'legal' insanity, as a special verdict of acquittal, did not exist," writes Dr. Halpern in the April 1980 Journal of Legal Medicine. "An individual was acquitted because of the failure of the prosecution to prove its case or because the jury chose out of sympathy to find the defendant 'not guilty.' In any event, he was immediately set free. If guilty, and extenuating circumstances existed (which could include lunacy), a special recommendation of a pardon was included in the verdict."

A special point that should be observed here is one that is glossed over by some legal scholars: Care for the language was observed. A lunatic who committed a crime—a sub-human "wild beast," or someone who could not tell the difference between right and wrong—might be pardoned, but he very clearly was found "guilty" first.

This respect for language, absolutely essential to justice, received a severe blow in 1800, according to Dr. Halpern. "In that year, James Hadfield, a war-injured British ex-soldier, believing he had been called by God to undergo self-sacrifice, took a shot at King George III. As Hadfield did intend to shoot at the king, and did know the difference between right and wrong, he would have been found guilty. So his lawyer had to invent a new defense."

Hadfield's attorney had numerous witnesses testify on Hadfield's deranged, delusional mind. Physicians were called to establish that his derangement had been caused by the head injuries he had received in the war. The argument then put forward was that Hadfield's delusional state, not his intention to commit the crime, should be the deciding factor for the jury.

The jury found Hadfield "not guilty" and added to that verdict, "the prisoner appearing to have been under the influence of insanity at the time the act was committed." Hadfield was committed to a lunatic asylum "until": His Majesty's pleasure be known." Although officially "not guilty," Hadfield was not freed, and died in incarceraton, now being called a "patient," instead of a prisoner.

"This decision was important for many reasons," says Dr. Halpern. "In effect from that time 'not guilty by reason of insanity' became a separate verdict of acquittal. Secondly, from that time forward, the jury's attention was increasingly focused on the definition of insanity, rather than on the question of whether the accused committed the act and had criminal intent. Lastly, the concept of insanity in the law became intertwined with 'science,' and effectively taken out of the purview of the laymen jurors."

Criminals were not individuals who had simply violated the rules of the culture, but people who suffered from some form of sickness called "mental illness." Once ethics were redefined in terms of medicine, it was continuously to widen the definitions so that any kind of criminality could be excused.

What is at stake here, of course, is our viewpoint on the nature of man. Is he a sentient, essentially spiritual being who makes choices in life? Or is he a material object, acted upon by genes and past experiences, whose choices are predetermined—an object that can neither be praised nor blamed? The evolution of the definitions of insanity reflect the latter, determinist approach.

The M'Naughten rule, adopted in England some 43 years after the Hadfield case, used a "cognitive" test for insanity. In order for the accused to be found insane under M'Naughten, "* * * it must be clearly proved that, at the time of the committing of the act, the party accused was laboring under such defect of reason, from disease of the mind, as not to know the nature and quality of the act he was doing, or, if he did know it, he did not know he was doing what was wrong."

America's first major contribution came in 1834 with the "irresistible impulse" test. As the label would suggest, this is the "just couldn't help it" approach, which assumes free-will does not exist, that impulses to act in certain ways sometimes can be resisted, and sometimes can't be. Thus a person under the influence of an irresistible impulse cannot be held responsible for his actions, even though he knows what he is doing, intends to do it and knows it is wrong.

There were no major redefinitions until the 1954 Durham decision was made by Judge David L. Bazelon in the U.S. Court of Appeals for the District of Columbia: "* * * An accused is not criminally responsible if his unlawful act was the product of mental disease or defect," and, in 1966, the U.S. Court of Appeals for the Second Circuit held, "* * * A person is not responsible for criminal conduct if at the time of such conduct as a result of mental disease or defect he lacks substantial capacity to appreciate the criminality of his conduct or to conform his conduct to the requirements of the law."

Yet these wildly deterministic definitions of insanity still placed too many restrictions on the psychiatricization of justice. A second inroad was consequently developed, "diminished capacity," the basis of the Dan White "Twinkie defense." It was designed for the use of those criminals who clearly were not insane by even the above definitions. Here the accused pleads "not guilty" as distinguished from "not guilty by reason of insanity" and uses psychiatric testimony to show that, because of a mental condition (depression after having eaten too many Twinkies, for example), the required criminal intent did not exist.

"Diminished capacity" was largely developed and popularized by psychiatrist and law Professor Bernard Diamond, who outlined his case in the Stanford Law Review, December 1961:

"Central to the difficulties with any definition of legal insanity is the all-or-none conceptualization of the law. A defendant is either sane and totally responsible, or insane and not at all responsible. Such all-or-nothing concepts are peculiarly foreign to modern psychiatric thinking."

The trouble with the above restrictive definitions, says Diamond, is that it forces the psychiatrist to be either the "tool of vengeance" (i.e., to testify a defendant is sane, thus opening the door to possible punishment for murder, etc.) or to perjure himself and convince the jury the accused is insane when he really isn't (in order to help the defendant avoid punishment).

Piggybacking his idea on a 1867 Scottish decision, his solution was for psychiatrists to testify that this or that mental condition

caused the defendant "diminished capacity" to harbor criminal intent, which, of course, only the psychiatrist could "diagnose." This approach undercut the traditional question whether the defendant had criminal intent, and focuses attention on how able the defendant was to formulate intent.

"Thus we arrive at a legal spectrum of an infinitely graduated scale of responsibility which corresponds, or could be made to correspond closely, to the psychological reality of human beings as understood by 20th Century medical pyschology," wrote Diamond.

But Diamond does not believe in free-will anyway, and all this is academic. "I concede that this whole business of lack of mental capacity to premeditate, to have malice or to entertain intent, is a kind of sophistry which must not be allowed to remain an end in itself. Right now we must utilize these legal technicalities to permit the psychiatrist to gain entrance into the trial court * * *.

"The next step * * * is to expand the principle of limited or diminished responsibility of the mentally ill offender to include all definitions of crime." It was easier to introduce this principle in the crimes of homicide because there already existed the legal structure of graduated responsibility for homicide."

In a decision made in June 1980, the Wisconsin Supreme Court struck down the diminished capacity defense:

"* * * diminished capacity inevitably opens the door to variable or sliding scales of criminal responsibility. We should not lightly undertake such a revolutionary change in our criminal justice system." It went on to question whether psychiatry can determine a defendant's intent at the time the crime was committed, and concluded it could not.

"Whether or not there should be criminal responsibility is essentially a moral issue. It is just, in light of the ethics and standards of our society, to hold a person who is insane accountable for what he has done."

The Court quoted University of Wisconsin Professor of Criminal Law Frank A. Remington: "In general, it is not at all apparent that psychiatrists know any more than does the layman about whether the defendant had an intent to kill when the act causing death was committed."

Even the hopes that psychiatry would help law enforcement officials spot habitual murderers have been dashed. Targeted by numerous malpractice lawsuits, the American Psychiatric Association has been forced to argue the case for psychiatric incompetence in the courts, and has done so most convincingly. In *Tarassoff* v. *the Regents of the University of California*, via an *amicus curiae* brief, the APA, citing massive professional literature, disclaimed any special psychiatric ability to protect society from potentially harmful citizens. In an even more compelling brief argued before the Supreme Court (*Estelle* v. *Smith*), the APA said: "The professional literature uniformly establishes that [predictions of future violence] are fundamentally of very low reliability and that psychiatric testimony and expertise are irrelevant to such predictions. * * * On the issue of future criminal behavior, it only distorts the fact-finding process. The fundamental disadvantage of utilizing such testimony is that it gives the appearance of being based on expert medical judgment, when in fact no such expertise exists."

But old myths die hard, and sadly the two bills designed to handle the insanity defense and its variants on the federal level, S. 818, introduced by Senator Hatch (R-Utah) and S. 1108, introduced by Senator Edward Zorinsky (D-Neb.)—while obviously well-intentioned—assumed many of the premises that first got us into trouble. The bills unfortunately swim in a sea of sliding definitions and psychiatric bogeymen, and fail to meet three simple tests that need to be met if the situation is to be corrected. These tests are:

First, the insanity defense per se should be entirely abolished. This is an argument for judicial conservatism, an argument to go back to the system that prevailed in jurisprudence before the modernities of 1800.

Second, psychiatrists should not be permitted to testify on criminal intent. They have no business speculating on how "mental illness," or even yesterday's breakfast, could explain the defendant's crime. The jury can draw more sensible conclusions about intent by first-hand inference, weighing the evidence placed before it. This would effectively end the psychiatric invasion of mens rea, abolish the "diminished capacity" excuse and return the examination of criminal intent to the jury rather than the "experts."

Third, psychiatrists should be stripped of their "expert status" entirely. Should a psychiatrist be called by the defense to testify on any grounds not excluded by the above, the jury should know he has about as much understanding of the human mind (probably a good deal less) as the butcher, the baker, the candlestickmaker, and his legal status should reflect that fact.

The problem is that "instanity" is not, nor ever could be, a medical term. It is always an ethical term. Insane acts are those which are counter-survival to a person himself, his family, his country, or to the many unknown individuals we commonly called "mankind."

Phonying up scientific names to describe morally and ethically aberrant behavior is anathema to justice. Questions of right and wrong are not irrelevant, they are paramount. They are not unknowable and complex; they can be reasoned and based on common sense. Our laws should reflect these simple truths.●

POLISH INDEPENDENCE DAY

HON. JAMES L. NELLIGAN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. NELLIGAN. Mr. Speaker, November 11 marked the 63d anniversary of Polish Independence. Since the invasion by Sweden in 1655, Poland and its people have been invaded, occupied, suppressed, and dominated, with the exception of the period between World War I and World War II.

After the three partitions of Poland by Austria, Prussia, and Russia in the late 18th century, the 19th century was marked by the continued Polish resistance to foreign and, in particular, Russian rule. The Polish people were reorganized under the Roman Catholic Church. It was the Catholic Church and the clergy that were the main factors in maintaining Polish nationalism. After World War I, on November 11, 1918, Poland declared its independence, which was recognized the following summer by the Treaty of Versailles. The ideals of self-determination, proclaimed by Woodrow Wilson and embodied in the treaty, enabled the people of Poland to realize their struggle for justice and freedom.

Today we are seeing a rebirth of Polish self-identification as a reaction to domination by the Soviets of the Polish Government. The Polish people have alined themselves with the solidarity movement with the reassertion of the Catholic Church as the symbol of Polish nationalism. We are all inspired by this struggle for autonomy, and it is most appropriate that we in the United States reassert our support for the determination of the Polish people to attain liberty.

I join with Americans of Polish descent in the 11th District of Pennsylvania, which I am privileged to represent, in honoring and supporting the Solidarity movement. I join with Americans all over the United States in praying for the success of the Polish people in freeing themselves from the yoke of Soviet domination.●

NATIONAL CONVENTION OF SOCIETY OF PROFESSIONAL JOURNALISTS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. WEISS. Mr. Speaker, last week the Society of Professional Journalists, Sigma Delta Chi, held its national convention in Washington. One of the issues hotly discussed at that convention was the Freedom of Information Act and the legislative proposals that are now before the Congress. Katherine Graham, chairman of the Washington Post Co., and chairman and president of the American Newspaper Publishers Association, spoke to the convention on the importance of the Freedom of Information Act to a free press.

I include Katherine Graham's remarks to the Society of Professional Journalists in the RECORD:

Good morning, and welcome to Washington. We are pleased that the annual meeting of the Society of Professional Journalists, Sigma Delta Chi, is being held in our nation's capital this year.

I think it is particularly important that you are meeting in Washington this year because of the unprecedented challenge being mounted to one of the most basic tenets of this organization. That goal was set out by the founders of this society in 1909, when they pledged to "work to safeguard the flow of information from all sources to the public, so that it has access to the truths required to make democracy function, and to protect our freedoms."

I must tell you this morning that this principle—the presumption that a democracy works best when its government's actions are open to the scrutiny of the people—is

under the most serious attack in recent years.

Not more than a quarter of a mile from here, the Senate is preparing to hold what may be the final day of hearings on bills that would significantly curtail the Freedom of Information Act.

I do not, of course, need to tell this gathering of journalists how the Freedom of Information Act has helped reporters in their pursuit of the news. It was three years ago that this Society, together with the Reporters Committee for Freedom of the Press, created the Freedom of Information Service Center—which offers advice and assistance to those wishing to use the federal Freedom of Information Act, and the various state open records acts. The increasing use that is being made of the Center is a pretty good measure of its value.

What I want to talk about this morning, however, is what I think the Freedom of Information Act symbolizes, and why I think any significant cutback in the Act would be a serious loss for us all.

The Freedom of Information Act, as an expression of national policy, embodies our commitment as a democratic society to open government.

In a perfect world, of course, there would never have been any need to spell out this fundamental principle in a statute. But before passage of the Freedom of Information Act in 1966, the world was far from ideal.

I was talking with a reporter the other day who recalled that while working on a story in the early 1960s, she had asked the Arms Control and Disarmament Agency for a list of members of its General Advisory Committee. A public information staff member told her: "We don't give out that information."

The reporter reminded the information officer that the list was in the agency's annual report which the reporter had misplaced. Even so, the government official still refused. When the reporter asked on what grounds the names were being withheld, the information officer disappeared for a few minutes, then returned and declared: "We claim executive privilege."

What this story illustrates (and every reporter who worked in Washington in those years has a similar tale) is that before passage of the Freedom of Information Act, government officials thought—no matter what the request—that it was perfectly all right to say "No."

I think the most important gain from the Freedom of Information Act is that it has largely changed this erroneous presumption.

The bipartisan coalition in Congress that drafted this legislation recognized, of course, that the public's right of access to information had to be very carefully balanced against all legitimate interests in national security, law enforcement, business confidentiality and personal privacy.

But the Johnson Administration, in a memo to all executive agencies shortly before the law went into effect, informed them the Freedom of Information Act left no doubt that disclosure was now the "transcendent goal."

Where too many government officials previously had felt that the burden was on the public to justify any request for information, the Freedom of Information Act made it abundantly clear that the burden was in fact on bureaucrats to justify any refusal.

That is exactly where the burden of proof should be.

None of us, of course, would claim today that the Act works perfectly.

Despite the admonitions of the Johnson, Ford and Carter Administrations to all executive agencies to meet the obligations of the Act in "spirit as well as practice," the fact remains that even today—in some government agencies and departments—bias against disclosure and an arbitrary preference for secrecy remain less the exception than the rule. Bureaucrats who oppose the principle of open government—or who do not wish to disclose embarrassing information—continue to manage to circumvent the Act in a frustrating variety of ways.

The Reagan Administration, for its part, complains of the use of the Freedom of Information Act in "unintended" ways—citing its use by business interests seeking unfair competitive advantage, by criminals seeking to thwart or undermine law enforcement agencies, and by foreign agents and others hostile to the United States seeking intelligence information. The Reagan Administration has proposed a wholesale overhaul of the Act to address these issues.

Certainly, if the Freedom of Information Act was indeed being seriously misused, I think as citizens we would be concerned with finding remedies. But in fact, the statute was drafted very precisely to protect fully these legitimate interests—and I think the burden lies on those seeking to change it to demonstrate how these protections have failed. Is the Act creating problems for the nation's law enforcement agencies? The FBI has not cited a single instance where information released under the Freedom of Information Act has hampered an investigation.

Does the Act endanger our national security? Former CIA Director Admiral Stansfield Turner said in 1980: "Thus far, we have not lost a case in the courts when we have claimed that something was classified and therefore could not be released."

What about trade secrets and business confidentiality? Well, the House Committee on Government Operations looked at this in 1978 and reported that "the committee has found no major abuses." The report went on to say that to the extent there had been difficulties, the problems had been in administrative procedures rather than in the substance of the law.

For the most part, I have to conclude that the problems that have been ascribed to the Freedom of Information Act are greatly overdrawn—and the proposed solutions for the most part seem as unneeded as they are undesirable. The case for a sweeping overhaul of the Act simply has not been made.

That is not to say the Freedom of Information Act cannot be improved—if what we really are talking about is improving it, and not weakening it. It can, of course, be made to serve all of us—both in and out of government—better.

I favor, for instance, the provision in S. 1730—the bill introduced by Senator Hatch—which would require the Office of Management and Budget to develop uniform fee schedules for all government agencies. At the present time it is virtually impossible to anticipate what fees will be charged when one attempts to use the Freedom of Information Act. Legislative language also should clearly state that fees ought not to be used to discourage requests, or to be imposed as obstacles to disclosure of requested information. I think it also important to strengthen provisions for waiver of all charges where the information would primarily benefit the general public.

I also support establishment of procedures to allow persons submitting information requested by the government to oppose release of that information to third parties. The Administration's proposal—which would allow parties unilaterally to stamp all documents they submit "confidential"—clearly invites abuse. But I feel it is only fair that a party be notified and allowed to object when a request is filed on information it has provided the government, and that a ruling be made in a reasonable period of time.

But the thought I want to leave you with today is that the major effort underway to modify the Freedom of Information Act—to roll back, to a great extent, the presumption of openness—is an effort that must not be allowed to prevail.

It is impossible to quantify the value of this Act either to the press, or through the press to the American people. The impact of this Act certainly cannot be measured solely by the number of freedom of information actions that journalists have filed. Every time a reporter walks into a government office—and properly is handed a public document that otherwise might arbitrarily have been withheld—society has benefited from the presumption of openness codified by this Act.

No single statute has ever given the citizens of a democracy a better window on their government. The Freedom of Information Act says to Americans—and to the World—that the business of government in a democracy is the people's business.

Upholding that principle—preserving that guarantee of public access to government records—is of overriding importance to us all.

Our government must remain committed to the benefits of openness. The societal benefits which derive from the availability of information concerning the functioning of government must be protected.

Nothing so diminishes democracy as obsessive and needless secrecy. Never has it been as important that the right of people to know the actions of their government be secure.

Thank you.●

HUMAN RIGHTS—HUNGARY

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. BONKER. Mr. Speaker, on November 4, Freedom House marked the 25th anniversary of the invasion of Hungary by the Soviet Union, calling it a "day of disgrace."

Freedom House, a national organization that monitors the level of political rights around the world said, "Soviet tanks and troops invaded Hungary on November 4 to put down its people's bid for human rights and political independence * * * It was Soviet imperialism at its worst."

As the Reagan administration continues to send the Soviet Union huge amounts of our agricultural products, I would hope they would remember the captive people of Hungary as well as thousands of other political dissi-

dents who are suffering in the Soviet Union and Eastern Europe.

I would like to commend to my distinguished colleagues the Freedom House statement.

The statement follows:

Is Western Europe doomed to pay in blood for not remembering what events a quarter-century ago should have taught?

In October 1956, two thousand students in Pest demonstrated peacefully for greater freedom. The students were joined by workers and soldiers. Their yearning became a revolt against the system imposed on Hungary by the Soviet Union. That was October.

On November 4—twenty-five years ago today—Soviet tanks and troops invaded Hungary to put down its people's bid for human rights and political independence. The Soviet's counter-revolution was terrible and terrifying. It was a day of disgrace. It was Soviet imperialism at its worst—repeated when Soviet troops invaded Czechoslovakia in 1968 and Afghanistan, a non-aligned neutral, in 1979.

A quarter-century later West Europeans and Americans may forget at their peril the Soviet's bloody counter-revolution in Hungary. "A river of blood flowed from Buda and from Pest into the Duna * * * Scattered on the streets before the Parliament of Budapest were the bodies of children, college students, aged men and women," wrote a Freedom House eyewitness then. A puppet Hungarian government made peace with the Soviet Union, but the years have not produced real political freedom or basic human rights for Hungary or the rest of Eastern Europe. On the contrary, Soviet forces are poised around Poland.

Behind the borders of Western Europe—today—the USSR has placed a new arsenal of SS-20 nuclear missiles, 50,000 tanks, 4,500 helicopters, and five million tons of ammunition—all zeroed in on the people of Europe who enjoy political freedom and civil rights.

Yet young Germans and Frenchmen—this October—mounted demonstrations against American support * * * support for the defense of the peoples of Western Europe * * * support which their governments had requested. No mention in the demonstrations of the years of disgrace when Soviet armaments, nuclear and conventional, were deployed.

Must the lessons of a quarter-century ago be learned again, perhaps in a still bloodier contest: Free peoples do not start wars; nations that oppress their own citizens do.●

THE CORNUCOPIA PROJECT'S "EMPTY BREADBASKET? THE COMING CHALLENGE TO AMERICA'S FOOD SUPPLY AND WHAT WE CAN DO ABOUT IT"

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. RITTER. Mr. Speaker, this morning Rodale Press released its Cornucopia project on the entire U.S. food system. The project entitled "Empty Breadbasket? The Coming Challenge to America's Food Supply and What We Can Do About It" is a scholarly look at the world's most productive food system, our own, and its vulnerabilities. The report also offers sound alternatives to the problems this sector faces in order to make a healthy transition toward an agriculture sector which preserves our precious resources and protects our Nation's farmland.

I would like to provide for my colleagues a brief summary of the project's findings. The project was undertaken in Emmaus, Pa. I urge all my colleagues to take a close look at the findings in this project that brings to light the hard choices which our agriculture industry faces in order to combat the threats to our Nation's food system.

EMPTY BREADBASKET? THE COMING CHALLENGE TO AMERICA'S FOOD SUPPLY AND WHAT WE CAN DO ABOUT IT

The most bountiful food system in the world is in trouble. To provide our food abundance, we are destroying vast amounts of soil, water, energy. In the midst of plenty, we are consuming our potential for future productivity, insuring a severe rise in the future cost of food.

That is the conclusion of a major study of the U.S. food system, "Empty Breadbasket?", which was released at a Washington news conference today by the Cornucopia Project of Rodale Press, a Pennsylvania-based publishing company concerned with food, health, energy and farming.

Two years in the making, the Cornucopia Project's report documents alarming trends in the food system and a series of steps that can be taken now to insure the sustainability of the system. "If we do not take these steps, the system will crash," explained Robert Rodale, Chairman of Rodale Press. "The $7 loaf of bread will be a reality by the end of this century unless we act now to protect our food supply."

The report examines these threats to the food system:

SOIL EROSION

America's agricultural lands lose 5.8 billion tons of topsoil annually—more than during the Dust Bowl of the 1930's. We lose 26 square miles of productivity every day to erosion. At current rates, eastern Washington will have no topsoil left in 10 years; Iowa will exhaust its soil in 40 to 50 years. For every pound of corn grown in Iowa, 5 to 6 pounds of topsoil are eroded.

DEVELOPMENT

We lose 3 million acres of agricultural land yearly to urban development, or 342 acres every hour. Taken together, erosion and development waste about 39 square miles of land every day, enough to feed 400,000 people a year.

FOOD TRANSPORT

The average food molecule in this country travels 1,300 miles before being eaten. Areas of the east coast, once self-sufficient, now import the majority of their food, mostly from California and Florida. New York imports more than 77 percent of its food. Dependence on distant food sources makes the supply vulnerable to disruption from an energy shortage, transportation strike, Medfly invasion or other natural disaster. The price of petroleum to fuel this system will continue to raise food prices. Much of this food could be grown more cheaply closer to home.

WATER DEPLETION

We are using up the groundwater tables for irrigation, especially in the West and Southwest. Already, farmland in Arizona and Texas has been abandoned because of high irrigation costs from lowering water tables.

ECONOMIC STRUCTURE

American farmers are in serious trouble. Farm debt is now over $160 billion, an average of $69,000 for every farm in the country. In 1980 net farm income plunged 29 percent. Constantly inflating land values is the only thing standing between many farmers and bankruptcy.

ENERGY DEPENDENCE

From farming to processing and distribution, the food system is a gas guzzler. This dependence threatens the system. A recent study by the Department of Energy showed that a fuel shortage or reduction of 10 percent would lead to an increase of 55 percent in the price of fresh fruits and vegetables.

MINERAL BASE

Our supplies of phosphate rock for phosphorous is running out. By 2000, we will be dependent on OPEC—the Organization of Phosphorous Exporting Countries like Jordan and Saudi Arabia and Morocco, for our phosphate.

MONOCULTURE

About 95 percent of our food now comes from only 30 plants. This genetic uniformity makes crops highly vulnerable to disease, as the 1970 corn blight demonstrated.

ENVIRONMENT IMPACTS

America's farmers now use about 2 pounds of pesticide and 112 pounds of synthetic fertilizer nutrients per acre of cropland. The environmental impact of these substances costs an estimated $839 million annually. In the past 15 years, while pesticide use has gone up 140 percent, crop loss to insects has increased more than 40 percent.

The Cornucopia Project report considers other problems in the food system as well. It then goes on to list a series of steps that could be taken by consumers, farmers, the food industry and government to keep these problems from collapsing the food system.

Recommendations for change include incentives of soil conservation, the promotion of regionalized agriculture, to avoid long-distance trucking where possible, direct-marketing by farmers, legislation to protect prime farmland from development, and the ending of subsidies to non-sustainable agricultural practices, including policies that encourage groundwater mining, land speculation and huge farm debts.

"We have a window of opportunity over the next few years to correct the system so it becomes sustainable," explained Medard Gabel, Director of the Cornucopia Project. "We must begin to act now, while we still have time."●

CURBING ACTIVIST JUDGES

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. ASHBROOK. Mr. Speaker, a recent editorial in the St. Louis Globe-Democrat sums up the feelings of many Americans who have been di-

rectly or indirectly affected adversely by the rulings of unelected Federal judges who have chosen not to interpret the law but to make new law.

I have witnessed this type of unchecked judicial activism on a number of unfortunate occasions in my own State of Ohio in the area of forced racial busing and public housing and can agree wholeheartedly with the Globe-Democrat editorial. The Congress is absolutely correct in taking steps to reverse this activist trend. I would urge my colleagues in the House of Representatives, particularly those with whom I serve on the Judiciary Committee, to take immediate steps to enact legislation which would limit the growing and unconstitutional power of the Federal judiciary.

The Globe-Democrat editorial follows:

JUDICIARY—CURBING ACTIVIST JUDGES

For many years a number of federal judges, including justices on the U.S. Supreme Court, not only have interpreted the law, they have made new law. They have done this despite the fact that such action is not authorized by the Constitution.

The Reagan administration commendably is moving to curb this judicial activism in such areas as abortion and school busing, according to Attorney General William French Smith.

Were it not for the activism of some federal judges, the massive and highly unpopular compulsory school busing orders covering whole cities would have stopped long ago. But, like Roman emperors, the judges seem to think they can do no wrong, even when their dictatorial busing plans fail miserably and only succeed in resegregating school system after school system.

This activism has infested the Supreme Court itself, a fact attested to earlier this year by Justice William H. Rehnquist as he accused the high court of "constantly tinkering with the principles laid down" in 1976 and thus making it "virtually impossible" for states to promptly execute convicted murderers.

It is encouraging that Attorney General Smith says the Justice Department will attempt to curb these judicial excesses by means of legislation and litigation. In past administrations, the Justice Department has been almost totally passive to the federal judiciary overstepping its bounds.

It is one thing to insulate the federal judiciary from political pressure. But when judges continue to take advantage of this immunity by interpreting the Constitution to suit their own pet social theories, it is time to call a halt.

Already there are strong movements for changing the constitutional provision which gives federal judges life tenure so that they will be required to stand for election. If the present situation is not rectified, these demands may be translated into action. The people are not going to stand by indefinitely and be dictated to by federal judges who attack the neighborhood school system, frustrate capital punishment of murderers and oppose the wishes of the great majority of Americans on other key issues.●

SUPPORT URGED FOR FEDERAL EDUCATION AID

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Mr. FORD of Michigan. Mr. Speaker, Federal education aid for local school districts has made a positive impact on students' achievement and assisted local educators in updating their skills and classroom materials. In many districts, Federal aid has prompted important and innovative education improvement. I was pleased to note that the Detroit Free Press on November 15 recognized the significant benefits of programs like title I of the Elementary and Secondary Education Act and Head Start. These and several other Federal education efforts have boosted Michigan's educational quality and helped make our State a national leader. I want to share this insightful editorial with you:

[From the Detroit Free Press, Nov. 15, 1981]

SCHOOL AID: WASHINGTON BACKS OUT WHEN HELP IS NEEDED MOST

A major justification for ongoing cuts in federal aid to schools is that such aid comprises only eight percent of school budgets. But it is a critical eight percent, targeted for those youngsters with special needs who got little aid before. They will suffer unless the federal government's educational priorities can be reversed.

The Reagan administration has offered both practical and philosophical reasons for slashing school-aid programs for the poor, the handicapped, the foreign-born. The practical reason is that such programs haven't really worked, while wasting vast sums of money. The philosophical reason is that the government shouldn't dictate to the states what their educational priorities should be. Neither rationale stands up under scrutiny.

Admittedly, the evidence that compensatory federal programs help kids has been slow coming in. It took decades for scholars to track enough Head Start youngsters to determine whether they retained the benefits of early childhood education. It has taken decades, as well, for schools to learn to fine-tune compensatory education well enough to help disadvantaged youngsters acquire basic skills.

But just as the federal government is withdrawing support for public education, some impressive documentation of the benefits of federal school dollars has begun to show up. Major studies have confirmed the benefits of Head Start and Follow Through. Schools in Detroit and elsewhere have accomplished major turnarounds in achievement with the help of Title I.

Congressional conservatives, however, have closed their eyes to this evidence, just as they close their minds to the fact that returning control to the states of federal dollars sounds better in theory than it will work in practice. Consolidation of 42 categorical programs into a single block grant program means programs will have to compete with one another for funding. Thus such variables as political pressure, the state of a municipality's treasury and the sensitivity of local officials will determine whether the handicapped, the learning disabled or slow learners continue getting special help.

So far, Mr. Reagan has won his battle to cut the federal government's commitment to education. The U.S. can't afford to be all things to all people, says the president. He may yet have trouble on his hands, though, as it begins to sink in that it is bloated military spending, not funding for social programs, that is straining the fabric of the federal budget. The message still to be conveyed is that cuts in education threaten our survival as a free and vibrant people far more than any overseas adversaries. Right now, the government is pursuing policies that endanger not only the future of thousands of youngsters but could fill our streets with disaffected people who feel they have no stake in society. Can we afford that?●

PRESIDENT OF TIME, INC., ISSUES WARNING ON REAGAN BUDGET CUTS

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 17, 1981

● Ms. FERRARO. Mr. Speaker, in this hectic year of budget and tax cutting, the most consistent rationale offered by the administration and its supporters for the program it has pursued is the promise of renewed economic prosperity for all. At no time this year has the debate been over whether or not we should have a stronger economy, with greater productivity, lower inflation, lower unemployment, and all the rest.

The argument, at all times, has been over whether the President's program is the best way, or even a suitable way, to achieve our common goals.

For many of us who have opposed the Reagan program, a vital question has been, What is the cost to the Nation of depriving disadvantaged children of sound nutrition, quality education, and basic health care? Our concern has been that the budget cuts in many social programs will not cause a deferral of opportunity, but, more harshly, a simple denial of opportunity to a generation of young Americans.

Unfortunately, this thinking has not been shared by our Nation's business leaders, who have instead subscribed to the trickle-down theory encompassed by Reagonomics.

My concern over this shortsightedness by our Nation's business leaders was greatly eased by an article by J. Richard Munro, the president of Time, Inc., which appeared in the November 15 New York Times and was excerpted from a speech he gave last week to the Union Club of New York.

Mr. Munro's concern is that the Reagan cuts have put too great a burden on the poor, thereby jeopardiz-

ing the long-term goals of the program. While Mr. Munro demonstrates that he is a man of compassion for the poor, he also makes a case based on the long-term economic consequences. Mr. Munro writes:

Remember that in a few years, the children of today will be our employees, adding, we hope, to our bottom line * * * We can already read projections of labor shortages later in this decade, especially in skilled labor. Budget cuts in training and education will worsen that problem.

I am extremely encouraged by Mr. Munro's article. I hope other business leaders will carefully consider his views, and I urge my colleagues to read the article, which is reprinted below.

[From the New York Times, Nov. 15, 1981]

EXECUTIVE DISSENT AGAINST THE BUDGET CUTS

(By J. Richard Munro)

I know that business executives are not supposed to disapprove of the Administration's spending program. Polls show support among us hovering around 90 percent. That's a phenomenal vote of confidence. I support the new policies that promote growth, new investment and greater productivity.

Yet, in the rush to fight inflation and stimulate investment, I fear that we have cut too deeply, that we have put too high a burden on the poor and elderly, and that we are jeopardizing the long-term goals of this program and the interests of business.

I am especially concerned about the cuts in social spending. They have gone too far, too fast. And too few of us understand their impact.

Most of us probably have found comfort in the notion that the cuts were marginal and that the cuts fall equally on everyone. The cuts are anything but evenhanded, and the effects are far from marginal as the numbers show. About 70 percent of the 1982 cuts now in place come from programs affecting the poor.

You can go down the line—education at all levels, jobs and training programs, Medicaid, housing aid, food stamps, school nutrition, support for poor families with children, energy assistance, unemployment insurance, and numerous other social services. Every one of these received major spending cuts, adding up to $25 billion of the $35 billion total cut from the budget this summer.

That doesn't include $13 billion in more cuts just proposed, and the $100 billion in cuts projected for 1984. Although those cuts are mostly unspecified, programs for the poor will again be on the chopping block.

Combined with tax cuts that benefit mostly higher-income people, this program adds up to a major redistribution of money in our society, from the lower end to the upper end of the scale.

Despite Administration assurances, the truly needy will have to cut back family budgets that simply can't be stretched any more.

The truly needy include the elderly and disabled poor. But the group that concerns me most is children, in families headed by a woman.

One out of 6 of all American children, about 10 million, lives in poverty today. One out of 4 of all children will need welfare support at some time before growing up. About one out of 6 of all children has no regular source of medical care. One out of 3 has never seen a dentist. Among black children, 2 out of 5 are poor.

Under the new budget, they are losing a little here and a little there, not too much taken one by one. But when the losses total several hundred dollars this year per family with even greater losses next year and the next, that will have a great impact.

We should also be concerned about the many social services, Government and privately run, being cut severely under this budget.

In Fairfield County, my wife and I are active in the Juvenile Diabetes Foundation. It's just been hit by Federal budget cuts that sharply reduce its research program. Actually, I think we can probably raise money locally to replace some of the loss. But what about similar organizations with no access to corporate contributions or well-funded local governments?

Let me sum up. The budget cuts are leaving serious and immediate human needs unmet. And if the budget cuts continue as scheduled, the problems of the poor will worsen intolerably. As business executives, I don't think we should stand by and let this happen.

On a practical level, let's consider the opportunity cost of letting the cuts go through. This year, we have the chance to restore business incentives for greater investment. The President, the Congress, and, most important, the public are behind us. Yet, this public support will vanish if the burdens of this program remain so uneven, and if the promised surge of prosperity pays off only for those already well off.

While we can talk about the need for patience until the long-term benefits arrive, the next election is a year away—close to the bottom of what appears to be a deep recession—at the very time the budget cuts put more holes in the "safety net" for people.

Also, while the economy declines, safety, health, consumer and environmental protections are weakening; civil rights enforcement is taking a giant step backward, and the share of taxes paid by corporations drops significantly.

That's not a scenario designed to build confidence in the current program. Consequently, in the next election, people may decide that they're not getting the changes they really wanted. And it'll be another generation before we get a similar chance to enact business incentives.

George Will wrote in a recent column that programs like Social Security spring from Americans' acceptance of "the ethic of common provision." He went on to say that President Reagan "must convince Americans that his conservatism is compatible with that ethic."

Let's consider the economic effects. Remember that in a few years, the children of today will be our employees, adding, we hope, to our bottom line. Because of the end of the baby boom, there will be far fewer of them available. And we can already read projections of labor shortages later in this decade, especially in skilled labor. Budget cuts in training and education will worsen that problem.

Consider also Social Security: There are three workers today for every beneficiary. In 30 years, there will be two, when the children of today should be in their prime working years.

Out of economic necessity, we can't afford to let the productive potential of any of today's children languish because of our neglect.

More than ever, they are vital to our future, and we should help them get the best possible start in life. That means good schools, good nutrition, health care, housing, stable homes.

Yet, we're moving in the opposite direction now and in the foreseeable future. That disturbs me, and I think it should disturb you.●

SENATE—*Wednesday, November 18, 1981*

(Legislative day of Monday, November 2, 1981)

The Senate met at 10:30 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Our help is in the name of the Lord, who made heaven and earth.—Psalms 124: 8.

Sovereign Lord, as the founders of this Republic sought and heeded Thy counsel more than 200 years ago, so may we in this crucial hour. Thy word promises: *If any one lack wisdom, let him ask of God who giveth freely and upbraideth not, and it shall be given him.*—James 1: 5.

Gracious Father, grant that the leadership of this Nation, like the Founding Fathers, shall humble themselves before Thee, acknowledge their need of Thy wisdom, open their hearts to the Holy Spirit's direction and allow themselves to be guided in the light of Thy truth. We ask this in the name of Him who is "the Way, the Truth, and the Life." Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. The majority leader is recognized.

Mr. BAKER. I thank the Chair.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

LEGISLATIVE SCHEDULE TODAY

Mr. BAKER. Mr. President, after the recognition of the two leaders today, there are special orders in favor of the Senator from Colorado (Mr. HART) and the Senator from Delaware (Mr. BIDEN), for not to exceed 15 minutes each. There is also a previous order, according to my notes, for morning business to extend not past 11:30 a.m. today.

At 11:30 a.m., I remind Senators, the Senate will go into executive session for the purpose of considering the resolutions of ratification on nine treaties, and there will be one vote to count for nine. So Senators are urged to watch their clocks and to be here in time for that very important vote.

Immediately after that vote, there will be a vote on the Helms amendment to the State-Justice-Commerce appropriations bill, dealing with school prayer.

Debate on State-Justice will continue thereafter, until 1 p.m., when the Senate, by order previously entered, will proceed to the consideration of the continuing resolution, House Joint Resolution 357.

THE PRESIDENT'S FOREIGN POLICY SPEECH

Mr. BAKER. Mr. President, I have just watched a historic speech by the President of the United States to the National Press Club and, by television, to the country and the entire world.

The President reiterated this Nation's commitment to the Atlantic Alliance and the desire to reduce the massive buildup of arms in Europe. I should like to quote one paragraph from the President's speech. He said:

> There is no reason why people in any part of the world should have to live in permanent fear of war or its specter. I believe the time has come for all nations to act in a responsible spirit that does not threaten other states. I believe the time is right to move forward on arms control and the resolution of critical regional disputes at the conference table.

I commend the President of the United States for this effort on behalf of peace and stability.

Mr. President, I ask unanimous consent that the entire text of the President's speech be printed in the RECORD.

The PRESIDING OFFICER (Mr. PRESSLER). Without objection, it is so ordered.

The President's speech is as follows:

TEXT OF THE ADDRESS BY THE PRESIDENT TO THE NATIONAL PRESS CLUB

Back in April while in the hospital I had, as you can readily understand, a lot of time for reflection.

One day I decided to send a personal, hand-written letter to Soviet President Leonid Brezhnev reminding him that we had met about 10 years ago in San Clemente, California, as he and President Nixon were concluding a series of meetings that had brought hope to all the world. Never had peace and goodwill seemed closer at hand. I would like to read you a few paragraphs from that letter.

"Mr. President: When we met I asked if you were aware that the hopes and aspirations of millions of people throughout the world were dependent on the decisions that would be reached in your meetings. You took my hand in both of yours and assured me that you were aware of that and that you were dedicated with all your heart and mind to fulfilling those hopes and dreams."

I went on in my letter to say: "The people of the world still share that hope. Indeed, the peoples of the world, despite differences in racial and ethnic origin, have very much in common. They want the dignity of having some control over their individual destiny. They want to work at the craft or trade of their own choosing and to be fairly rewarded. They want to raise their families in peace without harming anyone or suffering harm themselves. Government exists for their convenience, not the other way around."

"If they are incapable, as some would have us believe, of self government, then where among them do we find any who are capable of governing others?"

"Is it possible that we have permitted ideology, political and economic philosophies, and governmental policies to keep us from considering the very real, everyday problems of our peoples? Will the average Soviet family be better off or even aware that the Soviet Union has imposed a government of its own choice on the people in Afghanistan? Is life better for the people of Cuba because the Cuban military dictate who shall govern the people of Angola?"

"It is often implied that such things have been made necessary because of territorial ambitions of the United States; that we have imperialistic designs and thus constitute a threat to your own security and that of the newly emerging nations. There not only is no evidence to support such a charge, there is solid evidence that the United States, when it could have dominated the world with no risk to itself, made no effort whatsoever to do so."

"When World War II ended, the United States had the only undamaged industrial power in the world. Our military might was at its peak—and we alone had the ultimate weapon. the nuclear weapon, with the unquestioned ability to deliver it anywhere in the world. If we had sought world domination then, who could have opposed us?"

"But the United States followed a different course—one unique in all the history of mankind. We used our power and wealth to rebuild the war-ravaged economies of the world, including those nations who had been our enemies. May I say there is absolutely no substance to charges that the United States is guilty of imperialism or attempts to impose its will on other countries by use of force."

I concluded my letter by saying, "Mr. President. should we not be concerned with eliminating the obstacles which prevent our people—those you and I represent—from achieving their most cherished goals?"

It is in the same spirit that I want to speak today to this audience, and the people of the world, about America's program for peace and the coming negotiations which begin November 30 in Geneva, Switzerland. Specifically, I want to present our program for preserving peace in Europe, and our wider program for arms control.

Twice in my lifetime I have seen the peoples of Europe plunged into the tragedy of war. Twice in my lifetime Europe has suffered destruction and military occupation in wars that statesmen proved powerless to prevent, soldiers unable to contain, and ordinary citizens unable to escape. And twice in my lifetime, young Americans have bled their lives into the soil of those battlefields—not to enrich or enlarge our domain—but to restore the peace and independence of our friends and allies.

All of us who lived through those troubled times share a common resolve that they must never come again. And most of us share a common appreciation of the Atlantic Alliance that has made a peaceful, free and prosperous Western Europe in the post-war era possible.

But today a new generation is emerging on both sides of the Atlantic. Its members were not present at the creation of the North Atlantic Alliance. Many of them do not fully understand its roots in defending freedom and rebuilding a war-torn continent. Some young people question why we need weapons—particularly nuclear weapons—to deter war and to assure peaceful development. They fear that the accumulation of weapons itself may lead to conflagration. Some even propose unilateral disarmament.

I understand their concerns. Their questions deserve to be answered.

But we have an obligation to answer their questions on the basis of judgment and reason and experience. Our policies have resulted in the longest European peace in this century. Would not a rash departure from these policies, as some now suggest, endanger that peace?

From its founding, the Atlantic Alliance has preserved the peace through unity, deterrence and dialogue.

First, we and our allies have stood united by the firm commitment that an attack upon any one of us would be considered an attack upon us all;

Second, we and our allies have deterred aggression by maintaining forces strong enough to ensure that any aggressor would lose more from an attack than he could possibly gain; and

Third, we and our allies have engaged the Soviets in a dialogue about mutual restraint and arms limitations, hoping to reduce the risk of war and the burden of armaments, and to lower the barriers that divide East from West.

These three elements of our policy have preserved the peace in Europe for more than a third of a century. They can preserve it for generations to come, so long as we pursue them with sufficient will and vigor.

Today, I wish to reaffirm America's commitment to the Atlantic Alliance and our resolve to sustain the peace. And from my conversations with Allied leaders, I know that they also remain true to this tried and proven course.

NATO's policy of peace is based on restraint and balance. No NATO weapons, conventional or nuclear, will ever be used in Europe except in response to attack. NATO's defense plans have been responsible and restrained. The Allies remain strong, united and resolute. But the momentum of the continuing Soviet military build-up threatens both the conventional and the nuclear balance. Consider the facts. Over the past decade:

—The United States reduced the size of its armed forces and decreased its military spending. The Soviets steadily increased the number of men under arms. They now number more than double those of the United States. Over the same period the Soviets expanded their real military spending by about one-third.

—The Soviet Union increased its inventory of tanks to some 50,000 compared to our 11,000. Historically a landpower, they transformed their navy from a coastal defense force to an open ocean fleet, while the United States, a sea-power with transoceanic alliances, cut its fleet in half.

—During a period when NATO deployed no new intermediate range nuclear missiles, and actually withdrew 1,000 nuclear warheads, the Soviet Union deployed more than 750 nuclear warheads on the new SS–20 missiles alone.

Our response to this relentless build-up of Soviet military power has been restrained but firm. We have made decisions to strengthen all three legs of the strategic triad—sea, land and air-based. We have proposed a defense program in the United States for the next 5 years which will remedy the neglect of the past decade and restore the eroding balance on which our security depends.

I would like to discuss more specifically the growing threat to Western Europe which is posed by the continuing deployment of certain Soviet intermediate nuclear missiles.

The Soviet Union has three different missile systems—the SS–20, the SS–4, and the SS–5—all with a range capable of reaching virtually all of Western Europe. There are other Soviet weapons systems which also represent a major threat. The only answer to these systems is a comparable threat to Soviet targets. In other words, a deterrent preventing the use of these Soviet weapons by the counter-threat of a like response against their own territory.

At present, however, there is no equivalent deterrent to these Soviet intermediate missiles. And the Soviets continue to add one new SS–20 a week. To counter this the Allies agreed in 1979, as part of a two-track decision, to deploy as a deterrent land-based cruise missiles and Pershing II missiles capable of reaching targets in the Soviet Union. These missiles are to be deployed in several countries of Western Europe.

This relatively limited force in no way serves as a substitute for the much larger strategic umbrella spread over our NATO Allies. Rather, it provides a vital link between conventional, shorter range nuclear forces in Europe and inter-continental forces in the United States. Deployment of these systems will demonstrate to the Soviet Union that this link cannot be broken.

Deterring war depends on the perceived ability of our forces to perform effectively. The more effective our forces are, the less likely it is that we will have to use them. So, we and our Allies are proceeding to modernize NATO's nuclear forces of intermediate range—to meet increased Soviet deployments of nuclear systems threatening Western Europe.

Let me turn now to our hopes for arms control negotiations. There is a tendency to make this entire subject overly complex. I want to be clear and concise.

I told you of the letter I wrote to President Brezhnev last April. Well, I have just sent another message to the Soviet leadership. It's a simple, straight-forward, yet historic message: the United States proposes the mutual reduction of conventional, intermediate range nuclear, and strategic forces.

Specifically, I have proposed a four-point agenda to achieve this objective in my letter to President Brezhnev.

The first, and most important, point concerns the Geneva negotiations. As part of the 1979 two-track decision, NATO made a commitment to seek arms control negotiations with the Soviet Union on intermediate range nuclear forces. The United States has been preparing for these negotiations through close consultation with our NATO partners. We are now ready to set forth our proposal. I have informed President Brezhnev that when our delegation travels to the negotiations on intermediate range land-based nuclear missiles in Geneva on the 30th of this month, my representatives will present the following proposal: the United States is prepared to cancel its deployment of Pershing II and ground launch cruise missiles if the Soviets will dismantle their SS–20, SS–4, and SS–5 missiles. This would be an historic step. With Soviet agreement, we could together substantially reduce the dread threat of nuclear war which hangs over the people of Europe. This, like the first footstep on the moon, would be a giant step for mankind.

We intend to negotiate in good faith and go to Geneva willing to listen to and consider the proposals of our Soviet counterparts. But let me call to your attention the background against which our proposal is made. During the past 6 years, while the United States deployed no new intermediate range missiles and withdrew 1,000 nuclear warheads from Europe, the Soviet Union deployed 750 warheads on mobile, accurate ballistic missiles. As this chart illustrates, they now have 1,100 warheads on the SS–20, SS–4, and SS–5 missiles and the United States has no comparable missiles. Indeed, the United States dismantled the

last such missile in Europe over 15 years ago.

As we look to the future of the negotiations, it is also important to address certain Soviet claims which, left unrefuted, could become critical barriers to real progress in arms control.

The Soviets assert that a balance of intermediate range nuclear forces already exists. That assertion is wrong. By any objective measure, as this chart indicates, the Soviet Union has an overwhelming advantage, on the order of six-to-one.

Soviet spokesmen have suggested that moving their SS–20's beyond the Ural mountains will remove the threat to Europe. As this map demonstrates, the SS–20's, even if deployed behind the Urals, will have a range that places almost all of Western Europe, the great cities—Rome, Athens, Paris, London, Brussels, Amsterdam, Berlin and so many more—all within range of these missiles, which incidentally are mobile and can be moved on short notice.

The second proposal I have made to President Brezhnev concerns strategic weapons. The United States proposes to open negotiations on strategic arms as soon as possible next year. I have instructed Secretary Haig to discuss the timing of such meetings with Soviet representatives.

Substance, however, is far more important than timing. As our proposal for the Geneva talks this month illustrates, we can make proposals for genuinely serious reductions but only if we take the time to prepare carefully. The United States has been preparing carefully for resumption of strategic arms negotiations because we do not want a repetition of past disappointments. We do not want an arms control process that sends hopes soaring only to end in dashed expectations.

I have informed President Brezhnev that we will seek to negotiate substantial reductions in nuclear arms which would result in levels that are equal and verifiable. Our approach to verification will be to emphasize openness and creativity—rather than the secrecy and suspicion which have undermined confidence in arms control in the past.

While we can hope to benefit from work done over the past decade in strategic arms negotiations, let us agree to do more than simply begin where these efforts previously left off. We can and should attempt major qualitative and quantitative progress. Only such progress can fulfill the hopes of our own people and the rest of the world. Let us see how far we can go in achieving truly substantial reductions in our strategic arsenals.

To symbolize this fundamental change in direction. we will call these negotiations START—Strategic Arms *Reduction* Talks.

The third proposal I have made to the Soviet Union is that we act to achieve equality at lower levels of conventional forces in Europe. The defense needs of the Soviet Union hardly call for maintaining more combat divisions in East Germany today than were in the whole Allied invasion force that landed in Normandy on D-Day. The Soviet Union could make no more convincing contribution to peace in Europe—and in the world—than by agreeing to reduce its conventional forces significantly and constrain the potential for sudden aggression.

Finally, I have pointed out to President Brezhnev that to maintain peace, we must reduce the risks of surprise attack, and the chance of war arising out of uncertainty or miscalculation. I am renewing our proposal for a conference to develop effective measures that would reduce these dangers. At the current Madrid meeting of the Conference on Security and Cooperation in Europe, we are laying the foundation for a Western-proposed Conference on Disarmament in Europe. This conference would discuss new measures to enhance stability and security in Europe. Agreement on this conference is within reach. I urge the Soviet Union to join us and the many other nations who are ready to launch this important enterprise.

All of these proposals are based on the same fair-minded principles: substantial, militarily-significant reductions in forces; equal ceilings for similar types of forces; and adequate provisions for verification.

My Administration, my country and I are committed to achieving arms reductions agreements based on these principles. Today I have outlined the kinds of bold, equitable proposals which the world expects of us. But we cannot reduce arms unilaterally. Success can only come if the Soviet Union will share our commitment; if it will demonstrate that its often-repeated professions of concern for peace will be matched by positive action.

Preservation of peace in Europe and the pursuit of arms reductions talks are of fundamental importance. But we must also help to bring peace and security to regions now torn by conflict, external intervention and war.

The American concept of peace goes well beyond the absence of war. We foresee a flowering of economic growth and individual liberty in a world at peace.

At the Economic Summit in Cancun, I met with the leaders of 21 nations and sketched out our approach to global economic growth. We want to eliminate the barriers to trade and investment which hinder these critical incentives to growth. And we are working to develop new programs to help the poorest nations achieve self-sustaining growth.

Terms like "peace" and "security" have little meaning for the oppressed and the destitute. They also mean little to the individual whose state has stripped him of human freedom and dignity. Wherever there is oppression, we must strive for the peace and security of individuals as well as states. We must recognize that progress in the pursuit of liberty is a necessary complement to military security. Nowhere has this fundamental truth been more boldly and clearly stated than in the Helsinki Accords of 1975. These Accords have not yet been translated into living reality.

Today I have announced an agenda that can help to achieve peace, security and freedom across the globe. In particular, I have made an important offer to forgo entirely deployment of new American missiles in Europe if the Soviet Union is prepared to respond on an equal footing.

There is no reason why people in any part of the world should have to live in permanent fear of war or its specter. I believe the time has come for all nations to act in a responsible spirit that does not threaten other states. I believe the time is right to move forward on arms control and the resolution of critical regional disputes at the conference table.

Nothing will have a higher priority for me and for the American people over the coming months and years.

Addressing the United Nations 20 years ago, another American President described the goal we still pursue today.

"If we all can persevere," he said, "if we can . . . look beyond our own shores and ambitions, then surely the age will dawn in which the strong are just and the weak secure and the peace preserved." He did not live to see that goal achieved.

I invite all nations to join with America today in the quest for such a world.

Mr. ROBERT C. BYRD. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. ROBERT C. BYRD. Mr. President, I, likewise, watched the President as he addressed the National Press Club, and I listened with great interest to what he had to say.

I feel that this was the best delivered speech I have seen the President make, and I congratulate him on the speech. I commend him on taking the leadership in the efforts to bring about disarmament, not on a unilateral basis, but, as he emphasized, meaningful disarmament, mutual arms control.

I believe his words will be well received around the world and should certainly give heart to all peace-loving peoples everywhere. I think his statement was timely, and what he had to say constituted a very constructive initiative on arms control.

It is my hope that the initiative the President has taken will put us in a strong opening position vis-a-vis the Soviets as we go into negotiations on the question of theater nuclear weapons on the European continent at the end of this month, in Geneva.

The Soviets have engaged in a very intensive propaganda offensive in recent months, throughout Europe, to discredit America's commitment to arms control.

This must be expected. This is certainly in accordance with their style and was predictable. They have skillfully attempted to divide the alliance and to play on the fears of many in Europe that Europe would be used as a battleground by tne superpowers. They have done this at the same time that they continue deploying medium-range ballistic missiles, as the President stated, at the rate of one SS–20 per week—primarily aimed at Europe.

The alliance has taken no steps to stimulate or to simulate this belligerent activity, except to plan the emplacement of American-made missiles beginning in 1983 unless the destabilizing Soviet deployment is stopped.

The President has now taken the lead in the propaganda offensive. I think he has very effectively taken the offensive out of the Soviets' hands. He has certainly spoken most convincingly, and in such a persuasive way that our European friends should be encouraged. Their concerns should be put to rest. In my judgment, he has put the Soviets on the defensive, precisely where they should be.

I am sure that all my colleagues on both sides of the aisle join me in wishing the administration complete success in persuading the Soviet Union to dismantle the SS–20 launchers which have been the major factor causing the imbalance of nuclear missiles in the European theater. It will be a most difficult job because, if there is one thing the Soviets are generally superior at, it is of being tough at the bargaining table. So the President has my support in this endeavor. If, however, the Soviets cannot be persuaded to engage in such meaningful reductions in the European theater, then the President has my complete support in going forward to lead the alliance to deploy our own missiles, because it will then be clear that there is no other alternative.

The President is seeking an alternative and he is seeking an alternative which would redound to the peace of the world and to the lowering of manpower costs, human costs, and monetary costs for all countries involved.

But if the Soviets should reject this effort on the part of the President, then we know there is no alternative, and in that regard, again, I support the President fully.

Without such credible determination, of course, the Soviets could not be persuaded to dismantle their SS–20's, SS–5's, and SS–4's.

In addition, Europe expects us to go forward with strategic intercontinental arms talks as the overall framework within which the TNF talks are to proceed. Today, the President indicated a strong willingness to proceed expeditionally with strategic negotiations next year, and again he can count on my complete support. I am hopeful those talks can begin as soon as possible.

I thank the Senator for yielding.

Mr. BAKER. Mr. President, I wish to express my profound thanks to the distinguished minority leader.

I venture the estimate that only the President's speech today will have more impact here and around the world than the statement just uttered by the distinguished Senator from West Virginia, the minority leader.

It was truly a statement of major importance. The President's speech, now supported by the bipartisan leadership of the Senate, this initiative so quickly endorsed by the distinguished minority leader I believe adds strength and credibility to the President's remarks that he could have received in no other way.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. BAKER. I thank the minority leader. I am certain I speak for the President in expressing those thanks, and I believe the country will express its thanks to the minority leader for this act of prompt statemanship.

THE EXECUTIVE CALENDAR

Mr. BAKER. Mr. President, I hate to move from that lofty item to another item of routine business, but there are a few items on today's Executive Calendar that I am prepared to consider according to the notation on our Executive Calendar and have been cleared here.

I inquire of the minority leader if he is in a position to consider the nominations appearing on page 3 of today's Executive Calendar under the headings of both the Judiciary and the Department of Justice?

Mr. ROBERT C. BYRD. Mr. President, I am so prepared.

Mr. BAKER. I thank the minority leader.

EXECUTIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate now go into executive session for the purpose of considering all of the nominations appearing on page 3 of today's Executive Calendar.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

THE JUDICIARY

The legislative clerk read the nomination of Lawrence W. Pierce, of New York, to be U.S. circuit judge for the second circuit.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Emmett Ripley Cox, of Alabama, to be U.S. district judge for the southern district of Alabama.

THE NOMINATION OF EMMETT RIPLEY COX FOR THE POSITION OF UNITED STATES DISTRICT COURT JUDGE FOR THE SOUTHERN DISTRICT OF ALABAMA

Mr. HEFLIN. Mr. President, it is my distinct honor and pleasure to recommend to the U.S. Senate Emmett Ripley Cox of Alabama, nominee for the position of U.S. district court judge for the southern district of Alabama.

Mr. President, it was but a few months ago, in this August Chamber, that we passed judgment on Justice Sandra O'Connor's fitness for service on the bench of the highest Court in the land. As important as that Court is, and that nomination was, we often lose sight of the fact that it is our entire network of Federal courts which serves to protect our precious civil liberties and preserve our basic constitutional guarantees.

And it is the Federal district court which is the foundation, the bedrock, of that system. It is the district court—the entry level trial court within the Federal judiciary—to which aggrieved parties look for equity and justice.

The vast majority of cases filed in Federal court never reach the Supreme Court—not because they are not meritorious, but because they have been disposed of, and parties given redress, at the trial court level.

Recognizing the importance of the district court in our Federal system of jurisprudence, it is, then, no insignificant nomination which these hearings take up today.

I commend the President on this nomination. Mr. Cox is an outstanding attorney and I am confident that he will serve with distinction upon confirmation. He graduated in the upper 5 percent of his class at the University of Alabama Law School, where he was a member of the Moot Court Team representing the university, winning the Southeastern competition and competing with distinction at the national competition in New York.

Upon graduation from law school, he has practiced continuously in Birmingham and Mobile, Ala. The hallmark of his practice has been legal scholarship of the highest order, as exemplified by a landmark case early in his legal career. *Dallas County* v. *Commercial Union Assurance Co.*, 286 F.2d 388.

It involved the falling of a clock from the steeple of the courthouse of Dallas County, Ala. This case turned on the cause of the fall and whether a fire more than a half century before this incident was proximately related to the accident.

As a young lawyer, Rip Cox realized the predicament his client was in regarding evidentiary proof, and diligently researched the records of the Selma Morning Times until he found the appropriate article from 1901 supporting his client's position.

On appeal, based upon Mr. Cox's brief, the Fifth Circuit Court of Appeals wrote what has been acclaimed the single clearest treatise on the hearsay rules of evidence in modern times, reestablishing the

ancient document as a significant exception to the hearsay rule. Such legal scholarship has characterized Mr. Cox's work ever since.

This position in the southern district of Alabama is perhaps unique. It is headquartered in Mobile one of the major port areas of the Nation. It has only two active trial judges, who carry an extremely heavy caseload comprised of an interesting mixture of not only traditional civil and criminal litigation, but also an extremely large docket of admiralty, labor-management, and constitutional rights litigation.

Mr. Cox has had a diverse practice encompassing a great number of these areas. He has on a regular basis, represented both plaintiffs and defendants in civil litigation; and has had a heavy dose of admiralty, real estate and labor law practice in both Federal and State courts.

Mr. Cox was rated qualified for this position by the members of his local bar association and by the American Bar Association. In addition, a thorough and complete investigation was conducted by the Federal Bureau of Investigation and the Senate Judiciary Committee on this nomination.

I have personally met with Mr. Cox and discussed all issues and matters in regard to his qualifications and fitness for the bench. I am satisfied based upon the review of this nomination and my personal discussions with Mr. Cox, that he should be confirmed by the U.S. Senate.

Based upon my personal observation, and the nominee's eminent reputation within the legal community of Alabama, I am confident that he will serve with great distinction on the Federal bench, and with each case he tries, provide proof of the wisdom of President Reagan's nomination. It is with a great deal of pleasure that I recommend and wholeheartedly support, the nomination of Emmett Ripley Cox for this most important position.

Thank you, Mr. President.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Cynthia Holcomb Hall, of California, to be U.S. district judge for the central district of California.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Clarence A. Beam, of Nebraska, to be U.S. district judge for the district of Nebraska.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of John Bailey Jones, of South Dakota, to be U.S. district judge for the district of South Dakota.

HON. JOHN BAILEY JONES

Mr. ABDNOR. Mr. President, with Senate confirmation of the nomination of John Bailey Jones as U.S. district judge for the district of South Dakota, a distinguished American has joined the Federal judiciary.

It was a unique personal privilege for me to join with my distinguished senior colleague, the Honorable LARRY PRESSLER, in introducing Judge Jones to the Senate Judiciary Committee last week for his confirmation hearing.

John Jones and I grew up as neighbors in Lyman County, S. Dak. We attended school in the county and later served in the South Dakota Legislature together—he in the house of representatives while I was in the senate.

In introducing Judge Jones to the committee, I commented briefly on some of the qualities which prompt me and a host of others in South Dakota to include him among the very, very select few we esteem and hold in highest respect. John's personal integrity, his honesty, his sense of personal responsibility, his diligence, his dedication to and high regard for the law, and particularly, his unique understanding of people and their problems are among his very special attributes.

A Judicial Qualifications Committee, upon examining the qualifications of some 18 potential nominees for this position on the Federal bench, included Judge Jones upon its top recommendations. Upon his ultimate selection, the choice of John Jones was greeted with rare unanimity from members of the Judiciary, the legal profession, the press, Republicans and Democrats alike—and even among the others who sought the post.

U.S. District Judge Fred J. Nichol, who is retiring this year, said of Judge Jones:

Every word I've ever heard of him . . . has been good, and I welcome him to the federal judiciary. A judge's judge—a topflight choice . . . and you will have no regrets whatever over his carrying out of that office—a reputation of ability and fairness and a personal integrity beyond reproach—a gratifying choice on merit and qualifications and not for political reasons—a great credit to the legal profession and to the bench are typical of the public comments which greeted the announcement of his selection.

Such universal tribute is highly unusual in South Dakota or any other State.

John Bailey Jones was born in and grew up in South Dakota. He continues to reside in Presho.

He received his college and law school education at the University of South Dakota. This was preceded by 2 years of active duty in the U.S. Navy. After completing law school, Judge Jones entered private practice and concurrently served as county judge in Lyman County, S. Dak.

In 1967 he was appointed circuit judge for the 10th District of South Dakota, where he has continued to serve with distinction. In addition to his service in the South Dakota Legislature, he has been active in numerous civic and professional endeavors. Particularly noteworthy is his service to the South Dakota American Legion Boys' State, a program for young people dealing with the responsibilities of citizenship and government.

Judge Jones on the Federal bench is indeed a credit to the Federal judiciary, its finest traditions and its highest standards.

NOMINATION OF JOHN B. JONES TO BE FEDERAL DISTRICT JUDGE

Mr. PRESSLER. Mr. President, I wish to voice my strong support for the nomination of John Bailey Jones to be U.S. district judge for the district of South Dakota.

Judge Jones is considered in my home State as one of the most preeminent trial judges in South Dakota. He is a fine example of the type of individual who should be elevated to the Federal bench. The President, recognizing the need for experience in the Federal judiciary, has wisely chosen a man of Judge Jones' background for this nomination.

Judge Jones has been a judge of the Sixth Judicial Circuit in South Dakota since 1967. Prior to that he was a county court judge. During this long period on the bench, Judge Jones has tried a wide variety of cases presented by hundreds of counsel. In my visits with members of the South Dakota bar. I have heard nothing but universal acclaim for his legal ability and fairness. These are qualities which will serve him well on the Federal bench.

A native of South Dakota, Judge Jones was born in Mitchell. He received both his undergraduate and legal degrees from the University of South Dakota. Prior to going on the bench, he was engaged in the general practice of law for 14 years in Presho, Lyman County, where he and his wife, Rosemary, have resided and raised their six children.

Judge Jones has a fine record of involvement in civic affairs and served in the South Dakota Legislature. While on the bench, Judge Jones has been active in a number of judicial organizations and institutes for continuing judicial education.

Both on and off the bench, Judge Jones enjoyed the highest reputation for diligence, competence, and integrity. As a devoted family man and as a willing contributor of time and effort to the betterment of his community, he is a highly respected citizen in Lyman County. His dedication to the fair and efficient administration of justice has also gained him the reputation as an outstanding jurist throughout our State.

Mr. President, I applaud President Reagan for his excellent selection for this judicial position. I urge my colleagues to quickly confirm this nomination.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

DEPARTMENT OF JUSTICE

The legislative clerk read the nomination of Robert J. Wortham, of Texas, to be U.S. attorney for the eastern district of Texas.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Alan H. Nevas, of Connecticut, to be U.S. attorney for the district of Connecticut.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of John W. Gill, Jr., of Tennessee, to be U.S. attorney for the eastern district of Tennessee.

The PRESIDING OFFICER. Without objection, it is so ordered.

The legislative clerk read the nomination of Joseph P. Russoniello, of California, to be U.S. attorney for the northern district of California.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Philip N. Hogen, of South Dakota, to be U.S. attorney for the district of South Dakota.

SOUTH DAKOTA'S NEW U.S. ATTORNEY

Mr. ABDNOR. Mr. President, it is a pleasure for me to applaud the Senate's action today in confirming the nomination of Philip N. Hogen as South Dakota's new U.S. district attorney.

Phil Hogen is uniquely qualified for this position. He is an excellent attorney with broad-based experience. He is thorough, conscientious and sensitive to all aspects of the responsibilities of this office.

Earlier this year the Justice Department listed nine criteria on which they reviewed the various candidates for U.S. attorney. Phil Hogen not only fulfilled all these requirements, but more. He brings to the job a good, broad background of practical legal and administrative experience, and a devotion to vigorous law enforcement and the principles for which the American people supported the Reagan administration so enthusiastically. A lifelong South Dakotan, he is the son of a Sioux Indian mother and grandson of immigrant Scandinavian homesteaders all of whom had a keen interest in all levels of government in this country.

Inasmuch as he was my administrative assistant when I first came to Congress, I am especially knowledgeable of his qualifications for the position of U.S. attorney, and have been honored to enthusiastically endorse his nomination and confirmation.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of J. Jerome Perkins, of Indiana, to be U.S. marshal for the northern district of Indiana.

Mr. LUGAR. Mr. President, I am deeply pleased that the Senate will have the opportunity to confirm today, an outstanding black law enforcement official, J. Jerome Perkins to be the U.S. marshal for the U.S. district court in the northern district of Indiana.

Mr. Perkins is the first black citizen in the history of the Indiana northern district to serve in this important position, and only the second black to serve as a U.S. marshal in the State of Indiana.

This nomination by the President is also important because it came to floor after Mr. Perkins was recommended as the best individual for this job on a merit basis by a bipartisan selection committee I established with my colleague from Indiana, Senator DON QUAYLE, to replace the political patronage system.

Mr. Perkins has enjoyed an extensive career in law enforcement, and has special experience in working with young people. He has been the supervisor of security for the South Bend, Ind. school system. He is a 20-year veteran of the South Bend police force and the former chief of detectives. He has been very active in his church and in his community.

The Senate confirmation of Mr. Perkins to be U.S. marshal is a proud day for all citizens of Indiana, who are committed to equal opportunity and justice.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

The legislative clerk read the nomination of Denny L. Sampson, of Nevada, to be U.S. marshal for the district of Nevada.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nominations were confirmed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to the consideration of legislative business.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have 1 minute remaining and, with the indulgence of the minority leader, I yield that 1 minute to the distinguished Senator from Wyoming, the chairman of the Ethics Committee.

Mr. WALLOP. I thank the majority leader.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

SCHEDULE OF TAPE RECORDING VIEWINGS IN THE MATTER OF SENATOR WILLIAMS

Mr. WALLOP. Mr. President, I offer today a further reminder to my colleagues who have not seen the taped material in the matter of Senator WILLIAMS to take advantage of the Ethics Committee's new showings of those materials.

I remind them that December 3 has been fixed as the date for floor action on Senate Resolution 204, a resolution to expel Senator WILLIAMS. Each Member will surely want to become informed of the evidence upon which the Ethics Committee based its recommendation, both out of a sense of fairness to the Senate and to Senator WILLIAMS. To assist the Members with the great volume of data, the committee has sent to each office a copy of each committee publication in this matter, and a number of the tape recordings played in the committee hearings will be presented again on Thursday, November 19, and Tuesday, November 24.

There are approximately 35 Senators each of whom I will call on personally who have not yet heard and seen these tape recordings. Senator HEFLIN and I urge all of them to take advantage of one of these sessions. There will be four identical sessions on those 2 days, one each morning from 9:15 a.m. to 12:45 p.m., and one each afternoon from 2:15 p.m. to 5:45 p.m. The location is in room 457 Russell, and no appointment is necessary. One staff person per Senator may attend the afternoon session on November 24.

Again I remind each Member that it behooves each Member to equip himself to make an informed judgment when this important resolution is voted upon.

RECOGNITION OF THE MINORITY LEADER

The PRESIDING OFFICER. The Democratic leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield my time to the distinguished Senator from Colorado (Mr. HART) if he has need thereof.

RECOGNITION OF SENATOR HART

The PRESIDING OFFICER. The Senator from Colorado is recognized.

Mr. HART. Mr. President, may I inquire as to what the time situation is?

The PRESIDING OFFICER. The Senator has all the leadership time available and, additionally, the Senator has a special order for 15 minutes.

Mr. HART. I thank the Chair.

THE PRESIDENT'S SPEECH TODAY

Mr. HART. Mr. President, I wish to go on record this morning supporting the position taken by the minority leader, the Senator from West Virginia, in strong support of the initiative taken by the President this morning to control the spread of nuclear weapons in Europe.

The President has put forward a bold and far-reaching arms control position, and we all wish him well in promoting that position, whether we are Democrat or Republican.

The American people and I believe the people of the world understand that there is probably no issue before civilized mankind more important than bringing some control to the spread of nuclear weapons

whether they are on the Continent of Europe or throughout the world itself.

NATO

Mr. President, for good or for ill the proposal put forward by the President this morning cannot be taken out of the context of the general state of health of the NATO Alliance today.

NATO is the United States most important defense commitment worldwide and unfortunately many have come to believe that that relationship over the past year or two or more is in danger of unraveling.

It is in fact the failure of our foreign policy in Europe for the last 10 months that jeopardizes the critical theater nuclear force talks, and fortunately the proposal put forward by the President cannot be considered on its merits out of the context of the health of that alliance.

The importance of that alliance, of course, goes beyond the linked heritages of the United States and Europe and beyond our linked military and economic interests. The NATO Alliance is the living embodiment of the lesson that we learned from World War II, the lesson of collective security against a common threat.

Yet today, as I have indicated, the NATO alliance is under deep stress. These strains have been brought about, in large part, by the misstatements, missteps, and out-and-out mistakes of the Reagan administration. Examples of those mistakes are numerous.

First, and perhaps foremost, the administration alarmed our allies with its unilateral decision to build the neutron bomb. Building a weapon to be used on European soil involves vital European interests; it demands full consultation with our allies. Yet the Reagan administration announced plans to develop the neutron bomb without adequate consultation. We have every right to expect our allies to bear their fair share of NATO's burdens, but if we want them to do that, we must respect their desire to participate in the decision. Until the administration commits to full discussion with allies—before the fact—we cannot have a strong and healthy alliance.

Second, the administration has ignored the real issue of how to provide a quality defense for NATO in the 1980's.

In the NATO alliance, as here at home, increasing military spending alone does not insure military effectiveness, since it does not address the fundamental military questions. Military effectiveness depends on tactics, on unit cohesion, on readiness, for example, not on spending alone.

But the administration has provided no leadership in this area. It—like the administration before it—has offered only quantitative solutions. It defined sharing the burden of spending in terms of an arbitrary percentage of growth in military spending. But it is impossible for European leaders to gain support for increased defense spending without a clear qualitative redefinition of the notion of military strength in a changing world.

More important, a qualitative definition of strength requires reallocating the military division of labor for protecting the West's vital interests. Since the NATO alliance was formed, world realities have changed. The economic and military interests we share with our Western European partners now extend well beyond the central front of Europe—to the Middle East, to Japan, to increased trade with Warsaw Pact nations. Until we face the question of protecting vital Western interests in a changed world, we will not have a strong and healthy alliance.

Third, the administration has failed to articulate a clear military rationale for placing intermediate-range American missiles on European soil. We have not explained how the deployment of these weapons fits into our overall defense strategy. Until we can provide a military rationale for putting the cruise missile on European soil—where it will be vulnerable—we cannot gain European support for it. Until we articulate a clear and convincing military rationale for putting our weapons in Europe, we cannot have a strong and healthy alliance.

Fourth, our allies are increasingly insecure because the administration has delayed negotiations with the Soviet Union, on both theater nuclear forces and the larger issue of strategic forces.

We have to applaud once again the initiative taken by the President today. Had that initiative been taken sometime last spring or summer we would have a better chance of gaining the support of our allies in standing behind our commitment to deploy those weapons if negotiations fail.

By pursuing force modernization but not arms control negotiations, we have violated the essence of the NATO agreement of 1979. This has allowed the Soviet Union to paint us as the obstacle to peace. The growing European anti-nuclear movement is visible evidence of the erosion of this policy. Although Soviet SS-20's pointed at the heart of European cities are fact, the possibility of intermediate-range U.S. missiles on European soil has engendered greater fear—because Europeans view our delays in negotiations as a lack of commitment to the prevention of nuclear war. Until we fully commit ourselves to both strategic and TNF negotiations, we will not have a strong and healthy alliance.

Here the President must go forward with bringing our SALT negotiators to the bargaining table much sooner than next spring to make this a fact.

Fifth, the administration has alarmed our allies with its loose talk on limited nuclear war. The administration's ill-considered statements have helped confirm what so many Europeans fear: That when the United States talks of limited nuclear war, it means nuclear war limited to the European Continent. Until the administration clearly rejects the dangerous notion of limited nuclear war, we will not have a strong and healthy alliance.

Sixth, the NATO alliance has been strained by the administration's economic policies, as well as its military policies. Our economic policies—most notably the high interest rates the administration uses as its single weapon against inflation—have serious negative effects on our allies and their trading partners. As the administration's hard-line rhetoric chills East/West relations, Europeans have lost the benefit of increased trade with Warsaw Pact nations, which had been an economic side effect of détente. Until this administration recognizes that our economies are intertwined just as our security is intertwined, we will not have a strong and healthy alliance.

Finally, our allies are concerned by the administration's single-minded insistence on dealing with world problems in military terms alone. Our security depends on military effectiveness, but some critical international problems demand social, economic, and diplomatic solutions as well.

The administration prefers to rely on near-impossible military action in the Middle East to secure our oil supply while abandoning domestic policies that could bring energy independence to this Nation. And so, we do little to bring much-needed stability to a troubled region on which our allies rely so heavily.

The administration persists in ignoring the vitally important issue of halting the spread of nuclear weapons worldwide. While it calls for repealing the Symington amendment, for lifting the ban on commercial spent fuel reprocessing, for exporting nuclear materials to countries that have not accepted international safeguards, European and American cities could become vulnerable to nuclear terrorism. Deterrence, a military solution, has no effect on terrorists.

The administration also persists in ignoring the overwhelming needs of the Third World—for food, for health, for economic development. Left unmet, these needs are the seeds of war.

Until we recognize that there are threats to our long-term security that cannot be met by arms alone, we cannot have a strong and healthy alliance.

All this adds up to 10 months of failed foreign policy which has seriously undermined the NATO alliance. A weakened NATO would be a matter of serious concern at any time. But now, on the threshold of the crucially important TNF talks, the implications are particularly grim.

The President's laudable objectives for the TNF talks—the so-called zero-level option—is jeopardized by the very lack of unity some of his policies have produced.

First, the administration's ineptitude may have deprived the alliance of the most important lever we have at the bargaining table—NATO cohesion. To agree to the zero-level option, the Soviets must believe we are negotiating with the full support and commitment of our European allies. But the Soviets can find ample evidence of dissension and disagreement in NATO. They may count on the continuing erosion of European support to keep U.S. missiles out of Europe, believing their SS-20's might remain without ever having to face the countervailing NATO forces they fear.

In other words, the Soviets could take a calculated risk—to forgo good faith negotiations now, and hope for a more

favorable outcome later, because of some of the lack of confidence that our European and NATO allies feel for that alliance.

Second, if the administration's effort to negotiate the zero-level option fails for these reasons, there may not be sufficient European support for deploying our missiles—even at reduced numbers. The antinuclear movement is broad-based and growing. It includes not just traditional pacifists, but trade unionists, women's groups, and church activists. They—like American citizens in Nevada and Utah—do not want nuclear weapons in their backyards. Before we dismiss them, remember that two administrations failed to garner domestic support for an MX basing mode here in our country. The administration badly miscalculates the breadth and depth of European antinuclear sentiment. Clumsy statements suggesting the protesters are following a line laid down in Moscow only further divide the necessary base of European support for our arms control initiative.

Third, even the most successful conclusion to the TNF talks—adoption of the zero-level option—would be, at heart, inadequate to European nuclear security if there is not parallel progress on limiting strategic weapons.

Both the United States and the Soviet Union have weapons that are dual targeted. They may be used as intercontinental missiles—but they can also be used as theater weapons in Europe. Even the best TNF agreement contains this huge loophole. Closing the loophole will require limits on intercontinental missiles—something that can be accomplished only in the larger context of SALT talks.

As long as the administration focuses only on theater nuclear weapons, and neglects intercontinental weapons, they will remain a threat to the security of the Western alliance—as well as to the United States—as long as there is no strategic arms agreement.

Strategic arms limitation agreements are vital to our national security. And they are vital to the security of the NATO alliance for much the same reasons as they are vital to us:

An agreement would limit the size of the Soviet threat;

An agreement would provide greater certainty for defense planning;

An agreement would give us greater ability to focus our resources on conventional forces;

An agreement would help us build a much-needed new consensus on collective security issues.

This last point is the real challenge for NATO. At the end of World War II, we recognized that U.S. national security was inseparable from the security of Western Europe. That is still the case today. But nearly every other fact of the immediate postwar world has changed.

Today we need to reexamine our experience in the postwar years, to reconsider its meaning, and to reach a new consensus based on a strategic reformulation of alliance policies for the 1980's.

We must apply a healthy skepticism to the actions of the Soviet Union and move beyond the naivete and sentimentality of détente.

We must reconsider the individual defense responsibilities of the nations in the alliance. We must recognize that the NATO alliance's economic and military interests are broader than ever before, and reach consensus on a new division of labor.

We must work with the allies toward economic and diplomatic solutions for problems that cannot be solved militarily.

We must recognize that military effectiveness lies not in spending more or spending less, but in spending better, and with our allies, we must concentrate on what we need to fight and win wars.

And we must make Europe a full partner in United States-Soviet nuclear arms control talks and direct our policies toward the absolute prevention of nuclear war—the most overriding concern in the world today.

At a time when the only true security is collective security, we have shaken the confidence of the very allies who would provide it. In an age where once distant countries are neighbors, and where nuclear weapons threaten worldwide holocaust, there is no way—and no need—to go it alone. We must draw on our allies' wisdom and experience—and we must learn to act in concert with them.

Once again, Mr. President, I think all of us laud and applaud the initiative put forward by the President of the United States this morning. But the key to that initiative's success is the participation and confidence which our European allies have in that proposal.

The Soviet Union must believe that the failure of progress in limiting theater nuclear weapons would mean a deployment of our modern nuclear weapons on European soil. If our allies do not have the confidence in the Alliance and in us to commit to that deployment, then we hold a very weak bargaining hand. We all hope that the steps taken over the past 8 or 10 months that have led to the erosion in the NATO confidence in us can be redirected and changed, hopefully overnight, by the action taken by the President. We will support those actions. We will urge our allies to cooperate with us.

But we must have the credibility of their commitment to us and to the Alliance to make the President's bargaining position strong enough to succeed. And we all hope that it will succeed.

Mr. President, I yield the floor and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mrs. KASSEBAUM. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business not to extend beyond 11:30 a.m.

Mrs. KASSEBAUM. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PRESSLER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ARMSTRONG). Without objection, it is so ordered.

PRESIDENT REAGAN ON STRATEGIC ARMS CONTROL

Mr. PRESSLER. Mr. President, I rise to commend and praise President Reagan for his speech on strategic arms this morning. I have frequently said that President Reagan may well be more effective in the arms control area than any President we have had. I have also said that President Reagan may be able to accomplish in the arms control area what former President Nixon was able to accomplish on China policy. That may sound strange to some, but I say it because of the trust with which President Reagan is regarded by certain political elements normally opposed to any arms control agreement. He is in a unique position from a domestic political point of view to enter into balanced and verifiable arms control agreements and to move forward effectively in this area.

President Richard Nixon, who was considered a conservative, anti-Communist President, could go to China and establish foreign relations with that Communist Nation more easily than could a liberal Democrat.

The same may be true for President Reagan in the arms control area. The Reagan administration is in a unique position to negotiate with the Russians on arms control and arms reductions.

Let me also say, as chairman of the Arms Control Subcommittee of the Foreign Relations Committee, that there has been much talk about arms control, arms reductions, and arms limitations over the years, but very little has been accomplished. We are faced now with a huge budgetary deficit. There is growing realization that we cannot afford, without adding greatly to that budget deficit, some of the weapons that have been considered. Neither can the Soviets afford further escalation of the nuclear arms race.

I hope the Soviets will read the President's speech carefully. I am confident that it will be received around the world very well because it is a very serious effort to initiate genuine arms control.

I commend the majority and minority leaders for their statements here in the Chamber this morning.

I want to praise President Reagan for his arms control speech and for his efforts in strategic policymaking. I believe he is a man of peace who understands the realities of the world situation. Without effective verification methods, and without a serious response from the other side, we cannot expect him to succeed. But President Reagan has taken a

giant step this morning in his speech, and I am very pleased with his initiatives.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. WEICKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PRIVILEGE OF THE FLOOR

Mr. WEICKER. Mr. President, I ask unanimous consent that Mr. Geoffrey Baker and Mr. Steve Moore of my staff be granted the privilege of the floor during the present time, the treaty vote, and the vote on the State, Justice, Commerce bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ANNOUNCEMENT OF INTENTIONS TODAY ON COMMERCE—STATE—JUSTICE APPROPRIATIONS BILL

Mr. WEICKER. Mr. President, I should like to state at this time that it is my intention to oppose the amendment of the distinguished Senator from North Carolina to the State, Commerce, Justice appropriations bill. I indicated yesterday in a dialog with the distinguished Senator from North Carolina that I would take a look at his amendment, determine its effect on this legislation, and then give him my opinion today as to whether or not to oppose the amendment.

It is my intention to oppose the amendment of the distinguished Senator from North Carolina. It is also my intention, Mr. President, to continue to discuss in detail the various aspects of the State, Justice, Commerce appropriations bill and, more particularly, the effect of what has been done to it in terms of legislative language.

Mr. President, I felt it necessary to place these thoughts on the record in light of the dialog that took place yesterday around midday.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PERCY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I ask unanimous consent to proceed for 7 minutes so that I may make a statement prior to the vote.

Mr. STENNIS. Mr. President, may we have order, so that the Senator can be heard?

The PRESIDING OFFICER. The Senator will be in order.

It is the request of the Senator from Illinois that he be permitted to proceed for 7 minutes. Is there objection? The Chair hears none, and it is so ordered.

LATVIAN INDEPENDENCE DAY

Mr. PERCY. Mr. President, today is a very important day, indeed. It is the 63d anniversary of the independence of Latvia, whose right of national self-determination found proper recognition at the end of World War I.

In 1941, that right, that independence, that nationhood, were cruelly violated when the Soviet Union invaded, repressed, and annexed Latvia, along with her neighboring Baltic nations, Lithuania and Estonia.

Today, as Americans, we commemorate Latvia's national independence. We renew our support for the legitimate aspirations of the people of Latvia. We stand up to be counted in favor of the restoration of basic human rights in Latvia. And we oppose the U.S.S.R.'s Russification of Latvia and suppression of Latvia's own identity and traditions.

I also join with all Americans in saluting the dedication of Latvian Americans to Latvian independence, and in acknowledging our admiration for the contributions they have made to this country.

Mr. President, it is symbolic and important to me that on the floor with me today is Senator JOHN STENNIS, who for many years was the guiding spirit and the guiding light—and still is—behind the Senators' prayer breakfast. Tomorrow morning, Senators—25 or so—will bow their heads and pray to God.

In this Chamber, we have emblazoned in marble "In God We Trust," and it is the only legislative body I know of in the world that has such an inscription on its walls, and we certainly recognize that we seek guidance for our activities here.

I was very pleased to note that today, in the House of Representatives, the opening prayer was delivered by Rev. Vilis Varsbergs, of the Chicago Latvian Zion Evangelical Lutheran Church. I am very honored and pleased that he is in Washington today. I shall read the prayer he delivered this morning in the House of Representatives, and I suppose this is the first time that a prayer delivered in the House has been uttered on the floor of the Senate the same morning:

> Almighty God, Father of peoples and Lord of nations: constantly remind us, we pray, that history is Your story which tells us that You desire freedom and justice even for the small and weak. Help us, therefore, to hasten the day when no man and no people will be oppressed and exploited. This day we especially ask Your favor upon Latvia and her neighbors Estonia and Lithuania. As You had given them a brief day of freedom, so do not now disappoint their hope that the good will prevail, that justice will soon triumph, that freedom will return on the wings of peace to them and to all Your children—through Jesus Christ, our Lord. Amen.

I do not believe that a more fitting tribute could be given to Latvian Independence Day than this beautiful prayer uttered in the House of Representatives this morning and now repeated in the Senate of the United States.

Mr. STENNIS. Mr. President, will the Senator yield?

Mr. PERCY. I yield.

Mr. STENNIS. Mr. President, I highly commend the Senator on his presentation and for giving us and the people of the world the benefit of the thoughts contained in that very fine prayer.

I recall when Latvia came into being in its present form. I have great admiration for its people, with some of whom I have come in contact since that time. There is great merit, great truth, and great honor to them with respect to their outlook, their viewpoint, their family life, and their Government.

Mr. PERCY. I thank my distinguished colleague very much.

As the former chairman and now the ranking minority member of the Armed Services Committee, he speaks with a tremendous voice of authority in the Senate of the United States on every subject, especially when he speaks on the quest for freedom of all people in the world.

The United States is a beacon of light. Our arms program makes credible our foreign policy; and our foreign policy is such that, though we have won freedom ourselves, we shall always strive to see that other people throughout the world have the same opportunity for freedom; and keeping a strong United States of America is important.

I think it is also important for us to note on the floor of the Senate today a very significant speech just delivered by the President of the United States on arms reduction. START—Strategic Arms Reduction Talks—was inaugurated today, and SALT—Strategic Arms Limitation Talks—is no longer the term for our discussions with the Soviet Union on what should be done about strategic arms in the United States and the Soviet Union. We are going to work toward arms reductions, not just limitations. This was a dramatic, bold presentation by President Reagan.

Mr. President, I am proud to associate myself with the speech delivered by the President this morning, as to the goals, the aims, and the ambitions of our country and our highest priority, arms reduction.

President Reagan's announcement that he has directed Secretary Haig to begin the new strategic arms reduction talks as soon as possible next year is good news. While we must not underestimate the difficulty of the negotiations that lie ahead, I fully expect that the President will achieve an agreement with the Soviet Union that will, for the first time in the nuclear age, provide for genuine reductions in the awesome strategic weaponry deployed by both sides.

I also applaud the President's announcement that the NATO Alliance is prepared to forego the deployment of new land-based, intermediate-range missiles in Europe provided the Soviets agree to scrap their enormously hostile and destabilizing force of SS–20, SS–4, and SS–5 missiles. Taken in full consultation with our NATO Allies, this decision should once and for all reassure the people of Europe and the world that the United States is committed to the pursuit of peace and stability in its relationship with the Soviet Union.

In my opinion, this eminently reasonable NATO offer will appropriately test the Soviets' self-declared dedication to a

peaceful and harmonious relationship with the Western Alliance. I can only hope that the Soviet Union recognizes and acts on this unique opportunity to reverse what otherwise could prove to be another costly spiral in the nuclear arms race.

THE NEED FOR ARMS CONTROL

Mr. CHAFEE. Mr. President, today, I watched with great interest as President Reagan outlined his proposals concerning arms control negotiations with the Soviet Union.

In my view, there is no higher priority for the security of our country and the preservation of peace than the serious pursuit of arms control agreements with the Soviet Union. I was gratified to see that administration is not only moving forward with the talks on medium-range missiles in Geneva later this month, but also intends to begin talks on strategic arms control in early 1982.

The talks on strategic arms are absolutely essential to the ultimate success of the talks on intermediate-range missiles. In that regard, I want to emphasize my firm conviction that both sides should continue their adherence to the unratified SALT II treaty and that we should strive to retain as many of the features of that treaty as possible as a useful basis for "starting" the next round of talks.

President Reagan also made a dramatic proposal today, offering to forgo the deployment of our Pershing II and ground-launched cruise missiles in Europe if the Soviets will dismantle the medium-range missiles they have already deployed.

The proposal represents a positive step toward renewing the arms control process with the Soviet Union. I believe it is more important to renew this process—for strategic as well as medium-range systems—than to emphasize the details of a specific proposal.

Indeed, it is likely that the Soviets will require time to evaluate this proposal. Hard bargaining must be expected, and complete success in the negotiations.

By the same token, we should not anticipate that the talks will necessarily result in no nuclear weapons being deployed. What we can and must expect is that the negotiations begin moving, that they be conducted earnestly and seriously by both sides, and that they lead to a stable balance at the lowest levels possible.

I would like to comment on another aspect of this problem which has great significance. By his statement today, President Reagan has re-emphasized the defensive purpose of our forces in Europe, their role as a deterrent to conflict, and the full commitment of the United States to the security of its NATO allies.

The goal of insuring this deterrence—both conventional and nuclear and at the lowest force levels possible—is a worthy one and one which I fully support.

Recently, we have seen considerable unnecessary confusion in Europe and, unfortunately, in this country regarding our strategy and our commitments, and I believe today's statement should put an end to this confusion. The programs and policies of the United States and its NATO allies are designed to preserve the peace, not to endanger it.

Just as there should be no doubt about our commitment to the security of our allies, there should be no doubt about our willingness to work hard to achieve balanced and fair arms control agreements.

TREATIES

Mr. PERCY. Mr. President, the Senate has before it this morning for advice and consent a total of nine treaties. Seven of these are income tax treaties, one is an estate and gift tax treaty, and the final treaty is an extension of the existing Treaty of Friendship and Cooperation with Spain. I know of no opposition to any of these agreements. They were unanimously approved in the Foreign Relations Committee and have the full support of the Reagan administration. Reports on each of them are available to every member at his desk.

Mr. President, the agreement to extend the 1976 Treaty of Friendship and Cooperation with Spain is a simple 8-month extension of a treaty which was discussed at length in the Senate at the time of its original approval. The treaty recently expired by its own terms and the 8-month period is designed to bridge the period until Spain's formal entry into the North Atlantic Treaty Organization. NATO entry will itself be accompanied by a treaty protocol which requires the advice and consent of the Senate. Thereafter, any particular aspects of our bilateral security relations will be handled by executive agreement under the umbrella of the NATO Treaty.

Mr. President, the eight tax treaties before us are additions and modernizations of the broader network of bilateral tax treaties which the United States maintains to relieve our citizens from the burden of double taxation and excessive withholding rates. They are all relatively routine agreements, with the exception of a few issues in some of them, each of which is treated in the committee reports.

Mr. President, given the number and range of the tax treaties before the Foreign Relations Committee, we have taken special care this year to consult closely with the tax-writing committees of the Congress, both Senate Finance and House Ways and Means; Senator MATHIAS, the chairman of our Subcommittee on International Economic Policy, and I wrote to the leadership of those committees earlier this year asking for their comments not only on the individual treaties before us, but also on the general nature of the tax treaty process. I ask unanimous consent to have printed in the RECORD copies of the letters and statements received from the chairman and other members of those committees, which were of great assistance during the consideration of these agreements by the Committee on Foreign Relations.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

COMMITTEE ON WAYS AND MEANS,
Washington, D.C., September 24, 1981.

Hon. CHARLES H. PERCY,
Chairman, Senate Committee on Foreign Relations, U.S. Senate, Dirksen Building, Washington, D.C.

DEAR SENATOR PERCY: Thank you for your thoughtful letter inviting the Ways and Means Committee's view on the tax treaties presently pending before the Senate Committee on Foreign Relations. We are enclosing a statement for the Committee's September 24 hearing record which expresses our views on this matter; the Honorable Barber B. Conable, Jr., ranking minority member of the House Ways and Means Committee, joins me in this submission and a supplemental statement of Mr. Conable's is enclosed as well.

We very much appreciate the courtesy you have extended to us by inviting our comment on these treaties. As you have observed, these tax treaties do have a direct impact on our tax system; as such they deserve a careful review by the tax-writing Committees of Congress. While time has not permitted us to consult with the full membership of the Ways and Means Committee, the enclosed statement addresses those provisions of the pending treaties which cause the greatest concern, a concern that we believe will be generally shared by the Committee. In addition, we have taken this opportunity to express our deep frustration with the tax treaty process as it currently exists.

We view our efforts today as but a first step in developing a better understanding with the executive branch on tax treaty policies and in improving the process of negotiation and ratification of tax treaties which amend substantive tax laws and policies. It is our intention to pursue the issues that we have raised in further discussions with Ways and Means Committee members and the Treasury Department. We will make every effort to submit to you expeditiously any further recommendations we may have on these specific treaties since we understand that the Committee would like to schedule a final markup session on these treaties in mid-October.

Once again, thank you for your consideration of our views on this important matter.

Sincerely yours,

DAN ROSTENKOWSKI,
Chairman.

STATEMENT OF CHAIRMAN ROSTENKOWSKI BEFORE THE SENATE FOREIGN RELATIONS COMMITTEE ON TAX TREATIES AND PROTOCOLS

Mr. Chairman, I very much appreciate your invitation to submit a statement to the Committee in order to set forth the views of the House Committee on Ways and Means regarding the tax treaties and protocols presently under consideration by the Committee. The Honorable Barber B. Conable, Jr., ranking minority member of the Committee on Ways and Means, concurs with the views expressed herein and is submitting a supplemental statement as well.

The tax treaties before you today raise a number of important tax policy issues and may prove to be precedent-setting, particularly in regard to future tax treaties with developing countries. As such, these tax treaties deserve very thorough consideration by this Committee as well as by the tax-writing Committees of both Houses. Indeed, since these treaties were largely negotiated by the last Administration, I would hope that the Treasury Department will also carefully evaluate these documents and their implications for U.S. treaty policy now and in the future.

Let me state at the outset that I am not satisfied with the process that has evolved for negotiating and ratifying tax treaties. As you are well aware, the Treasury Department has determined, with little or no input from the legislative branch, those countries

with which to negotiate tax treaties and has proceeded to negotiate with those selected countries with virtually no oversight by Congress. The Senate is then presented with a "fait accompli" for ratification. Too often the treaty presented conflicts with or negates the legislative tax policies that we in the tax writing Committees and in Congress have established. Such conflicts are present in some of the treaties before you today.

Also, I am not enthusiastic about the rationale which leads us to adopt a tax treaty with a country just for the sake of having a treaty. Why is it in the interest of the United States to have tax treaties with tax haven countries? Why do we want a concessionary tax treaty with a developing country where there is virtually no U.S. investment to protect or one where there is little potential for double taxation? Today there are several treaties that fall into these categories.

It is unfortunate that a better understanding between the executive and legislative branches on an overall U.S. tax treaty policy has not been developed. The purpose of my testimony today is at least in part to lay the groundwork for a more consultative process in the future. I am hopeful that the bipartisan Congressional approach that we have undertaken today will encourage the Administration to work with us in that regard.

Let me assure you that I am most sensitive to your Constitutional role in this process. But I am also aware that it places a difficult burden on this committee for us to come before you at this stage in the process and say "Please don't report this tax treaty for ratification because it contravenes what we did in the Ways and Means Committee and in the Congress last year!" Yet that is the only recourse we, as a Committee having responsibility for our tax system, are left under the treaty process as it exists today.

Accordingly, it is our intention to pursue further discussions with the members of the Ways and Means Committee and the Treasury Department on these general problems we have with the treaty process and on the specific concerns set forth below with regard to some of these treaties. Clearly the effect in many cases has been to selectively amend legislatively adopted provisions in the Internal Revenue Code; as such the Ways and Means Committee has an unquestionable interest in these provisions. It is our hope that our views can be reconciled with regard to these treaties before you and that we can propose at an early date an improved process for dealing with tax treaties in the future.

With that introduction, let me turn first to the Canadian tax treaty as I realize it is viewed as the major treaty being considered today by this Committee. While the Canadian treaty raises a number of tax policy issues as are discussed in the materials prepared by the Joint Committee on Taxation staff, I will focus on only the most troublesome aspects from the Ways and Means Committee perspective.

Just last year, Ways and Means reported and the Congress approved legislation to tax the capital gains of foreign investors in U.S. real property. The bill applies to dispositions after June 18, 1980, and all appreciation on dispositions coming under the bill is taxable. The bill also specifically recognized the need to coordinate these rules with potentially conflicting tax treaty provisions. Thus, the bill provided that treaty rules would prevail until January 1, 1985; at that time, the new Code rules would override any conflicting treaty provision. This decision was reiterated and refined in the Economic Recovery Tax Act of 1981 where we provided, as a technical amendment, that for treaties signed between January 1, 1981, and January 1, 1985, the treaty rules would apply for a maximum period of two years. I frankly do not know how Congress could make the point any clearer that we intend these Code rules to apply and that this tax is not negotiable.

Nevertheless, we are now presented with a treaty that excludes certain property from the tax—trade or business property—and allows Canadians a step-up in basis to the effective date of the new treaty for purposes of computing taxable gain on their property. Is this just the first step in a series to come of undoing the Foreign Investment in U.S. Real Property Tax Act? If we are to extend such concessions to Canada, I cannot imagine that our other major treaty partners will not demand the same treatment. I note that the Philippines treaty for example overturns the 1980 Act in total. Yet, I cannot fathom what principles of tax equity or of sound treaty policy would justify selective application of these new rules to only the citizens of certain countries. Should we then reconsider the wisdom of these new provisions in whole or in part? Must we override each treaty by new legislation? Or should we ask you to reserve ratification?

This one provision of the Canadian treaty is illustrative of the types of problems many of these treaty provisions pose for the tax writing Committees of Congress. I find this situation a most vexing one, and I confess to my own uncertainty about the appropriate solution, given that such a narrow range of options is available by the time a tax treaty reaches the ratification stage.

The proposed Canadian treaty poses a number of other issues that will concern members of the Ways and Means Committee. The treaty permits certain types of discrimination by Canada against U.S. investors. Yet many members have long objected to and are seeking an end to the Canadian treatment of business expenses for U.S. advertising and broadcasting which discriminates against U.S. taxpayers. We should be ending such discrimination, not endorsing it. In fact, retaliatory legislation may be introduced and considered this Congress in response to Canadian tax discrimination against U.S. television broadcastors.

Further, the treaty's provisions contradict the Code rules and IRS regulations in regard to the foreign tax credit. The Code provides an overall limit on the credit while the treaty applies per-country limitations. The treaty also implies that the rules concerning what taxes are creditable will be amended for Canada. While similar foreign tax credit problems are present in other existing and proposed treaties as well, the Ways and Means Committee is presented with a most difficult situation when the solutions we develop in Committee on such complex questions as these are then selectively amended by various tax treaties. Often this result clearly stems from an attempt to avoid the legislative process. One might well ask what the law actually is on foreign tax credit issues, the answer is, "It depends!"

Finally, the Canadian treaty permits U.S. residents to deduct charitable contributions made to Canadian charities and vice versa. A similar provision is also contained in the proposed treaty with Israel. By determining the U.S. tax treatment of U.S. taxpayers, this provision goes beyond the typical scope of tax treaties, may prove precedent-setting for future treaties and certainly contravenes the provisions in the I.R.C.

As I mentioned earlier, these are not the only troublesome provisions of this treaty, but they are those that cause the most difficulty for the House Ways and Means Committee because they directly conflict with legislative decisions. At the very least, Treasury must offer a persuasive defense of the policies proposed here, and it is our intention to pursue these issues further with the Administration. If it proves necessary, we will submit recommendations to this Committee as expeditiously as possible.

A number of the other proposed treaties contain provisions that represent questionable tax policy from our perspective. I will describe these briefly. As I mentioned above, the Philippines treaty also contravenes the 1980 Act on foreign investors in U.S. real estate. I do not believe the Ways and Means Committee will find a total negation of the 1980 Act acceptable, and we would therefore recommend reserving on this provision of the Philippines treaty. As the Joint Committee on Taxation will discuss, this treaty also contains a major issue of treaty policy in regard to reciprocal exemption of international aircraft operations.

The Israeli treaty, in addition to the concern I expressed earlier about allowing the deduction for charitable contributions to Israeli organizations, contains a troublesome provision on forced loans; the treaty allows compulsory loans to the Israeli government to be treated as income taxes eligible for the U.S. foreign tax credit. When the loans are repaid, they are to be treated as a refund of Israeli taxes and the taxpayer's creditable foreign taxes thereby reduced. As a matter of fact, this amounts to a loan to Israel from the U.S. government. Some may argue that this provision should not be of great concern because Israel no longer requires forced loans. However, the inclusion of such provisions can and does prove precedent-setting. The Morocco treaty has a similar provision on compulsory loans and Morocco still requires such loans of U.S. businesses.

The treaty with Jamaica also contains a provision that would be most controversial in the Ways and Means Committee. A protocol to the treaty extends the North American exception under the foreign convention rules, an exception adopted just last year for U.S. possessions, Canada and Mexico, to include Jamaica. As a result, conventions in Jamaica would be treated as held in the U.S. for tax purposes. Once again the traditional scope of tax treaties is expanded by determining the U.S. tax treatment of U.S. taxpayers. The Jamaican treaty does contain certain provisions of importance to the U.S., such as broad anti-treaty shopping provisions and an agreement to negotiate mutual assistance provisions. Nevertheless, as a matter of tax policy, it is the tax-writing Committees and the Congress that should consider an expanded North American exception; further, if they did agree that an expansion was warranted, I am sure the members would logically consider including a broader group of other Carribean countries. Once again we are troubled by this type of expansion of the scope of typical treaty provisions and it places the tax-writing Committees in a most awkward position.

Earlier, I touched on our difficulties with overriding the foreign tax credit rules by treaty in the context of the Canadian treaty. The proposed protocol with Norway presents an even more controversial issue; the protocol provides a U.S. foreign tax credit for a special tax Norway imposes on submarine petroleum resources. There is little doubt in my mind that this tax would not be considered a creditable income tax in the absence of this provision. As you will recall, a similar provision was included in the UK protocol ratified in 1979 and it too proved controversial. In light of that experience perhaps, the protocol with Norway contains a per country limitation on the credit.

As a tax policy matter, these provisions I have just described in the proposed treaties with Canada, the Philippines, Israel, Morocco, Jamaica and Norway cause me the greatest concern, a concern that I believe the members of the Ways and Means Committee will share. Further, it is somewhat alarming that the Treasury Department is unable to provide us estimates of the expected revenue

losses involved as this information is clearly needed to assist us in evaluating their significance. At this time we would recommend, as noted above, that the provision in the Philippines treaty which overrides the act on foreign investors in U.S. real property be reserved. The other issues I have raised will require additional discussions with Treasury.

Let me turn now to the basic questions posed by tax treaties with developing countries, as illustrated by several of the treaties before you today. Technically all these tax treaties except those with Canada and Norway are with developing countries. As such, we are forced to address the question of what our tax treaty policy should be with developing countries and when it is in the best interest of the U.S. to have such tax treaties in force. As a general rule, I can see no benefit to this country from a tax treaty with a developing country unless (1) there is significant U.S. investment taking place in the treaty country and, as a result, double taxation is occurring that should be resolved by treaty; or, (2) it is determined that the treaty country is being used to abuse or evade U.S. laws, and thus it is in our interest to have strong exchange of information provisions, anti-treaty shopping rules and mutual assistance agreements for law enforcement purposes.

We must recognize at the outset that developing countries have economic interests that differ dramatically from our own. Accordingly, they will want very different provisions in a treaty, provisions that will conflict with the treaty policy positions Treasury has taken in the U.S. model treaty. Developing countries will be most reluctant to forego source-based taxation and as a result, any treaties negotiated with developing countries will vary significantly from the rules we typically insist upon in regard to limitations on source-based taxation. This fact of life is illustrated in the provisions of the proposed treaties with Argentina, Bangladesh, BVI, Egypt, Israel, Jamaica, Malta and Morocco, all of which permit more source-based taxation than typical in U.S. tax treaties.

In addition, such countries will typically want other tax concessions, such as the treatment of forced loans in the Israeli and Moroccan treaties, and they will urge "tax sparing" provisions that represent a very significant departure from U.S., and indeed international, tax policies. "Tax sparing" provisions in essence eliminate all tax, by both countries, on the profits and certain other types of income derived from investments in the treaty country. As an example of this potential problem, the Moroccan treaty is accompanied by an Exchange of Notes in which the U.S. agreed to resume discussions on incorporating a "tax sparing" credit at a later date.

We do not believe that the purpose of a tax treaty or of treaty provisions should be to eliminate all tax on certain activities producing income or profits, and we want to make that position clear to the Treasury Department as they consider future treaties with developing countries. This result is reached, though by a different route, in the proposed treaty with Argentina. Because Argentina has a strict territorial system, they do not tax any foreign source income of their residents. Accordingly, there is no possibility of double taxation from a U.S. tax on U.S. source income accruing to a resident of Argentina. The effect of the treaty then is to totally exempt such U.S. source income from tax. Many of our treaties provide that the U.S. will not forego tax unless the income is subject to tax by the treaty partner, and I do not understand why a similar provision has not been included here.

Frankly, given Argentina's territorial system one could question the need for this treaty at all. The treaty does not measure up under the general rule I have cited. It does not even contain an anti-treaty shopping provision. Finally, its provisions on source-based taxation are among the most egregious of all in this class of treaties. Accordingly, we would recommend that Treasury be required to negotiate these two additional provisions—an anti-treaty shopping provision and one to insure that U.S. tax will not be foregone unless tax is paid to Argentina.

The proposed treaties with Bangladesh and Malta are the other two that I question the need for. There is little if any U.S. investment in these countries and the anti-treaty shopping provision in the treaty with Malta is not as strong as it should be. I hope Treasury will not pursue treaties of this type in the future.

For similar reasons, the proposed treaty with Cyprus was high on my list for severe criticism. In addition, Cyprus is an undisguised tax haven country. I am most relieved that the Administration has withdrawn this treaty and the BVI treaty. Congress cannot countenance tax treaties with haven countries. In fact, I was prepared to recommend that notice of our intent to terminate be given to the BVI, and I would urge this Committee and the Treasury Department to seriously consider this option between now and June 30, 1982, when such notice must be given. The treaty with the Netherlands Antilles should be studied in the same light. I am most skeptical about the wisdom of retaining the present treaties we have with haven countries, and I surely see no reason to invite new treaties with other haven countries.

Finally, I would hope this Committee would place a sunset date on any of these treaties with developing countries that you decide to report for ratification. These treaties are among the first we have negotiated with countries of this type and as such we are breaking new ground. Congress should assure itself that these treaties are of limited duration so that we may reassess them within a reasonable time period. Further, the Administration should consult with this Committee and the tax writing Committees before undertaking further negotiations with other developing countries. We must jointly agree upon some ground rules before proceeding further down this path.

Before closing, I would like to raise some administrative issues that are also worthy of your consideration. Several of the proposed treaties contain broad and unprecedented delegations of authority to the competent authorities of the treaty countries, in essence to the IRS and the foreign tax administrators. The first permits the competent authorities to eliminate double taxation in cases not provided for in the treaty. Under a literal reading, this delegation could be interpreted to include double taxation arising from any source, even state unitary tax systems. Accordingly, the scope of this delegation of authority must be clarified and limited to include only noncontroversial technical matters, not items of substance. The competent authorities are also allowed to increase the dollar amounts specified in the treaties, but no standards are included to guide their actions in this regard. Once again, the intended scope of this delegation must be established.

Finally, there has been an ongoing debate between the House Ways and Means Committee and the Treasury Department concerning Congressional oversight of the administration of treaty provisions by the U.S. competent authority. The standard treaty secrecy clause has been interpreted by the IRS to limit the access to such information to persons directly engaged in the assessment or collection of taxes. IRS, therefore, has not permitted the General Accounting Office, acting as an agent of the Ways and Means Committee, to review competent authority case files.

The Treasury Department has agreed, as a matter of principle, that such access for oversight purposes should be assured. To accomplish this result, Treasury agreed to add the term "administration" to the exchange of information clause as new treaties are negotiated and to clarify the intent of this change with our treaty partners. Further, Treasury agreed to use the mutual agreement process to gain the agreement of our present treaty partners. Still, I am informed by the Joint Committee on Taxation staff that this matter is not clearly resolved in the treaties before you. Therefore, I would urge that the Committee express its support of the need for Congressional oversight in this area and its understanding that our treaty partners will permit GAO access for this purpose when acting as our agent.

In all of these administrative matters I believe, and I hope Treasury will agree, that Senate guidance on the question will be adequate to resolve the matter to the satisfaction of all parties.

With that Mr. Chairman I will conclude, and I thank you again for your invitation and your indulgence. We intend to consult further on the matters I have raised today with members of the Ways and Means Committee and with the Administration. We will make every effort to submit to you in an expeditious fashion any further recommendations we may have on these specific treaties once those consultations are completed.

STATEMENT OF THE HONORABLE BARBER B. CONABLE, JR., BEFORE THE SENATE FOREIGN RELATIONS COMMITTEE ON TAX TREATIES AND PROTOCOLS, SEPTEMBER 24, 1981

Mr. Chairman, I appreciate your invitation to appear before the Committee today to submit our position regarding the tax treaties and protocols now under consideration. I am in substantial agreement with the statement of my Chairman, Mr. Rostenkowski, and, therefore, I have only a few brief, supplementary remarks.

My primary interest is in the tax treaty and protocol process itself. In recent years, the treaty network of the United States has been substantially expanded. This has caused increasing concern on the part of many members of the Committee on Ways and Means because, as a result, the treaty process has become the equivalent of substantive tax legislation, an area clearly within this jurisdiction of our Committee. Mr. Rostenkowski has well highlighted the extent to which the treaties under consideration here contravene specific tax legislation which previously, and in some cases recently, has been approved by our Committee and the Congress. Therefore, my remarks will center on what I see as a disturbing trend in the treaty process.

This development is significant for several reasons. First, the potential of tax treaties for adversely modifying United States tax policy has been increased greatly. Second, the overall revenue impact of tax treaties is growing. Third, the potential for permitting foreign competitors of U.S. businesses to obtain treaty shopping benefits which afford them an unfair advantage over U.S. businesses is becoming greater. Finally, and most important, the expansion of the tax treaty network is, in effect transferring Congressional authority, in tax legislation, to Treasury officials who are responsible for negotiating the treaties. The trend looms even more importantly because there is little or no oversight conducted to monitor either the development or implementation of these treaties.

In view of these concerns, I believe two alternatives should be given serious consideration. First, attention could be given to the possibility of modifying the treaty

process to allow a greater role for the tax writing committees of the Congress. This could make it easier to avoid inconsistencies between provisions of the tax treaties and overall U.S. tax policy and to more clearly modify actual implementation of the treaties.

Second, attention also could be given to modifying the provisions of the internal revenue code which deal with tax treaty provisions in order to prevent treaties from overriding basic U.S. tax policy established through the Code.

Thank you for the opportunity to testify before your Committee today.

U.S. SENATE,
COMMITTEE ON FINANCE,
Washington, D.C., October 8, 1981.

Hon. CHARLES H. PERCY,
Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: Thank you for your gracious invitation to present my views to the Foreign Relations Committee on the tax treaties currently pending before it. I understand that Senator Long, the ranking minority member of the Finance Committee, may also respond to your invitation. Your invitation, and the similar invitation you extended to the Chairman and ranking minority member of the Ways and Means Committee, may serve as the catalyst for needed improvement in the process by which the Senate renders its advice and consent to tax treaties.

THE TREATY PROCESS

In implementing their objectives, tax treaties inevitably modify the tax rules and policies established by the Congress and embodied in the Internal Revenue Code. Indeed, the Code itself recognizes this in providing in sections 894 and 7852(d) that treaty provisions may override statutory provisions.

However, the displacement of the policies established in the Code by the sometimes conflicting policies established through the tax treaty process gives me, as a member who devotes considerable time and energy to the tax legislative process, cause for some concern. Particularly as the United States tax treaty network grows and as tax treaties become more detailed and complex, this concern regarding the possible conflicts between the tax legislative process and the tax treaty process can only increase.

Your solicitation of the involvement of the tax-legislation-writing committees in the tax treaty process is a helpful first step in allaying those concerns. Precisely because a number of the pending treaties present possible conflicts with tax issues either presently of concern to the members of the Finance Committee or recently the subject of carefully considered tax legislation, your invitation in this instance is most welcome. Because all 20 members of the Finance Committee have an interest in minimizing the conflicts between the tax legislative process and the tax treaty process, however, and because this submission cannot purport to reflect all the members' views, I have suggested to the other members that they may wish to communicate their views to you separately.

Equally important, further initiatives to improve the coordination of the tax legislative process with the tax treaty process will come, I hope, from the Department of Treasury. Such initiatives should include, at a minimum, consultation with the chairmen of the Foreign Relations Committee and the Finance and Ways and Means Committees at several stages of the treaty negotiation process.

First, before negotiations are commenced, I suggest that the Treasury notify Congress regarding the reasons for seeking a new tax treaty. In the case of a protocol to an existing treaty or a treaty to replace an existing treaty, such notification ought to include an explanation of the specific provisions of the extant treaty and U.S. or foreign law, and an explanation of any changed economic conditions, which together may give rise to the need for a revised treaty. Further, the Treasury might provide Congress a description of the goals hoped to be achieved through the adoption of a new treaty or protocol. For treaties with nations with whom we have no existing tax treaty such notification should include a description of the problems U.S. taxpayers may experience in commercial and other contacts with the other nation's taxing jurisdiction, the commercial activity that might be fostered by such a treaty, and what interests of the U.S. might be served by promoting trade with or investment between the U.S. and the other nation. In the present group of treaties, some early explanation of the goals to be achieved through tax treaties with developing countries with whom U.S. taxpayers have minimal commercial contacts would have cleared up a number of questions.

Second, once negotiations have commenced, periodic consultation with Congress regarding progress, problems, and the choices among options in the treaty negotiation process could facilitate the process of later Senate ratification. I understand that such consultation is often sought in the case of treaties outside of the tax area. While we all wish not to "politicize" every issue under negotiation some level of contact would be desirable. The need for Senate recommendations, clarifications, or even possible reservations regarding some of the pending treaties could have been obviated by even the most cursory level of communication between Congress and the Treasury during the negotiation stage.

Third, the Treasury should find it useful during the tax legislative process itself, to keep the tax-writing committees abreast of the impact of pending legislation on ongoing treaty negotiations. Recent legislative decisions in the real property and foreign convention areas, for instance, might have been better informed had the decision-makers been fully aware of the status and substance of ongoing treaty negotiations, particularly those with Canada. Coordination between treaty negotiators and those involved in the tax legislative process could avoid the development of conflicting provisions.

REVENUE EFFECT

For the Senate to give its informed advice and consent to these treaties, particularly in these days when budget questions loom large on every front, it will be necessary to obtain a more-than-speculative indication of the revenue impact of these treaties. Especially where a treaty or protocol deems a foreign tax creditable against U.S. tax which, under the Code, would not be creditable, some more-than-negligible loss to the Treasury may be involved. I recommend, therefore, that the Foreign Relations Committee withhold further action on any of the treaties until detailed revenue estimates are supplied regarding each of the pending treaties.

FOREIGN INVESTMENT IN U.S. REAL PROPERTY

As part of the Omnibus Reconciliation Act of 1980, Congress enacted the Foreign Investment in U.S. Real Property Tax Act (FIRPTA), a statute designed to tax the disposition of direct or indirect investments in U.S. real property by nonresident aliens and foreign corporations. The members of the Finance Committee took a great deal of interest in developing this legislation in response to popular insistence that foreign investment in U.S. real property bear at least the same tax burdens as domestic investment. It was not without some difficulty that these concerns were balanced against desires not to discourage foreign investment in the United States for unwarranted reasons. Several of the pending treaties, however, seem to disrupt the balance struck by that legislation.

One such disruption is the application of the nondiscrimination article of several treaties. FIRPTA clearly indicated that the statute would override existing treaties, on this and any other conflicting points. It was expected that new treaties would specifically state whether or not FIRPTA overrode conflicting treaty provisions; many members expected that new treaties would specifically state that FIRPTA always overrode possibly conflicting treaty provisions. Several treaties do not make such a statement. I recommend, therefore, that approval of the treaties be subject to the explicit understanding that the treaty nondiscrimination provisions do not override FIRPTA. This is, we understand, consistent with Treasury's interpretation.

Several treaties cede substantial portions of the taxing jurisdiction asserted by FIRPTA. Both the Canadian and the Argentine treaties alter the statutory method for determining whether an entity is a U.S. real property holding organization by excluding trade or business property from real property. Second, a number of the treaties treat partnerships, trusts, and estates as entities rather than conduits for the purposes of determining whether and when a nonresident alien will be treated as making a taxable disposition of a U.S. real property interest.

Third, the Canadian treaty includes a provision which prevents either country from taxing gains on the sale of real property holding companies by residents of the other unless the other country would tax foreign investors on their real property holding companies in comparable circumstances. Fourth, the Canadian treaty uses a different standard than that provided by FIRPTA for determining whether a Canadian shareholder of a real property holding organization is taxed on the sale of his interest.

Each of these items appears to run contrary to our intent in enacting FIRPTA and, if accepted, would constitute significant concessions of U.S. taxing jurisdiction. Because the combined effect of these concessions may be to undermine the thrust and efficacy of FIRPTA, particularly in the case of the Canadian treaty, I recommend that a full explanation of the rationale for these concessions be provided before the committee approves these treaties.

It is understood that many of these items which today constitute concessions of U.S. taxing jurisdiction, may have been less significant if considered prior to FIRPTA's enactment. In light of FIRPTA, therefore, and in light of considerable sentiment that the taxes imposed by FIRPTA are not to be bargained away, the Treasury may wish to approach the Canadians to renegotiate these points.

The Canadian treaty also overrides FIRPTA in permitting a step-up in basis for Canadian-owned U.S. real property to the effective date of the new treaty. It is understood that this provision is designed to avoid a substantial number of sales and repurchases of property prior to the effective date of the new treaty. Generally, the gain on such sales would be protected from taxation under the present treaty. While this provision may be appropriate in Canada's case because of this unique provision in the existing treaty, we suggest that it will not be considered appropriate in future treaties with Canada or other countries.

The Philippine treaty completely overrides the FIRPTA provisions regarding the taxation of the disposition of an interest in a U.S. real property holding organization. I recognize that this provision was negotiated long before the enactment of FIRPTA. Further, the lack of any anti-treaty shopping

provision in the Philippine treaty could permit the abuse of the FIRPTA override by third country nationals. For these reasons I recommend that the Senate specifically reserve its consent to the Philippine treaty on this issue.

EXPANDED DEDUCTION FOR U.S. TAXPAYERS

Historically, the purposes for entering tax treaties have been the elimination of double taxation and the facilitation of administrative cooperation. Three treaties (Canada, Israel, and Jamaica) go beyond this circumscribed realm to grant to U.S. taxpayers deductions they would not enjoy in the treaty's absence. The Canadian and Israeli treaties permit U.S. taxpayers to take a deduction for contributions to a charitable organization in the other country. The Canadian treaty and the Jamaican protocol contain provisions permitting a U.S. person to deduct the expenses of attending a business convention in those countries.

I find these provisions particularly troubling. First, the granting of new deductions to U.S. taxpayers, even where the other country's taxpayers receive similar deductions, does not seem to be an appropriate treaty function. Particularly, as in the extension of the convention deduction to Jamaica, where Congress specified precisely which of our North American neighbors were to be included within the convention deduction rule's scope, it is inappropriate for a treaty to override Congress's specific intent. Because some Finance Committee members have expressed serious concern over this provision, I urge you to examine the Jamaican protocol with great care. Congress itself, of course, concluded that this deduction is appropriate for conventions in Canada. Had it not, the Canadian treaty provision would be similarly troublesome.

Second, there is concern whether the treaty process should be used to create support, on a selective basis, for foreign charities. While the provision in the Canadian treaty, similar to a provision in our existing treaty, may be justified by the special relationship we enjoy with that neighbor, the possibility that we could be perceived as discriminating among the charities of the world, and the effect that establishing this precedent may have on negotiations with other nations, should give us reason to question these provisions.

FOREIGN TAX CREDIT

The question of what foreign taxes are creditable against U.S. tax has, for several years now, been the subject of substantial controversy. Several versions of the section 901 regulations that have been proposed have been subjected to substantial criticism by affected taxpayers.

Some taxpayers maintain that the regulations adopt an overly restrictive interpretation of the statute so that the credit issue may be preserved for treaty negotiations. Taxpayers also complain that requests for IRS rulings receive no action and suspect similar motives to explain the IRS inaction.
